The Club Puerto Riqueno is a center for a wide variety of social and cultural events. Under the direction of President Manuel Oritz, the celebration of such holidays as Three Kings Day, Constitution Day, and Discovery Day preserve the traditions of the Emerald Island of Puerto Rico in the Sixth District of Connecticut.

Hispanic culture has had an impact on all of us. Whether in the older communities of the Southwest, or the newer ones of the Northeast, it has enriched our lives with its unique, music, colorful traditions, and warm and vital community life. In a nation whose origins and strength are rooted in ethnic diversity, America's Hispanic citizens are rightfully honored this week for their continuing contributions to our country.●

THE FIRST NATIONAL BANK OF CLARKSVILLE, TENN., A PROUD PAST AND A SOLID FUTURE

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. SUNDQUIST. Mr. Speaker, on March 9, 1982, ground breaking ceremonies were held for the historic First National Bank of Clarksville, Tenn. On September 6, 1983, the new facility opened at One Public Square where it had been located 118 years before, but the circumstances were markedly different. In 1865, the bank occupied only a few rooms in a building; now it has its own magnificent structure as a centerpiece for the city's historic downtown—a fitting testimony to the bank's proud past and its bright future. I think it would be appropriate on this occasion to insert a brief history of the First National Bank of Clarksville in the CONGRESSIONAL RECORD for my colleagues and fellow citizens. This history will then be placed in the cornerstone of the new bank inside a time capsule to be opened in 100 years, so our posterity will also be able to appreciate the rich history of this fine American bank.

On November 1, 1864, scarcely 7 months after the cessation of hostilities of the Civil War, a group of successful local businessmen pooled their capital and initiative, and founded the First National Bank of Clarksville. Starting with $50,000 in deposits, the bank opened its doors in a small building on Public Square. Sterling Beaumont was president and W. P. Hume was cashier.

The bank survived and even thrived despite its dependence on "King Tobacco". It moved into its own building on the corner of Franklin and Second Streets, and in the next 7 years, it acquired such newfangled devices as typewriters and electric lightbulbs.

During World War I, the bank collected money through stock dividends to send to the Red Cross War Fund. During the Great Depression, the bank carried desperate farmers on credit for the major part of each year and bank employees took cuts in pay.

In searching new ways to alleviate the situation, Mr. Bailey, the young charismatic successor to Mr. Drane, sought the advice of a successful farmer named Peter Barker who suggested: "Four crops for four seasons; tobacco to sell in late winter, lambs to market in spring, wheat to harvest in July, and cattle in the fall." Soon thereafter, Mr. Bailey led the bank on a speculative and innovative plan to do for the whole 14-county area of the bank's influence, what Mr. Barker had done for one farm.

The program met with skepticism, however, the bank took a group of 63 farmers to a nearby Kentucky county to observe lamb and wool operations, realizing $1 million a year. It brought 2,000 crossbred yearling ewes from Montana, and invited farmers from miles around to buy. Nearly $20,000 was loaned in the first few days and within 5 years, 30,000 sheep were grazing in Montgomery County, Tenn. At the same time, several farms were set up as demonstration stock farms, and the bank encouraged development of other livestock businesses in the area.

In years since, First National Bank of Clarksville has continued to work closely with the area's farmers, but it has also responded to the rapid changes in Clarksville brought on by industrialization and the building of Fort Campbell. It also supported B. F. Goodrich Co., the city's first satellite plant of a large industrial concern after Tennessee Valley Authority made cheap electricity possible.

When Mr. Bailey died in 1959, his was a hard act to follow, but his successor, Edward Norman did an excellent job. Mr. Norman was a popular, good-humored man who pushed the bank further into the modern age. He was killed in an automobile accident on May 20, 1972, and was succeeded the next month by Dewey Morris.

With substantial growth and improved earnings, branches were opened at St. Bethlehem and Tradewinds North, and First National

became the first local bank to introduce 24-hour electronic banking. With Mr. Morris' guidance, a one-bank holding company, called First National Financial Corp., was formed to permit a more comprehensive financial service. By the end of 1982, First National's total assets had grown to $140 million. The board of directors, soon after, authorized the purchase of the 3.82 acres at One Public Square to build the new main office facility and drive-in branch.

Mr. James C. Cotham III became the new president on September 13, 1983, and the future of the bank truly does look bright with 118 years of innovative experience behind it.●

HISPANICS: AN INTEGRAL PART OF AMERICAN SOCIETY

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. ORTIZ. Mr. Speaker, in 1565, Spanish forces founded the first permanent European colony in America at Saint Augustin, Fla. Since that time, Hispanics have not ceased to open new frontiers, expand existing parameters, and conquer the "Terra Incognita" of modern American society. Four hundred years later, Hispanics like Francisco Jose Ayala have pioneered studies in genetics and evolution; Luis W. Alvarez, 1968 Nobel Prize winner for physics, has contributed significant data to the study of subatomic particles. Innovators in the Arts—film, dance, music, and literature—have bridged racial schisms. Trailblazers in law and politics such as Judge Harold Medina, New Mexico Senator Joseph Montoya, Congressman HENRY B. GONZALEZ of Texas, Governor Raul Castro of Arizona, and Mayor Henry Cisneros of San Antonio, have erupted into national consciousness.

Those 400 years encompass a spectrum of diversity, growth and progress. A significant watershed for Hispanics was World War II which marked a sharp reversal in the course of Hispanic history. The Depression had left in its wake population decline, devastated communities and shattered dreams; the war brought population growth, resurgent communities and rising expectations. When the military forces called for recruits, Hispanics responded in great numbers and served with distinction. Some 350,000 served and won 17 Medals of Honor, including 5 of the 14 awarded to Texans. The war also brought industrial expansion, further aggravating the labor shortage caused by the growth of the Armed Forces. Thus, Hispanics managed to gain entry to jobs and industries that had been virtually closed to them in the past. In 1977, there were 219,355 firms owned by persons of Spanish origin with gross receipts of $10,417 million. Prior to the devastating effects of the Peso Devaluation, 1,617 businesses with gross receipts amounting to $81,671 were owned by Hispanics in the Brownsville-Harlingen-San Benito, Tex., area; 1,609 with receipts of $54,995 in Corpus Christi, Tex. Kleberg County, Tex., maintained 281 Hispanic-owned businesses and brought in $9,467 in revenues. In 1981, there were approximately 5.1 million employed Hispanics in the United States. More than 57 percent of the working age population was employed, very close to the 59 percent for all workers. While employed Hispanics tended to be concentrated in those occupations which are characterized by low pay and low skill requirements, there has been marked progress shown by changes in job concentrations, reflecting to some extent changes in the economy of the Southwest. Since 1940, the area has experienced a manufacturing boom and rapid growth in such areas as government, product distribution, consumer-oriented activities and professional services, and the number of agricultural jobs has significantly declined.

Drawing on the century-long foundation of Hispanic experience in America, the Hispanic of the 1980's has become a dynamic force for social change. The impetus is not monolithic but is rather an amalgram of individuals and organizations that share a sense of pride in their ethnicity, a dedication to the enhancement and preservation of a precious cultural heritage, a desire to improve the Hispanic socioeconomic position and a commitment to making constructive changes within the framework of American society. A crucial focus is politics. It is vital that Hispanics work together within the American democratic system to increase the number of Hispanic candidates, to convince non-Hispanics to commit themselves to the needs of the Hispanic community and to conduct broad-scale voter registration drives. Working together, we can achieve an equilibrium of purpose and create an atmosphere of economic growth and political respect beneficial to all Americans.●

FAIR EMPLOYMENT IN CONGRESS ACT

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. EDWARDS of California. Mr. Speaker, I am introducing today legislation to bring congressional employees under the protection of the body of laws Congress has enacted over the years on behalf of most working Americans. I am pleased to be joined in this effort by my distinguished colleague from Colorado, Congresswoman PAT SCHROEDER, who has done so much during her tenure here in Congress to encourage fair employment practices on Capitol Hill.

This proposal is the companion bill to S. 1588, legislation introduced by the Senator from Vermont, Senator LEAHY, who has also been in the forefront of efforts to bring employment equity to congressional employees.

The Civil Service Reform Act, the Civil Rights Act of 1964, the Equal Employment Opportunity Act of 1972, the Age Discrimination in Employment Act of 1967, the Equal Pay Act, and the Occupational Safety and Health Act—taken together these laws establish civil, social, physical, and financial rights and standards for most working Americans. However, in drafting these important statutes, Congress has seen fit to exempt itself from them all.

The result has been continued inequities in the workplace for congressional employees, accompanied by embarrassing but accurate charges that the Congress is "the Last Plantation," or as the Washington Post titled us recently, a "Citadel of Privilege." It is long past time to right these inequities.

Our congressional employees are some of the brightest, most capable, and industrious workers in the Nation. Without them, the work of the legislative branch would come to a standstill. Surely, they should be entitled to the same protections under the law that are provided to other workers. Congress should act now to remove the arbitrary and illogical exemptions it has provided for itself in our Nation's employment laws. I hope the legislation I am introducing will lead to achievement of that goal.

The text of the bill follows:

H.R. 3905

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the purpose of this Act to eliminate the exemption for the Congress or for the Federal Government, as the case may be, in the provisions of Federal law described in this Act.

EQUAL EMPLOYMENT OPPORTUNITY

SEC. 2. Section 717(a) of the Civil Rights Act of 1964 is amended by striking out "in those units of the legislative and judicial branches of the Federal Government having positions in the competitive service" and inserting in lieu thereof "in all units of the legislative branch of the Federal Government, and in those units of the judicial branch of the Federal Government having positions in the competitive service".

LABOR-MANAGEMENT RELATIONS

SEC. 3. Paragraph (3) of section 7103 of title 5, United States Code, is amended by inserting ", any unit of the legislative branch" before ", the Library of Congress".

FAIR LABOR STANDARDS; EQUAL PAY

SEC. 4. Section 3(e)(2)(A)(iii) of the Fair Labor Standards Act of 1938 is amended to read as follows:

"(iii) in any unit of the legislative branch of the Government, or in any unit of the judicial branch of the Government which has positions in the competitive service,".

AGE DISCRIMINATION IN EMPLOYMENT

SEC. 5. The second sentence of section 11 (b) of the Age Discrimination in Employment Act of 1967 is amended by inserting before the period a comma and the following: "except the term 'employer' does include the United States for each unit of the legislative branch of the Federal Government".

OCCUPATIONAL SAFETY AND HEALTH

SEC. 6. (a) Section 3(5) of the Occupational Safety and Health Act of 1970 is amended by inserting after "United States" the following: "(except the term 'employer' does include the United States for each unit of the legislative branch of the Federal Government)".

(b) Section 3(6) of such Act is amended by inserting before the period the following: ", and the employees of any unit of the legislative branch of the Federal Government shall be deemed to be employed in the business affecting commerce for the purpose of this Act".

EFFECTIVE DATE

SEC. 7. The amendments made by this Act shall become effective thirty days after the date of enactment of this Act.

SHORT TITLE

SEC. 8. This Act may be cited as the "Fair Employment in Congress Act".●

STRASBURG: 250 YEARS OF PRESERVATION AND PROGRESS

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. WALKER. Mr. Speaker, on Sunday, September 11, I had the privilege of participating in one of many special events being held during 1983 to commemorate the 250th Anniversary of the borough of Strasburg, Pa. Many of our colleagues who have traveled to the 16th District of Pennsylvania will undoubtedly remember Strasburg as one of the most picturesque and charming towns in the heart of Pennsylvania Dutch country as well as the home of the famed Strasburg Railroad. In honor of this historic occasion, I would like to take this opportunity to insert the following article written by Mary Rachel Hoover entitled, "Strasburg: 250 Years of Preservation and Progress."

STRASBURG: 250 YEARS OF PRESERVATION AND PROGRESS

"Some changes have come since the years long ago,
But the trees are still green and the creeks calmly flow,
The bumble-bees hum and the chimney birds trill,
In the little old town on the hill."

So wrote the poet-professor, John L. Shroy, in 1908 in a song of tribute to his native town of Strasburg.

These lines aptly described the small village at the beginning of the Twentieth Century, but such was not always the case:

This small town had its beginnings as a colonial settlement along the Indian trail known as Minqua's Path. By 1714 this path was on record as the Old Conestoga Road, a public road which was part of the link between Philadelphia and Lancaster. Heavy wagon traffic through the Village in the latter half of the 1700's prompted the appearance of more than a few Ordinaries or Public Houses. These taverns and the general appearance and behaviour of most of the people who frequented them led to the name, Hell's Hole, for the community at this time.

However, the completion of the Lancaster Turnpike in 1795 and the arrival of a clergyman in town led to change and a new era for Strasburg (by this time this name was well established), an era in which the town now became known as a center of cultural, educational and religious growth. This is a reputation the town still strives to maintain.

And now, this Community of 1,999 inhabitants, a figure which has doubled in the last fifty years, is gearing up for the Celebration of the 250th Anniversary of its settlement as a village in 1733. A real spur and added cause for celebration came in March of this year with the inclusion of the 2-mile Historic District in the National Register of Historic Places.

This celebration, which will be observed in various ways throughout the year, will have the week-end of September 9, 10, 11 as the focal time for its activities and there will be a Birthday Ball, December 3rd, to climax the festivities.

MARY RACHEL HOOVER.●

HISPANIC HERITAGE WEEK

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. SMITH of Florida. Mr. Speaker, I am pleased to join my colleagues in celebrating Hispanic Heritage Week.

The three county region of south Florida is home for 840,000 Hispanics, some of whom are my constituents. The long-established Cuban American community has made a positive impact on the region. Cuban Americans, while only 6 percent of the total Hispanic population in the United States, rank highest in income and educational levels. Their businesses—ranging from million dollar firms to one-person operations—have improved the south Florida economy and provided thousands of jobs. They serve as shining examples to thousands who continue to believe that the United States remains the land of opportunity.

In recent years, non-Cuban Hispanics from Central and South America and the Caribbean also have moved into south Florida. They have contributed to the cultural diversity that characterizes the United States, and they have helped make south Florida the new international center in the Southeast. The cosmopolitan nature of the area has led to its being a focal point of increased trade and tourism with the rest of the Western Hemisphere. Let me cite just one example. Exports from south Florida to Latin America are averaging 28 percent growth annually—one of the fastest growth rates of Latin America export trade of any region in the country. This is good for south Florida and good for the United States.

Hispanic Americans in south Florida are Americans like the rest of us with one important distinction—they are Americans by choice. As Americans, they pay the same taxes and serve in the same Armed Forces as the rest of the country. They participate actively in public affairs and fulfill willingly their obligations to the community and their new country. Fiercely proud of their language, culture, and traditions, they give to the United States as much as they receive. Consequently, all of us are enriched by their presence.●

WHITE HOUSE CONFERENCE ON PRODUCTIVITY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. LAFALCE. Mr. Speaker, on September 22 and 23 in Washington, D.C., President Reagan and Vice President BUSH will speak to approximately 1,000 participants in what will be known as the White House Conference on Productivity.

This is an event that I have been trying to bring about for years—a focused attention by the President and the Vice President of the United States, by the leaders of American industry and labor, and indeed, by all Americans, to the importance of productivity in our society.

Although I have worked on this issue since I first came to Congress in 1975, it was in October of last year that I was able to obtain passage of my bill that mandated a White House Conference on Productivity and, therefore, mandated that the President and the Vice President of the United States give focused attention to it.

I actively pursued this legislation for many reasons, but primarily because I felt that it is only the White House that can truly raise the consciousness of the American people to the importance of productivity, and since the White House historically has not attempted to do this, I believed the only way I could achieve this result would be to mandate it by law. Hence, the White House Conference approach.

The session that will take place on the 22d and 23d is the culmination of preparatory conferences which were also mandated by my bill and that have been held throughout the entire United States—for example, in Durham, N.C., where a great discussion took place on capital investment as a means of promoting productivity; in St. Louis, Mo., where the import of human resources in enhancing productivity was propounded; in San Diego, Calif., where the essential and appropriate role of the Government in promoting productivity was pursued; and in Pittsburgh, Pa., where the many and various private sector initiatives from all over the United States were examined. The agenda and subject matter of the plenary session of the Conference will in large part be made up of the deliberations, analyses, and recommendations of the various preparatory conferences.

On a personal note, it is also going to be a pleasure for me to share the platform with President Reagan on September 22 and, as the author of the legislation creating the Conference, to speak briefly on the importance of productivity and the need for raising the consciousness of America about the need to place improved productivity on the highest scale of our national agenda.

We do this not simply so that we can have a better set of productivity figures to toss about. We do this because the only way we can insure a future for our children better than our past is to improve our productivity. If we remain stagnant, our economy will not only remain stagnant, but it will decrease. Our standard of living will not only remain stagnant, but it will decrease. This is true because we live in a world with an integrated global economy and to stand still when others are forging ahead is to fall behind.

I am well aware that conferences come and conference go. I am well aware that, oftentimes, conferences are forgotten about the day after. I hope that this will not be the case this time. I will do my best to make sure that is not the case. Part of the legislation I drafted requires that a report be made regarding the findings of the conference 120 days after its conclusion, and then that the President submit his recommendation for the administrative actions and legislation necessary to implement the recommendations in the report with which he concurs. The President will have 120 days to submit to Congress those recommendations. Then it will be the Congress turn to do what it can to change our laws to enhance productivity, although it must be emphasized that productivity is something that must be worked on not just by government officials, but by industry, by labor, by management, by academia, by the American consumer—by everyone who has a stake in our economy.

It is my fervent hope that the focused attention that the White House Conference on Productivity will bring to this issue will help enhance our endeavor. To whatever extent it does, the effort that has been put forth will be most worthwhile.●

WHY SYRIA WILL NOT LEAVE LEBANON

HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. DANIEL B. CRANE. Mr. Speaker, I would like to share with my colleagues an article concerning the situation in Lebanon written by Daniel K. Bloomfield, M.D., the Dean of the College of Medicine at the University of Illinois. Dr. Bloomfield, a widely respected authority of Middle Eastern affairs, states that the reluctance of Syria to leave Lebanon is directly related to the basic desire of the Syrians and much of the Arab world to give Israel no respite from their 35 years of war against her. Those who would believe that the Palestinian refugee problem is central to the Middle East conflict, says Dr. Bloomfield, are deluded.

The text of the article follows:

WHY SYRIA WILL NOT LEAVE LEBANON

(By Daniel K. Bloomfield)

The current refusal or delay by Syria in refusing to leave Lebanon helps clarify Syria's long range foreign policy objectives which are: (1) the obliteration of the State of Israel, and (2) the establishment of Syrian hegemony over "greater Syria". The latter goal includes at a minimum the territory of Lebanon and probably a great deal more, and both goals are in harmony with one another. Should Syria ever conquer Jordan, Israel, and the disputed territories of Judea, Samaria (the West Bank of the Jordan River) and Gaza there would be an abrupt end to any talk of either a Jewish or a Palestinian homeland. The Syrians have used and will continue to use the PLO and Palestinian nationalism so long as both seek to destroy Israel, but they will have no compunctions whatsoever in destroying any person or group, Palestinian Arabs and PLO included, which advocates accommodation with Israel.

In essence and in fact, the Syrians along with most of the Arab world, have been at war with Israel for thirty five years. It has been a single and continuous war and while many observers prefer to think of Israel as having six wars with its Arab neighbors, such conclusions are quite incorrect. Only a treaty of peace can end a war. Except for Egypt, and hopefully for Lebanon the remainder of the Arab world remains at war with Israel in a campaign which the Arabs began in 1948 and which the Arab leadership refuses to end. Syria absolutely and unequivocally refuses even to sit at the same negotiating table with Israel. For all the benefits of third party shuttle diplomacy, in the long run it has been counterproductive by allowing total obduracy on the part of states such as Syria for more than one third of a century.

The United States has tried to play an "evenhanded" role in the conflict. Evenhandedness is a misleading term in middle eastern politics because it only means a balanced position between the existence and the extinction of Israel. The continuous Arab assault on the State of Israel, physically, economically and diplomatically for 35 years is what the entire Arab-Israel conflict is all about. The Palestinian Arab refugees are a convenient and distracting side show that must ultimately be dealt with, but the present Syrian truculence clearly demonstrates that Israel's jugular is the real target and the Arab refugees be damned. United States foreign policy has been inconsistent because it has been so difficult for us to grapple with the realities of the region. We are looking for peace and the security of all states in the region. The Syrians are simply not looking for peace so long as Israel exists, not now and probably not in the foreseeable future. Syria opposes the Lebanese settlement worked out by the U.S., Israel and Lebanon because it affords a measure of increased security for Israel and amounts to an end of the state of belligerency between Lebanon and Israel.

Furthermore, in quarrelling with Yasser Arafat, Syria has effectively demonstrated again that except for lip service and propaganda purposes, it cares little for the Palestinian cause. Recent evidence suggests that emerging within the PLO were voices of moderation that appeared willing to seek a settlement with the Israelis. The Reagan peace plan of September 1982 was an open invitation to any truly modrate elements within the Arab ranks to come forward. Arafat and Hussein engaged in an intricate dialogue that represented their first step towards rapprochement since the bloody 1970 Jordanian-PLO war which chased the PLO out of Jordan to Lebanon. But all of this was too much for Syria and for the fanatical hate mongers of the Arab world. The recent assassination of the only member of the PLO national council who was bold enough to publicly call for an effort towards an accommodation with Israel was a sign that the hate and vengeance spewing forth from Damascus and elsewhere would strive to frustrate any effort to make peace with Israel. It is "death to the peacemakers" and the Palestinian Arab refugees remain today as they have since 1948, the unwilling hostages of an endless vendetta against the Jewish state.

Syria can take its intrasignent stand because it is backed by Moscow and funded by Saudi Arabia. The Russians will continue to work for political control of middle eastern oil. The Saudis, despite their links to and dependency on the United States for their ultimate security have been and remain viciously anti-Israel. They continue to pay protection blackmail to any government or group that has the potential to upset the Saudi apple cart on the Arabian peninsula. So president Assad of Syria can tell our Secretary of State, Mr. Schultz, to bury his peace plans for Lebanon. The end result of this sorry state of affairs is that Syria and its PLO pawns will continue to occupy the northern and eastern parts of Lebanon, Israel will draw back to a less exposed position in the southern part of Lebanon but one which will protect its cities in the Galilee, the U.S. will have to bolster the multinational force in the center of Lebanon and the Palestinian Arab refugees will remain

(as the Arab countries and particularly Syria want them to remain) a festering boil of purulent rancor, crowded into unsightly camps and nourished daily on the hatred of Israel. It also means that to save Lebanon, more U.S. troops will be needed to fill the gaps left by the partial Israeli withdrawal, where they will be targets for the countless fanatics that are endemic to the area. More United States soldiers will die before Syria joins the ranks of civilized countries and is willing to negotiate an end to its pointless and endless war.●

WORLD PEACE DAY

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. PATTERSON. Mr. Speaker, there can be no greater cause in the world today than universal peace. News of ethnic, racial, religious, economic, and national animosities fills our media. Death, destruction, and terror leave no people untouched and no country unscathed.

Those who wage the wars, hoping to gain by promoting one group of ideology over all places, seem plentiful. It is the peacemakers, those who work for and promote the peaceful resolution of the world's manifold injustices, who are scarce.

The Baha'i is one such group who promotes the cause of unity and peace. In their communities all over the globe, Baha'is are working to build a foundation of understanding and harmony between people of all races, classes, colors, and creeds.

It was in such a spirit that the Baha'is of the United States established World Peace Day in 1958, 25 years ago. Since then, the Baha'is have endeavored to make World Peace Day a celebration for all, not only a Baha'i observance.

In the over 5,000 localities where Baha'is live in California, World Peace Day—the third Sunday in September—has taken on many forms. Peace fairs, interfaith meetings, seminars, service projects, entertainment programs, and athletic events commemorate the original Baha'i idea and ideal of world peace throughout our State. World Peace Day has become known as a day when our common humanity can be emphasized.

Mr. Speaker, it is with this sense of deep concern I share over world peace with Baha'is of California that I endorse the World Peace Day celebration and thank the Baha'is for their many efforts to achieve world harmony.●

"ANATOLY SHCHARANSKY DAY" IN NEW YORK

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. BIAGGI. Mr. Speaker, in my home State of New York, today has been officially proclaimed Anatoly Shcharansky Day by Governor Mario Cuomo. It is a day to mark the halfway point in Mr. Shcharansky's 13 year sentence as a Soviet Prisoner of Conscience.

This day is especially significant because under Soviet law, prisoners who have served at least half their sentence can be released for medical reasons. Mr. Shcharansky, who has been reported to be in very poor health, is eligible for such an early release. In fact, when responding earlier this year to an appeal from Georges Marchais, General Secretary of the Communist Party of France, Soviet leader Yuri Andropov confirmed that persons, like Mr. Shcharansky, could be freed early in the Soviet Union.

On the occasion of Anatoly Shcharansky Day I join New Yorkers and millions of freedom loving people throughout the world in calling on the Soviet Union to abide by their own laws and release Mr. Shcharansky, and allow him to emigrate to Israel and join his wife, Avital. Simply put, Mr. Shcharansky has suffered enough, for no just reason.

History tells us that Mr. Shcharansky, a Soviet Jewish activist was arrested on March 15, 1977, on trumped up charges of treason, anti-Soviet agitation and progaganda. He was sentenced to 3 years in prison and 10 years in a strict regime labor camp.

Those of us who have closely followed Anatoly Shcharansky's case know, however, that he was not arrested for treason, or anything even remotely resembling such a crime. He was arrested because he sought, with his wife, to leave the Soviet Union so he cold live in a country that would allow him basic human rights, such as the freedom of religious and cultural expression—rights he could never expect to have in the Soviet Union.

In fact, the Shcharanskys had been married only 1 day when the Soviets let his wife leave for Israel with the promise that Mr. Shcharansky would soon be allowed to follow. Soon after their forced separation, Anatoly Shcharansky was arrested and imprisoned.

Mr. Shcharansky has spent much of his imprisonment in solitary confinement, and he has been denied proper food, sleep and health care. Last September, he began a hunger strike to protest the terrible hardships he has been forced to endure. His health deteriorated to a very dangerous level until he ended his hunger strike earlier this year, not for his own sake, but for the the sake of his family.

To this day, however, Mr. Shcharansky remains in a very weakened state of health. Reports indicate he has only enough energy to write just a few minutes at a time.

By detaining Anatoly Shcharansky, and other Prisoners of Conscience, the Soviet Union is not only violating its own laws, but also the obligations they have made under the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights and the Helsinki Final Act of the Conference on Security and Cooperation in Europe.

As a result of the Korean Air Lines massacre, the entire world is questioning whether the Soviet Government has even the slightest bit of compassion for human life. Based on their downing of Korean Air Lines flight 007, and their innumerable other crimes against humanity, the answer seems all too obvious.

However, by calling on the Soviet Union to release Anatoly Shcharansky and allow him to join his wife in Israel, we are offering the Soviet Union an opportunity to demonstrate at least a semblance of morality and decency. The Soviets have indeed earned their title of "outlaws in the Community of Man." Now it is time for them to change their ways. the entire civilized world is demanding it.●

HONORING THE ITALIAN ROLE IN PROTECTING JEWS DURING THE HOLOCAUST

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. LANTOS. Mr. Speaker, in March 1981, the Congress of the United States voted overwhelmingly to confer honorary U.S. citizenship upon Swedish diplomat Raoul Wallenberg who with incomparable courage singlehandedly confronted the German SS and their collaborators in Nazi-occupied Hungary during World War II and saved close to 100,000 innocent men, women, and children from certain death in the gas chambers. In recognizing and honoring the selfless dedication of this man to the basic concepts of liberty and human dignity which are the very foundations upon which the United States were established, Congress sought to reaffirm the commitment of the American people to the values which animated Raoul Wallenberg's actions and, in the hope that he is still alive, secure his release from Soviet prison where he may still be languishing.

Today, almost 40 years after the darkest period in the history of man-

kind, other extraordinary stories of moral courage and humanity are being brought to light. One of these, certainly among the most exceptional, has remained almost completely unknown to the general public throughout the world. For the first time, a documentary film is now being made on the fact that while throughout Nazi-dominated Europe the Jewish people were being systematically murdered, tens of thousands of Jews found refuge in what would have seemed to be the most unlikely of places—the zones of Italian military occupation in France, Yugoslavia, and Greece.

Fascist Italy, Nazi Germany's main ally, had promulgated anti-Semitic laws in 1938, 1 year before the outbreak of World War II. The Italian Jews were excluded from national life, prohibited from exercising the professions, their property was confiscated, and in some cases they were enlisted for forced labor. But their physical existence was not threatened.

In 1940 and 1941, when Germany and Italy invaded and occupied France, Yugoslavia, and Greece, several thousand Jews living in those countries came under Italian rule. While in the zones under German occupation, as virtually everywhere else in Nazi-dominated Europe, the S.S. and their local collaborators rounded up the Jews and and deported them to Auschwitz and other death camps, in the zones under Italian occupation the Jews continued to live undisturbed. As news of the humane Italian attitude spread, tens of thousands attempted to flee the barbaric persecutions under way in the Nazi zones and to find refuge with the Italians. By 1943, the number of Jews living under Italian occupation in southern Europe had swollen to 60,000; they lived in complete freedom from prosecution and enjoyed the same rights as the rest of the civilian population.

The Germans were confounded and exasperated by the attitude of their closest ally, and pressed the Italian Fascist Government to permit the deportation of all the Jews residing under Italian occupation. On more than one occasion, bowing to German pressure, Mussolini himself issued orders to his troops that they were to permit the deportations to take place, but his orders were never carried out. Revolted by the idea of sending innocent civilians to their certain deaths simply because of their race or religion, the Italian military and civilian authorities followed the directives of their conscience instead of those of their Supreme Commander. They did everything in their power to obstruct and delay the execution of orders which they considered to be immoral.

In the part of France occupied by them, the Italians followed a policy of protective internment pursuant to which the Jewish refugees were housed in requisitioned hotels and private homes and told to report daily to the police; in this way, the Nazis could be told that restrictive measures had been taken while at the same time the Jews continued to live peacefully. Any attempts by the S.S. or by their local collaborators to carry out arrests were firmly opposed, when necessary even with drawn arms, on the grounds that all questions regarding measures against the Jews were of the exclusive competence of the Italian occupation authorities.

In their zone of occupation of Yugoslavia, the Italians employed a similar technique. Some 3,000 Jews living under Italian control were interned in camps on the Adriatic coast. The Italians supplied them with military rations, and although they were not allowed to move around freely, they were permitted to pursue social, cultural, and educational activities inside the camps. The Italian commanders gave their assurance that as long as they were in control, no harm would come to the Jews. Despite increasingly heavy German pressure, that promise was to be kept in full.

In Greece, the Italians in their zone simply refrained from taking any action at all concerning the Jews. The 10,000 Jews under Italian military rule continued to live undisturbed. Moreover, in Saloniki, a city in German-occupied Greece where the S.S. eventually deported and murdered virtually the entire Jewish community of 55,000 people, the Italian Consul General issued scores of certificates of Italian nationality to Greek Jews who had only the most tenuous of links to Italy, and in this manner saved their lives; they were quickly transferred to safety in Athens, which was under Italian occupation.

This humane Italian attitude naturally rendered the Nazis furious, and official German dispatches of that period make it clear that of all people it was their Italian allies who were obstructing the complete application of the "final solution" to the Jewish question in Europe.

On September 8, 1943, the day the armistice between Italy and the Allies was proclaimed, the Italian military units laid down their arms and retreated in disarray. Tens of thousands of Jews were left without protection, and the S.S. moved in swiftly. Perhaps as many as half of the Jews who had lived in safety under Italian occupation were eventually caught and deported to their deaths; the other half, between 20,000 and 30,000 people, managed to survive the war, often with the help of the local Italian and Greek populations, or of Tito's Partizans.

Joseph Rochlitz, son of one of the many who owe their lives to the Italians, is at present producing a documentary film on this outstanding episode in the tragic story of the destruction of European Jewry. Many of the Italians still alive today who played an active part in resisting the Nazi designs have already been interviewed, as have been a large number of survivors of the Holocaust who are indebted to the Italians for their courageous actions.

But not only because of the deep gratitude felt by the many thousands of men, women, and children whose lives were saved by the Italians during the Holocaust is it important today to give belated public recognition to the profound humanity of the Italian people; perhaps even more important is the example that their actions can set for the present and the future. In a world in which violence and mass murder are still all too common, this episode can demonstrate that in the face of blind hatred, racism, and barbarity, people of high moral integrity can and must unite to prevent heinous crimes from being committed, no matter how daunting the odds, no matter how desperate the circumstances.●

THE PURLOINED ADVANCE BOOK

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. MICHEL. Mr. Speaker, Lynn Cheney, writing in the September 1983 issue of the Washingtonian, reports that the advance team for President Jimmy Carter's 1980 bid for reelection admits to having purloined parts of the bible of modern advance work written by Ron Walker, generally conceded to be the best advance man in national politics.

I for one hope it is not true that the Carter team descended to such tactics as purloining. Do you think we will see any of our illustrious colleagues sending letters to Carter advance men asking for their testimony on these allegations? Will there be a full-scale investigation? Will Jody Powell view this development with alarm? Will the media become hyperactive in search of the truth of the incident? If you believe all that, Mr. Speaker, you will believe anything.

At this point, I insert in the RECORD, "The Case of the Purloined Advance Manual" by Lynn Cheney, in the September 1983 issue of the Washingtonian:

THE CASE OF THE PURLOINED ADVANCE MANUAL

The bible of modern advance work is the manual used by the Nixon campaign in 1972. The manual firmly established the idea that an orderly set of procedures was important, so all subsequent campaigns owe a debt to it. And sometimes the debt has

been more direct. When the Carter people sat down to write an advance manual, they drew on "purloined parts" of the Nixon manual, according to Ellis Woodward, who headed the Carter advance office.

Written by Ronald H. Walker, who headed the Nixon advance team and was an adviser to the Reagan effort, the Nixon manual covers everything from the services provided by the White House Communications Agency to the best positioning of a motorcade at an airport arrival. When Gerald Ford became President, his people also used the manual.

In its hundreds of pages, the book advises on picking rally sites ("It is much better to stuff 6,000 people into a 5,000-person auditorium than 20,000 into a 30,000-seat auditorium"); raising crowds (a telephone campaign is "absolutely essential"); and accommodating the press (get two one-and-a-half-ton covered trucks for luggage and press-office gear). There are checklists by the dozens and very detailed case studies. There is even an appendix on balloons.

Asked how he felt about the Carter White House's unauthorized use of his work, Walker replied, "Well, I'm sure it helped them. We spent the better part of three years putting it together. Maybe we could call it 'Advance-Manual-Gate.'"●

ENFORCING U.S. NATIONAL SECURITY CONTROLS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. ROTH. Mr. Speaker, this summer the Committee on Foreign Affairs completed its markup of the Export Administration Act. The version of the bill approved by the committee incorporates amendments which present the House with two choices.

The first choice is to strengthen the level of export controls by targeting them toward militarily critical technologies and restricting their export from the West to the East. The second choice involves the elimination by Congress of certain export controls without adequately taking into account national security and foreign policy considerations.

An editorial in the June Wall Street Journal favors the first choice. It suggests the necessity of strengthening export controls and toughening Western efforts to control the flow of advanced technology to the Soviet Union. The Wall Street Journal said "two cheers for the leverage a tough Export Administration Act gives the U.S." I agree and urge my colleagues to consider the points raised by the following editorial:

[From the Wall Street Journal, June 2, 1983]

POLITICS AND TRADE

Western leaders have stepped down from the summit far more gracefully than at Versailles last year, when efforts to find unity were tripped up by differences on East-West trade. That's great but it doesn't mean by any stretch of the imagination that the trade issue has been resolved.

President Reagan has lowered the pitch of his arguments against certain kinds of dealings with the Soviets, but he hasn't dropped them. Indeed, he wants Congress to further toughen the Export Administration Act, due to expire Sept. 30, to give him stronger powers to punish foreign companies that don't abide by U.S. trade strictures, allowing him to close the U.S. market to foreign firms that violate the act. Our summit allies, no fans of the act as it already stands, would hate that. It appears that Congress doesn't like it very well either, judging from committee actions so far. Some have the effect of weakening rather than strengthening the act.

We admit to some ambivalance of our own on this issue. Our fundamental position on trade is that it should be as free as possible so that all the world's citizens can have the benefits of broad and varied commerce. But we know as well that there are special problems in trading with Communist bloc nations, who have no such liberal notions themselves and who are ideologically hostile to Western democracy and capitalism. Most importantly, much of the trade in question itself seems like a politically inspired departure from market principles.

Mr. Reagan has some good arguments and the distinctions he makes about what kinds of trade are acceptable and unacceptable are not merely politically self-serving as the Europeans often claim. The Reagan administration, in essence, makes the following points:

Detente has become a Western policy of making deliberately uneconomic trade deals with the Soviets, really simple appeasement under the guise of trade. It's a failed political strategy, and the U.S. will make no bones about voicing its view of what NATO political strategy should be.

The vast array of European subsidies to the Communist bloc for everything from butter to natural gas compressor stations is not just bad defense policy but bad economics. The heavily subsidized Soviet gas pipeline, for example, will cost European consumers an arm and a leg.

We've got to get serious about keeping strategic high-tech goodies like terrain-mapping guidance systems away from the Soviets. This means toughening up COCOM, the Paris coordinating group, which doesn't even have its own office space yet. Already U.S. Assistant Defense Secretary Richard Perle estimates that 150 Soviets weapons, among them the SS-20s aimed at European capitals, include Western technology.

Indeed, the Europeans, while decrying U.S. "economic warfare" for public consumption, are not totally unsympathetic to any of these complaints. They have even paid lip service to having East-West trade "guided by indications of the market," a promise subject to various interpretations. But there was little serious discussion of these issues until the Reagan administration's pipeline sanctions. and even now several European governments are toying with the awful idea of further expanding the pipeline project.

Given those circumstances, a good case can be made for toughening the Export Administration Act. if ever applied, the sanctions the administration has in mind clearly could raise havoc with trade and markets, but some threat seems to be just about the only way to get serious discussion about how the West behaves towards its military adversary. We say two cheers for the leverage a tough export administration act gives the U.S.—even while we hope its sanctions are never used.●

CAN CLINCH RIVER BE PRIVATELY FINANCED?

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. OTTINGER. Mr. Speaker, I have spent most of this morning in a hearing before the Subcommittee on Energy Research and Production of the Science and Technology Committee listening to testimony on the administrations Clinch River breeder reactor financing scheme. Contrary to what the administration would have us believe this plan does not involve private investment put at risk, but in fact put the full faith and credit of the U.S. Government behind investors and guarantees a generous return.

At the hearing the illusory nature of the financing schemes benefits were excellently described by Prof. Hendrik S. Houthakker of Harvard University. I insert the statement of Dr. Houthakker in the RECORD;

CAN CLINCH RIVER BE PRIVATELY FINANCED?

(By Hendrik S. Houthakker)

Madam Chairman, I have to thank you for allowing me to testify on the so-called private financing plan for the Clinch River breeder reactor. To begin with, let me emphasize that I am not opposed to the breeder on environmental or other non-economic grounds. As a member of the National Academy of Science's Committee on Nuclear and Alternative Energy Systems (CONAES) I supported the Committee's recommendation to keep the breeder option open. The Committee's reasoning, in brief, was that under certain assumptions breeder reactors could be economically viable thirty or forty years from now, and that the lead time needed for commercialization is measured in decades rather than in years. The likelihood viability was considered large enough to reject abandonment of Clinch River, the most promising pilot project at that time.

The economics of breeder reactors is quite simple. Whether such reactors can supply electricity at lower cost than lightwater reactors depends principally on only two things; the price of uranium and the cost of the additional capital needed for the breeder. Given this capital cost, for instance, one can calculate the lowest uranium price that will make a breeder competitive. Similarly, a given uranium price determines how much capital can profitably be invested in a breeder. In this context "capital cost" involves not only the investment itself but also the lifetime over which the investment should be amortized as well as the rate of interest.

The CONAES report was written four years ago. Even then the case for the breeder was recognized as speculative, depending as it does on the future course of many factors, most of them difficult to predict with any assurance. These factors include the growth rate of the world economy, new discoveries of uranium, interest rates, and the prices of competing energy fuels. Since 1979

these four factors have all evolved in directions unfavorable to the economic viability of breeder reactors. The world economy went through a severe recession, considerable low-cost uranium was discovered, interest rates rose (especially in real terms) and the price of oil declined. It is still conceivable that breeder reactors will be competitive three or four decades from now, but it is distinctly less likely. Clinch River is more speculative than ever.

The description of Clinch River as speculative may surprise those who think of it as insurance against the inevitable exhaustion of uranium resources by non-breeding reactors. The fact is that the U.S. will never run out of uranium, which is widely distributed in the earth's crust. What will happen, rather, is that ultimately uranium may have to be extracted from leaner ores, such as the Chattanooga shales, once the richer ores are exhausted. Uranium will then probably cost more, which will cause breeder reactors to look better from an economic point of view and uranium mining to decline. Actually there is no compelling reason why the U.S. should use only domestic uranium. There are large low-cost reserves in Canada, Australia and other friendly countries.

It is because of the speculative aspect of breeder reactors that private sector involvement in their commercialization is essential. As the Congress has recognized from the beginning, it would be unconscionable for the Federal government to bear the overwhelming responsiblitiy for a project whose national significance is quite limited. By now we all know that the resources available to the Federal government are finite and must be allocated more carefully than in the past. Those who believe the breeder has a future should put their money where their mouth is. They are entitled to a profit if they turn out to be correct; conversely they should suffer losses if they are wrong. A modest contribution by the Federal government toward the development of technolgy may be appropriate, but it should not amount to an open-ended commitment.

The plan put forward by the Corey taskforce, and endorsed by the Administration is not responsive to the Congressional concern for greater participation from the private sector. In fact it does not provide for any meaningful participation by the private sector. The proposed "joint venture" between the Federal government and private parties is one in which the taxpayers bear all the risk while the so-called partners do just what they would be doing anyway, namely buying riskless government bonds and sheltering their income from taxation. Moreover the government would have to make a large up-front appropriation, contrary to the established budgetary process.

As to the bonds to be issued under this plan, it suffices to look at point two in the Appendix signed by Mr. Corey. Among the Federal assurances that the sponsors require is "that all debt service obligations of the Project (. . .) will be met under any and all circumstances." In other words, these obligations would be backed by the full faith and credit of the U.S. They would be fully equivalent to ordinary Treasury securities. If the purchase of fully guaranteed government bonds constitutes "private sector participation," then all Federal activities should be considered joint ventures.

The plan makes much of the idea that these bonds would be outside the budget, as if that were an advantage. Whether Federal obligations are inside or outside the budget is irrelevant from an economic point of view. The Unified budget was enacted precisely because this sort of creative bookkeeping dilutes Congressional control over the budget and encourages wasteful expenditures. It is surprising that leading financial houses should lend their support to this deceptive practice or to the statement on p. 1 of the Executive Summary that the bonds issued under the plan "would reduce the Federal budget deficit at a time when budgetary expenditures are of widespread concern." This statement alone suffices to characterize the plan as a brazen attempt to mislead the Congress and the public.

But that is not even the worst feature of this ingenious scheme. The so-called equity participation amounts to nothing more than officially sponsored tax evasion. The Corey report is relatively frank on this, stating (p. 18) that "the equity investment will be supported largely by tax incentives." No doubt the word "largely" should read "entirely." Later on the same page we read that "[e]quity investors (. . .) are, for the most part, anticipating specific tax consequences rather than the speculative profit normally associated with risk-taking. Hence assurances as to the continued availability of those tax incentives will be required." What this means is that any attempt by the Congress to close the tax loopholes in question would lead to monetary compensation for the equity participants in the joint venture. To call this equity participation is surely straining financial terminology.

Looking at the three parts of the joint venture plan together one can only conclude that the private financing it describes is largely the same as that for any other Federal project, and that the remainder involves a thoroughly objectionable reliance on tax loopholes. Moreover the government would have to make an open-ended commitment to the project into the indefinite future without any opportunity for further Congressional or Presidential review. These are the essentials of the Corey plan. More could be said about the details, but that would be overkill. The plan should be rejected in its entirety.

A truly private financing plan would have to involve new risk capital rather than guaranteed bonds and guaranteed tax shelters. Could such a plan be devised? The Corey task force report emphasizes the requirements of pension funds and similar risk-averse sources of funds; it does not even consider the prospects for raising genuine risk capital. In this respect the task force was realistic. Not many private investors will risk substantial funds in an enterprise whose pay-off, uncertain at best, will certainly not come until well into the next century.

Truly private participation in Clinch River, on a scale commensurate with the fully justified intent of Congress, does not appear to be feasible. The implication is that Clinch River must be terminated. Perhaps the breeder option will have to be reopened at a later time, when the outlook for uranium prices and interest rates is more clearly in favor of the breeder than it is now. If and when that time comes, Clinch River will probably be obsolete; some experts consider it obsolete already. The Federal government should continue to support research on new breeders and related technologies.

Termination of Clinch River will not weaken our energy security in the foreseeable future, though it could under certain conditions have an adverse effect in more distant years. We should not worry either about abandoning the world market for breeder reactors to the French. This world market is simply too hypothetical. The factors that have dampened the economic prospects of the breeder in the U.S. are at least as strong in the rest of the world. The French themselves have become noticeably more subdued; thus in recent official reports on electricity the words "Super Phoenix" and even the French equivalent of "breeder reactor" are conspicuously absent. A historical parallel exists: when the U.S. abandoned the Supersonic Transport a dozen years ago, there was much concern about leaving the field to the French-British Concorde. Yet apart from a few heavily subsidized transactions with their own captive airlines, no Concordes have ever been sold: there simply was no world market.

On the other hand the termination of Clinch River will be a small step towards the most urgent task facing the Congress and the Administration at present, which is to bring the budget deficit under control. This should be done not by bookkeeping tricks, as the Corey task force proposed, but by cutting out projects of marginal value if meaningful private participation cannot be obtained. The Clinch River reactor is clearly in that category.●

THE 75TH ANNIVERSARY OF THE CITY OF SOUTH SAN FRANCISCO

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. LANTOS. Mr. Speaker, I welcome this opportunity to call to the attention of the House the 75th anniversary of the incorporation of the city of South San Francisco.

Since the town's humble beginnings in the 1800's as a large cattle ranch, it has grown and flourished beyond even the most optimistic expectations of its founders. One of the major reasons for its success and growth over the years has been its success in attracting industry.

Gustavus F. Swift owned the first major industry to settle in the town—the Western Meat Co.—and legend has it he was responsible for naming the town.

South San Francisco quickly became known as a meatpacking town, and began to attract other major industries who saw great potential for success. By September 19, 1908—the date when the city was incorporated—South San Francisco was home to 14 major industries and almost 2,000 residents.

In 1923, residents and city officials, still anxious to attract industry to the city, came up with a unique and successful idea. On the mountain separating South San Francisco from San Francisco—subsequently known as sign hill—the letters "South San Francisco—The Industrial City" were printed in letters 60 feet tall. Residents felt that the sign would be the best adver-

tising the city could have because it would be seen from miles around.

Five years later the sign had proved so successful that residents voted to make it a permanent fixture by putting the letters in cement. The sign is still there today—a reminder to millions of bay area residents and visitors of the great pride this city has maintained through the years.

The city continued to grow and flourish in the 1930's and 1940's, but in 1955 South San Francisco embarked upon one of the largest industrial expansion programs in the State by developing previously unused marshlands into industrial areas attractive to both light and heavy industry. By 1963, plans were announced for a $50 million industrial park to be built on 600 acres located on the city's bayshore. The park was built using innovative landscaping and construction standards, and still serves as a model of comprehensive industrial planning.

In keeping with its tradition of innovation and foresight, the city last year announced plans for a unique new business development called the Gateway project. Located on 117 acres, the project will mark South San Francisco's transition from an industrial and manufacturing past to a future of advanced technology and diverse interests. It will include business offices, research and development, retail stores, and hotels.

Although I have emphasized the great success of South San Francisco as an industrial city, it is a residential, commercial, and service center also. Residents take great pride in their city's outstanding schools, dedicated and concerned public officials, excellent recreational facilities, low tax rates, and mild climate.

Perhaps the finest quality that South San Francisco has, however, is its ability to maintain a tightly knit, ethnically diverse community where neighbors know and care about each other and their city. With all of its residential growth over the past 75 years, South San Francisco has retained its friendly, small town atmosphere.

Mr. Speaker, I am proud to represent this fine city, and to have the opportunity to honor it today. The people of South San Francisco should be extremely proud of their city's 75-year history, its present accomplishments, and its bright future.●

SUPPORT FOR H.R. 1036

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. ADDABBO. Mr. Speaker, scattered throughout the news of the past several months, we find optimistic stories of plants reopening their doors, of people regaining their jobs after long periods of unemployment. These lucky few have ridden out the crisis with just a severe depletion of their savings. We cannot allow their sense of relief to blind us to the plight of all those workers whose plants may never reopen, and who cannot find jobs. Unemployment in this country remains at an unacceptable level, and only prompt action by this body, not empty words of hope for a prosperous future, can change that.

We will have a chance to take action when H.R. 1036, the Community Renewal Employment Act, sponsored by my distinguished colleague from California, GUS HAWKINS, comes up for consideration next Tuesday. I commend my colleague for addressing our nagging unemployment problem effectively, and urge my colleagues to support the bill. It will target those worst hit by unemployment, and put America back to work fixing up long-neglected community facilities. Passage of the Hawkins bill would mean that our hopes for economic prosperity need not be empty.●

THE NAVY IS A GOOD NEIGHBOR

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. LOWERY of California. Mr. Speaker, I would like to share with my colleagues an editorial which recently appeared in the Tribune, a San Diego newspaper. The editorial lauds the Navy for its uncommon sensitivity to the concerns of local residents in planning the construction of a 120-unit family housing complex in San Diego. I am pleased to report that the recent groundbreaking for this project signals the culmination of a cooperative effort of the Congress, the Defense Department, the Navy, San Diego elected officials, and local citizens.

San Diego has been host to the Navy for over 60 years. During this period, the city has witnessed the rapid growth of the Navy in times of national emergency and has watched its contraction as emergencies subside. Yet, throughout these periods of growth and contraction there has existed a constant need to house the families of personnel assigned to San Diego.

Traditionally, Navy personnel have been congregated in military family enclaves. Though obvious economies derive from the production and maintenance of large clusters of housing, such massing of Federal employees and their dependents creates substantial social problems for those being housed.

Recognizing that this human problem could no longer be overlooked, the San Diego congressional delegation, along with city officials, sought to convince the Navy to build family housing on small sites scattered throughout the city. In addition, we urged the Navy to purchase new vacant housing for its personnel rather than undertake new construction. This approach would house families quickly and stimulate our depressed local housing market.

Both the House and Senate Armed Services Committees encouraged the Navy to implement our proposals. The Navy agreed to a trial of San Diego's ideas and, shortly after the beginning of this fiscal year, it purchased existing housing in San Diego. Furthermore, as chronicled by the Tribune editorial, the Navy agreed to move away from large enclaves and begin construction on scattered site housing.

As a logical followup to our proposals, we suggested that the Navy—and the Congress—obtain choice San Diego sites for future Navy housing needs while such property is still available. Once again, the House Armed Services Committee provided strong leadership, approving language permitting site acquisitions through purchase, land trades, or options.

I would like to pay special tribute, as does the Tribune, to the exemplary leadership of San Diego City Councilmember Dick Murphy. As the chairman of the local military housing task force, Councilman Murphy was a key figure in the formation of our housing policy proposals accepted by the Navy.

Before turning to the editorial, I would like to complement both the Department of Defense and the Navy for their willingness to consider new approaches to old problems. Their spirited cooperation with San Diegans sets a fine example for future military-civilian endeavors and I look forward to the continuation of this warm relationship in the months and years ahead.

[From the Tribune, Aug. 24, 1983]

NAVY HOUSING IS A GOOD NEIGHBOR

What? Public housing in exclusive Scripps Ranch?

At one time, the idea might have raised eyebrows, at the very least.

But there was nary a protest when the Navy broke ground there last week for a new town house complex for enlisted military families.

The reason? The Navy has shown uncommon sensitivity to the desires of the project's neighbors consulting with the community planning group and designing a 120-unit complex that will not overwhelm its surroundings.

Navy planners even went so far as to negotiate with Scripps Ranch residents on the color and texture of the military housing and whether to install interior or exterior television antennae.

The town houses going up at Scripps Ranch Boulevard and Pomerado Road are among the first fruits of the Navy's effort

to provide military housing projects on small sites scattered throughout the region.

This approach represents a positive change in the way Navy develops its housing in San Diego—an approach we hope the Navy will continue.

In the '50s and '60s, the Navy concentrated most of its apartment units on a few sites. During that era, for instance, 2,321 apartments were built on Murphy Canyon Heights.

But the city has grown since then. Tierrasanta residents were outraged two years ago when the Navy proposed construction of 1,200 units in their community.

Councilman Dick Murphy and other local officials on the San Diego Association of Government's Military Housing Task Force are to be commended for helping the Navy with an alternative that eliminated the Tierrasanta controversy while meeting military housing needs.

With task force help, the Navy last year bought 132 units of already-built housing in San Diego, Poway and Lakeside. The task force also suggested vacant sites for new projects, such as the one of Scripps Ranch.

The San Diego experiment should serve as a model for other cities where large numbers of Navy personnel and civilians must live together.●

THE IMPRISONMENT OF ANATOLY SHCHARANSKY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. ACKERMAN. Mr. Speaker, today, September 15 marks an important day for the Soviet Jewry movement, and for all of the people who have worked tirelessly for the release of Anatoly Shcharansky from the infamous Chistopol prison. Today, Anatoly Shcharansky has reached the halfway point in his 13-year prison term. He serves this sentence because of a deeply held commitment to Judaism, Zionism, and his fellow refuseniks. The Soviet Union's brutal treatment of Shcharansky exemplifies the worst tactics of oppression, which are brought to bear on those seeking to emigrate from the U.S.S.R. Year after year, the Soviets ignore the pleas of the world community to grant exist visas to all the Anatoly Shcharanskys who languish in the Soviet Union. The only crime committed by the valiant Jewish refuseniks is their refusal to succumb to the Soviet tactics of harrasment and intimidation.

Mr. Speaker, the Soviet Jewry activists in this country will never succumb to the Soviet war of attrition—a vicious tactice which is aimed at wearing down the Soviet refuseniks and their supporters in the West. We will not relent in the fight to gain freedom for Soviet Jews, who depend on our efforts to keep world opinion focused on this issue. With the Soviet's renewed determination to clamp down on Soviet Jewish emigration, we must remain vigilant in our commitment to press the Soviet Union for an improvement in their dismal human rights record.

Mr. Speaker, I have recently expressed many of these concerns directly to President Reagan. This correspondence focused on my particular concern for the Shcharansky case. I urged the President to reaise this issue with the Soviets at every possible opportunity. As a nation devoted to freedom and individual liberties, we cannot relent in our efforts to secure the release of Anatoly Shcharansky and the other refuseniks. We must persevere until these brave men and women have fulfilled their dream of living as free Jews in Israel.

A copy of my letter to President Reagan follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 14, 1983.

Hon. RONALD W. REAGAN,
President of the United States, The White House, Washington, D.C.

DEAR MR. PRESIDENT: I am writing to express my concern about Soviet prisoner of conscience Anatoly Shcharansky.

As you know, this case is of grave concern to the American people who have been following this situation for many years. It has been extremely frustrating to witness the Soviets' repeated refusal to permit Anatoly Shcharansky to emigrate, as they continue their vicious harassment against him.

As President, you have a unique opportunity to help save Anatoly Shcharansky. I urge you, in the course of upcoming negotiations, to make the Shcharansky case a test of Soviet intentions toward the United States. I am afraid that the Soviets will let Shcharansky go only after they are forced to confront this issue at the highest levels.

Unfortunately, time is short. Anatoly Shcharansky is a sick man who has been devastated by the conditions forced upon him. He barely survives in isolation from his family and friends. The descriptions of conditions in Chistopol prison make it difficult to believe that Shcharansky will live much longer unless he is granted permission to emigrate. During his last hunger strike, Shcharansky dropped to 77 pounds, and suffered beatings at the hands of prison officials who carry out the KGB's orders to physically harass him.

I firmly believe that the Shcharansky case is similar to the Pentecostal situation, which was resolved when you personally intervened on their behalf. In the spirit of the American commitment to the Helsinki Accords, I hope that you will personally intervene on behalf of Anatoly Shcharansky.

Thank you for your attention to this matter.

Sincerely,

GARY L. ACKERMAN,
Member of Congress.●

ANATOLY SHCHARANSKY MUST BE FREED

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. McGRATH. Mr. Speaker, the Madrid Conference has ended, and the Soviet Union has signed an agreement which pledges the reunification of families. Yet, Anatoly Shcharansky is in prison. Anatoly Shcharansky, a symbol of faith, commitment, and love of freedom, who wants no more than to be reunited with his wife in Jerusalem, is representative of the Soviets total disregard for human dignity and liberty.

New York's Gov. Mario Cuomo has declared today, September 15, Shcharansky Day, in commemoration of the 6½ years Anatoly has served in prison. Since Soviet law permits the release of a prisoner after the completion of one-half of his term, this half-way point in Anatoly's sentence provides the Soviet Government the opportunity to change the perceptions that its words and promises are hollow, and that its signature on human rights agreements cannot be trusted.

The Soviet Union claims all of its citizens who want to leave have already done so. But Anatoly Shcharansky, and thousands of others who have refused to bend to Soviet pressure, harassment, and government inspired anti-semitism in response to their desire to be free, are still waiting to emigrate. I urge my colleagues in this democratic legislative body, to urge the Soviet Union to comply with the agreements of the Madrid Review Conference, and to respect and honor human rights, by beginning with the release of Anatoly Shcharansky.●

NAVAHO NATION SURVEY

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. RUDD. Mr. Speaker, the Navaho Reservation is a land of contrast and diversity, approximately two-thirds of which lies in northeastern Arizona. Another one-third lies in northwestern New Mexico, while a small portion extends into southeastern Utah.

A traveler through this 25,000 square mile area can ascend from arid deserts at 3,000 feet elevation to alpine forests at more than 10,000 feet elevation. Millions of years of wind, water, Earth shifts, and volcanic action have created spectacularly dramatic rock sculptures, scenic canyons, and mesas. It is a land rich in history and cultural resources, and beneath the land lie resources of another nature, rich deposits of coal, oil, gas, and uranium.

The Navaho Reservation is unique in many ways, not the least of which is that it represents the largest land mass in the contiguous 48 States that has never been subject to an original cadastral survey. Until recently, only 10 percent of the area had been surveyed. I am proud to say the situation so long overlooked is now being cor-

rected through a cooperative program between the Navaho Tribe, the Bureau of Land Management and the Bureau of Indian Affairs.

This is a milestone in the economy of the Navaho Reservation for much of its future growth depends on development that can identify with legally binding property boundaries, which requires surveys.

I am particularly pleased that Navaho surveyors are working alongside BLM surveyors. I want to recognize the Navaho surveyors for the key role they have played in completing original surveys on 230,000 acres since the program began in June of 1982.

They are Albert Steven Tsosie, Jr., of Fort Defiance, Ariz.; Wilfred David Chee and Daniel R. Bryan, both of Window Rock, Ariz.; Gene H. Peters, Ya-Ta-Hey, N. Mex.; Reuben Mason, Gallup, N. Mex.; Jones C. Curtiss, St. Michaels, Ariz.; and Andrew Murphy, Houck, Ariz.

The importance of the survey to the further development of the Navaho Reservation was pointed out recently in an article in the Navaho Times, published at Window Rock, Ariz., and I recommend its reading to my colleagues.

The article follows:

[From the Navajo Times, Aug. 17, 1983]

SURVEY IS LINKED TO PROGRESS

(By Dick Thomas)

Shortly after dawn, Steve Tsosie and Reuben Mason pulled off the paved highway and followed a tortuous 30-mile route across the Navajo Nation that at times taxed the abilities of their four-wheel drive vehicle.

They arrived at their job site, and pulling up beside them in another vehicle were Gene Peters the Kevin Derossett. Quickly, they mounted an instrument on a tripod and began taking sitings toward a nearby sandstone mesa.

The four men are cadsatral surveyors, engaged in laying out and establishing original township and section corners on the largest unsurveyed chunk of real estate in the contiguous 48 states.

"Yeah, I guess it's kind of awesome when you think about it," Mr. Tsosie said. "The Navajo Nation is the size of West Virginia, and 90 percent has never been surveyed."

Mr. Tsosie, Mr. Mason and Mr. Peters are Navajos and are employed by the Navajo Nation. Mr. Derossett works for the Bureau of Land Management, the only agency authorized to excute and approve cadastral surveys on federal and Indian lands.

They are one of three survey crews made up of Navajo and BLM surveyors, none of whom expects to see the job through to completion. It will take 20 to 25 years.

Alfred Dehiya, acting director of Navajo land development, said the survey is long overdue.

"The tribe has been trying to get this program started since the '50s, but there were always funding snags," he said from his office at Window Rock. "Now we're rolling, and we're enthusiastic about what this survey means to the economic development of the reservation.

"We have energy resources ripe for development, but oil and gas leases, coal leases, pipeline and other rights-of-way have to be tied down to known township and section corners. Without them, we run the risk of overlapping leases that could result in lawsuits and other complications," he said.

Mr. Dehiya said top priority of the survey is the energy areas, followed by major growth areas where new townsites are likely to develop, and finally the 110 "chapters," which are local governmental units. Determining the exact boundaries of chapters will define voting precincts and will also aid in census counts.

Road construction is another desperately needed improvement that cannot move ahead without the survey.

"The pickup truck is the major method of transportation on the reservation," Mr. Dehiya said, "but we have only 660 miles of paved roads and more than 6,000 miles of dirt roads. The days of horse and wagon transportation are gone."

The two men closest to the program, Dell Cazier, a BLM employee and survey project leader, and Melvin Bautista, head of the Navajo survey office, are proud of the work accomplished in the last 14 months, and of the cooperation between BLM, the Navajo Nation, and the Bureau of Indian Affairs (BIA).

"The people I talked to in Washington were amazed at the area we have that is unsurveyed, about 25,000 square miles, and I think that revelation gave us the push we needed," Mr. Bautista said.

Mr. Bautista reiterated the theme of economic development that will be spurred by the survey, as did Genevieve Denetsone, assistant area real property management officer for the BIA at Window Rock.

"There is very little Navajo private sector, and unemployment on the reservation is high," she said. "Most dollars flow off the reservation. Through this survey, we have the opportunity for prioritizing resource development. We will be able to develop infrastructures to support communities, and that would enhance development and help achieve the goal of a vigerous Navajo private sector."

There's no question that energy-rich areas of the reservation are targeted for surveying first. Daniel Bryan, a Navajo surveyor, dug into the earth to place a 28-inch long survey monument and struck solid coal a few inches below the surface.

Jones Curtiss, another Navajo surveyor and graduate of Monterey Peninsula College in California, said he is proud of the work being done.

"I see this as more than job. I see it as being a part of history," he said. "This land has remained unsurveyed since the Navajo reservation was created 115 years ago. These survey monuments we're setting today will still be serving their purpose 115 years into the future. I feel good about what we're doing."

Andrew Murphy, a Navajo who works with Curtiss and BLM crew chief Jim Werdel, is a surveyor during the week and a bull rider in area rodeos on weekends.

"I lived in Phoenix seven years when I was in college and working for a private engineering firm" he said. "I'd rather be surveying this land than surveying runways at Sky Harbor Airport."

"Do you know," Mr. Murphy asked, "that the official plat of these surveys will carry the Navajo Nation seal on the 'north arrow' and that the monument caps we'll be getting soon will also bear the likeness of the Navajo Nation seal? That means a great deal to us Navajos."●

A CONGRESS IN MOURNING

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. HAMMERSCHMIDT. Mr. Speaker, today, a delegation from Congress will travel to Marietta, Ga., to attend a memorial service for our late colleague, Larry McDonald, a victim of the brutal Soviet downing of Korean Air Lines flight 007. The ironic death of Representative McDonald, one of the most outspoken Members with regard to the gulag of Soviet oppression, deepens the initial shock into a more acute realization internationally of the critical implications of this tragedy.

Events transpiring from the Soviet attack have augmented world disrespect and repulsion for that nation which has displayed a total disregard for human life. Soviet responses to the whole affair have been void of concern for international peace, even to the extreme of shifting blame upon its victims. As Secretary of State Shultz has said, Soviet answers and excuses have been "totally unacceptable."

As we are united in our denouncement of this despicable act, and in our sympathy with the victims' families, the strength of our unity must be vigorously proclaimed to the Soviets as evidence that we will not stand idly by while they inflict warlike offensives on innocent U.S. citizens.

The defense policy of the Reagan administration has long realized the Soviet goal of world domination, and the Communist intent to gain such dominance as quickly and effectively as possible when there appear to be vulnerabilities in other parts of the globe. The atrocities of Poland and Afghanistan, and now the barbaric destruction of a civilian airliner, justify the "peace through strength" philosophy toward deterrence of the Soviet quest.

Upon my return to Washington from the district work period, I joined with my esteemed colleague, Congressman GEKAS, in sponsoring a resolution similar in content to House Joint Resolution 353, overwhelmingly approved by the House yesterday. The text of my own resolution is as follows:

HOUSE CONCURRENT RESOLUTION 160—CONDEMNING THE SOVIET UNION ATTACK ON KAL FLIGHT 007

Whereas, in the pre-dawn hours of September 1, 1983, Korean Air Lines flight 007, a Boeing 747 with 240 passengers and 29 crew members on board, was shot down by a Soviet-piloted SU 15 warplane over the Sea of Okhotsk near international waters, killing all passengers and crew on board;

Whereas 61 passengers on board KAL 007 were Americans, including U.S. Representative Larry P. McDonald;

Whereas the Soviet military tracked the flight of KAL 007 for more than two hours as the plane accidentally veered from its intended flight path and crossed into Soviet air space over the Kamchatka Peninsula, the Sea of Okhotsk and the Sakhalin Island;

Whereas transcripts of the communications between the Soviet pilot and his ground commander explicitly demonstrate that the Soviets made no efforts to let the civilian flight know that it was off-course or to warn it of an impending attack;

Whereas this is the second un-provoked attack by the Soviet Union on an international civilian aircraft in five years;

Whereas the Soviet Union refused to admit for several days after the incident that its warplane had shot down the KAL civilian flight;

Whereas after international opinion and stark proof forced the Soviet Union to admit to the civilian attack the Soviets maintained that it is within their right to shoot down, without warning, any international civilian airliner that accidentally strays into Soviet airspace;

Whereas the entire world has reacted with revulsion and disbelief at the savageness and brutality of the Soviet murder of 269 innocent civilians near international waters;

Whereas the Soviet Union, despite international pleas, has refused to allow any outside group or country to assist in the search efforts to find any wreckage or bodies from the downed KAL flight by continuing to cite the absolutely inviolate nature of Soviet territory, no matter what the circumstance;

Whereas these actions by the Soviet Union clearly indicate to the entire world their lack of humanity or honest desires for a peaceful international community, and further puts the world on notice of Soviet global intentions: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that attacks on international civilian airlines are to be denounced and that the Soviet Union's attack on Korea Air Lines flight 007 and the murder of the 269 human beings on board is to be condemned in the strongest possible terms. The Congress of the United States supports the actions of the President of the United States in his efforts to bring the Government of the Union of Soviet Socialist Republics before the world community to admit its liability and responsibility for this murderous deed and offer recompense to its victims and guarantees to the world that the safety of civilian airlines will not be violated in the future.●

KOREAN AIR LINES FLIGHT 007

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. DE LA GARZA. Mr. Speaker, since first learning that Korean Air Lines flight 007 had been shot out of the skies by a Soviet jet fighter, with a tragic loss of 269 innocent lives, I have been following the developments closely.

The more information released about the events on the night of August 31, 1983, the clearer it becomes that we will never know the full chain of events leading to the loss of 269 innocent lives. One thing, however, is perfectly clear. The military powers of the Soviet Union are responsible for taking the lives of 269 innocent civilians who posed no threat to the security of the Soviet Union. The taking of so many lives, in such fashion can only be described as coldblooded murder.

The Soviet Union believes 269 innocent lives are meaningless when compared to the security of the state. The Soviet leaders refuse to accept responsibility or apologize for their barbarous act, believing they acted in a rational manner, and that other countries would act in the same way. I can only say that this Soviet philosophy is totally backward. Governments are created for the protection of the people, not the other way around. Innocent lives are not expendable on the grounds of national security.

While it is not possible to cut off all relations with the Soviet Union, actions must be taken by all civilized peoples and nations to put the Soviets on notice that their actions are not acceptable to the civilized world. As long as one nation believes innocent lives are expendable in the name of national security, none of us is safe.

I know that the residents of the 15th District of Texas join me in extending sincerest sympathy to the friends and families of all whose lives were so brutally taken by the Soviet Union. In the memory of the 269 who were murdered by the Soviets, it is imperative the civilized peoples of the world take action to put the Soviet leadership and the Soviet people on notice that such action is not acceptable to the rest of the world.

Due to recent abdominal surgery and physician's orders to limit my activities, I regret that I was unable to be on the floor to vote in support of the resolution. Had I been here I would have voted for passage.●

THE 50TH ANNIVERSARY OF THE WALNUT CREEK PROFESSIONAL AND BUSINESS WOMEN'S CLUB

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. MILLER of California. Mr. Speaker, it is with great pleasure that I rise to recognize the achievements of the Walnut Creek Professional and Business Women's Club on the celebration of its 50th anniversary of its founding.

At a luncheon on September 14, 1933, 20 Walnut Creek businesswomen met to "be an organized effort for the good of this community and to create a friendly spirit and better understanding between the businesswomen of Walnut Creek."

The goals of the Walnut Creek Professional and Business Women's Club have been admirably achieved and many businesses have benefited from their efforts. The city of Walnut Creek has profited greatly from the club's service projects, philanthropic efforts, and civic activities.

Over the past 50 years the club has contributed to a variety of worthwhile causes and projects, including food baskets for the needy, the War Relief Fund, the American-Hungarian Relief Fund, assistance to the Alexander Lindsey Museum, Battered Women's Alternatives, scholarships, Walnut Creek Youth Athletics Association, and a host of other endeavors.

The membership has grown steadily over the years and now reflects representation from health services, education, law, banking, retail, communications, consultants, accounting, and many other businesses.

The Walnut Creek Professional and Business Women's Club achievements in community participation are outstanding. These women have helped Walnut Creek develop and grow toward its potential, and I am pleased to bring the work of this club to the attention of the Congress on the 50th anniversary of its founding.●

IN CELEBRATION OF NATIONAL HISPANIC HERITAGE WEEK

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. PATTERSON. Mr. Speaker, I am proud to join my colleagues in paying tribute to the outstanding contributions of our Hispanic brothers and sisters throughout the history of the United States. America would not have developed to its fullest were it not for the strength of the Hispanic community as demonstrated by the leadership of the United Farmworkers founding president, Cesar Chavez, or former longtime MALDEF president, Vilma Martinez.

By applying the principles of self-help, hard work, and compassion for all people, Hispanics have forged landmark changes in our Nation's laws, Supreme Court decisions, and executive policies. To cite just a few of these gains, I recall the positive influence of Hispanic Americans in promoting the passage of the 1964 Civil Rights Act, the 1965 Voting Rights Act and its 1981 amendments, and the 1973 Housing and Community Development Act. Further accomplishments include Hispanic involvement in the creation of affirmative action programs, in extending opportunities and services in higher education, and in public school programs for child nutrition. Hispanic Americans have also played an impor-

tant role in providing for the equitable delivery of services through Legal Aid Societies, community development block grants, HUD low-interest rehabilitation loans and rental assistance, public health services, and employment programs.

Quite obviously, there must be many more Hispanic Americans elected to local, State, and Federal offices in order to achieve true representation in proportion to their population. The congressional Hispanic caucus has long promoted the active participation of Hispanic Americans to affect public policy. In recent years, it has been gratifying to see an increase in the number of Hispanic citizens elected and appointed to serve in public office. This progress must continue.

Over the past few years, there have been many efforts to dismantle programs or rescind laws advocated for and by Hispanics. In addition, those of us committed to these programs have been forced to endure the accusations of adversaries who would believe that progress among Hispanic Americans has been achieved at the expense of non-Hispanics. Decries of "reverse discrimination" and "favoritism" can still be heard. Despite this, many of our colleagues continue to work toward advancing the power, influence, and progress of Hispanic Americans. We claim this goal, because we are aware of the intense poverty and sense of political disenfranchisement which has for so long been forced upon Hispanic Americans. We know that the past gains and achievements of a small number of individuals are not enough. As we stake our hope in future progress, we seek strength in the unity of purpose.

Throughout my tenure in the House of Representatives, and as the former mayor of Santa Ana, it has been my privilege to work with Hispanic representatives from labor, church, small business, and service organizations. I have personally come to know and respect Hispanic womens' advocates, barrio leaders, veterans, armed service personnel, executives, volunteers, youths, and seniors. The inexhaustible dedication of these individuals and their affiliate organizations deserve our greatest esteem.

I reflect fondly on the significant insight that Hispanic Americans have contributed in our national affairs. They have demonstrated that our political system works by affecting positive change. Hispanic Americans have restored hope in the ability of our children to succeed in the next generation, they have given relief to the needy, and they have inspired our faith in the future. Mr. Speaker, it is with great pleasure that I ask my colleagues to join in celebration of National Hispanic Heritage Week and in tribute to Hispanic Americans.●

BIRMINGHAM REMEMBERS

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. ERDREICH. Mr. Speaker, 20 years ago today a bomb exploded in the 16th Street Baptist Church in Birmingham, killing four little girls, and focusing the attention of the Nation on the racial strife in Alabama. Denise McNair, Carole Robertson, Cynthia Wesley, and Addie Mae Collins were innocent victims of the tension that characterized the civil rights movement, and their deaths helped open the eyes of our Nation to the need for justice and equality for all.

An editorial in the September 11, 1983, Birmingham News speaks of that city's remembrance of the past and hope for the future.

The editorial follows:

THE BOMBING

The bombing. No one from Birmingham need ask What bombing? We know, all of us, what bombing.

Twenty years ago next Thursday, it happened. At 10:19 a.m., Sept. 15, 1963, a Sunday, the dynamite bomb exploded at the 16th Street Baptist Church. It killed four young black girls who were in a basement dressing room.

The names of those girls should be important to us all. They were: Denise McNair, 11, and Carole Robertson, Cynthia Wesley and Addie Mae Collins, all 14. They would have been in their 30s now, perhaps married and with children of their own—children approaching their own ages that day when the bombing happened.

But the bombing did happen. It killed them. They are dead and the bombing, ironically, lives on.

It lives, however much we might have tried to ignore or forget it, rationalize it or explain it away. It lives on because it killed four innocent girls and became a symbol of the bitter result of racial hatred.

As a symbol it became ever more potent, even as the act itself was shown impotent. Birmingham became "Bombingham" to much of the world and the civil rights movement used this city as a foil to advance its own principles before the rest of the nation and indeed the world.

That the principles of civil rights should have been advanced is unquestionable; that this city should have suffered, and still suffers, the stain of villainy is another matter.

For the bombing should stand as more than a symbol of racial hatred. There was, and is, more to it than that.

Those who set the bomb were part of it, part of Birmingham. But so were those who died a part of Birmingham. Birmingham was police dogs and fire hoses; but Birmingham was also those who believed enough in what they were doing to face the dogs and hoses. And Birmingham was a larger white community that recoiled in disgust from the confrontations that divided the community, a city that changed its form of government in the midst of chaos in an attempt—too late, perhaps, but still an honest attempt—to change the entire direction in which Birmingham was moving. The commissioners who preached racial intolerance were removed—not by the Justice Department, not by the federal courts, but by Birmingham itself—and replaced by a moderate mayor and council who served their charter valiantly.

Birmingham indeed has changed itself in more than the form of its government. And that, too, is a part of the bombing.

Birmingham was a bi-racial Community Affairs Committee before such groups became standard for many cities. Birmingham was leading white citizens working behind the scenes to bring harmony in place of hatred. Birmingham was black citizens willing to swallow their hurt to work for the good of the city.

And Birmingham is now what it is—not perfect to be sure, but still trying honestly to make things right—in great measure because of the bombing. As Police Chief Arthur Deutsch wrote in a recent letter to The New York Times Magazine in commenting on an article recalling the bombing, "Birmingham is maturing, and because of those deaths has become a better place. The heat from that blast seared many hearts—some forever, but, as in most explosions, there was much light produced."

The fact of the bombing has been something, as much as possible, to forgive and forget. The 1977 conviction of Robert Chambliss for his part in the bombing was of course significant and only right in its rendering of justice, and it is not too much to hope that other convictions may someday follow—if not in the courts, at least in the judgments of history. But the fact of the bombing, in itself, is done and over and can never be changed. As an isolated act, it pales beside the car bombs of Beirut and Northern Ireland and the other acts of terrorism which have become all to common in the world.

The bombing as a symbol—a symbol of the wrongness of hatred, and of how a city can change itself—ought to be kept by us all, however. It ought, indeed, to be a permanent reminder of the wrong that can happen and of the right that can be accomplished by men of good will.

On this 20th anniversary of the bombing, the fact of it and the symbolism of it, it is perhaps time to consider whether we as a community ought to commemorate what happened. At present, the only memorials are at the church itself—a stained glass window (presented by the people of Wales) and a brass plaque that implores, "May men learn to replace bitterness and violence with love and understanding."

There should be more than that. Because we should understand better all of what the bombing meant, the effect it has had on us and the effect it ought to have on us in the future, there should be more than that.

For the bombing was, is and always will be a part of us, a part of Birmingham. We ought never to allow outselves to forget what it taught us.

If Birmingham's very name is to be indelibly written in the minds of millions as a symbol of the struggle for civil rights, why can't Birminghamians build a living memorial to our own unique place in that drama and to the larger lessons for all mankind of the corrosive power of racism and hatred and the healing power of love and justice?

In truth, Birmingham itself is a memorial to some of the most important events and days in our nation's history. Why not say so, not in a spirit of bitterness but in a spirit of hope?

To help accompish the goals stated in that editorial, the Birmingham

News has established a fund called The Memorial Fund for the Children, through AmSouth Bank. This fund will not be used for granite and glass commemorations, but for a living memorial to the power of love and justice. Through no specific plans have been made yet for the use of the fund, many ideas are being discussed: An endowed professorship at one or more of Birmingham's colleges, and a Center for Civil Rights Studies are two possibilities. The city of Birmingham is investigating the establishment of a Civil Rights Museum. All of these are ideas whose times have come, in a city that has learned and continues to learn from its past, and that looks toward the future with a great deal of hope and pride.●

WINDSOR, CONN.: 350 YEARS YOUNG

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mrs. KENNELLY. Mr. Speaker, this September the town of Windsor, Conn., commemorates its 350th anniversary. Windsor claims the distinction as Connecticut's first permanent settlement and can be credited with contributing to much of the State's early history. In 1633, Windsor encompassed an area of over 600 square miles in the Connecticut River Valley from which 20 other Connecticut towns would later emerge.

Windsor was first discovered in 1614 by a Dutch sea captain, Adrien Block, who sailed up the Connecticut River from New Amsterdam—now known as New York—where he found an Indian village at the present site of Windsor. But it was not for 19 years, in 1633, that the first permanent settlers arrived from the colony of Plymouth, led by Lt. William Holmes. These pilgrims were later to be joined by Puritans who found their way to Windsor from England in 1635.

During Windsor's first few years as a community, no formal governmental institutions existed. Instead, the settlement relied on the cooperation of its citizens and upon the authority of leaders from church organizations and schools. It operated according to traditional customs rather than through laws.

However, as the town and the surrounding communities of Hartford and Wethersfield developed, so too did the need for a civil government. Thus, in 1636 the three towns established a commission in order to hold a meeting. Windsor's Robert Ludlow presided over this meeting as the General Court's elected President, thereby performing the duties of a State Governor. It was Ludlow and this court who would be ultimately responsible for instituting Connecticut's famed "blue laws" which sought to regulate behavior on the sabbath. From these meetings also emerged the Fundamental Orders of Connecticut, a document which formed the basis of Connecticut's founding and later to be used as a model for the U.S. Constitution.

This general court, as the State Legislature was initially called, proclaimed the right of each town to self-government. Windsor organized a selectman type of government which later evolved into the council-managerial form of local government which exists in Windsor today.

Windsor, over its 350 year history, has witnessed much progress and change, yet it has long been established as a model community in Connecticut. Beginning with its founding in 1633, and continuing through to the present, the residents of Windsor have always exemplified a strong sense of community and pride in their accomplishments. This spirit, which was kindled in colonial times, still exists today, as Windsor continues to improve the quality of life for its 25,000 citizens. Windsor is a dynamic community whose rich history has contributed to the benefit of all those who reside in the Connecticut River Valley.

I am honored to congratulate Windsor on the 350th anniversary of its founding and to share my exuberance in their celebration of this event.●

RECOGNITION OF NEW YORK STATES' SHCHARANSKY DAY

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. DOWNEY of New York. Mr. Speaker, I rise today in recognition of Anatoly Shcharansky, who has today reached the half-way point in his cruel and unjust sentence of 13 years in Soviet prisons. Shcharansky's sentence contradicts even minimum international standards of justice; he sought only to work and speak out for the right of emigration of Soviet Jews and the right to live out the lives of their forefathers. It is, then, our duty today to restate our outrage at this continued moral travesty. I commend Gov. Mario Cuomo for his recognition and designation of September 15 as "Shcharansky Day" in New York State and hope that his leadership in the field of human rights becomes a model for all public officials.

Today I repeat the facts of Shcharansky's saga as I will continue to do until this wrong has been righted. Our pressure must remain undaunted because our determination continues to be resolute.

On March 15, 1977, the Soviet KGB arrested the then-29-year-old Russian Jew. His arrest was the culmination of a series of confrontations with Soviet authorities. Five years earlier, Shcharansky—who had studied computer technology and its application to chess—had applied to Israel. His application was denied on what many regard as spurious grounds—"national security". But the technology to which he had access was primitive, widely known and, by now dated. In July 1974, he sought to marry his fiancee on the eve of her departure to Israel. A religious ceremony was conducted after it proved impossible to obtain formal state approval.

After a 1977 Soviet television broadcast labeled him and others as "Soldiers of Zionism," Shcharansky courageously began a series of legal attempts to demonstrate that Soviet authorities had broken their own laws which prohibit anti-Semitism and slander. He took authorities to the People's Court.

Shcharansky also had the courage to take seriously the Soviet Union's legal obligations under the Helsinki accords. He, along with several other dissidents, joined together to form a public action group for the implementation of the Helsinki agreement in the U.S.S.R. Taking the Soviet provisions of law guaranteeing freedom of speech seriously, he began to serve as unofficial spokesman for the Jewish emigration movement.

Soon after he became a member of the Helsinki Watchdog Committee in 1976, the KGB increased their pressure against him. Beginning in March 1977, Shcharansky was held under constant KGB guard with six to eight agents following him, under full-time surveillance.

Shcharansky was arrested on March 15, 1977, and, after almost 16 months held incommunicado, Shcharansky was tried on July 10. Charged with treason and espionage, Anatoly Shcharansky was sentenced to 13 years.

Mr. Speaker, in Anatoly Shcharansky's 6½ years of sentence he has suffered from brutal conditions and a hunger strike that recently brought him to near death. The movement he so poignantly symbolizes has suffered a similarly tragic recent history.

Emigration for Soviet Jews is now at a trickle and anti-Semitic activities by Soviet authorities have been on the rise. I therefore ask my colleagues to continue to bolster the unshaken commitment of Soviet Jews; a spirit well symbolized in the brave words of Shcharansky's wife, Avital:

> Over the footsteps of the jailers and over the clang of the iron gates being shut closed, we can hear the call of our prisoners in Soviet Russia: "Next Year in Jerusalem! Next year in Jerusalem!"●

COMMENDING CAPT. GEORGE L. DUPOUY UPON THE OCCASION OF HIS RETIREMENT

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. MILLER of California. Mr. Speaker, George L. Dupouy of the Concord Police Department has served his community with great dedication and distinction, and is deserving of special recognition and the highest commendations upon the occasion of his retirement.

Captain Dupouy joined the Concord Police Department on May 1, 1952, as a police officer, was promoted to the rank of sergeant in 1955, was elevated to lieutenant in 1960, and was assigned as a captain in 1963.

He has, over the years, commanded all divisions of the department and guided the department in its growth from a complement of 7 men to the 126-man department it is today.

Captain Dupouy was one of the founding members of the Concord Police Association and served as its president in 1957.

As a member of the military police during World War II, he served his country as a member of the 9th Army, in England, France, Belgium, Germany, and the Philippines.

Mr. Speaker, the people of Concord are fortunate to have been served by a law enforcement officer of the stature of Capt. George L. Dupouy, through whose efforts that community has been made a safer and more desirable place in which to live.

I know that all Members of the House of Representatives join me in honoring Captain Dupouy for his many years of dedicated service to law enforcement and to the people of Concord.●

WRITE TO PRESIDENT ANDROPOV TO SEEK THE RELEASE OF MR. SHCHARANSKY

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. OWENS. Mr. Speaker, today marks 6½ years of imprisonment for Anatoly Shcharansky who is serving a 13-year sentence in the Soviet Union. Governor Cuomo of New York has made the following proclamation urging the release of Mr. Shcharansky and all prisoners of conscience in the Soviet Union. I urge all of my colleagues to write to President Andropov to seek the release of Mr. Shcharansky.

PROCLAMATION

Whereas, Anatoly Shcharansky has been in prison for six and one-half years; and

Whereas, in all those years he has been isolated from his wife and family and has gone on a four month hunger strike to protest his isolation which resulted in the serious deterioration of his health; and

Whereas, Anatoly Shcharansky is a symbol of all prisoners of conscience in the Soviet Union; and

Whereas, Soviet law makes it possible for a prisoner to be released after the completion of half of his sentence and this will fall on September 15th,

Now, therefore, I, Mario M. Cuomo, Governor of the State of New York do hereby proclaim September 15, 1983

ANATOLY SCHCHARANSKY DAY in New York State and call upon the President of the Soviet Union Yuri Andropov to release Anatoly Shcharansky from prison so that he may rejoin his wife in Israel.

I ask all citizens of our state to use this occasion to write to President Andropov to appeal to him to free Anatoly Shcharansky, as well as all other prisoners of conscience whom he symbolizes.

It is my sincere hope that President Andropov will take this opportunity to respond to the plight of Anatoly Shcharansky and his family as well as to the plight of other prisoners of conscience in the Soviet Union.●

H.R. 1036, THE COMMUNITY RENEWAL EMPLOYMENT ACT

HON. FORTNEY (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. STARK. Mr. Speaker, I am pleased to join my colleagues in voicing support for H.R. 1036, the Community Renewal Employment Act. Mr. HAWKINS, a senior Member of my State's delegation has put many hours of work into this effort, and the passage of this bill is long overdue.

I am tired of the President's proclamations that we are well on our way to recovery. Labor Day 1983 brought news of still high unemployment rates, and the necessity for legislation such as H.R. 1036 remains critical.

This bill will provide job opportunities to unemployed workers in high unemployment areas through grants to local governments for labor costs associated with the repair of public facilities, conservation of public lands, and for public safety activities. Members of this House have long recognized the need to maintain our infrastructure and to conserve our public lands. For many years, and certainly since the passage of the Humphrey-Hawkins bill, again with the senior Member of California's delegation as a leader, we have recognized that it is in the interest of our entire Nation, that each and every American be given the opportunity to have a job. Jobs, Mr. Speaker, jobs are what America needs, not more administration rhetoric. This bill is a good start—a needed start. I am pleased to be a cosponsor of this legislation and I urge the support of this House.●

THE PLIGHT OF SOVIET JEWS

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Ms. FERRARO. Mr. Speaker, on this day exactly 6½ years ago, the gates of Chistopol Prison closed on Anatoly Shcharansky.

Since then Shcharansky has endured hunger, brutality, and separation from his family—all for the crimes of speaking out on Soviet policies toward Jewish citizens and seeking to join his wife Avital in Israel.

Soviet disregard for basic human rights—so shockingly shown by the recent downing of a civilian passenger plane—comes as no surprise to those of us who have taken a special interest in the plight of Soviet Jews and other ethnic minorities in the U.S.S.R.

True, the Soviets participate in international human rights fora, such as the Madrid Conference, and sign their names to human rights documents. Meanwhile, Shcharansky and 18 other Jewish Prisoners of Conscience are imprisoned and just 865 Jews have been permitted to leave the U.S.S.R. this year.

I join today with Governor Mario Cuomo, who has proclaimed this Anatoly Shcharansky Day in New York State, and with other Members of this House in urging the Soviet Government to at last release Shcharansky. He has served half his term, he is weakened by a hunger strike and is in failing health. It is legally and morally imperative that Anatoly Shcharansky be freed.●

EQUITY CAPITAL FORMATION INCENTIVES ACT OF 1983

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. MARKEY. Mr. Speaker, in this session of Congress, a myriad of bills to spur capital formation have been introduced. Most of these bills focus on individual investors or on the businesses in need of this capital.

Substantially ignored in this process, however, are the crucial financial intermediaries—the capital markets around the country that match investors with businesses. For some, these markets still work. But for small, newer firms these markets have failed. That is why I am introducing the Equity Capital Formation Incentive Act (ECFIA) of 1983 today.

New and small firms searching for needed capital complain of many problems. Several legislative proposals are pending to provide needed R&D funds, while others encourage the provision of venture capital. But more often than not, emerging firms find that funding for the next stage—commercialization—is lacking. These firms often need $2 million to $5 million to get their manufacturing of a new product off the ground.

Traditionally, our economy has handled such needs. Firms wanting equity capital approached a local stock trader—known as a market maker—and asked him to offer equity or stock shares in his firm through one of the stock markets. Such initial offerings usually raised $2 million to $5 million in shareholder investments.

Capital markets have changed. Now, the number of market makers is the smallest ever in recent history. While the current surge in the stock market has increased the number of securities firms generally, the number of market makers has remained on the decline. Over the past 15 years, the number of market makers in the country has almost been cut in half. Today, 13 States have no market maker headquartered within its borders, while another 10 States have only one or two market makers.

Like many other industries, the securities industry has witnessed a concentration of market power in a few large firms. These firms are uninterested in doing the needed research and taking the needed risk to bring a small or new business to the market for capital. Therefore, as regional market makers have decreased in number, so too has access to equity capital for new firms. In 1969, nearly 700 small firms (worth $5 million or less) were able to obtain capital by selling stock to the public. Since 1975, that number has dropped to an average of 20 per year.

Why are market making incentives needed? Simply put, market making is a risky business. A market maker must know a firm well, for if it brings the firm to market, it is bound to subsequently repurchase stock offered for resale by investors if no other buyer can be found. Thus, market makers—key links in the chain of capital formation—expose themselves to the risk of being stuck with a large investment in unsuccessful stock ventures. That is what ECFIA is all about.

ECFIA would provide a 10-year, tax deferred reserve for the profits made by securities firms and market specialists in the trading of small business equities. The reserve would allow these firms to accumulate funds to cover future losses in market-making activities. Taxes on the reserve would be deferred for 10 years at the maximum—though profits would be liable to taxation whenever they are withdrawn.

A study of ECFIA done by the National Association of Securities Dealers (NASD) suggested that it would channel approximately $180 million a year in capital to new and small businesses. NASD also estimates this would create annually 25,000 to 30,000 jobs across the country. The tax deferral is estimated to be $35 million, or only $1,300 per job created in the private sector.

When ECFIA was introduced in different forms in previous Congresses, it received support of small business people, high technology firms, and securities firms across the country. They recognized the value of providing incentives for market making activities, and the vital role such activities could play in rebuilding our economy.

ECFIA can be an important part of an overall industrial policy being considered in the Congress. More importantly, it is an initial step to spur capital formation for productive, employing businesses that need funds for commercialization and production.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. CORCORAN. Mr. Speaker, due to previous commitments, I was not present and voting in the House on the following matters:

TUESDAY, SEPTEMBER 13

On agreeing to the Journal of Monday, September 12. Had I been present I would have voted "yea."

On an amendment to H.R. 3520 that sought to strike language modifying authorization levels for nonrehabilitation programs—strike title IV of the bill—paired for.

On an amendment that changes the formula for distribution of low-income energy assistance to States, paired for. As a member of the Energy and Commerce Committee, I worked to change this formula so that a more equitable allocation of funding would occur.

On a motion to recommit H.R. 3520, Rehabilitation Act of 1973 with instructions, paired for.

On final passage of H.R. 3520, paired against.

THURSDAY, SEPTEMBER 15

On agreeing to the Journal of Wednesday, September 14. Had I been present, I would have voted "yea."●

ACID RAIN

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. DONNELLY. Mr. Speaker, today I have introduced legislation which will have an immediate effect on an ongoing problem which has been debated in the Congress over the past 5 years. While most of us agree that something must be done to solve the problems created by acid rain, no steps have been taken due to the inability of the Congress to move a clean air bill.

The legislation I have introduced will bring about a temporary mitigation of this problem. This proposal will add a new section to the Clean Lake Act and authorize $25 million annually to assist States in restoring water quality which has deteriorated as a result to acid deposition. My proposal will provide up to 80 percent of the cost of neutralizing the acidity in lakes. These funds can only be used for the actual materials and work involved with the neutralization and will not subsidize any ongoing field work.

I would like to point out that this is only a temporary solution and future legislation which would control emissions is necessary. However, Federal assistance is essential. In Massachusetts, 82 percent of the lakes and streams tested have proved sensitive to acid rain. Fish loss has been documented and entire species of fish have disappeared. A conservative estimate of current loss due to fisheries damage in New York and New England is between $20–$50 million. This is small when compared to the potential loss which could occur in our aquatic resources.

Mr. Speaker, if we do not take action to bring this problem under control, we take the chance of losing one of our most valuable natural resources.●

IN HONOR OF ANATOLY SHCHARANSKY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. GARCIA. Mr. Speaker, today is the midpoint of Anatoly Shcharansky's prison term. His health is reported to be in poor condition, there is no sign that he is about to be released, and the imprisonment of his fellow Soviet Jews continues.

Yet, this should be looked upon as more than a moment of sorrowful meditation. It should be, instead, viewed as a moment to celebrate the strength and courage of this brave in-

dividual. His continued survival is symbolic of his victory over those who would break his spirit. He is the one who is winning, not the Soviet authorities.

The present Government of the Soviet Union does not seem to realize that it cannot eliminate those brave dissidents who oppose them by putting them in prison or mental wards. They will not be silenced. Never again will Soviet Jews be forgotten or ignored. Those of us who are remembering men like Anatoly Shcharansky will see to that. We will help him in his fight.

There is a bravery and a spirit within the dissident community that goes beyond even the power of the Soviet Government. There is nothing they can do that will change this. Anatoly Shcharansky is living proof of this strength and determination. I pause today not to mourn him, but to celebrate in his continuing victory.●

THIS IS SHCHARANSKY DAY—ACT FOR FREEDOM

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. LENT. Mr. Speaker, I wish to call to the attention of my colleagues the fact that in my home State of New York, Gov. Mario Cuomo has proclaimed this day, Thursday, September 15, 1983, Anatoly Shcharansky Day.

The Governor's action was taken in recognition of the fact that today marks the half-way point in the harsh 13-year prison sentence inflicted upon Anatoly Shcharansky, an innocent victim of the Soviet Union's anti-Semitic persecution. For 6½ years this courageous prisoner of conscience had endured constant harassment. For the past 18 months, the KGB, the Soviet secret police, has attempted to extract a confession from Shcharansky that the Jewish emigration movement does not exist. But, despite suffering physical deterioration, Anatoly Shcharansky persist in declaring the truth: Thousands of Soviet Jews are seeking the freedom to practice their religion in the country of their choice.

Earlier this year, on an offical congressional visit to the Soviet Union to meet with the Soviet officials participating in arms control talks, I had the opportunity to talk with Leonid Shcharansky, Anatoly's brother. His message was: "Carry the story of this heartless persecution to every American. Keep working for us, you are our only hope."

We need to do more to combat the tragic persecution the Soviet leaders are inflicting on the Soviet Jews. Only a few hundred Jews have been permitted to emigrate from the Soviet Union this year. In 1979, more Soviet Jews emigrated each day than have been permitted to leave in any month this year.

We must do everything within our power to open wider that door to freedom, and to help the Prisoners of Conscience. On this day I am writing President Reagan urging his personal intervention on behalf of Anatoly Shcharansky, and to Yuriy Andropov demanding that he order the immediate release of this innocent victim of persecution.

I request that my colleagues join me in this important effort. We must do more for Anatoly Shcharansky, and other Prisoners of Conscience and for all Soviet Jews desiring their freedom. Please make a personal plea to President Reagan and to Yuri Andropov.

Many thousands of Soviet Jews are looking to us for support.●

ANATOLY SHCHARANSKY DAY

HON. WILLIAM CARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. CARNEY. Mr. Speaker, today has been officially designated as Anatoly Shcharansky Day in New York State. I join with the people and elected officials of New York in marking this day as an expression of our solidarity with Anatoly Shcharansky in his struggle for freedom, and in protest of the Soviet Government's inhumane abuse of his basic rights.

Anatoly Shcharansky is a prisoner of conscience. He was jailed by Soviet authorities in 1978 on charges of treason and anti-Soviet agitation and propaganda, and was sentenced to 13 years in labor camp. His only real crime was expressing his religious and political beliefs and his desire for freedom. For this he has been isolated in prison, where his health has deteriorated, and denied contact with his family.

Mr. Speaker, by shooting down an unarmed civilian aircraft, the Soviet Union has brutally reminded the world of their government's disregard for human life. Now, more than ever, it is imperative that we remember Anatoly Shcharansky, all Soviet Jews, and everyone who has been unjustly denied their freedom by the Soviet Government.

Today marks the exact halfway point in Anatoly Shcharansky's prison sentence. A sentence that should never have begun at all. Today is a day for all free people to call upon the Soviet leaders to release him, and all those that he has come to symbolize. I call on my colleagues and their States to join New York in remembering Anatoly Shcharansky and working for his freedom.●

WORLD SERIES DRAWS NEAR

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. CLINGER. Mr. Speaker, as the World Series, the annual fall classic to crown professional baseball's No. 1 team draws nearer, I would like to take time to recognize a baseball team which can already claim to be No. 1—the DuBois Little League All-Stars. This outstanding DuBois ball club captured the 1983 Pennsylvania Little League All-Star title.

This marks the third State crown that the DuBois Little League system has produced since 1971. This year's team, coached by Bill Nesbith and Ron Maietta, bettered seven other Pennsylvania All-Star teams to earn the championship. These 11- and 12-year olds then went on to defeat New York's best before losing in 11 innings to New Jersey in the eastern regionals for the national championship.

Also, I would like to take this opportunity to commend the DuBois community on the efforts they put toward this championship. The friends of the DuBois All-Stars contributed all the funds necessary to pay the team's traveling expenses. In addition, business sponsors made it possible for two local radio stations to bring the play by play of all eight games into the living rooms of hometown fans. Upon the team's return home, they were greeted by 200 of these fans including two fire engines which paraded them through town.

It is my honor, Mr. Speaker, to commend the town of DuBois and their Little League All-Stars. They are an example of the dedication, sportsmanship, and teamwork of which champions are made.●

HELPING TO SAVE THE BAHAIS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. STARK. Mr. Speaker, today I am introducing a bill which concerns the plight of the Bahais in Iran. This bill directs the U.S. Ambassador to the United Nations to introduce a resolution that calls for the Iranians to cease their persecution of the Iranian Bahais and calls for the Iranian Government to let all those Bahais, who desire, to emigrate from Iran.

The Government of Iran since 1978 has rekindled their oppression of the Bahai people. It has tortured and killed the people of the Bahai faith, has jailed Bahais unjustly, has confiscated and shut down Bahai holy places

and other community property, has refused to recognize Bahai marriages, has banned Bahai meetings, has dismissed Bahais from public and private employment, has destroyed Bahai homes, businesses, and cemeteries, and has harassed and/or assaulted Bahais throughout the country.

This terrorist government, by refusing to allow Bahais to freely emigrate, does not allow the Bahais to flee from the barbaric treatment they receive, but instead forces them to accept this punishment or else to recant their faith.

I have already introduced the bill, H.R. 2778, which states that no growth or product of Iran shall be imported into the United States until the persecution of the Bahias ceases. I am now introducing this bill because the Bahai bloodbath is not an issue that only Americans find outrageous; it is a gross violation of human rights which all moral and just people throughout the world condemn. I believe a U.N. resolution is a good place to begin to show publicly this condemnation.●

ACCOMPLISHMENTS AND ACHIEVEMENTS OF ROBERT E. BORSTELMANN

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. SCHEUER. Mr. Speaker, it is my pleasure to call to the attention of this Congress and our Nation the accomplishments and achievements of Robert E. Borstelmann, vice president, EXTEBANK, officer in charge of its home office in Stony Brook and Branch Administrator. In honoring Bob Borstelmann with the first annual Good Scout Award of the Nathaniel Woodhull District, Suffolk County Council of the Boy Scouts of America, the very finest qualities of leadership and excellence in community service are being recognized.

Mr. Speaker and my distinguished colleagues, in these times when our Nation's young people seek direction and leadership, the contributions of Bob Borstelmann stand for more than just his service to the Boy Scouts of America. Bob Borstelmann's lasting service will be the inspirational dedication he demonstrates in his work. The example he sets for his fellow citizens can be followed in every course of action.

I have spoken on the floor of the House of Representatives on many occasions on behalf of the interests and concerns of the citizens of New York State. It is, indeed, a particular pleasure for me to speak of the great contributions of one of our leading citizens in calling the attention of the Congress to the work of Robert E. Borstelmann.●

SUPPORT BUILDS FOR SHELBY SUBSTITUTE TO H.R. 2350—NIH REAUTHORIZATION

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. BROYHILL. Mr. Speaker, yesterday my friend and colleague, RICHARD SHELBY of Alabama submitted for the record an amendment in the nature of a substitute that EDWARD MADIGAN and I will join him in offering to H.R. 2350, the Health Research Extension Act of 1983, when it is considered by the House. The Shelby substitute reathorizes for 3 fiscal years the National Cancer Institute, the National Heart, Lung, and Blood Institute, the Medical Library Assistance Act, and the National Research Service Awards at the same funding levels in H.R. 2350, the Waxman bill. The amendment also includes the creation of a new National Institute of Arthritis and Musculoskeletal Disease and an authorization for 25 centers for research and demonstration of health promotion and disease prevention.

Endorsements for the substitute have been received from: American Medical Association, Association of American Medical Colleges, Association for Academic Health Centers, Federation of American Societies for Experimental Biology, American Society for Microbiology, National Society for Medical Research, American Physiological Society, American Federation for Clinical Research, the American Institute of Biological Sciences.

The membership of these organizations represent the many educators, researchers, physicians, and scientists who are directly engaged in the biomedical research activities of National Institutes of Health (NIH). These organizations believe that the current statutory authority which governs NIH activities has been effective in funding our Nation's biomedical research endeavors and has served the public well. Therefore, they oppose the significant changes to NIH structure, the many line-item authorizations for research in specific disease areas, and the detailed administrative mandates which comprise H.R. 2350.

Sidney F. Phillips, M.D., professor of medicine, Mayo Medical School, Mayo Clinic recently wrote me to express his opposition to H.R. 2350. I believe he clearly explains what I believe to be the fundamental failings of the Waxman bill.

The letter follows:

MAYO FOUNDATION,
Rochester, Minn., August 24, 1983.

Hon. JAMES T. BROYHILL,
Rayburn House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE BROYHILL: I am writing in regard to a House of Representatives bill sponsored by Henry A. Waxman (HR 2350) and to a competing bill sponsored by Reps. Broyhill and Madigan. It refers to funding mechanisms for the National Institutes of Health.

I wish to oppose the concept of Representative Waxman's bill most firmly, and to suggest that you consider adopting a similar view. I state this opinion from the position of one who has been closely involved in, and supported in part by funds appropriated for, biomedical research for 20 years.

It is perhaps no surprise that the legislative arm wishes to exercise control over the National Institutes of Health. These are, indeed, public monies which are used to support biomedical research and complete accountability must be ensured. On the other hand, it must be recognized that scientific endeavor is often balanced delicately between those forces generated spontaneously within the scientific community and the more practical or targeted research goals which are imposed externally. Some feel that the ability of the National Institutes of Health to survive, and even prosper, in the face of being used for political purposes at other times is a source of encouragement.

Surely, the lessons of the past should be obvious. The targeted efforts directed towards heart disease and cancer by previous administrations have not been notable successes. On the other hand, the federal government in its wisdom places the administrative authority for the National Institutes of Health in excellent hands. The NIH system of peer review, which all will admit is not without its flaws, has nevertheless been a model for the rest of the scientific world. We thus have as administrative leaders the most accomplished of our professions, aided, extended and monitored by the most able of external reviewers. In all good sense, we must leave well alone since it seems extremely unlikely that the present format can be improved upon; however, further meddling, such as exemplified in HR 2350, has the capability of doing great harm to a most important federal program.

I urge you to what you can to defeat this bill and not to tamper further with the National Institutes of Health. Further, I would hope that you would support the maximum level of reasonable support for biomedical research. We have lead the world in this model, but many of us fear that uninformed, misdirected, though well intentioned political pressures are about to destroy yet another of the models of which this country can be justly proud.

My reactions are strong, but I feel the issue is an important one.

Respectfully yours,

SIDNEY F. PHILLIPS, M.D.

In conclusion, I can only stress to my colleagues my firm belief that H.R. 2350 fails to recognize the fundamental nature of the research activities funded by the National Institutes of Health. Enactment of this legislation could seriously jeopardize the ability of NIH to assure that funding is: First, allocated to science of the highest quality; and second, directed to the most promising research leads. The Shelby substitute significantly increases funding, while assuring that inordinate restraints are not placed on the NIH so that it may effectively capitalize on scientific opportunities which may lead to improved methods

for the prevention, diagnosis, and treatment of human disease.●

TRIBUTE TO REV. J. ISAIAH GOODMAN

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. TORRICELLI. Mr. Speaker, I rise today to pay tribute to Rev. J. Isaiah Goodman, D.D., of the First Baptist Church of Englewood, N.J. For 35 years as pastor, Reverend Goodman has committed himself to service to his community and service to his fellow mankind. During those years he has brought new spirit and growth to his congregation and new prosperity to his church.

Perhaps one of his greatest, and lasting, achievements during those 35 years has been the creation of a health center in Haiti for the sick and elderly. This Center serves as a symbol of his devotion and compassion for people, not only in Bergen County, but around the world.

This Saturday, September 17, I will attend an anniversary celebration in Reverend Goodman's honor. At the same time we will be commemorating the 90th year of the church he has served with distinction for so many years.

I am proud to have the opportunity to join with him and his friends and admirers in this time of celebration. I wish to extend my best wishes to him and his congregation for continued growth and prosperity in the years to come.●

ANATOLY SHCHARANSKY DAY

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. SCHUMER. Mr. Speaker, 6½ years ago, Soviet Jewish dissident Anatoly Shcharansky was sentenced to 13 years in prison. What was his "crime"? Mr. Shcharansky was protesting Soviet human rights violations and was insisting that the Soviet Union honor its commitment to allow Soviet Jews to emigrate.

Today marks the halfway point in Mr. Shcharansky's jail sentence. To help bring attention to Mr. Shcharansky's plight and the plight of all Soviet Jews, I am honored to join with Gov. Mario Cuomo in declaring September 15 "Anatoly Shcharansky Day."

Midpoints often coincide with crisis. After 78 months of brutal oppression—months which have included long stretches of solitary confinement, inhumane living conditions, and a near-fatal hunger strike waged to regain his right to communicate with his family—he stands no closer to freedom; he remains a prisoner of conscience, and a vivid reminder of the Soviet Union's continued disregard for human dignity and human rights.

Anatoly Shcharansky's imprisonment must serve as a reminder of other instances of Soviet oppression. Recent examples of Soviet brutality—the shutdown of Soviet Jewish emigration, the creation of the Anti-Zionist Committee, the steady drumbeat of anti-Semitic propaganda, and the Korean Air Line tragedy—do not bode well for Soviet Jews. But though the prospects may appear dim, we must never falter in our insistence on justice for Soviet Jews, our demands that Soviet action live up to Soviet rhetoric, and our determination to seek freedom for Soviet Jews.

Anatoly Shcharansky still needs our help. We must not fail him.●

LEV ELBERT

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 15, 1983

● Mr. SYNAR. Mr. Speaker, many of you are aware of the difficulties that Soviet Jews encounter when they try to emigrate out of the Soviet Union. Lev Elbert, of Kiev, is a 35-year-old engineer who has attempted to emigrate to Israel for the last 9 years. Recently, his efforts to emigrate have resulted in being sent to prison camp for a year. In addition, he has been accused of other "crimes" which could result in a longer sentence.

When I returned to my district for the August recess, a number of my constituents brought Lev's case to my attention. The Oklahoma Commission for Soviet Jewry and I decided that we would try to telephone Lev's family to express our solidarity with them. As many of you are already aware, it is extremely difficult to get a call through to the family of a Soviet Prisoner of Conscience (POC). Whether or not our call was completed, we felt that the attempt alone would let the Soviet Government—which monitors the telephone lines to POC's—know that the Elberts have support in the United States. To our astonishment our call got through. The conversation with the Elberts was one of the most moving moments of my life and I did like to share with you some of its highlights.

The call was placed at 8:30 p.m., September 6, 1983, from south Tulsa, Okla. Lev's brother, Michael, spoke excellent English. The following are the highlights from that conversation:

MICHAEL ELBERT: Inna (Lev's wife) wants to especially express her gratitude for all that you've done for her husband, and her family, and she is confident that finally the troubles of the trial, and the prosecuting authorities will find that my brother is not guilty . . . and I suppose everything will be O.K.

MIKE SYNAR: Please give the family our deepest regards, and tell her that as a United States Congressman, I want her to know that the Congress is deeply interested in Lev's condition, and, whether or not he will be released from prison . . . Congressmen throughout this country are going to be following the actions of the authorities and their treatment of Lev within the prison.

After wishing the Elberts a happy Rosh Hashanah, Michael had the following very moving message:

MICHAEL ELBERT: Go and pray for the release of my brother and for the release of all the other innocent suffering people. Pray that this year will be the year of our deliverance, and that we will join our family, our brethren, in the land of Israel.●

SENATE—*Monday, September 19, 1983*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

For Thine is the kingdom and the power and the glory forever. Amen.

Father in heaven, at a time when international relations are strained to the breaking point, when there is so much division in our land among the people as well as the leadership, when almost any proposal will find strong advocacy and fierce opposition, we need a visitation of God upon us. I pray for an unprecedented manifestation of the power and the glory of God upon our city. May each office on Independence Avenue, Constitution Avenue, and Pennsylvania Avenue experience Thy presence and love.

Grant, dear God, that every Member of Congress and every Senator will somehow be made aware of the reality of God in his heart and his home. May every person who works on the Hill feel the presence of Almighty God in some undeniable, unforgetable way. Make Thyself known to us in sovereign wisdom and power, Lord Jehovah. In Thy name and for Thy glory. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE CHAPLAIN RETURNS WITH VIGOR

Mr. BAKER. Mr. President, let me first say that I am happy this morning to hear that there is renewed strength and vibrance in the tone of our distinguished Chaplain who has recently been ill but is so unmistakably recovering from that illness and shows his characteristic strength and enthusiasm in his prayer this morning.

I take great pleasure in seeing and observing that the Chaplain is making a quick and prompt recovery in regaining his strength, and we are happy to have him back with us and to see his health improved.

Mr. BYRD. Mr. President, will the majority leader yield when he has finished on that subject?

Mr. BAKER. I yield.

Mr. BYRD. Mr. President, I wish to share with the majority leader my own pleasure and relief in seeing our good Chaplain back praying daily in the Chamber as we meet.

He is a true friend of mine, because we have had some personal exchanges on matters in which he has been very, very helpful, and I am grateful that he is back and recovered.

I wish him well and express the deep hope and wish that he not have any further problems.

I thank the majority leader for yielding.

Mr. BAKER. I thank the minority leader.

SENATE SCHEDULE

Mr. BAKER. Mr. President, today after the period for the transaction of routine morning business the Senate will resume consideration for the Interior appropriations bill. I am tantalized by the prospect that we may be able to finish that measure today, but that may prove to be an idle hope.

In any event, I urge Members to try to work out their differences on this measure and to get on with the business of passing this regular appropriations bill where there are so many other things that must be dealt with this week.

Mr. President, I will try to have a further report on the outlook for that measure later in the day.

In addition to the Interior appropriations bill, it is possible that we will try to do the Export-Import Bank bill, the revenue-sharing reauthorization bill, the Martin Luther King holiday bill, and there may be other measures that can be reached, but in any event, it is going to be a full week, and I urge Senators today, on Monday, the beginning of this week, to assume that we will be in for 5 full days.

I do not expect the Senate to be in late today. I do expect, however, that it will be a full day and that rollcall votes will occur later in the day. I do not anticipate that before midafternoon, however.

Mr. President, I believe that is all I have to say in leader time this morning, and if there is any further statement I need to make I can make it during morning business or I am sure I can arrange to do it in sequence during the day.

Therefore, Mr. President, I offer the remainder of my leader time to the distinguished minority leader if he wishes.

Mr. BYRD. I thank the distinguished majority leader. I will accept the time which has so graciously been offered.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. GORTON). The minority leader is recognized.

Mr. BYRD. How much time do I have?

The PRESIDING OFFICER. The Democratic leader has 13 minutes.

Mr. BYRD. I thank the Chair.

BACK TO SCHOOL

Mr. BYRD. Mr. President, it is "Back to School" time. All over America, students are returning to the classroom. They are eager and expectant: Eager to get started, to see old friends and meet new ones, to meet their teachers, and to find their classrooms. They are filled with expectations about the coming year. Some may expect a challenging and rewarding learning experience; some may expect to acquire new skills, new facts, and figures; some may expect merely to put in their time. Their parents and all of us concerned with education in this country are also not only eager but also anxious and expectant. We are anxious that our children receive the very best education possible. We have expectations that such an education will equip our children—and when I say "our children," I include grandchildren, with the knowledge and skills to lead productive and happy lives.

Those of us who have great expectations about the future of our children and grandchildren have been greatly affected by the recent reports about the status of public education in our country. We want to understand what is happening in education, what has caused it, and, most importantly, what we need to do to make our public education system the very best it needs to be.

The President's National Commission on Excellence in Education, reporting to the President in April, found that:

> The educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our very future as a nation and as a people.

The Commission recommended a number of steps that should be taken to stem this tide:

High school graduation requirements should be toughened by requiring 4 years of English, 3 years of math, 3 years of science, 3 years of social studies, and a half year of computer science. Most States currently require fewer years in each area.

I thoroughly agree with that recommendation. I think that the future strength, security, and well-being of our Nation will depend upon a toughening of those requirements, and specifically with reference to English, math, and science.

Students should be assigned far more homework.

School districts and State legislatures should strongly consider 7-hour school days and a 200- to 220-day school year.

Firm and fair codes of student discipline should be established and consistently enforced.

I think that is an excellent recommendation. It is obvious that discipline in the schools, at least in a lot of these schools, has slipped a long way from what it used to be.

Pay for teachers should be increased.

Persons preparing to teach should be required to meet high educational standards and demonstrate competence in their academic disciplines.

School boards, administrators, and teachers should cooperate to develop career ladders for teachers that distinguish among the beginning instructor, the experienced teacher, and the "master teacher".

The 20th Century Fund Task Force on Federal Elementary and Secondary Education Policy reported this spring that:

> By almost every measure—the commitment and competency of teachers, student test scores, truancy and dropout rates, crimes of violence—the performance of our schools falls far short of expectations.

The task force makes several recommendations, the majority of which are focused on the role of the Federal Government in education. Some of those recommendations include:

Establishing a national master teachers program, funded by the Federal Government, that recognizes and rewards teaching excellence.

That the Federal Government promote and support proficiency in English for all children in the public schools, but especially for those who do not speak English or have a limited command of it.

That every American public school student should have the opportunity to acquire proficiency in a second language.

That the Federal Government emphasize programs to develop basic scientific literacy among all citizens and to provide advanced training in science and mathematics for secondary school students.

Continuing Federal efforts to provide special educational programs for the poor—and for the handicapped.

That categorical programs required by the Federal Government should be paid for from the Federal Treasury.

Establishment of special Federal fellowships to school districts to enable them to create small, individualized programs to provide the alternate learning environments that some children seem to need.

The Carnegie Foundation issued a report in late August on the condition of teaching in America. The findings in the report:

> Make clear that the teaching profession is in crisis * * * poor students are going into teaching, teacher pay has actually declined in relation to other professionals and public employees, credentialing is a mess, and teachers do not receive adequate recognition and reward.

Just last week the Carnegie Foundation issued another report titled "High School: A Report on Secondary Education in America." This study finds that American high schools are adrift and calls for new core curriculums, more writing required of students, better working conditions, and more autonomy for teachers, and sweeping changes in how teachers are trained.

Also last week a National Science Foundation panel, after a 17-month study, charged that:

> The nation that * * * led the world into the age of technology is failing to provide its own children with the intellectual tools needed for the 21st century.

The panel recommends that American science and mathematics education be rebuilt. They call for national curriculum development, new nationwide exams, and 2,000 federally funded science and math schools.

All governing bodies, school boards, local governments, and State legislatures are looking closely at these reports, seeking appropriate solutions to current problems, and devising appropriate plans for the future. Here in the Congress, Senators KENNEDY, HOLLINGS, PELL, and CHILES have submitted a bill (S. 1495) calling for a National Summit Conference on Education. The Conference would call together educators, parents, policymakers, business, and labor to make recommendations and draw up blueprints for improving the quality of education in the Nation. Although earlier this summer the Senate rejected this call for a Summit Conference as an amendment to the supplemental appropriations bill on a party line vote, I continue to hope that the Senate and the House will pass this very timely legislation. The Committee on Labor and Human Resources is holding hearings this September, October, and November on the quality in education reports.

It is my hope that the Conference and hearings will point us in the direction we in the Congress must take in fashioning new initiatives. I look forward to participating in this process.

In thinking about the appropriate Federal role in education, I cannot help but be reminded of the emphasis the President's Commission, the 20th Century Fund, and the National Science Foundation put on adequately funding educational programs. The President's Commission report makes this searing admonition: "Excellence costs. But in the long run mediocrity costs far more." The 20th Century Fund makes the plea:

> We should be able to afford the price of a commitment to educational excellence. This Nation's young people are our most precious and potentially our most productive asset, provided that we invest wisely in educating them.

The National Science Foundation panel calls for a substantial additional Federal monetary commitment—$4.6 billion over the next 6 years—because our educational problems are so serious that there is a "crying need for national leadership and a national commitment."

I also cannot help but be reminded that the grave concern over education being voiced by the President and his administration is merely that—voiced concern. I cannot help but be reminded that the fiscal year 1982 budget the President pushed through Congress made deep cuts in nearly all areas of education: Elementary and secondary education programs were cut roughly 15 percent—between fiscal year 1980 and fiscal year 1982—school lunch programs 35 percent—between fiscal year 1981 and fiscal year 1982—vocational education programs roughly 16 percent—between fiscal year 1980 and fiscal year 1982—funding for Pell grants for low-income students and the national direct student loan program was severely cut back.

In his next budget the President again sought deep cuts, but Congress, awakening to the very serious threats to education these cuts would impose, was not as willing to follow the President's leadership. With each budget submitted, the Congress has been less and less willing to enact the full program cuts requested by the President. We have staved off the worst of the cuts, but because of the President's repeated gnawing at the Federal education budget, spending—after adjustment for inflation—has decreased for education since President Reagan assumed office. The President's request for fiscal year 1984, even though he and his Secretary of Education are now speaking throughout the country about our serious crisis in education, continues to cut Federal education programs. According to the Congressional Research Service—"Impact of Budget Changes in Major Education Programs During the Reagan Administration," Paul M. Irwin, CRS, Library of Congress, July 19, 1983—in comparison with fiscal year 1980 funding levels, the President's fiscal year 1984 request represents a decrease of over 40 percent for the education block grant, bilingual education, and vocational education programs. The President proposes to terminate Pell grants

altogether, replacing them with a new self-help grant program. I quote the CRS report:

After adjusting the administration's fiscal year 1984 budget for inflation since fiscal year 1980, only the college work-study request represents an increase in funding since fiscal year 1980 (15 percent). In real purchasing power, the fiscal year 1984 request would represent decreases for all other programs.

The Congress has refused to accept the President's fiscal year 1984 requests for education cuts. Under the leadership of Senator HOLLINGS, we voted to add back $1 billion to education funding in the fiscal year 1984 budget resolution. We clearly and repeatedly are sending a message to the American public that we support maintaining a Federal commitment to education in this country.

These Federal programs have made a difference.

We know that millions of Americans have worked or are working today, instead of being on welfare, because of vocational education. Federal support for vocational education began in 1917.

We know that chapter I, the education of disadvantaged children program, is effective. Recent Federal, State, and local studies, including those reported by Secretary of Education Bell, show that low-achieving children who participate in chapter I programs do significantly better in school than similar children who do not participate. The National Assessment of Education Progress—an independent national study by the education commission of the States—reports that reading scores of disadvantaged students have risen dramatically over the last 10 years and that these gains are attributable to chapter I.

We know that Pell grants this year are helping 2.35 million needy students—over 55 percent are from families with incomes under $9,000—go to college.

We know that the school lunch program, enacted in 1946, works. According to the national evaluation of school nutrition programs contracted by the Department of Agriculture, the program clearly provides meals that are superior to the lunches received by nonparticipants.

Cutting education programs has meant a significant decrease in the numbers of people these programs serve at the local level. Two recent reports—the August 25, 1983, report by the Congressional Budget Office on "Spending Cuts in Human Resources Programs Since 1981," and the report of the same date by the AFL-CIO Public Employee Department and the American Federation of Teachers on the President's record on Federal support of education—document the magnitude of the cuts and the numbers of people denied services because of program cuts.

I ask unanimous consent that the report by the AFL-CIO Public Employee Department and the American Federation of Teachers be included in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BYRD. We also know that school districts, already strapped for revenue to pay for education programs—29 States since 1977 have passed tax and expenditure limitation laws which severely restrict the ability of local school boards to raise taxes—have been, in many cases, left to try to absorb the provisions of these services. This absorption puts a strain on already inflexible budgets. It therefore has to have an effect on the quality of education services local school districts can provide.

Obviously the President does not know what we know, or he does not want to know. His commitment to upgrading the quality of education is limited to his speeches, not his actions. Our children need more than a public relations campaign. They need—we need—a concerted commitment to upgrade the quality of our public education system while insuring that it is accessible to all children. In the next few weeks, Congress will again have the chance to demonstrate its commitment. First, we must vote to fully fund education programs as we provided in the budget resolution. The House of Representatives has just passed legislation raising authorization spending levels in key education programs so that the budget can be fully funded. The Senate must do likewise. Then we must turn our attention to developing a comprehensive approach to the educational challenge facing this country. It is a challenge we must not fail to meet.

EXHIBIT 1.—EXECUTIVE SUMMARY, AUGUST 25, 1983

THE THREE R'S (REAGAN, RHETORIC, AND REALITY)

"I've answered a few questions here with some things that I said were facts and figures. Don't let me get away with it. Check me out. And do that with everyone who tries to bring a message to you. Don't become a sucker generation. It isn't insulting or anything. Just make sure always that you're being told the truth."—President Reagan, Speech before the National Association of Student Councils, Shawnee, Kansas, June 29, 1983.

I. INTRODUCTION

Just in time for the 1984 campaign, Ronald Reagan has discovered education. Barnstorming across the country, the President has embraced the "Back to Basics" theme of the report of the National Commission on Excellence in Education with a fervor he once reserved for his "New Federalism" initiative.

But this crusade is a cover-up. It is designed to shift public attention away from his own abysmal record in the area of federal aid to education toward areas where he can speak with more openness and candor—areas in which the federal government plays no formal role, such as teacher pay, the length of the school day, and graduation requirements for high school students. In these areas, the President can speak without regard for the financial implications of what he advocates. Thus, as he has travelled across the country, the rhetoric has flown fast and furious. A newcomer to the political scene could easily be forgiven for thinking that this President is a true champion of the American public education system.

But the reality is something else altogether. For every time the President has been required to state his own priorities for federal spending—with the annual submission of his federal budget to Congress—the major federal education programs were among the first to be placed on the chopping block.

The purpose of this study is to refocus public attention on the reality of President Reagan's record on federal support of education. To do this, we have selected two of the largest federal aid programs—Vocational and Adult Education and Chapter 1/Educationally Deprived Children—and analyzed the impact that his budgets have had in these areas on a state-by-state, and congressional district-by-congressional district basis. This sort of hard data, we believe, will permit voters—and the Congressmen and Congresswomen who represent them—to seed past the rhetorical flourishes of recent months to the reality of the past three years—and what that has meant for their communities. For hundreds of thousands of American children, Ronald Reagan's newfound interest in education comes far too late.

II. HAS THE PRESIDENT REALLY CUT FEDERAL SPENDING ON EDUCATION?

Rhetoric

"* * * Mr. Reagan was asked by another student about the Administration's commitment to public education, given his proposals for the tuition tax credits and 'cutbacks in Federal funding for education.'

"Mr. Reagan said there had been 'no such thing as a budget cut,' but rather a cut in the rate of increase. Giving a national figure for education spending by all levels of government, he continued: "This year it'll be a total spent on education of $116.9 billion. That's 7 percent more than last year, and that's double what was spent just 10 years ago on education.'" (Emphasis added.)—"Reagan Denies Fund Cutbacks for Education," Associated Press, May 23, 1983.

"The facts are, the federal budget for education in 1980 was $14.8 billion. In 1981, which was still not our budget, it was $14.8 billion. Our first appropriation, the one for 1982, held the level for education at $14.8 billion, the same as in 1981. This year, we'll spend about $15.3 billion."—President Ronald Reagan, Radio Address, June 25, 1983.

Reality

President Reagan maintains that federal aid to education has not been cut during his administration. But, President Reagan is correct in only the most narrow of senses—in fact he is correct in a sense so narrow that it is fundamentally misleading.

First, he fails to take into account the effect of inflation on program costs. Obviously, it costs more to provide the same level of service to the same number of people year after year. Therefore, the proper basis of comparison for the funding

levels he has proposed are not the funding levels that existed in the past, but rather those funding levels required today to provide the same level of service to the same number of people as was provided in the past. Only in this way, can the full impact of his budget changes be gauged.

Therefore, we have calculated for federal fiscal years 1982, 1983, and 1984, the funding levels that would have been and would be necessary to maintain the level of service to the number of program participants that existed prior to the adoption of the first Reagan budget (which was the FY 1982 budget). Our base for calculating these "current services" funding levels, then, is the level of service that existed in FY 1981.

The true budget cut that the Reagan budget request represents in any given fiscal year represents the difference between his budget request and the "current services" level for that fiscal year.

Second, President Reagan, by referring to "our first appropriations" rather than his initial budget request, implicitly takes credit for the money that Congress restored to these programs—against his wishes. Funding cuts for both Vocational and Adult Education and the Chapter 1 programs would have been far worse had Congress not acted as it did. As it was, these cuts were bad enough. But credit should be given where credit is due, and the extent to which final Congressional action diverged from the President's intentions should be underscored.

Once inflation is accounted for, and once Congressional action is isolated from the President's initial request, the conclusion that President Reagan's term in office has brought about severe cutbacks in major federal education programs is inescapable. In the process, he has denied hundreds of thousands of disadvantaged children the opportunity to receive special assistance in the development of their math and reading skills.

For the purposes of this report, we have looked specifically at two federal education programs: (1) Chapter 1, and (2) Vocational and Adult Education. We chose these two programs because we felt there could be no doubt that they serve to further goals that are truly national in scope, and they are, therefore, properly the object of federal assistance. Yet they have been particularly hard hit by the Reagan cutbacks. Our major findings include:

President Reagan's budget requests for Chapter 1 have amounted to a 25 percent, 48 percent and 26 percent reduction from FY 1981 service levels in fiscal years 1982, 1983, and 1984, respectively.

If these requests had been approved by Congress, nearly 1.2 million fewer children would have been provided Chapter 1 services in FY 1982 than in FY 1981, more than 2.5 million fewer would have been provided these services in FY 1983, and an additional 1 million would be denied these services in FY 1984.

In FY 1982, Congress restored 25 percent of what the President sought to cut from Chapter 1, retaining nearly 390,000 children in the program who otherwise would have been forced to leave. In FY 1983, Congress restored a full 62 percent of the President's proposed budget cut, allowing more than 1.7 million children to remain in the program. In FY 1984, the funding proposal backed by the American Federation of Teachers would add back more than two-thirds of President Reagan's budget cut, allowing 900,000 children to retain program services.

Even after Congressional action, however, funding for Chapter 1 programs was reduced by 19 percent in each of fiscal years 1982 and 1983 below the level required to maintain services at FY 1981 levels. As a result, nearly 800,000 children were denied Chapter 1 service in FY 1982, and another 750,000 were removed from the program in FY 1983. Despite the fact that the AFT's current proposal for FY 1984 represents a significant improvement over the FY 1983 funding level, it would fall about 8 percent short of maintaining FY 1981 service levels. If adopted, 90,000 fewer children would participate in the program next year than in FY 1981.

In the area of vocational and adult education, the Reagan budgets have been even more harsh:

President Reagan requested a cut of 25 percent in FY 1982, 49 percent in FY 1983, and 53 percent in FY 1984 below the level required to maintain FY 1981 levels in those fiscal years.

Congress, which granted the President 89 percent of what he wanted in FY 1982, stiffened somewhat in FY 1983, agreeing to 39 percent of his proposed cutback for that year.

As a result, the net budget cut in vocational and adult education for FYs 1982 and 1983 amounted to a 22 percent and 19 percent reduction from current services levels, respectively.

III. DOES FEDERAL AID TO EDUCATION CAUSE DECLINING SCORES ON STANDARDIZED TESTS?

Rhetoric

"It's time to face the truth. Advocates of more and more government interference in education have had ample time to make their case and they've failed.

"Look at the record. Federal spending on education soared eightfold in the last 20 years, rising much faster than inflation. But during the same period, scholastic aptitude test scores went down, down and down."—President Ronald Reagan, Radio Address, March 20, 1983.

"We created the greatest public school system the world has ever seen, and then have let it deteriorate . . . I think you can make a case that it began to deteriorate when the Federal Government started interfering in education."—President Ronald Reagan, News Conference, May 17, 1983.

Reality

The notion that federal aid to education is somehow responsible for all that ails our nation's schools is a recurrent theme of the President. The reasoning behind this belief takes two basic forms: (1) federal aid to education has grown dramatically at the same time that scores on standardized tests have dropped dramatically, and (2) the federal funds come with onerous regulatory burdens attached. We find both arguments curious.

If scores on standardized tests varied only with the level of federal aid to education, then scores today would be no lower than they were 15 years ago. The reason: once you adjust federal spending on elementary, secondary, and vocational education for inflation, outlays in 1982 were actually lower then they were in 1967. Nearly all of the growth in this area occurred in the mid-1960s with the initial implementation of major Great Society programs, such as the Elementary and Secondary Education Act of 1965. Since then, in real terms, federal funding has remained relatively static. (See Appendix)

Looked at another way—as a share of the total federal budget—outlays on elementary, secondary, and vocational education programs have dropped from 1.7 percent in 1967 to 0.9 percent in 1982. Or—as a percentage of total spending on education by state and local governments—federal outlays in this area actually peaked in 1967.

Thus, the data belie the widely held belief that federal spending in this area has escalated wildly in recent years. The President's constant use of the year 1960 as the one to which he compares today's spending levels is more than slightly disingenuous. It ignores a period of time in this country when we as a people vastly expanded our view of the proper role of the federal government in the enforcement of civil rights.

The regulations, moreover, so disparaged by the President were designed with the goal of ensuring that federal educational assistance goes to those the President has called the "truly needy." Clearly—in other program areas, such as food stamps, or aid for dependent children—the President has championed the adoption of regulations with similar objectives. If this regulatory goal is proper in the case of these income-support programs, why shouldn't it be proper in the case of programs like Chapter 1 as well?

But, if the President really believes that federal aid is the root of our public education problems, then he is ranging far afield from the conclusions of the National Commission on Excellence in Education.

Federal education programs have absolutely nothing to do with the central problems identified by the Commission. The federal government has nothing to say about the level of teacher pay; it does not regulate the length of the school year, the amount of homework assigned, or the kinds of courses the average student is required to take. If problems exist in these areas, they are a result of a series of decisions made over the years by state and local governments.

The federal role is, instead, limited to those areas where a compelling national interest requires that the ability to provide a particular service not hinge on the fiscal capacity or will of a given community. Such is the case, for instance, with special federal programs designed to ensure equal educational opportunity for handicapped or disadvantaged children. Similarly, the need for the development of skills suited to rapidly changing workplace, or the retraining of workers displaced by the introduction of new technology, warrants federal intervention.

All Americans presumably benefit from the enforcement of civil rights laws, and an economy where job skills match job opportunities, regardless of where they live. But, by and large, the average student is unaffected by federal "intrusion" in these areas. The dismantling of these federal programs will, then, leave the average student largely unaffected as well. Much can be lost—and nothing gained—by the sort of radical reduction in federal assistance advocated by the President.

IV. WHO WILL PAY FOR THE EDUCATION REFORMS ADVOCATED BY THE PRESIDENT?

Rhetoric

"Now I appointed a Commission to study and bring back a report on what we felt was a decline in education in our schools.

"They brought back a masterful report. And in that report there is very little suggestion for more money. *What they're talking about can be corrected without money.*

It takes some leadership. It takes some return to basics. It takes having students that now have to learn what they're supposed to learn in a class before they're moved on to the next class * * *" (Emphasis added.)—President Ronald Reagan, News Conference/The White House, May 17, 1983.

Reality

Far-reaching reforms, such as the introduction of master teacher programs or the extension of the school day and school year, are expensive propositions. According to Denis Doyle of the American Enterprise Institute, moving to a 7-hour day, an 11-month year, and a more attractive pay structure would cost at least $13.5 billion.

The critical question is not whether more money is needed, but who will pay? President Reagan offers absolutely no guidance in this area, except to rule out the possibility of any new federal aid. Does he think that the money should come from business—which benefits so clearly from the existence of a skilled labor force from which to recruit? Does he think that it should come from the wealthy, who have already benefitted disproportionately from his tax program? or should it come from workers—most of whom have already seen their combined federal, state, and local tax load go up during Reagan's term in office?

State and local governments are hardly in any position to take on a new financial responsibility of the magnitude implied by the package of reforms supported by the President. Total federal aid to state and local governments has been cut by nearly $50 billion during the FY 1982 to FY 1984 period. Repeated revenue shortfalls brought about by the recession have frustrated the planning efforts of governors and state legislators alike. The combination of these two factors has triggered personal income tax hikes in 11 states, sales tax increases in 14 states, and motor fuels tax increases in 16 states just in 1983 alone. Local property taxes—the backbone of school finance—increased 13.7 percent in 1982, more than three times the rate of increase of any other major state and local tax.

As long as the President is silent on the question of where the money to finance his education reforms will come from, he forfeits much of his credibility on this issue. And as long as he calls for continued cuts in both aid to education specifically—and aid to state and local governments generally—his policies will remain part of the education problem in this country, not part of the solution. Perhaps the President would have local governments obtain the funds for increased education spending the same way he has obtained the funds required to finance his military build-up—by even greater deficits and even greater amounts of government borrowing.

V. DOES FEDERAL AID TO EDUCATION PROMOTE ECONOMIC GROWTH?

Rhetoric

"If America's industries hope to compete and win in world markets, they must have at their hearts a broadly educated workforce trained in the skills of the 21st Century.

"America has no higher stake than in the quality of your education, the sharpness of your skills and your opportunity to use them both in well-paying jobs. I've come here today to reaffirm my personal commitment."—President Ronald Reagan, Speech before the Vocational Industrial Clubs of America Leadership Conference, Louisville, Kentucky, June 29, 1983.

Reality

Although President Reagan pays lip service to the idea that vocational training may very well be in the national interest, the personal commitment of which he speaks never quite gets translated into a federal commitment. In fact, after proposing cuts in vocational and adult education totaling in excess of $1.26 billion over the last 3 years, even the extent of his personal commitment might be subject to review.

But then President Reagan has based his political career on the contention that government spending and private economic growth are somehow competing and contradictory objectives. His line of reasoning is that money taken out of private hands is bound to be squandered.

This limited view of the role of government ignores the complementary nature of public and private investment. Perhaps nowhere is this more true than in the case of the two programs we have chosen to analyze in this report. In an economy changing as rapidly as our own, with the need to develop skills that match the needs of growing businesses, the need for an effective and well-financed system of vocational and adult education seems obvious. With unemployment among low-income inner-city youths running at all-time record highs, the benefits of compensatory reading and math programs for the disadvantaged seem self-evident. By cutting these programs as sharply as he has done, President Reagan risks jeopardizing our prospects for long-term growth, and revitalization of our cities.

Although the President has turned his back on federal programs designed to assist in the development of human capital, he has bent over backwards to provide the "incentives" necessary to create on environment suitable to the development of physical capital. No tax break is too small or too large for the President when it comes to fostering business investment in machinery or structures. The accelerated depreciation provisions of the Economic Recovery Tax Act of 1981 will cost the federal government more than $115 billion over the next five years. Yet federal spending on education, training, employment, and social services, adjusted for inflation, is slated to decline by 26 percent over approximately the same time period. We believe that the President's priorities should be reversed.

VI. IS EDUCATION A POLITICAL FOOTBALL?

Rhetoric

"Send a message to Washington, D.C., and make it loud and clear. Tell them you want the basics back in your schools and the parents back in charge. Tell them that education must never become a political football because your children come first."—President Ronald Reagan, Speech before the 87th Annual Convention of the National Parents and Teachers Associations, Albuquerque, New Mexico, June 15, 1983.

Reality

"As an issue, education has taken off like wildfire," according to White House communication strategist David Gergen. The issue has great appeal to women and Roman Catholics, two constituencies Reagan is courting for the 1984 election, he added."—Associated Press, June 20, 1983.

"* * * the most recent (1982) Gallup Poll of Public Attitudes Toward the Public Schools holds that education is 'extremely' important to one's future success and that public education should be the top priority for *additional federal funding.* Education occupied first place among 12 funding categories considered in the survey * * * with 55 percent selecting public education as one of their first 3 choices."—Report of the National Commission on Excellence in Education, April 1983.

President Reagan and his advisers can read the polls. And the polls say that Americans are concerned about the state of their public education system. When asked which issues will be most important in next year's presidential campaign, the respondents to a recent (June 27) Newsweek survey ranked "the quality of public education" second only to "unemployment." But by a 45 to 32 percent margin these same respondents disapprove of "the way Ronald Reagan is dealing with the problems of education." And few Americans share his view of the value of federal aid to education.

Survey results like these spell political trouble. Knowing this, the White House has launched a preemptive strike—attempting to corner the market on educational "reform" before the President's potential opponents are able to draw attention to his own lackluster performance.

If education has become a political football, it's because the President has made it one. He has kicked off the debate, and we do not intend to sit idly by on the sidelines. It's not by mistake that we have chosen to break down the impact of the President's budget request by Congressional District. Our goal is to demonstrate—on as localized a basis as possible—the reality of the President's record. Only with complete information, can voters make informed judgments next year. Only when armed with this sort of data, will voters be able to separate rhetoric from reality.

PROGRAM: CHAPTER 1—FEDERAL FISCAL YEAR

[Dollars in thousands]

States	President Reagan's budget proposal		Congressional action		Net, after congressional action

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 1 hour, with statements therein limited to 10 minutes each.

PEOPLE ASK WHY WE ARE THERE

Mr. MELCHER. Mr. President, there are 125,000 heavily armed troops and several million civilians in Lebanon, a tiny country of 4,000 square miles. Our State of Montana alone is 146,000 square miles.

Why are we in Lebanon?

The President and his White House advisers' reasoning goes like this:

First. Israel agreed to halt their aggression in Lebanon and permitted a cease-fire with the United Nations setting up a peacekeeping force. Italy, Britain, France, and the United States comprise that force of 5,350 with contingents of approximately 2,050 Italians, 2,000 French, and 97 British troops. We have 1,200 U.S. Marines as our portion;

Second. The reason that our presence and direct involvement would assure not only Israeli withdrawal from Lebanon but would also strengthen and stabilize the Lebanese Government; and

Third. The President's policy rationalizes that there was little likelihood of war breaking out and that a peaceful settlement could be agreed to by the several factions comprising the population of Lebanon.

Unfortunately, that has not been the result and I do not agree that this is the proper policy for the United States.

In this strife-torn country of longstanding conflicts among several religious sects with ancient grievances, the presence of 1,200 U.S. marines as part of the peacekeeping force is more likely to hinder rather than hasten the peace negotiations. Our presence, if not like a magnet to draw part of the hostile fire, is at least like a lightning rod attracting hostile resentment from many of the Arab inhabitants because we are correctly recognized as supporters and allies of Israel.

We find ourselves mixing in the present hostile bloodshed of the religious sects' ancient grievances. Our only role has occurred this generation through our strong and telling military and economic support of Israel.

That amounts to underwriting the military capability of Israel with modern land and air armaments plus assuring economic stability for Israel. That considerable financial support was bolstered even more with the Camp David accords to gain peace between Egypt and Israel.

Following Israel's attack on Lebanon, many of the Lebanese, as well as other Mideast countries, assume that U.S. Marines are in Lebanon to strongly support Israel.

As I noted at the outset, we should not have been involved directly with any of our forces in the U.N. peacekeeping mission in Beirut but another nation with clearly neutral identification should have made up the U.S. portion of the peacekeeping contingent. In my judgment, that is still true today.

As bad as it is to have had four marines killed and a score more of marine casualties, it is fortunate that there have not been even more. Paced in the middle of hostile camps, when the firing starts, it is certain that we eventually will be in the line of fire. Calling for air and sea strikes, which the President's policy is drifting into, will not likely add to successful peace negotiations.

The people of our country need to know what we, their representatives, think about U.S. involvement in Lebanon.

They have concluded that this is a Lebanese war and they ask, "Are we involved?"

The answer is, "Yes."

"Is our direct involvement necessary?"

The answer is, "No."

"Will it mean more involvement than the present U.S. Marine contingent?"

The answer to that is "Yes, if the President's policy is not restrained."

"Can we withdraw?"

The answer to that is, "Of course, we can withdraw."

They ask, "Why not, and how soon?"

The best answer to that is "Very soon, and that our Marine contingent should be replaced through the U.N. with a contingent from another nation."

I believe the American people also expect us to answer to them, as their representatives, that we care that they think and will act accordingly to avoid the further loss of life and drifting deeper into a Middle East war.

Mr. President, I yield the floor.

ELIE WIESEL AND THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, 34 years ago the United States authored the Genocide Convention and pushed it through the United Nations. Yet, today the United States is the only developed nation in the world which has not ratified the treaty.

I am only left to think that despite atrocities of Nazi Germany, Cambodia, and other countries that we have detailed on the floor of the Senate, genocide remains too far removed, too elusive a concept for the Senate to grasp and deal with. Genocide, of course, is the planned, premeditated destruction of an entire ethnic group the way Hitler wiped out 6 million Jews in Europe, the way the Romans destroyed the Carthaginians and killed every man, woman, and child who was a Carthaginian, 2,000 years ago.

Perhaps it is because of the magnitude of the horror that we fail to realize its tremendous consequences. But, each of us has the responsibility to remember and act on these tragedies.

The Genocide Convention would outlaw genocide, the most heinous crime that I think anyone can imagine. It would outlaw genocide, make it an international crime.

As I say, every other developed country in the world has already ratified that Convention.

I recently had the opportunity to read a piece on Elie Wiesel. He is the author of 22 books, a distinguished professor at Boston University, and a survivor of four Nazi concentration camps. His adult life has been spent trying to keep alive the memory of the 6 million Jews who were killed during World War II.

In his book, "Night," Mr. Wiesel describes some of his experiences:

> . . . We pressed against the windows. The convoy was moving slowly . . . through the window we could see barbed wire. We had arrived. This was the camp.
>
> And as the train stopped, we saw this time that flames were gushing out of a tall chimney into the black sky . . . we looked into the flames in the darkness. There was an abominable odor floating in the air. Suddenly, our doors opened. Some odd-looking characters, dressed in striped shirts and black trousers, leapt into the wagon. They held electric torches and truncheons.

Mr. Wiesel has always stressed the need to preserve the memories of the Holocaust. He warns that the world has learned nothing from the tragedy and it continues to be "indifferent to suffering, especially Jewish suffering."

The story of Elie Wiesel's efforts serves as an important reminder that each of us has a responsibility to speak out against persecution.

We all must do our part to stop such atrocities from happening again. I applaud Mr. Wiesel for his desire to stimulate discussion in order to bring wider understanding of the issues. The more educated we are about the crime of genocide, the better able we should be to prevent future genocidal acts from being committed.

We, here in the Senate, can do our part to prevent the crime of premeditated mass murder by ratifying the Genocide Convention. Let us not wait for another Holocaust to occur before we are moved to action on this important treaty. Mr. President, I urge my colleagues to ratify the Genocide Convention immediately.

President after President has pleaded with the Senate to ratify it—President Eisenhower, President Kennedy, President Johnson, President Nixon, President Ford, President Carter. Yet we have failed to act throughout the years.

Mr. President, it is a real blot on the integrity and reputation of this body that we have failed to act. I earnestly hope that we will consider acting in this session.

Four times the Foreign Relations Committee has sent the Genocide Convention to the floor and we have never been able to secure a vote on the convention. I think after 34 long years, it is about time we acted.

IS McNAMARA RIGHT ON NO FIRST USE BY AMERICA OF NUCLEAR WEAPONS?

Mr. PROXMIRE. Mr. President, this country has never renounced our option to initiate the first use of nuclear weapons. However persuasively we can defend our record, we cannot escape from the fact that only twice in human history have nuclear weapons been used as a weapon against another nation, and both times—at Hiroshima and Nagasaki—they were used by our country, the United States of America. We used it.

The other superpower—the Soviet Union—has renounced any first use. To most Americans, that renunciation does not mean anything. The Soviets have cheated and lied and abrogated agreements before, most notably in the use of biological weapons in Afghanistan and in the shooting down of the unarmed Korean jet liner. Few Americans would trust the Russians not to use their nuclear power first if they thought they could gain an advantage by doing so. Realistic persons in other countries of the world must recognize this fact, too.

Nevertheless, with each passing development in nuclear military power on both the Soviet side and our side, the first use of nuclear weapons becomes more obviously suicidal. Our military experts have generally tended to overestimate Soviet strength and underestimate our strength, but they have consistently and unanimously agreed that there is no way the Soviet Union could destroy our nuclear retaliatory power with a first strike.

They have gone even farther. Secretary of the Navy Lehman, earlier this year, testified to the Senate Appropriations Committee that our submarine deterrent is not only invulnerable today, but it will become increasingly invulnerable throughout this century.

Other military experts have also assured us repeatedly that the United States deterrent that would survive a Soviet first strike, of whatever magnitude, could and would utterly devastate the Soviet Union.

Can there be any doubt that the Soviet Union knows this? Similarly, no responsible military official of our Government has ever, to my knowledge, told the Congress that, in the event we should attack the Soviet Union all-out with everything we have, we could prevent a Soviet retaliation that would utterly destroy our country as an organized society.

Should it not be clear, then, that whether we do or do not renounce a first strike, neither side will initiate such a catastrophic and suicidal act? Under what conceivable circumstances would we initiate a first strike? The strongest argument for us to reserve such a right was made by former Secretary of State Alexander Haig He argued that the Soviet's have a preponderance of conventional power in Europe, including a vast advantage in tanks.

Secretary Haig contended that if we renounced the first use of nuclear weapons, the Russians, with their preponderance in conventional weapons, would be more likely to initiate a conventional war in Europe. What prevents them from using this military advantage? Haig contended it was the fear that a conventional military success would persuade NATO to respond out of desperation with nuclear weapons, and the Russians would recognize that once NATO gave a nuclear response, the Russian homeland itself would come under full nuclear attack. Is Haig right?

In an article in Foreign Affairs and in an article in the New York Times, former Defense Secretary Robert McNamara comes down hard on the side of an American renunication of the first use of nuclear weapons for a series of reasons.

First, McNamara argues that any use of nuclear weapons between the United States and the Soviet Union would be utterly and conspiciously irrational—an act of sure, swift, and mutual suicide.

Second, he contends that the NATO countries would never agree to the use of nuclear weapons to defend against a Russian conventional attack because the nuclear exchange would bring "greater destruction to NATO than any conceivable contribution they might make to NATO's defense."

Third, that preparing for tactical nuclear war significantly limits NATO's ability to fight a conventional war.

Fourth, the nuclear threat from NATO could actually persuade the Soviets to institute their own nuclear first strike.

Fifth, at modest cost, NATO can increase its conventional strength to match the conventional Soviet threat.

McNamara concludes with this interesting series of questions:

Do we favor a world free of nuclear weapons? If so, should we not recognize that such a world would not provide a "nuclear deterrent" to Soviet conventional aggression? If we could live without such a deterrent then, why can't we do so now, thereby moving a step toward a nonnuclear world?

Mr. President, I ask unanimous consent that the article in the New York Times of September 15 by former Secretary of Defense McNamara be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 15, 1983]

INVITING WAR

(By Robert S. McNamara)

Even if the "first use" of nuclear weapons is not to NATO's advantage, does not the threat of such use help deter a Soviet nuclear attack and would not the removal of the threat increase the risk of war?

The problems associated with a first use seem clear enough. The launching of strategic nuclear weapons against the Soviet homeland would lead almost certainly to a response in kind which would inflict unacceptable damage on Europe and the United States—it would be an act of suicide. The threat of such an action, therefore, has lost all credibility as a deterrent to Soviet conventional aggression. One cannot build a credible deterrent on an incredible action.

Many observers in both the United States and Europe, however, believe that the threat of first use is an effective deterrent. It is not that NATO would coolly and deliberately calculate that a strategic exchange made sense, they explain, but rather that the dynamics of the crisis would literally force such an action—or so Soviet leaders would fear.

In this view, the Russians will perceive a considerable risk that conventional conflict will lead to the use of battlefield weapons, which will lead in turn to theater-wide nuclear conflict, which will inevitably spread to the homelands of the superpowers. So long as the escalation is perceived to be likely to proceed smoothly, the logic continues, then the Warsaw Pact will be deterred from taking the first step—the conventional aggression—that might start the process.

The flaw in this argument, I believe, is in its view of how NATO is likely to act. More and more Western political and military leaders are coming to recognize, and are publicly avowing, that even the use of battlefield nuclear weapons in Europe would bring greater destruction to NATO than any conceivable contribution they might make to NATO's defense. There is less and less likelihood, therefore, that NATO would authorize the use of any nuclear weapons except in response to a Soviet nuclear attack. As this diminishing prospect becomes more and more widely perceived—and it will—whatever deterrent value still resides in NATO's nuclear strategy will diminish still further.

Moreover, preparing for tactical nuclear war limits NATO's ability to defend itself conventionally. Nuclear weapons require special security precautions and special command, control and communications arrangements. They thus limit the flexibility with which units can be deployed and military plans altered. In addition, since most of the systems that would deliver NATO's nuclear munitions are dual-purpose, some numbers of aircraft and artillery must be reserved to be available for nuclear attacks and thus would not be available for delivering conventional munitions. Most important, though, the reliance on nuclear threats for deterrence makes it more difficult to muster the political and financial support necessary to sustain an adequate conventional military force.

To the extent, then, that the nuclear threat had deterrent value, it is because it in fact increases the risk of nuclear war.

Moreover, this is a double threat—for Soviet predictions of the risk could lead them to initiate nuclear war themselves. Preparing themselves for the possibility of NATO nuclear attacks would make it more difficult for them to mount a successful conventional attack, raising the incentives for a nuclear offensive. And if they believe that NATO would indeed carry out its nuclear threat—as a matter of deliberate choice or not—the Russians would have virtually no incentive not to initiate nuclear war themselves.

The costs of whatever deterrent value remains in NATO's nuclear strategy are, therefore, substantial. Could not equivalent deterrence be achieved at lesser "cost"? I believe the answer is yes. Compared to the huge risks that the alliance now runs by relying on increasingly less credible nuclear threats, recent studies have pointed to ways by which the conventional forces may be strengthened at modest cost.

Having spent seven years as Secretary of Defense dealing with the problems unleased by the initial nuclear chain reaction, I do not believe we can avoid serious and unacceptable risk of nuclear war until we recognize—and until we base all our military plans, defense budgets, weapons deployments and arms negotiations on the recognition—that nuclear weapons serve no military purpose whatsoever. They are totally useless—except only to deter one's opponent from using them.

This is my view today. It was my view in the early 1960's.

At that time, in long private conversations with successive Presidents—John F. Kennedy and Lyndon B. Johnson—I recommended, without qualification, that they never initiate, under any circumstances, the use of nuclear weapons. I believe they accepted my recommendation.

Do we favor a world free of nuclear weapons? If so, should we not recognize that such a world would not provide a "nuclear deterrent" to Soviet conventional aggression? If we could live without such a deterrent then, why can't we do so now—thereby moving a step toward a non-nuclear world?

WAR POWERS RESOLUTION

Mr. DIXON. Mr. President, let me say at the outset that I would like to associate myself with the remarks of the minority leader, Senator BYRD from West Virginia, who spoke so wisely and eloquently on the subject of the war powers resolution. I also join with my friend and colleague, Senator KENNEDY, and others, in welcoming Senator BYRDS' leadership on this issue.

As I listened to the discussion in this Chamber on the operation of the War Powers Act and its applicability to the situation on the ground in Lebanon, I was struck by the bipartisan belief that the 60-day clock, under section 5(b), had tolled. That is undeniably the case because of the workings of section 4(a)(1), which mandates a report once U.S. Armed Forces are introduced:

into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances.

It appears that many Members of this Chamber, as well as an overwhelming number of Americans, are of the consensus that our Marines in Beirut are involved in hostilities, within the meaning of section 4(a)(1). There can be no other reasonable interpretation of the situation in Lebanon in conjunction with the War Powers Act. It would serve little purpose to belabor that point, especially after the forceful presentations given by many Senators.

There is at least one other critical point, though, that I wish to discuss—one which I believe is a necessary prelude to a full discussion of the applicability of the War Powers Act to the Marines' presence in Lebanon. That point concerns the question of whether the war powers resolution is still the law of the land, in light of the Supreme Court's decisions this past July which voided as unconstitutional one-House and two-House legislative vetoes. As everyone in this place recalls, section 5(c) of the act contained a legislative veto provision.

So the question becomes: Is that legislative veto section severable from the rest of the war powers resolution? The Supreme Court provided the framework for answering that question on several occasions, and recently, of course, in the landmark Chadha decision. The general standard for severability inquiries is that an invalid portion of a law is to be severed unless:

It is evident that the legislature would not have enacted those provisions which are within its power, independently of that which is not. *Champlin Refining Co.* v. *Corporation Commission*, 286 U.S. 310, 234 (1932).

In the case of the war powers resolution, Congress attempted to resolve that issue. Section 9 of the act declares:

If any provision of this joint resolution or the application thereof to any person or circumstances is held invalid, the remainder of the joint resolution and the application of such provision to any other person or circumstances shall not be affected thereby.

To those who require further proof on the issue of separability, I commend to your attention an excellent study prepared by Raymond J. Celada, a senior specialist in American public law at the Library of Congress, who recently wrote a report entitled "Effect of the Legislative Veto Decision on the Two-House Disapproval Mechanism to Terminate U.S. Involvement in Hostilities Pursuant to Unilateral Presidential Action." Mr. Celada traces the legislative history of the war powers resolution in great detail, and concludes that the legislative veto section is separable from the rest of the act, and that the remaining sections are fully operative.

It seems to me that the heart of the war powers resolution, sections 4(a)(1) and 5(b), can be triggered in two ways. Either the President can trigger the 60-day clock of section 5(b), by reporting under section 4(a)(1), or the Congress can make the 4(a)(1) determination through an interpretative reading of section 5(b), by stating that the 4(a)(1) report is required.

That is what we are doing in this place—we are saying to the President that events in Lebanon require a determination that our Marines are involved in hostilities or are in a situation where imminent involvement in hostilities is clearly indicated by the circumstances.

Mr. President, this is the reality, whether the administration admits it or not. If every Chief Executive, whether Republican or Democrat—I am not saying this in a partisan way—claims he is free to act without reference to the War Powers Act, then a very serious situation exists.

Ignoring the war powers resolution could lead us into a situation where a President acting precipitously can thrust us into a war we do not seek and do not want.

That is why so many Members of this great deliberative body argue forthrightly that section (4)(1) has been triggered. It is my belief that we must follow the statutory guidelines of the War Powers Act. These guidelines will trigger debate. We must have national debate, national discussions on what course our Nation will follow. Debate, rather than unilateral action, is imperative if the country and its citizens are to be united on what we do.

LEGAL SERVICES UNDER THE OLDER AMERICANS ACT

Mr. GRASSLEY. Mr. President, I believe that a very important program has been lost in the shuffle—or should I say scuffle—surrounding the many creative uses of Legal Services Corporation funds. And that overlooked program is the paralled legal assistance program under title III-B of the Older American Act.

Congress made legal services—or legal assistance, as I prefer to state it to avoid confusion with LSC—a priority service under the 1975 amendments to the Older Americans Act.

Quoting from section 306 of the Older Americans Act:

Each plan shall . . . provide assurances that an adequate proportion of the amount alloted for part B to the planning and service area will be expanded for the delivery of . . . legal services.

Legal services is defined in the Older Americans Act as:

Legal advice and representation by an attorney (including, to the extent feasible, counseling or other appropriate assistance by a paralegal or law student under the supervision of an attorney), and includes counseling or representation by a non-lawyer where permitted by law, to older individuals with economic or social needs.

By the way, it is rather striking that unlike the Older Americans Act, "legal services" is nowhere defined in the Legal Services Corporation Act.

The evidence indicates that legal assistance was funded under the Older Americans Act because the legal problems of the elderly were not getting sufficient attention from other Government legal services programs.

The report accompanying the 1975 amendments, submitted by my able colleague from Missouri, Senator EAGLETON, makes this clear. "(I)n far too many instances and far too many areas," states the report, "our Nation's elderly lack adequate legal services. Testimony before this committee showed that although comprising over 20 percent of the Nation's poor, the elderly represent only 6 percent of the average client load of the average legal services program funded under the Community Services Administration."

A report by the Administration on Aging in 1980 states: "The overall percentages of older persons served by Legal Services Corporation projects has been rising, and particularly where a Legal Services Corporation project received title III funding.

"In 1978, it was estimated that persons over 65 years of age constituted an average of approximately 6.5 percent of the (Legal Services Corporation's) caseload."

Indeed, a recent hearing I held on "Judicial Access and the Elderly" indicates this problem has been rectified since State and area agencies on aging got into the act. Deputy Commissioner on Aging Gene Handelsman told the Labor and Human Resources Committee that the number of older persons served under title III-B has increased 41 percent over the last 3 years—from 301,000 to 507,000. Eighty percent of area agencies now provide legal service.

And Gregg Hartley, director of Field Services for the Legal Services Corporation, indicated that the percentage of persons over 60 served by that program has now increased to 14 percent from the 6 percent cited in the 1980 report.

Of course, as the 1980 report indicates, the increase in the Legal Services Corporation's elderly caseload can be directly attributed to the infusion

of Older American Act funds. Fifty-six percent of area agencies on aging provide legal assistance contracts to Legal Services Corporation recipients.

It is not as widely known as it should be that area agencies on aging are providing this crucial operating subsidy to the Legal Services Corporation, above and beyond the $241 million already appropriated to LSC, by providing Older American Act funds to LSC recipients in exchange for services to senior center users.

Another fact not widely enough known is the innovative and cost-effective manner in which area agencies on aging across the Nation are using their title III-B legal assistance funds.

In my own State of Iowa, testimony at our hearing indicated, these innovative programs include a clinic for seniors operated by Drake University Law School, the use of senior advocates and paralegals operating under the supervision of full-time attorneys, and the availability of a collect-call number for seniors with legal problems.

In addition, it became clear at our hearing that these programs concentrate on the real legal needs of senior citizens. This is because area agencies on aging are under the tight control of local advisory boards, which carefully prioritize the use of legal assistance funds to get the most bang for the buck.

I can only contrast this performance by the network of 660 area agencies on aging with the somewhat spotty performance of the Legal Services Corporation as presented at recent oversight hearings.

Where area agencies sought innovation and cost effectiveness, Legal Services grantees have apparently stored up millions in fund balances for political purposes and spent heavily on buildings and equipment.

Where area agencies have concentrated on the real legal needs of seniors, Legal Services grantees have seemingly used seniors as pawns in a campaign for political influence and in attempts to push back the boundaries of the law.

And where area agencies have remained under the tight control and watchful eye of local advisory boards, Legal Services grantees, at least in the past, seem to have become part of a nationwide political network, a morass into which millions of dollars have disappeared from congressional scrutiny.

I believe that the innovative and cost-effective programs created by area agencies on aging provide a model for the way publicly funded legal assistance should be operated. I hope that as the debate on reauthorization of the Legal Services Corporation continues, reform efforts will succeed in making this kind of performance the norm.

And I further hope that the legal assistance programs operated by area agencies on aging will get their due recognition: that policymakers at all levels will come to realize that legal services means more than LSC.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

POLAND AND THE SOVIET UNION

Mr. MURKOWSKI. Mr. President, during the August recess two events occurred which were of major import for both the Eastern bloc and the world. The first was the anniversary of the founding of the Solidarity trade union in Poland and of the August accords between the union and the Polish Communist authorities, laying down principles for economic and social Odnowa—renewal. The second event was the tragic and wanton destruction of a Korean commercial airliner over the Japan Sea.

August 31 marked the third anniversary of the Gdansk shipyard riots out of which Solidarity was born. In late July the underground leaders of the now outlawed Solidarity union called for boycotts of public transportation and for demonstrations to commemorate the anniversary. Pressure to lift martial law was increasing, not only from the United States, but from the rest of the world, in the wake of the Pope's visit in June. So the Polish Communist authorities called a session of the Polish Parliament and foisted certain legal reforms upon them that would allow General Jaruzelski to lift martial law.

And the government did lift martial law in August. And instituted new laws bulldozed through the Parliament. I ask unanimous consent that a summary of these laws be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Martial law measures which will remain in effect after martial law is lifted in Poland. These measures constitute "crimes" under newly codified Polish law:

It's forbidden to sing the national anthem or raise the national flag in public.

It's forbidden to speak certain words and phrases.

It's forbidden to make the "V for victory" sign.

It's forbidden to read publications deemed "unsuitable."

It's forbidden to display posters or banners with lettering and colors that have special associations (in relation to the colors used and lettering style in the word "Solidarity").

It's forbidden to wear a pin or button that has unapproved significance.

It's forbidden to organize, congregate for, or participate in an unsanctioned gathering.

In addition to the above:

No warrant is needed to hold people for 48-hours.

There is a ban on strikes for four years.

No search warrant is needed to gain entry to private residences.

Telephone eavesdropping can occur, but without the previous warning message played during martial law.

A "social parasites" bill has been passed, after pending for 15 years in the "Sejm" (parliament). This bill specifies that if a man, ages 18-45, is not working after a 3-month period, he can be imprisoned or fined.

Internment camps are to be disbanded and replaced with military penal camps (already in existence) which employ stiff, disciplinary measures.

A bill is pending in the "Sejm" which would provide for mandatory psychiatric treatment. Previously, family approval would be required before treatment could begin. If passed, psychiatric treatment would be used as widely and arbitrarily for political purposes as it now is in the U.S.S.R.

Miscellaneous information/comments:

July 22nd, Poland's "National Day," is actually the date when Communist rule was *imposed* upon the people of the country without their vote.

Underground solidarity still continues to collect dues; appoint officers; pay out benefits to members and publish many bulletins, newsletters, etc.

For their part, the Polish people commemorated the Gdansk riots with renewed demonstrations all over Poland. Tens of thousands of Poles marched in the cities and carried wreaths to memorials and to cemeteries filled with the bodies of Poles killed by the Communist authorities. The public buses and trams were almost empty. The Polish people indeed showed the world that a year and a half of suppression has left Solidarity with as much support as ever.

Where are we today? At an impasse still. The Polish Government—like the Soviet Union's—seems unable to understand and accept the strength of people's beliefs in freedom and sovereignty.

In another arena, the Soviet Union daily announce a new explanation of the second major August event, the destruction of the Korean airliner.

The simplistic and self-serving reports by the U.S.S.R. about this terrible crime are a tragic way to remind us that, to the Soviets, human life does not have the same value we place on it. The murder of 269 people underscores the dramatic difference between the Soviets and the Americans—clearly, they will always prize territorial sovereignty over human life. When the Western world speaks of the sa-

credness of human life, the Soviets speak of sacred soil, which is not to be disturbed by rude intrusions of people.

This Senator, Mr. President, does not believe that the Soviets understand why we are so upset about what we call the senseless massacre of innocent lives. Perhaps the Soviets do not believe in innocent lives—perhaps they think all outsiders are guilty. All are enemies. Perhaps they do not even understand that Americans simply would not do such a thing.

This terrible act is another illustration of the weakness of a system based on the constant and continuous repression of human life and values and in Poland and all Soviet-dominated countries. We cannot forget, we will not forget, the evil perpetrated by their system of government.

WILLIAM HAMILTON

Mr. MURKOWSKI. Mr. President, an old friend died tragically last week in my home town of Ketchikan. Bill Hamilton was well known and well loved by everyone in Ketchikan. A 36-year resident of Ketchikan, Bill taught school in Ketchikan for 18 years. After his retirement from teaching, he made his living as a very successful fisherman.

In fact, there are two members of my staff, Maggie Moran and Doris Elerding, here in Washington who remember him well, one as a student of his, and the other as a parent whose children he taught. Doris, Maggie, and I all remember Bill as an excellent teacher and a fine man.

But the kids are the ones who remember him best. They remember his playing kick the can with them, the swing in his backyard, his stories, and his jokes. And his friends remember his steadfast cheerfulness. He liked to play Sousa marches while he cleaned his fish. I am sure his enthusiasm was a prime factor in his success as a fisherman. "Darn!" he used to say, "It's easy to make money in Alaska!"

Bill Hamilton was extraordinarily active in the Ketchikan community. Mayor from 1970 to 1973, he also participated in student and other educational activities, in commercial fisherman's organizations, and in the National Guard. He was given a military funeral in the Ketchikan Armory in honor of his special relationship to the Guard.

Mr. President, I wish to take this opportunity to convey my sympathy to his wife Fran and his four children, Harriet, Patricia, William, Jr., and Deborah, as well as to his three grandchildren.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mr. MURKOWSKI assumed the chair.)

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HECHT.) Without objection, it is so ordered.

SCOOP JACKSON: PATRIOT

Mr. HELMS. Mr. President, all of us deal with sadness from time to time, but sometimes, there comes a sadness that is particularly difficult to accept. That is the way I feel about the loss of the distinguished Senator from Washington, Henry Jackson.

That is the first time, Mr. President, that I recall having referred to that great Senator as Henry Jackson—and I think it tells something about him that all of us called him Scoop, referred to him as Scoop, and thought of him as Scoop. He was not just a colleague. He was a greatly admired friend.

Scoop Jackson was a patriot and a statesman. Our Nation has lost a man dedicated in the fullest sense of the word to the national security of America. He understood the evil implications of the policies pursued by expansionist totalitarian powers, whether the Germany of the Hitler regime or the Soviet Russia of the Communist regime.

On one of the most fundamental issues before this body, the defense of our Nation from the threat posed by the ever-expanding Soviet nuclear arsenal, Scoop Jackson was second to none in his dedication to building a military defense posture which would deter the Soviets from aggression.

Mr. President, throughout the SALT debates and throughout debates on our defense posture, his words and actions were boldly addressed to the dangers posed by the Soviet empire. Constantly he encouraged us to support a strong defense posture. His words on our national defense proceeded from a wisdom borne of some four decades of service in the Congress of the United States of America.

In his three decades in this body, he was respected and admired as a hard working Senator, considerate to his colleagues, and loved by the people of his State. Indeed, Scoop Jackson was loved all across this land for his dedication to a strong defense, for his defense of minorities under the heel of totalitarian regimes, and for his personal dignity and leadership.

It is an irony of history that such a staunch defender of our national security was called to his maker on the day following the Soviet massacre of 269 innocent men, women, and children who were travelling in a civilian jetliner across the Pacific. Among his last public words on that day, he stated plainly that the Soviets had committed an act of barbarism. Scoop Jackson had dedicated his career here among us to defending our Nation against just such barbarism and to improving the life of his fellow Americans.

Mr. President, I shall never forget the words, the actions, the wisdom of Scoop Jackson in his defense of America and freedom. As we consider the great issues of national defense, we should pause to reflect and ask, What would Scoop have done? His unswerving dedication to our national defense will memorialize him in the hearts of this generation and those who come after us.

Mr. President, Dorothy and I extend our loving sympathy to Helen, Anna Marie, and Peter. Theirs has been a caring, loving family, and we want them to know that we love them, too.

THE PASSING OF SENATOR HENRY JACKSON

Mr. PACKWOOD. Mr. President when Senator Henry Jackson died my home State of Oregon lost a good neighbor and, like so many of my colleagues, I lost a good friend. Our Nation and this institution will sorely miss the wisdom, leadership and experience of "Scoop" Jackson.

I join in expressing my deepest sympathy to Helen Jackson and their two children, Anna Marie and Peter.

Like the Jackson family, many of us here also feel a sense of familial loss because "Scoop" Jackson was a patriarch of what one might call the Senate "family." Few Members in the history of this body have been so willing and able to carry the torch for causes they believe in and carry that torch so effectively.

Furthermore, Senator Jackson carried that mantle of leadership in the method that marks effectiveness in the Senate—extensive research on issues—ability to persuade Senators with his knowledge and reasoning—the difficult skill of constructing compromises that permit good ideas to become law—all of which wins the unending respect and admiration of colleagues.

Ideologically, "Scoop" Jackson has been long noted for his unswerving dedication to a secure American defense, but he was just as unyielding in his belief in a just and fair America where no one should be needy and deprived. "Scoop's" compassion for the less fortunate and his pragmatic recognition of the need for a strong America in a hostile world are facets of the man that will live forever.

For those of us in the Senate, for his constituents in the State of Washington, for this country and the world, Henry Jackson left his mark. His actions, words, and deeds will never be forgotten. We have worked with one of the greatest people who has ever

served in the U.S. Senate. He will be succeeded. He will never be replaced.

HUNGER PROBLEMS—REAL AND IMAGINED

Mr. HELMS. Mr. President, Senators will be interested in an excellent article written by the distinguished Senator from Kansas (Mr. DOLE), chairman of the Nutrition Subcommittee. Few other Senators have been as diligent as BOB DOLE in providing leadership in oversight of the nutrition programs of this country.

His comments in a recent Washington Post article are especially noteworthy because they contrast dramatically with what is stated by often-quoted hunger critics. Senator DOLE's observations are all the more important because of his longstanding reputation for bipartisan leadership on nutrition issues.

Senator DOLE notes, "There has been no documentation of nationwide 'hunger' problems, unless one accepts frequently biased media reports . . . The reality of the 'hunger' problem has been distorted by media in response to complaints by 'hunger' critics who seldom offer constructive ideas. They are, by and large, liberal Democrats who will always be 'anti-Reagan'—a point never made by the writers or commentators."

Mr. President, I ask unanimous consent that the article, "Hunger Problems—Real and Imagined," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 17, 1983]

HUNGER PROBLEMS—REAL AND IMAGINED

(By Bob Dole)

Domestic food assistance problems are on the minds of many Americans these days—including President Reagan. To demonstrate his concern, the president has appointed a special Task Force on Food Assistance to assess the problem and report to him within 90 days. Personally, I hope the group will offer constructive ideas—not just suggestions for more federal responsibility or more federal dollars.

Members of Congress, especially those of us on committees with jurisdiction over federal nutrition programs, are aware of scattered problems in the food assistance area—problems obviously accentuated by high unemployment. It is also recognized that, although more money is being spent on nutrition programs than ever before, some deserving Americans are falling in the cracks.

While there certainly are problems, most identified so far are based upon anecdotal evidence. There has been no documentation of nationwide "hunger" problems, unless one accepts frequently biased media reports.

In April, my nutrition subcommittee held a hearing on "The Nutritional Status of Low-Income Americans in the 1980s" in an attempt to determine the extent of reported "hunger" problems and the potential causes. This hearing underscored the fact that comprehensive, objective, up-to-date information is not available. The reality of the "hunger" problem has been distorted by media in response to complaints by "hunger" critics who seldom offer constructive ideas. They are, by and large, liberal Democrats who will always be anti-Reagan"—a point never made by the writers or commentators.

As the chairman of the Senate subcommittee on nutrition, I have actively participated in the development of the federal nutrition programs since the late 1960s. For the most part, it is my view that food assistance programs have been effective in alleviating domestic nutrition problems. No one who objectively reviews the issue believes we are witnessing a return to the conditions existing a decade or two ago.

Let's treat this issue fairly. While there are some deserving Americans who fail to receive adequate food assistance, there are others who benefit who should not.

This is rarely the focus of attention by "hunger" activists or the media, but it should be noted that, in the food stamp program alone, an estimated $1 billion annually is squandered through excessive benefits, payments to ineligible recipients and outright fraud. A billion dollars could go a long way in assisting those not now being reached.

Another point that deserves clarification is the repeated allegation by "hunger" critics that the Reagan budget cuts are the direct cause of all the alleged hardships. The truth is that Congress finally recognized some areas in the food assistance programs were getting out of hand. The net result was achievement of significant savings in 1981—near the level of the president's budget request, but accomplished by Republican and Democratic cooperation.

For example: we instituted a provision for the prorating of monthly benefits in the first month of participating in the food stamp program. This means in effect that, instead of receiving a full month's allotment, newly eligible participants would receive only an allotment equivalent to the actual days remaining in the month for which they initially qualified. This provision alone saves about $600 million annually.

Throughout this process of review and cost reduction, we protected the interests of those without strong voices in Congress by rejecting a number of undesirable amendments. We did this, and still managed to reduce food stamp program costs by about $7 billion over a three-year period, fiscal years 1982-1985. The changes made served to better target benefits, eliminate some fraud and waste, and initiate much-needed administrative improvements. In my view, Congress must continue to scrutinize these programs to make them more cost-effective, being responsive to the needs of both deserving recipients and overburdened taxpayers.

Let me cite another area constantly in the news. While nutrition problems persist, so do government-owned agricultural surpluses. This is a striking paradox, and it is genuinely difficult to comprehend that there can be scarcity for some while mountainous surpluses of agricultural commodities exist simultaneously.

This dilemma, recognized by Congress and the administration, perhaps explains why the final piece of legislation acted on by Congress before the August recess was a two-year extension of the Temporary Emergency Food Assistance Act. This act will require the secretary of agriculture to distribute surplus cheese, butter, milk, wheat, rice, corn, soybeans and honey to eligible recipient agencies that provide food assistance in local communities. This proposal, which I introduced for myself and 33 other Republican and Democratic senators, includes $50 million in funding for intrastate distribution and storage, with $10 million set aside for use by local agencies, in order to ensure that the program can be effectively implemented.

Finally, it should be noted that, while the unemployment rate is failing with the strong economic recovery, many Americans still face daily hardships. Soup kitchens are serving more people than ever before, and food banks are busier than ever. An unprecedented number of house holds are participating in the food stamp program—23.4 million in contrast to just under 21 million four years ago.

More money is being spent on the food stamp program now—a total of about $12.8 billion. In 1979 food stamp costs totaled about $7 billion, and combined federal food program expenditures were about $11 billion. The federal government is now spending close to $17.8 billion on about 10 separate programs.

In addition to the food stamp program, there are numerous child nutrition programs, including school lunch, school breakfast, child care food, summer food, commodity supplemental and special supplemental food program for women, infants and children, usually referred to as WIC. Nearly $4.8 billion annually is being spent on these combined programs.

There is also a false notion, advocated by some, that sole responsibility for food assistance, including distribution, should rest with the federal government. On the contrary, it is my view that federal efforts should be generously supplemented by state and local governments—all working together with nonprofit organizations and community volunteers.

While nutrition programs have had a dramatic, positive impact on hunger and malnutrition in this country, the federal bureaucracy—no matter how sensitive—cannot possibly respond to all the problems of individuals in need of food assistance. Responsibility must be spread and shared if we are to properly serve those who permanently or temporarily need help. For starters, more bipartisan cooperation and less partisan rhetoric would be helpful.

HISPANIC-AMERICANS

Mr. DOMENICI. Mr. President, I have often thought that one of the most unique characteristics of the United States is the fact that while we would all call ourselves Americans, one would be hard pressed to define exactly what that means as far as isolating a common heritage we share as a people. While there is no doubt that we are unified in those values and principles which we hold dear, the fact remains that the United States is, quite literally, a Nation of immigrants. As such, it is perhaps in the amalgamation of the many diverse cultural backgrounds that comprise our citizenry through which we derive our collective strength.

As this last week we celebrated Hispanic Heritage Week, it is appropriate that we all take note of—and state our

gratitude for—the unique contributions that those among us of Hispanic descent have made to the quality of American life. Coming from New Mexico, where more than one-third of the citizens are of Hispanic origin, I have had the privilege of working with Hispanic-Americans in nearly every aspect of business and political life. The importance they place on hard work, traditional values, and the maintenance of close family ties represent for me what would be at the heart of any society concerned with developing a strong, enduring moral fiber. While the existence of these virtues are of immeasurable value in the lives of individual Hispanic communities, I can only feel that an increased proliferation of these ethics into the mainstream of American life would be an enormous asset to the strong principles upon which this Nation was founded.

The Rose Garden ceremony officially marking last week as Hispanic Heritage Week was highlighted by the nomination of Katherine Ortega to be Treasurer of the United States. She joins Manuel Justiz, Director of the National Institute of Education; Henry Rivera, FCC Commissioner, and Linda Chavez, Staff Director of the U.S. Civil Rights Commission, as Hispanic-Americans in positions of great importance to the domestic policies of this Nation. And while I must add with great pride that all four of these outstanding citizens are from my home State of New Mexico, it is worth noting that President Reagan has appointed 125 Hispanics to serve in his administration. With more than 20 Hispanics under consideration at this time, I can only believe that this number will grow, and will grow to the benefit of our National Government as this wealth of talent is tapped.

Last week afforded us not only an opportunity to reflect on the enrichment and diversity with which Hispanic culture has endowed American life, but to look forward to an ever-widening role for Hispanic-Americans in the carving out of a productive and prosperous future for all Americans.

As a Nation, we should be keenly aware of the natural bridge we have to our Latin American neighbors. Our Hispanic citizens form this bridge, and the more we can do to brighten their future, the more we will be doing to inspire Latin America with a realistic vision of the joys and rewards of living in a democracy. As we recall past cultural achievements and contributions. I would like to close my belief comments with a call to the future possibilities in our relations with Mexico, Central America, and South America. These are troubled countries today, but the United States, with the active participation of our Hispanic population, can show the way to economic strength, peace, and prosperity. I hope that my country and my fellow Hispanics will accept this challenge.

IN MEMORY OF HENRY M. JACKSON

Mr. PRESSLER. Mr. President, during the summer recess, the Senate suffered a tragic loss. Our distinguished colleague, Senator Henry M. Jackson of the State of Washington, died suddenly on September 1.

We will greatly miss Scoop Jackson. For 42 years, Scoop Jackson represented the State of Washington in Congress. The last 30 years were spent in the U.S. Senate. At the time of his death, Scoop was the ranking member of the Senate Armed Services Committee and the third most senior Democratic Senator. On two occasions, he entered the race for his party's nomination for the Presidency.

But Jackson was a man of far greater importance to this Nation and the Senate than these simple facts suggest. In this distinguished Chamber, noted for its great leaders, Henry Jackson was a giant. Indeed, he was an institution within this great Government.

For new Members of the Senate, he was a role model and the embodiment of what it was to be a Senator. For 30 years, Senator Jackson was part of the Senate's tradition. It is with sorrow that we return to this Chamber knowing that this mighty political figure is gone.

To the Nation as a whole, Senator Jackson was best known for his advocacy of a strong defense posture. He spoke out forcefully and repeatedly for Amercian vigilance against the threat posed by the Soviet Union. It is characteristic that, in his last public act, he spoke out in protest against the Soviet Union's barbarous attack on Korean Air Lines flight 007.

Scoop was a leading friend of Israel. Year in and year out, he remained a constant friend of this uniquely democratic Middle Eastern nation. Scoop supported freedom and democracy wherever it flourished, but this only partly explains his support for Israel. The Senator was also a close friend of the world's Jewish community and used all his resources to assure that they would never again be victims of genocidal policies. His authorship of the landmark Jackson-Vanik amendment, tying most-favored-nation trade status for the Soviet Union to Soviet policy on Jewish emigration, reflected this broad concern.

Scoop had faith in the strength, loyalty, and basic goodness of the American people. He believed that the threat to U.S. security arose less from internal conspiracy than from policies of an expansionist Soviet Union.

Senator Jackson was not a one-dimensional man. Though his foreign and defense policy views were well known, he was equally active in domestic affairs. Senator Jackson was a New Deal Democrat who believed that the Government should actively advance and protect the interests of its citizens. He advocated the creation of a consumer protection agency. He authored the act that led to the creation of the Environmental Protection Agency. He was deeply concerned about the plight of our less fortunate citizens.

Henry M. Jackson left a clear record of his views. During his 30 years in this body, he cast over 11,000 votes. His statements on public policy were frequently covered in the media.

The Senate was fortunate to experience the leadership and companionship of Scoop Jackson. The Senate and our Nation are richer for the fact that he devoted his life to public service. I am saddened by the death of Senator Henry M. Jackson, and I extend my deepest sympathy to his widow, Helen, the other members of his family, and the citizens of his beloved State of Washington.

SENATOR HENRY M. JACKSON

Mr. HEINZ. Mr. President, on September 1, the Senate lost one of its greatest leaders, and we all lost a close friend.

For over four decades, Senator Henry Jackson faithfully served his constituents and our country with unparalleled vigor and an unselfish character. As we, who were honored to serve with him, were reminded and benefited time after time, he possessed a tremendous wealth of knowledge and expertise, especially in the areas of defense, energy, civil rights, and United States-Soviet relations. But, as significant as the wide sweep of his deep interests, his unfailing ability to identify and articulate the issue of central importance in any public policy debate was a gift that earned him unquestioned respect from both sides of the aisle. He was above all a fairminded man of infinite decency and total integrity, of talent married with energy that flowed from inner sources that most of us either never use or simply do not know how to draw upon. He was a man whose strongly held beliefs brought him the affection of his coworkers and millions of countrymen.

Scoop Jackson will be long remembered for his tough anti-Communist stand and for his brilliance on affairs of national defense. But he also understood the importance of bipartisanship. No Senator worked harder to remove the threatening winds of party politics from the debate surrounding national defense than Scoop Jackson. To him, national security could not be an issue decided by the ideological differences of political parties. The

safety of the American people was always first and foremost. We would be well advised, Mr. President, in these contentious and fractious times, to keep this, his example, in our minds as we remember Scoop Jackson, the man in our hearts.

Mr. President, Scoop Jackson's sentiments on issues of civil rights and personal freedoms were also a profound part of his character. As comfortable as he felt in his dealings with questions of national defense and security, he was similarly at ease in making an unflinching effort throughout his career in public service to afford the American people the widest latitude in personal freedoms. To Senator Jackson, the rights of individuals were sacred and inalienable. He believed that individual human rights should know no boundaries and that human beings, be they a black mill worker in North Carolina or a Jew in Leningrad, must be protected from those that would limit or prohibit basic and fundamental rights.

Very personally, Mr. President, I am profoundly saddened by the loss of a friend. He was the first Senator I met except for my employer, Senator Hugh Scott, when I came to work as a Senate staff member here in Washington in 1964. Although I was only a 25-year-old neophyte, he did not hesitate to welcome me into his office and be as gracious and helpful as he always was to all of us as colleagues. He was then a friend and contemporary of my father's. During my service in the Senate, I count myself fortunate to make a similar claim upon his and my relationship. It understates it to say that he is one of the most thoughtful, generous, and conscientious men I have ever met or have had the opportunity to work with. My colleagues and I are joined, I believe, by an entire international community that will mourn the passage of this outstanding leader.

THE CONGRESSIONAL RECORD

Mr. MATHIAS. Mr. President, in February of this year the Reader's Digest published an article by James Nathan Miller entitled "Congress's License to Lie." The article is in the form of a letter addressed to me as chairman of the Joint Committee on Printing, a position that I held in the last Congress. The gist of Mr. Miller's article is that the practice of editing the CONGRESSIONAL RECORD before it is printed amounts to a gross deception of the American people. He projects a picture of Senators and Representatives saying one thing on the floor and then so radically changing their words in print as to misrepresent their position on matters of public policy. It is possible to read between the lines of his article that Members change their positions on issues to correspond to the outcome of a vote. It is possible to get the idea that the RECORD is untrustworthy as an indication of the position a Member takes on a question of public policy. In fact, as a result of the article, I have been deluged with mail from concerned and sometimes irate citizens who want to know what I am going to do to rectify the situation Mr. Miller describes.

As my colleagues know, "I" alone cannot do anything about abuse of the CONGRESSIONAL RECORD, although I certainly would raise questions myself if deceptions were being practiced as Mr. Miller suggests or if there were no effective remedies. But reflection reveals that this is one of those situations where it is easier to parody than to explain why things are done the way they are. Let us consider Mr. Miller's proposed remedy. He proposes a "system of printing verbatim all words spoken on the floor." This sounds so simple, so obvious, that one wonders why it is otherwise. But, of course, there is no such thing as an unedited transcript.

I take my hat off to the official reporters of debate, to the men and women who take down what we say here. I know of no group of people in the Senate or elsewhere who surpass them in skill or devotion to duty. I am frequently amazed that they can actually keep up with the lively debate that characterizes the Senate, much less take it down so accurately—word for word. But they would be the last to claim that they never make a mistake; that there is no need to edit their work. Even an electronic record usually requires some editorial treatment, as the world learned during the Watergate hearings. So no matter how passionately one embraces the idea of a verbatim transcript at the outset, any reasonable person would have to concede the necessity for editing and correcting. Once this is conceded, it then becomes a question of where to draw the line. Or, more precisely, the question is really, who will draw the line? And how?

When a Senator or a Representative edits a transcript, who is going to tell him or her that he or she has stepped over that imaginary line between editing and revising? Is the Chief of the Official Reporters of Debate going to do it? Is the Secretary of the Senate? Is the majority leader or the minority leader? Is the President pro tempore? The Vice President? Am I supposed to do it? Are you? Who wishes to be appointed the Censor of the Senate? Or are we to put such questions to a vote of the Senate?

Merely to ask the question exposes the impracticality of the proposal. But I do not mean to suggest that there is no one to do this, or that it does not need to be done. For clearly, it is possible for a Senator or Representative to go beyond the bounds of reason in his or her editing, and just as clearly there should be a remedy. But in fact, there already is a group of people whose life work is to keep an eye on us and to raise the alarm when we overstep the lines of propriety.

Mr. Miller is a member of that group, and he and his colleagues in the press—the fourth estate of government—do a thorough job of keeping an eye on us and publishing reports about our real and imagined faults. That is how it should be.

Senators and Representatives are responsible to the people of their States and districts, and the effective remedy against Senators and Representatives who make changes in the RECORD that go beyond editing, that smack of a deceptive revising of history, is just the kind of article that Mr. Miller has written. In his assertions, naming names and citing specific instances as he has done, he brings a Member's actions to the attention of those before whom the Member must stand for election and to whom he must explain his behavior. And the value of the ammunition such disclosures provide to potential challengers is beyond measure. In fact Mr. Miller's article could serve not only as an example of investigative journalism but also as a classic example of one aspect of how American democracy works. None among us surely is so naive as to think that merely writing a new rule would work half as well.

II. ON WHETHER ANYONE REALLY IS DECEIVED

There is another dimension to Mr. Miller's allegations. His proposal assumes that a verbatim transcript is inherently preferable to the current RECORD. As we all know, the RECORD is an assemblage of many things not spoken on the floor. It includes the text of bills and resolutions and sometimes the text of reports. It includes reprints of articles from newspapers and magazines. It includes expressions of views of Senators and Representatives which are not spoken on the floor, but which are there for the purposes of stating the Member's position, communicating his views to others and sharing with the public facts and viewpoints of interest to an informed citizenry. Mr. Miller suggests that these practices, in and of themselves, are deceptive because they do not conform to the ideal of a verbatim transcript. This is, of course, a value judgment about which reasonable people can disagree. Certainly if the RECORD came with a statement on the cover proclaiming it to be a verbatim transcript, then I could understand outrage at a discovery of its true nature. But I challenge you to find anyone interested enough in public affairs to have studied the CONGRESSIONAL RECORD who does not understand what it is, what it contains, and the

useful purposes served by the way it is used.

Now none of what I have said so far should be taken to mean that I have no suggestions for improvement. In studying this matter, I have become acutely aware of certain areas that could use improvement. As I see it, there are two major problems. First, the RECORD contains materials that simply need not be there at all. This material, which is varied in nature and substantial in size, creates two problems: It is expensive, and the clutter it adds makes the essential parts of the RECORD more difficult to use. The second major problem is the rule requiring material not spoken on the floor to be identified in the RECORD by the "bullet" symbol. In both of these respects, Senate practice differs from that of the House, which, in my view, provides an example that the Senate would do well to emulate.

III. COST OF THE CONGRESSIONAL RECORD

I recently asked the staffs of the Joint Committee on Printing, the Senate Committee on Rules and Administration, and the Senate Computer Center to analyze material in the CONGRESSIONAL RECORD. The analysis covered the period from February 28 through March 11, 1983. Each page of the RECORD for each day was examined and the material classified into categories. The Senate categories were: Morning business, executive session, legislative session, and the introduction of bills and resolutions. The House categories were: 1-minute speeches, legislative session, special orders, and extension of remarks. Within each category, material was further classified into two subgroups: Statements and extraneous material. Whether material was "bulleted" or not was recorded, and the number of column inches taken up by each item was also recorded. I would like to share with Members some of the results of the analysis.

There was a total of 38,446 column inches of material in the CONGRESSIONAL RECORD for the days covered by the analysis. In this discussion it will be important to bear three things in mind. First, the per-page cost of the CONGRESSIONAL RECORD is $483. Second, there are 28.5 column inches per page. Third, each column inch, therefore, costs $16.95. The total column inches for the 12-day period, therefore, cost $651,660. This represents an annual cost of over $19 million. As a body, we often spend hundreds of hours looking for ways to save money. While savings in this area would be modest, compared with the need, we certainly are in a time when even modest savings ought not to be overlooked.

Of the overall total, 23,287 column inches, or 61 percent, was used by the Senate, and 15,158 column inches, or 39 percent, was used by the House. With one-fourth the Members, the Senate used one and one-half times as much space in the RECORD as the House. Part of this imbalance can be attributed to the cherished Senate tradition of unlimited debate, but by no means all of it. The amounts and percentages in the various categories are set forth in the two following tables:

	Measurement in column inches				Percentage of House and Senate total				Cost at $16.95 per column inch

Note: Detail may not add to totals due to rounding.

Study of the tabulations reveals some startling facts. First, the largest single category, in either body, is the introduction of bills and resolutions in the Senate. Over 25 percent of the RECORD for the review period was taken up with the text of measures, statements on measures, and related extraneous material. At a cost of over $170,000 for this period. The text of measures alone took over 10 percent of the RECORD, at a cost of $70,000. The texts of bills are not printed in the House portion of the RECORD, and I would recommend that Senators content themselves with the customary printing of bills and resolutions as such. They need not be reprinted in the RECORD.

Another thing to look at in the tabulation is the volume of extraneous material. For the Senate, this totaled over 300 pages, at a cost of over $150,000. It represented almost one-fourth of the House and Senate combined total, and over 38 percent of the Senate total. Clearly the RECORD is being used for more than to report the debate on the Senate floor. Clearly also, the word "substantially" in section 901 of title 44 of the United States Code, which requires that the RECORD be "substantially a verbatim report of proceedings" has become meaningless. The combined cost of these 12 days of extraneous material in the House and Senate portions was approximately $250,000. This represents potential annual costs of $7.5 million. Review of the extraneous material reveals that the RECORD has become a catchall and that some of the material has little, if any, relevance to the business at hand and sometimes no relevance at all to the legislative process. There is material in the RECORD that more appropriately belongs in committee reports or hearings. Let us resolve to put it there, where the per page cost is only $112, less than one-fourth the per-page cost of the RECORD. There is material in the RECORD that appropriately belongs in newsletters to constituents. Let us put it there instead.

Not only does this extraneous material represent unnecessary cost, the additional volume of such material, and the fact that it is not segregated into a special section, makes it unnecessarily difficult to use the RECORD for its primary purpose; namely, to follow action on legislation on the floor. Of course, one of the reasons so much extraneous material is inserted is that the franking law allows us to send reprints of the CONGRESSIONAL RECORD as franked mail. This provision was intended to facilitate dissemination of the debate on major issues to the public. But now much of the material in the RECORD seems to be there for no purpose other than to make it frankable. Then, in addition to the RECORD costs, the Senate incurs costs to mass-mail the reprints. In this connection, it is worth recalling that the cost for Senate mass-mail in 1982 was $33 million.

IV. USE OF THE BULLET

Let me turn now to the use of the "bullet." As you know, the large dot or "bullet" is used to identify material not spoken on the floor. This began on March 1, 1978. To Senator PACKWOOD and the late Representative Bill Steiger belong the credit for the idea, which they proposed 2 years earlier. The purpose of the "bullet" is simple. It is to let readers of the RECORD know that statements so identified were not part of the live discussion on the floor. This does not detract from the usefulness of a submitted statement as a record of a Members' views, but it does allow readers to get a true picture of what happened. It could even have a bearing on legislative history. A statement spoken in debate, if unchallenged by other participants, carries a certain weight. A submitted statement, not spoken, could not be challenged because other Senators, and the managers of a bill in particular, would not even know that the statement was being made. The absence of challenge to such a statement should have different weight in the legislative history than the absence of challenge to a spoken statement. Without some typographical device to distinguish between the two, they will carry equal weight, and should, if for this reason alone, be marked.

In the Senate, there is growing resistance to use of the "bullet." In fact, from its inception, a way was found to escape it. It was agreed that if a Senator spoke the first sentence of a statement, the "bullet" would not appear, and the entire statement would appear as if spoken in its entirety. Later, some Senators found an easier way: simply to go to the Official Reporter of Debates and request that the "bullet" not appear. There have even been suggestions that the requirement for use of the "bullet" be dropped altogether.

I think that the idea behind the "bullet" is sound, and that the erosion of its effectiveness should be reversed. Instead of eliminating or further weakening the requirement, I recommend that it be strengthened. I think we should return to the practice of using bullets unless a statement is read in its entirety. If the Senator does not have the time to come and make the full statement, let us adjourn and hear him when he does have time. Or let him submit the statement to be printed with the "bullet" or put it in an appendix as an appropriate alternative.

I know the distinguished majority leader will be quick to recognize the importance of this to his hopes of restoring the Senate as a forum for the debate of major issues. This reform would require Senators who want to have a reputation for being involved in legislative debate to be actually involved in legislative debate. If the appearance is so important, let us use that as an incentive to bring about the reality. And, finally, it would make for more accurate legislative histories, a result that by itself should be justification enough.

In conclusion, I would just point out that there are already rules governing inserted material, which, if followed faithfully, would go a long way toward correcting abuses. These rules are printed occasionally in the back of the RECORD, and I urge my colleagues to read them, noting especially paragraph 13 on the two-page rule, which states that no extraneous matter in excess of two printed RECORD pages can be printed unless it is accompanied by a printing cost estimate from the Public Printer and which limits the kinds of material that can be included.

As a Republican, I am a staunch believer in government being the regulator of last resort, and whenever I address business groups I exhort them to clean up their own acts if they want government off their backs and out of their pockets. That message has equal validity for us. We can regulate ourselves and observe the sensible rules we have made for use of the CONGRESSIONAL RECORD, or we can expose ourselves to criticism and calumny for not doing so.

TRIBUTE TO JOHN R. OLDHAM

Mr. MATHIAS. Mr. President, among the many innocent victims of Korean Air Lines flight 007 was John R. Oldham, a 27-year-old aspiring attorney from Bethesda, Md.

Mr. Oldham was on his way to the People's Republic of China to teach law at the Beijing University Law School under a program established between Columbia University Law School and the Beijing University Law School. He planned to spend a year in China before joining the Washington, D.C., office of the international law firm of Surrey & Morse. He had been offered an associate position as a result of his outstanding performance as a summer associate with the firm during the summer of 1982.

Mr. Oldham was respected and admired by his contemporaries at school, at work, and in community organizations. He also was admired by his elders, teachers, friends, neighbors, and mentors. Illustrative of the respect and admiration which he engendered is the reaction to his loss by his colleagues at Surrey & Morse. They have prepared a tribute to Mr. Oldham. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the tribute was ordered to be printed in the RECORD, as follows:

JOHN R. OLDHAM—A TRIBUTE FROM HIS FRIENDS AT SURREY & MORSE

We, the attorneys of Surrey & Morse, join the family and friends of John R. Oldham in mourning the tragic and senseless death of our friend and colleague. John was aboard Korean Air Lines flight 007 from New York to Seoul when, during the early morning hours of September 1, 1983, a Soviet fighter plane attacked and brought down the Korean commercial jet. John and 268 other passengers were massacred.

To us, the attorneys of Surrey & Morse, the death of one of our colleagues, John R. Oldham, will remain a loss for us personally, for our profession, and for those who shared his dreams for the betterment of the world.

John accomplished much in his 27 years of life. He was a cum laude graduate of Princeton's Woodrow Wilson School of International Relations; a Fulbright Scholar at the University of Geneva, Switzerland; a 1983 graduate of Columbia University Law School; and a selfless, dedicated volunteer for the Red Cross and other worthy international causes. His accomplishments bespoke a person consumed with the drive to leave this world a better place than it had been.

What John had experienced and learned from his travels in Asia and the Middle East underscored his passion for improving the lives of the underprivileged and healing the wounds of the innocent victims of conflict. He dedicated his life to international law and relations. His life's journey was a path of study, training, and experience which better enabled John to enrich the lives of others and to work at solving some of the world's most truculent problems. To end suffering, to bring understanding, to find solutions where none had worked before—these were John's aspirations. His chief tools were trust, logic, strength of character, and that special kind of hope and optimism.

John was on his way to Beijing to teach and study law at The Beijing University Law School for one year before he was to rejoin our ranks as an associate. We had come to know John well. He had served as a summer associate with Surrey & Morse in 1982 and was offered a full-time position, not only because of his outstanding performance as a lawyer, but also because of his enthusiasm, integrity, humility, and great sense of humor.

Only a few days before his departure for East Asia, many of us had visited with John, discussed his plans for the year, and had wished him well. He recently had completed the District of Columbia Bar examination and eagerly was anticipating new encounters, new challenges, and new friends in the People's Republic of China. His exuberance excited our office during that recent whirlwind visit.

Each of us will long remember the all too brief period in which we were able to share our personal and professional lives with John. Individually and collectively, we will all remember and honor the times he shared with us and his dedication to righting the wrongs of humanity.

John's legacy will continue. Together with his many friends and colleagues, Columbia University Law School is establishing The John R. Oldham Scholarship Fund. This scholarship will be awarded to students so that they can continue in the work which was so dear to John.

We, his colleagues at Surrey & Morse, are grateful and privileged to have known John. We shall always miss him.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I believe the order would provide for the Chair to lay before the Senate the unfinished business.

The PRESIDING OFFICER. Morning business is closed.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The PRESIDING OFFICER. The Chair will lay before the Senate the unfinished business.

The legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior, and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The Senate resumed consideration of the bill.

AMENDMENT NO. 2110

The PRESIDING OFFICER. The question is on agreeing to amendment No. 2110 offered by the Senator from Idaho.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, will the Chair state the pending business?

The PRESIDING OFFICER. The question is on the amendment of the Senator from Idaho, numbered 2110, to the committee amendment on page 81.

Mr. McCLURE. Mr. President, I yield at this time to the Senator from Oregon.

Mr. HATFIELD. I thank the chairman of the Interior Subcommittee of the Appropriations Committee for his courtesy.

Mr. President, I should like to pose a request to the chairman of the subcommittee and to the managers of the bill generally.

As we may recall, when we had this Interior appropriations bill before the Senate prior to the recess, there was added to the bill at that time section 317, which relates to the financing of WPPSS No. 2 and No. 3.

Before I address that particular point, I should like to recall to mind that up to this time, we have had 4 of the 13 appropriations bills passed by both the Senate and the House, reached a conference report, and now signed by the President. That is 4 of the 13. We have three more of the appropriations bills ready for conference: The agriculture, the D.C., and the military construction bills. The latter two will be in conference this Wednesday.

This in itself is a rather remarkable record thus far because generally speaking we have not moved toward the goal of passing 13 appropriations bills for a number of years.

The Senate Committee on Appropriations has marked up the remaining bills with the exception of Labor-HHS, which has now cleared the subcommittee and will be marked up next week by the full committee; the foreign operations bill, which is scheduled for subcommittee markup this Thursday and full committee next week; and the defense bill.

The Interior bill, which is now before us, is the last of the bills which the House of Representatives has acted upon and sent to the Senate thus far.

Why I think it is materially important to have action on this and any other appropriations bill is not only to try to get as many of them done as possible before we have to face the CR. We are going to have a continuing resolution. There is no way out of it. But we need to at least act on these bills in order to develop the benchmark for negotiating with the House of Representatives as it relates to the CR.

I am very hopeful that we can have a short term CR in order to give an opportunity to complete the work on all the remaining of these bills and get them down to the White House and get them signed so that we will not have to function in any agency under the CR for a long period. My hope, desire, dream, and vision would be not to have any agency function under the CR for longer than perhaps a month or 6 weeks.

But I cannot cross that bridge until we come to it. I am only indicating at this point that we, I feel, must reach some agreement on the Interior appropriations bill in order to develop our benchmark and move the appropriation process forward.

Mr. President, it is very obvious that this not only is a controversial issue within the region but it has far-reaching impact on the Nation as a whole in terms of the bonding capability of various and sundry political subdivisions, and so it is a national issue in that sense.

Rather than attempting to resolve that issue as an amendment to the Interior appropriations bill, I would much prefer to see this handled as a separate vehicle so that we can not only move the appropriations bill into final completion but also deal with this very important subject when there have been adequate hearings on the House side and when we have the benefit of the ongoing investigations that are now being conducted by the Luce Commission, named after Charlie Luce, the former Director of BPA, the Luce Commission, the Northwest Power Planning Council, which is also carrying on an investigation on this matter, and the BPA, the Bonneville Power Administration.

So we have three entities, in effect, that are carrying on an investigation as to the complexities and the problem of WPPSS 2 and 3.

I think it would be very helpful to have the results of those findings when they are available.

Also, judging from the results of the hearings earlier this week on the House side, it appears as though the House of Representatives from my general estimate is not going to act upon this matter in the immediate future, so I do not see any time incentive here to move this on an appropriations measure.

I know this subject and this problem is not going to go away. It is going to have a vehicle of its own, or we will have other vehicles coming down the track upon which this matter can be decided or at least debated.

So with that background and for those reasons, I urge, ask, and request the chairman of the committee to call or to pull this amendment down at this time in order that we may proceed with the appropriations bill generally unencumbered by what I am sure would necessitate a long, extensive discussion and debate not only in the Senate but also in the House of Representatives and probably in conference if such an amendment really survived that length of time.

I know the Senators from Washington State are very interested in this. It involves their State very intimately as well as the State of Idaho from which the chairman of the committee comes, and my own State of Oregon, the whole district and area served by the BPA, but, as I said, every Senator has some very legitimate interest in this.

I am very hopeful the Senators from Washington will comment. I see Senator EVANS has arrived in the Chamber; I am sure Senator GORTON likewise will want to make some comments on this matter.

But that is the background. Those are the reasons why I urge the chairman of the committee to pull this amendment down at this time and I make that as a request to him.

Mr. Metzenbaum and Mr. McClure addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. METZENBAUM. Mr. President, the Senator from Ohio sought recognition. The rules of the Senate——

Mr. McCLURE. Mr. President, before the Senator from Ohio gets involved, might I respond to the Senator from Oregon just very briefly?

Mr. METZENBAUM. Yes.

Mr. McCLURE. I am certain before we are completed, we will both have had the opportunity to express ourselves very fully upon this issue, and I do not mean to preempt at all. I will be very brief.

Mr. METZENBAUM. I yield to the Senator from Idaho.

Mr. McCLURE. I will not try at all to make a full statement at this time because I know the Senator from Ohio——

Mr. METZENBAUM. I yield to the Senator from Idaho, but I just want the Chair to understand that the rules of this body provide that the first Member of the Senate on the floor seeking recognition is entitled to it, and there was developing a practice of not providing for that recognition and each time it occurs, I am going to be on my feet and I am asking the minority leader to do the same.

It is not a question of who or what. It is the question of who is first on the floor with the exception of the majority leader and the minority leader.

The PRESIDING OFFICER. In the judgment of the Chair, both were on their feet at the same time seeking recognition at the same time.

The Senator from Idaho.

Mr. McCLURE. Mr. President, I think it would be encumbent upon me also to express the concern that has been expressed off and even on the floor as to whether or not the leadership has a priority in the claim on the attention of the Chair where there are two or more seeking the attention of the Chair at the same time. I think the manager of the bill ordinarily stands in the place of the leadership in those circumstances and the Chair ordinarily recognizes in that fashion.

But I do not want to get involved in that at this time with my friend from Ohio at all.

I do wish to express my appreciation of the remarks the Senator from Oregon has made and to acknowledge that indeed there is a reason to want to get the Interior appropriations measure done.

One of the options which I might have in this instance is to ask that further consideration of the Interior appropriations bill be deferred until we have had the opportunity to try to work something out with respect to this amendment and with other people who are involved, including the Senator from Ohio, the Senator from Wisconsin, and others who have expessed interest. It is also possible that we simply go ahead with the discussion and take however long it may take to resolve the issue and then have a vote on it.

The Senate earlier worked its will with respect to a procedural question, and I wish to take note of that just very briefly.

The question was whether or not this amendment should be in order on this bill at this time, and the discussion centered around the question of how does Congress ordinarily address the question of the operations of the Bonneville Power Administration, because that is what we are addressing here.

There were a number of the news reports in regard to the discussion in the Appropriations Committee or the hearing in the Committee on Energy and Natural Resources on the legislation pending before that committee, both the hearing that was held here in Washington, D.C., and the hearing that was held in Seattle, Wash. The news reports oftentimes referred to this amendment as something that created a new entity with which Bonneville Power then could negotiate with respect to the completion of these powerplants.

I wish to underscore that this amendment does not do that. This amendment simply allows BPA the authority to deal with such an entity if such an entity is created.

The reason I mention that at this juncture is that the jurisdiction of the Appropriations Committee has been called into question with respect to appropriations language because it deals with something other than Interior matters. As a matter of fact, all it does is do what we have done for many, many years, which is dealing with the way in which Bonneville Power Administration is instructed by Congress to conduct its business, and most of

that instruction has, as a matter of tradition and practice, been handled in appropriations language before the Appropriations Committee.

The authorization or the creation of a new entity outside of BPA might indeed be a different thing. That is the reason I draw that distinction at this time. The amendment creates no new entity. It simply gives the Bonneville Power Administration the authority to deal with such an entity if it is created.

The request of the Senator from Oregon is premised on the need for moving the Interior appropriations bill at this time. I do not desire to prolong or delay the consideration of this appropriations measure. There are many, many items in this legislation that are important to every Member of this Senate. I have had any number of requests from both sides of the aisle to somehow resolve the issue so we can get on with the consideration of this bill and all of the things that are encompassed within the bill

I am also aware of the studies that are on going, both in the Bonneville Power Administration and with the Northwest Power Planning Council, to determine the basic facts with respect to the cost effectiveness of completing powerplants Nos. 2 and 3, upon which the Bonneville Power Administration has entered into contracts with the Washington Public Power Supply System, as they did on No. 1 as well. But they did not have net billing agreements or contracts with WPPSS on plants Nos. 4 and 5, so Bonneville does have an interest with respect to 1, 2, and 3 and a responsibility with respect to 1, 2, and 3. I think it is ultimately going to devolve upon us in the Congress to give some advice and consent to actions that may be taken by Bonneville with respect to those powerplants.

In addition, the Governor of the State of Washington has appointed another commission to which the distinguished Senator from Oregon has made reference, the Luce Commission, trying to determine whether there is a solution to the problems that beset the Northwest, not just Bonneville, not just WPSS, but all of the entities and every citizen and ratepayer within the Northwest.

I think it has become abundantly clear that there are dozens of minority positions. There are as many different viewpoints and you can seek out different groups of people to provide those viewpoints with respect to what might be done or should be done, but there is no majority opinion.

I have been struggling for 2 years to try to find some way to alleviate the conditions so penalizing the Northwest and of such great concern to the country as a whole. We have tried at various times to come up with a partial solution or an entire solution, and we have always failed to reach a consensus among those contending forces and concerned groups not only in the Northwest but across the country.

I will not belabor the subject at this point other than to say that I have been persuaded that it is the better part of valor, and perhaps the better part of process, to wait until we have the benefit of those studies to which the Senator from Oregon has made reference and to which I have made reference. It may be that the conclusion of those studies will shed enough light on it that a majority view will emerge in the Northwest. It is also quite possible that those findings will not all be uniform. We may have, out of the three groups, three different answers and we will be no further along than we are today. But I have to hope, perhaps in the excess of optimism, that at least two of the three, if not three of the three, come up with at least some of the same answers and that we can then come before this body and say there is a majority of opinion, if not a unanimous opinion, in the Northwest that something needs to be done.

I know that the Senator from Ohio was seeking recognition, but I did want to respond to the Senator from Oregon before I go into more detail and I do want to go into more of the detail with respect to what the amendment was seeking to do.

I would say to my friend from Oregon, I am mindful of his request. I am not unwilling to respond to it today. It will be my intention at the appropriate time to ask unanimous consent that the amendment be withdrawn and that we set aside the Bonneville Power Administration questions for today, and come back to them at a later date.

Mr. HATFIELD. Will the Senator yield?

Mr. McCLURE. Yes.

Mr. HATFIELD. I wish to express my gratitude to the Senator for his gracious response to my request. I know, as the Senator does, and especially hearing his very erudite description of this very complex issue, that the issue is going to continue to confront us and, as I indicated, will not go away.

Also, I think it is very evident there will be a number of people who will want to speak on this subject today. I am not going to belabor the point further, but only express my appreciation to the Senator from Idaho for his acquiescing to this request and also to indicate to him my interest in continuing to study and to work together on trying to find some kind of a solution to the problem, because this, in effect, could set into sequence events and circumstances that could lead to an economic disaster for a major region of this country.

I do not want to in any way underestimate the magnitude and the importance of the problem. I think it is fairly well known that I am opposed to nuclear power as such and continue to be other than a supporter of nuclear power. But this matter transcends even that issue.

Mr. McCLURE. Will the Senator yield on that point?

Mr. HATFIELD. Yes.

Mr. McCLURE. I think the Senator states it well in that regard. I am a supporter of nuclear power, but in spite of that fact if I were not I would still be concerned about what is happening in the Northwest and the utility relationships that exist there.

Mr. HATFIELD. We are at least on agreement on that particular point, relating to the importance of the issue regardless of our personal views about nuclear power. Be that as it may, that is a battle and issue for another day and on another front.

But the economic importance of this, the power importance of it, the bonding importance, there are so many facets to this that raise it beyond just a simple simplistic idea of whether you are pro- or anti-nuclear power.

So I wanted to thank the Senator for his gracious response and I yield back to him at this time.

Mr. McCLURE. Mr. President, I believe the Senator from Ohio was seeking recognition. I have no objection to yielding the floor at this time. I will complete my remarks at a later time.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I want to address myself to the issue, and I am pleased with the results that I think are about to develop. But before doing so, I would like to address myself to the parliamentary aspects, because it is a matter of concern to me and I think a matter of concern to a number of Members on this side of the aisle. I am not now taking issue with the Presiding Officer, the Acting President of the Senate, because I accept him at his word that he felt that the Senator from Idaho was on the floor first and, therefore, was entitled to recognition. So, I am not raising that issue.

But I do want to say and I want to respond to my good friend from Idaho that you do not have a preferential right as the manager of the bill, even when you are sitting as the spokesperson for the majority leader.

The Senate rules specifically provide on page 880, which is right on target:

> A Senator managing the bill who may be sitting in the majority leader's seat, but did not address the Chair, would have no preferential status as to recognition.

Now I make this point only because it was a matter of some issue at an earlier point in the Senate's deliberation

some months ago. And I have strong feelings, and I think a number of other Members on this side of the aisle share those feelings, concerning the right to recognition.

Now on the question of the fact that this matter was up previously on a procedural question——

The PRESIDING OFFICER. Will the Senator suspend for just a moment, please?

Mr. METZENBAUM. I prefer not to. The Chair has no right to interrupt my remarks. At an appropriate time, I will be glad to hear from the Chair. I have the floor and will be glad to yield to——

The PRESIDING OFFICER. The Chair simply asks if the Senator will yield.

Mr. METZENBAUM. I see no reason to, but go ahead.

The PRESIDING OFFICER. Page 883 states:

> Leaders—Preferential Recognition:
> Under the traditions and practices of the Senate, the leadership is given preferential recognition when they seek the floor simultaneously with other Senators. Leaders and managers of a bill are given preferential recognition as compared to other Senators generally.

Thank you.

Mr. METZENBAUM. I want to point out to both the Parliamentarian and the acting Presiding Officer, the President of the Senate, that there is a condition to be found on page 883 that is not to be found on page 880; that is, when they seek the floor simultaneously with other Senators.

I said earlier that I am not challenging the Presiding Officer's decision that the Senator from Idaho may have been seeking recognition at the same time. I did not hear it. I am saying that if he is not seeking recognition and then arises subsequent in time to that of any other Member, under those circumstances that is not a simultaneous seeking of the floor but it is one that follows in sequential order and should be recognized in sequential order, not on a priority basis.

If the Parliamentarian or the President of the Senate wishes to debate that issue at length, I am prepared to suggest to the minority leader that he come to the floor and enter into this debate as well because I think it goes very much to the question of how the actions of this body are conducted, at least for the remainder of these 2 years, and how they will be conducted beginning in January 1985.

With respect to the question of the matter having been deliberated by the Senate previously on a procedural basis, I am not certain that I would agree with that description.

The matter was debated previously not on a procedural basis, but it was debated on the question that the Chair had ruled that this amendment was legislation on an appropriations bill and, therefore, out of order. In the main, that was a political vote where almost the entire body on the other side of the aisle saw fit to go with the manager of the bill. I will leave the subject of mechanics behind me at this point.

I am pleased to find that the manager of the bill and the chairman of the Appropriations Committee are prepared to take down the pending amendment.

I assume, and I think I am correct in that assumption, that taking down the pending amendment is indeed intended to mean that you have not taken down the pending amendment but that you will take down the committee amendment to which the pending amendment is pending. Am I correct in that?

Mr. McCLURE. Will the Senator yield?

Mr. METZENBAUM. Yes.

Mr. McCLURE. Yes that would be my intention. The committee amendment and the amendment thereto would be withdrawn and that would leave the bill silent with respect to the WPPSS question and the Bonneville Power Administration.

Mr. METZENBAUM. That is my understanding.

I commend the manager of the bill, the chairman of the Appropriations Committee and others interested in this matter for withdrawing the amendment. I understand the urgent desire to address the WPPSS problem and I share their concern for thousands of ratepayers, consumers, and bondholders caught up in the mess. But I think we ought to look at this entire situation on an overall perspective. I would hope that when they return the issue to the floor of the Senate, that they would also give some attention to the entire matter as pertains to the Bonneville Power Administration.

The Bonneville Power Administration currently owes the Federal Government nearly $8 billion for construction of the power generating and transmission facilities in the Northwest.

I have not had any difficulty in supporting these kinds of public power undertakings, but it was always my understanding that there would be repayment and that it would be done on a fair basis. But that is not the case.

The original Bonneville Power Act provided that the BPA's rate schedules should be drawn to repay the Federal investment over a reasonable period of years.

Well, that ought to teach those of us who are in the process of drafting legislation never to use loose language, never to fail to spell it out, because what is a reasonable period of years for those who are operating BPA may be very unreasonable for the rest of the taxpayers of this country.

As a consequence of that language, through its early years BPA made timely payments to the U.S. Treasury as required by law, but in 1965 it dropped the practice of making a fixed annual repayment to the United States. Instead, BPA adopted the repayment study method. Under this procedure, which has absolutely no counterpart in the private sector, BPA abolished annual repayments to the Treasury.

Let us think of what we are saying. There is a rolling 50-year repayment period which extends repayment deadlines to as long as 89 years—89 years. The interest rate in the main is subpar, substantially below that which the Federal Government pays for the money it borrows. If somebody owes the Federal Government $8 billion and is not repaying it at all, then that is the kind of subvention that I have difficulty in understanding. I cannot believe that my liberal friends over there on the other side of the aisle, no matter what State those liberals come from, I cannot believe that they think that the Federal Government ought to subvent BPA to the extent of millions and millions and millions of Treasury dollars. What kind of giveaway programs are these? What kind of nonbusinesslike approach is this? What kind of policy can anybody advocate that is so liberal that there is no repayment?

These are the conservatives of the Senate who are supporting that posture.

The amendment that is before us, which is about to be taken down, would have added approximately $1 billion more to that repayment schedule, only it would have provided a priority in front of that $8 billion. So the Federal Government would have wound up holding the bag for another $1 billion of debt, subpar interest rates, and we would have been subsidizing the Bonneville Power Authority even further than it is presently being subsidized.

As a result of the BPA policy, which had been approved by the Congress, I am sad to say, they have fallen so far behind in the repayment of their Federal investment. According to the General Accounting Office, BPA's $8 billion had only had $638 million of its total repaid, or less than 10 percent. Most of those payments came in the early years of operation. In fact, in the last 11 years, since 1972, BPA has only repaid $43 million, and it has made no repayment at all in the last 2 years, nor is it expected to make one this year.

The General Accounting Office has looked into this subject. The General Accounting Office has led a chorus of criticism on BPA's repayment practices. In a report last month GAO said that the repayment study method "is

not in keeping with sound business practices which require regular repayment of all debt."

In an earlier report the agency said that BPA's repayment practices have "created an unsanctioned burden on the American taxpayer" by forcing the Treasury to sell bonds at much higher rates to make up for BPA's shortfall.

I can see that this afternoon we are experiencing that which we do not experience very often in the Halls of Congress. Chalk one up for the American taxpayer. This is a victory for the American taxpayer who gets very few victories. Instead of being taken for another $1 billion at subpar interest rates, at least for the present we will not have to deal further with this issue.

In saying that, I want it to be understood that I am prepared to work with the sponsors and others in coming weeks to search for a better solution which not only addresses the plant construction issue, but also the increasing delinquency situation of BPA and other power marketing agencies in repaying the Treasury. I am prepared to work together to see to it that we provide a solution with respect to BPA's problems and that we do so in a fair and equitable manner so that the rest of the American taxpayers in this country will not be called upon to further subsidize BPA over and beyond that which it is presently doing.

Mr. McCLURE. Mr. President, I appreciate the comments of the Senator from Ohio. I do not disagree with some of what he has said, which may come as a great shock to him. I do not mean to prejudice the debate by indicating that if he is not careful, he and I will join forces, and that will really cause some consternation.

I have grown up with this problem. If I am remiss, I am remiss in the assumption that I did not know I would have an ally in the Senator from Ohio in trying to get done what I have long thought ought to be done, upon which I think he and I, judging from his comments now, would find common cause.

I did not want Bonneville Power to escape the obligation to repay the Treasury, but I think the very fact that this is something that all of us in the Northwest have lived with for all of our adult lives can obscure the fact that perhaps others have not lived with it as closely as have we. I think the Senator from Ohio would be pleased to know that the Bonneville Power Administration is required to go to the Federal Energy Regulatory Commission for review of its rate structure; that that rate case is now pending; and that the rate submitted by Bonneville Power today in the case that is now pending, that will be resolved very soon, contemplates keeping current on all obligations and, in addition, catching up the amount which is in arrears by 1985.

I know that the Senator from Ohio would be very quick, probably, to point out that keeping up with their schedule of repayments does not necessarily solve the question of how they do their accounting. That is an issue that arose before the Senator came to the Congress of the United States. As a matter of fact, I arrived in the House of Representatives in January 1967 and it was then the fact, if my memory serves me correctly, that they had then adopted the system of rolling maturities that allows them to refinance the entire debt whenever there is an addition to the debt and that addition to the debt is by way of expenditures which are approved by the Congress of the United States in the facilities that they use to distribute the Federal power generated at Federal facilities and/or the additional amount that they must repay by way of the repayment schedule on power-producing facilities. So this question of rolling maturities is a matter of some hoary age and will need to be addressed. I think the Senator may be somewhat shocked to find that he and I do not disagree on that point.

The more recent practice of Bonneville making a choice of which debt to repay—the oldest debt first or the newest debt first—in which they have said that they have the authority to determine to which of the debts they will apply the payment and they choose the one that has the highest interest rate, is a matter of relatively recent practice. It is not a practice that has been specifically approved by the Congress of the United States and I think is legitimately the subject of a question of the accounting practices.

There again, I think the Senator from Ohio, if he addresses himself to that issue, may find the Senator from Idaho was there in advance of the Senator from Ohio. I shall be happy to join forces with him in looking at this question as well.

When it comes to the question of catching up on past arrearages on payments, then, indeed, I cannot disagree with the Senator from Ohio. But let me suggest that when a region is going through the trauma that the Northwest is going through today, with the tremendous change in the economy of not just that region of the United States, but it has had a particular impact in that region, with the change over from very low cost hydropower facilities to relatively much higher cost thermal facilities, whether it be coal or nuclear, we would be seeing very large rate adjustments if everything had gone according to script and everything had gone well with the Washington Public Power Supply System.

Remember, the WPPSS is an instrumentality of the State of Washington; it is not an instrumentality of the Federal Government. While Bonneville Power Administration, at an earlier date, had agreed with the Washington Public Power Supply System that they would cooperate under what became known in the Northwest as the hydrothermal accord, that they would cooperate with them in absorbing the costs of the first three of those powerplants, they did not enter into such an agreement with WPPSS with respect to the last two of those powerplants. So Bonneville Power does have a very direct responsibility on plants numbered 1, 2, and 3 because of the contractual relationship that they entered into at that time.

As a matter of fact, Bonneville Power is now responding to lawsuits brought against them by some of the participants in Plants 1, 2, and 3 saying Bonneville Power is not meeting their obligation under those contracts by way of completion of 1, 2, and 3. So while we may be here debating whether they should go ahead in some way to find arrangements by which they could complete plants No. 2 and 3—No. 1 has been deferred indefinitely—some of the participants in 1, 2, and 3 are saying, "You are not doing enough to meet your contractual obligations." We shall be addressing that question.

What was primarily a regional question with respect to how you pay for the bonds that have been issued on powerplants No. 4 and 5, the Washington Public Power Supply System having decided to build those plants and having sold participation in that to 88 public entities throughout the Northwest in the States of Washington, Oregon, and Idaho primarily, those 88 entities and the Washington Public Power Supply System were faced with the collapse of the financing for those plants based on two or three factors.

One was the delay which was attendant on the construction of most powerplants and particularly nuclear powerplants under increasing Government regulation and scrutiny that stretches out the time that it takes to build a plant. They were also struck, as was everyone else, with the tremendous escalation in interest costs. When the cost of debt servicing is the largest single cost in a powerplant, because they get nothing back from the operation of the powerplant until it is on line and producing electricity and selling electricity—the cost of financing during that interim, which has now become 13 or 14 years, is the largest single cost. When you go from a cost that averages less than 6 percent per year to a cost of 18 percent per year to carry that debt, that tripling of the cost of the largest single item is a very real reason that they got in trouble.

Well, that is a part of the background. We can look at all these burgeoning problems with respect to the Northwest and say this is not the time for us to be compelled to look at the issue of the repayment schedule, although, certainly, I am quite willing to look at the repayment schedule. As I said earlier, Bonneville Power Administration and their current rate submission says that we will generate enough revenues not only to keep current but to pay, in addition to those current requirements, those amounts by which we are in arrears.

Peter Johnson, the administrator of the Bonneville Power Administration, says and has said repeatedly—publicly, privately, consistently—that if Bonneville Power Administration is to have credibility in the financial markets, it must show that it can pay its bills and will do so.

The rate schedule in being today reflects that.

I say to the Senator from Ohio and others, we have another major concern not just to the Northwest. It is also a matter of concern to the Nation, I hope. That is whether we maintain a viable aluminum industry. From the very beginning of the great main stem Columbia River dams there has been a surplus of electricity. Grand Coulee simply produced more electricity than the ordinary consumers in the Northwest could absorb in the market in that period of time. There was a tremendous surplus of low-cost hydroelectric power as a result of the Federal installations on the Columbia River. The aluminum industry came in to become the purchaser and some would say the beneficiary of that block of low-cost hydroelectric power that was available.

The result is an aluminum industry has grown up around that hydroelectric base. That aluminum industry now provides direct employment for 12,000 men and women primarily in the States of Oregon and Washington, not primarily in my State of Idaho.

But the existence of the aluminum industry is important for two reasons. One is that if the rate structure in the Northwest gets to the point where they can no longer afford to pay their share of the electricity, they have an option—they simply close. If they close down, they do not move somewhere else in the United States because there is nowhere else in the United States to move. They will move out of the country. Another basic industry that is very important to the maintenance of the economic base and the military security of this country would be lost to us if the rate structure gets forced to the point that it can no longer support that aluminum industry and the aluminum industry then can no longer afford to stay there.

It is not just the aluminum industry that pays the bill in that event. Because they are such a large consumer of electricity, if they move out, there would be a tremendous surplus of electricity to add to the current temporary surplus. The fixed costs of maintenance and operation of that system then get spread over the remaining users, and the ratepayers in the Northwest will again take a tremendous increase in their rates simply to cover the repayment schedule to which the Senator from Ohio has made reference.

So it is a complicated situation which we are trying desperately to resolve. We are trying to sort out Bonneville's responsibility, its relationship to the Washington Public Power Supply System on plants Nos. 1, 2, and 3, and then add to that the further complication of the default by the Washington Public Power Supply System on the repayment of 2.25 billion dollars' worth of bonds that have been issued and sold with respect to the partial construction on plants Nos. 4 and 5.

Now, those plants have been abandoned, and the effort to find voluntary agreement to pay those bonds has failed. The decision of the Supreme Court in the State of Washington that the public utility districts in the State of Washington lacked legal authority to enter into the contracts for the construction of these plants meant there was no money to pay those bonds. So WPPSS has defaulted on bonds of $2.25 billion that have been issued and sold and in the hands of how many people we do not know—hundreds, thousands, people who can ill afford that loss in many instances. Some of the sad cases have made national news as newsmen go out to determine the impact of the collapse of the Washington Public Power Supply System.

That converted what was a regional disaster into a matter of national concern in a much more direct way because pension funds, insurance companies, various others who hold some of that 2¼ billion dollar's worth of bonds—bonding houses, bonding councils, people all over the United States—suddenly are very much concerned about what happens to the Washington Public Power Supply System who were not concerned prior to the time of that default.

Mr. METZENBAUM. Will the Senator from Idaho yield for a question?

Mr. McCLURE. I would be happy to yield for a question.

Mr. METZENBAUM. Just so there is no misunderstanding on the part of any one of those bondholders or anyone else for that matter, is it not a fact that even with this amendment they would not have been bailed out?

Mr. McCLURE. The Senator is correct. This amendment has nothing at all to do with the bondholders on 4 and 5, with one possible exception. That is the contention that is made by some that WPPSS creditors, even though they may be creditors or bondholders on 4 and 5, could go to court and seize whatever assets WPPSS had and therefore might be able to look to WPPSS plants 1, 2, and 3 for some kind of recoupment that would allow them to collect something on either the debt or the bonds that were issued by WPPSS.

Mr. METZENBAUM. But this would not have provided a direct payment.

Mr. McCLURE. It would not have provided a direct source of funding for payment unless they are successful, first, in establishing the fact that the WPPSS powerplants are to be taken as a whole and not as separate entities, and, second, that somehow WPPSS has an enhanced asset because of the passage of this amendment.

Question No. 1. What is the bill's impact on existing WPPSS 1-2-3 bondholders? Does the measure in any way improve their chances for being repaid? Could it hurt them?

Response. The bill has no direct impact on existing net billed bondholders as it only sets up a new entity to do the to-go financing to complete the plants. Whether the plants are completed or not, the existing bondholders would continue to receive payment since the costs to date are already in the Bonneville Power Administration (BPA) rates and being paid. That represents, for interest alone, $618 million per year for the next 25 years.

There may be a perceived benefit as the feeling exists that a bond held on a completed plant has more value. As presently written, this bill would not hurt the existing bondholders. Some may argue on perference payment because of the direct nature of the contracts with BPA, but the fact remains that as long as BPA rates reflect the total indebtedness, there should be no problem.

Question No. 2. What is the bill's impact on existing WPPSS 4-5 bondholders? Does the bill improve their prospects for repayment? Does it hurt them?

Response. The bill does not address the WNP-4/5 bondholders or the WNP-4/5 problem. It neither helps nor hurts the existing WNP-4/5 situation and probably represents a large part of its critics' comments because it is not a total solution.

Mr. McCLURE. This is not a total solution. It is not intended to be a total solution, but there are those who contend that the completion of plant Nos. 2 and 3 will enhance the position of the bondholders on 4 and 5 because they could look to any of the assets that WPPSS has. Plants 1, 2, and 3 are assets that might be obtainable by the creditors and the bondholders of WPPSS with respect to 4 and 5.

There are attorneys that make that contention, and there are lawsuits which seek to make that point, but it has not been determined. It is certainly not surprising at all that WPPSS would respond to a question in the fashion which the Senator from Ohio has made reference. While I believe that is a correct answer, there are others who say that answer is not cor-

rect. But at best it could help the bondholders of 4 and 5; at worst it would leave them no worse off than they now are.

Mr. METZENBAUM. I thank the Senator.

Mr. McCLURE. It seems to me that we look at the question of the thrust of this amendment, we need to look at the background a little bit. I do not want anybody to assume that because we are withdrawing this amendment at this time that this is an issue we are not going to have to revisit.

I think we will, and at the appropriate time I hope we will be able to find a solution to the problem for 1, 2, and 3. There is a relationship between Bonneville Power Administration and WPPSS, and 4 and 5, and I do not believe that you are going to see the largest municipal bond default in the history of this country go unaddressed by some legislative initiative. I have always felt, since the beginning of this problem with respect to 4 and 5, that it was not likely that Congress was going to step in and bail out the Washington Public Power Supply System with the infusion of Federal taxpayers' dollars.

The fact that it was a regional problem very clearly indicated to me—and my conversations with others around here bore it out—that people like the Senator from Ohio would say, "Why should we bail out the Northwest using taxpayers' funds from all over the United States to help finance the construction of these powerplants, particularly since the Northwest has already had the advantage of the investment of taxpayers' dollars in the hydropower facilities, enjoying some of the lowest power rates?"

Those lower power rates are threatened by development of thermal powerplants, and the development that is occurring also continues to be a problem with respect to the Washington Public Power Supply System, including 1, 2, and 3 and 4 and 5.

Mr. President, it is not my intention to prolong this discussion. I know that the Senators from Washington desire to participate in the discussion before we have concluded, but I think it might be well at this time if I were to ask unanimous consent that the committee amendment and the amendment thereto be stricken from the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. METZENBAUM. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. METZENBAUM. I have an amendment having to do with the matter of timber and the contracts that the White House has postponed. It is my understanding that Senator HATFIELD wishes to engage in that discussion. I do not intend to call it up this afternoon. I assume that I will have no difficulty and that we will not conclude this bill today and that I will have an opportunity to do it tomorrow.

Mr. McCLURE. Let me respond as honestly as I can to the Senator from Ohio.

There has been no agreement as yet entered into with respect to the disposition of this bill or if it will be carried over until tomorrow. We intend to process amendments as rapidly as we can toward the conclusion of this bill. If all the amendments are offered, it might be possible to conclude this bill today.

Mr. METZENBAUM. I say to the Senator from Idaho that I am ready to go, but I mention this as a courtesy to the Senator from Oregon, who is the chairman of this committee. He asked me if I would hold it until tomorrow.

If the Senator from Idaho wants me to call it up today, despite that circumstance, I will be prepared to do so.

Mr. McCLURE. We have two or three amendments that will take some time. We have a whole list of amendments and colloquies we can handle in the meantime. Later this afternoon, we will have a better idea of how long it will take to complete consideration of this bill.

Mr. President, before leaving this subject, even though the amendment and the amendment thereto have been stricken from the bill and are not now pending before the Senate, I think the RECORD should reflect a little more about what this amendment was intended to do and the kinds of issues that have been raised in the hearings and the kinds of issues which will be addressed by the study which Bonneville Power Administration is conducting, the study that the Northwest Power Planning Council is conducting with respect to the effectiveness of plant No. 3, and the additional cost to complete it and finance it and sell the power. Also, we must look at the kinds of considerations which the Luce Commission will inevitably have to consider with respect to plant No. 3, as they look for the total answer to the problem.

First of all, there are a number of facts upon which reasonable minds can differ; and because reasonable minds can differ, they have.

One is, how long will it take to complete plant No. 3? The pace of construction has been slow. It takes a while to turn that around. Even if this amendment were adopted by Congress immediately, it would still take a little while to resume the same degree of activity that was there before the slowdown started.

If this amendment were adopted, a suitable entity would have to be created pursuant to State law in the State of Washington. If that entity were created, Bonneville Power Administration would still have to enter into a contract for an arrangement with that new entity to continue the construction of plant No. 3.

Following that, that entity would have to go to the market and borrow the money, by whatever means, necessary for the completion of plant No. 3.

Following that, the construction activities could then be accelerated to the completion of plant No. 3. The best estimates I have seen indicate that it probably would be 1987 or 1988, at best, before the plant could be completed, assuming we look at a very optimum time schedule for all these preliminary studies that would be necessary and then for the construction of the plant. But reasonable minds can differ as to how long that would take and what the complexity would be. So the question of "How long" is a question to which we must address ourselves ultimately.

That also affects the second question. The second question is, How much does it take to complete the plant? Here, you have not only the uncertainty of time but also the uncertainty of construction schedule and the uncertainty of cost of construction. Here again, reasonable minds can differ as to what that might be. My own best estimate, based upon the best advice I can get, is that it is about $960 million to complete the construction of that plant. There are others who will estimate at least twice that much for the completion costs of plant No. 3.

The third fact upon which reasonable minds can differ is the need for power. What will be the growth of power construction in the Northwest? Congress, in passing the Northwest Planning Act, assumed that all three of these plants would be part of the base system for Bonneville. There have been various estimates of load growth and consumption in the Northwest, but will the power be needed, and how much? Again, reasonable minds can differ; but my own estimate, after listening to everyone, has indicated to me that it would be somewhere in the time frame of 1989 to 1990 or 1991.

So you have not only a current surplus, but, also, if my assumptions based on the facts as I have outlined them are right, and if it could be completed by 1988 at the earliest, then you have 1 to 3 years of overlap between the completion of the plant and the need for the power.

If you assume the earliest possible completion on the plant and the latest possible need for power, you might have as much as 2½ years in which this power would be surplus.

Next is the question of where the surplus power is to be sold and at what rates. That becomes an important factor, whether or not it is economical

to the ratepayers of the Northwest to complete construction now.

We had to have a fixed variable upon which reasonable minds can differ, as to how much more it costs you for every additional month of delay in resumption of the completion of that plant. My own conclusion from all of that, supported by very many good minds in the Northwest, including my good friend from Washington, Senator GORTON, and the late Senator Jackson of Washington, when he agreed that this was a course we should pursue, was that you take all these variables and do the best job you can. You work out the assumptions and the risks that are involved and determine that the risk of completion of the plant and the marketing of the power is a lower risk than the failure to do so.

The studies to which we have made reference are designed to shed light upon those facts. The reason I take a little time at this particular time to go into that issue is that we will be back. I hope that the next time we have to come back, there will be some people who, either having heard this or having read it or having access to this information, may be in a better position to respond when we are ready to come forward with another kind of solution, be it a partial solution or an entire solution for the problems that confront this WPPSS situation as it has become known throughout the Northwest and throughout the Nation.

Mr. BURDICK. Mr. President, will the Senator yield?

Mr. GORTON. Mr. President, will the Senator yield?

Mr. McCLURE. Mr. President, I yield to Senator BURDICK.

Mr. BURDICK. Mr. President, I have been listening with a great deal of interest to the Senator's presentation.

One fact occurred to me. What is the schedule or how much completion has been done in plants 1 and 2?

Mr. McCLURE. Plant No. 1 has been indefinitely postponed, and it does not figure in this amendment. It may come back at a later time.

Plant No. 2 is 98 percent complete and Bonneville Power is providing through its rate revenues enough money to complete that, if they do not have the authority and the means to finance it by debt. It is scheduled now, if there are no further delays, to load fuel this fall and go to generation next year.

Plant No. 3, the one that is most in contention, is 78 percent complete at this time. Now that is not 78 percent of the expenditures but 78 percent of the physical construction.

Mr. BURDICK. Then there will be revenues coming in on plant No. 2 before 1988.

Mr. McCLURE. The Senator is correct.

Mr. BURDICK. Has that been calculated as part of the indebtedness here?

Mr. McCLURE. Plant No. 2 revenues have been included in the overall revenue structure for both WPPSS and Bonneville.

Mr. BURDICK. I thank the Senator.

Mr. McCLURE. Mr. President, I yield to the distinguished junior Senator from the State of Washington, a man while new to this body is not new to the politics of the Northwest and certainly not new to this issue. As the former chairman of the Northwest Planning Council, who has had to look at this issue under the Planning Act that this Congress passed, he comes well equipped and with a running start to confront these very, very tough issues.

I yield the floor, if I may, and if the Chair could recognize Senator EVANS.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, I thank the Senator from Idaho for yielding and for explaining so cogently and clearly the problems which we face in the Pacific Northwest.

I need not repeat the elements of the proposal now before this body. But I believe, as chairman of the Pacific Northwest Power Planning Council for the last 2 years, that the Council, the Bonneville Power Administration and the so-called Luce Commission, which was appointed by the Governor of Washington, together will produce additional information within the next month which will be of enormous help in building what may well be a more comprehensive proposal.

But let me cut through all of the complexities and get to a fundamental goal which we are attempting to achieve. That goal is the opportunity to help ourselves.

Under no circumstances, as past chairman of the Power Council or as Senator, do I believe that the taxpayers of this Nation should bail out the ratepayers of the Pacific Northwest, nor is that intended in this proposal.

But given time I am confident we can prepare a more comprehensive answer. We can try to determine better the cost effectiveness of these various nuclear plants. Perhaps we can even advance the opportunity of conservation programs in the Pacific Northwest as part of the overall response which is going to be necessary. And most of all I believe that an appropriate and similar proposal to the one before us will better insure an appropriate payback of the necessary funds to the Federal Government from the Bonneville Power Administration.

One of the enormous difficulties Bonneville has in each rate case, especially now when rates are rising so rapidly, is to predict with any accuracy the revenues to be achieved during the next 20 month period. They are hopeful and, I believe, the rates will be sufficient to bring in revenues to both pay back on schedule the payments to the Federal Government and also to begin to catch up on some past payments.

There obviously can be no absolute assurances. Because no one can determine precisely what the economy will do in the next 20 months, or what will happen to inflation rates in the next 20 months, or what conservation decisions the citizens will make in the next 20 months. And all of those go into the determination of revenue which the Bonneville Power Administration will achieve.

There is another element at work here: The opportunity to proceed and complete cost-effective plants, and with the studies now going on, this may well give us an opportunity to work in concert with the Pacific Southwest to share resources, to develop opportunities where both areas of this Nation will be winners, to create a more stable revenue base for the Pacific Northwest and more stable power supplies for the Pacific Southwest. It will be in the best interest of all and that, also is one of the potential goals that we seek.

Mr. President, we are grateful, and I am personally greateful, that the chairman has been willing to withdraw the amendment at this time. But we will return. It is terribly important that we return with a similar yet better proposal. And we will be seeking support from the Senate and from Congress for a mechanism which will allow the Pacific Northwest to resolve its own problems. That is the goal we seek.

This is an important element. It is important to pay our just obligations back to the Federal Government.

I thank the Chair.

Mr. GORTON. Mr. President, along with my distinguished previous colleague, Senator Jackson, and the chairman of the Committee on Energy and Natural Resources, I am a sponsor of the amendment which the chairman has just withdrawn.

I joined with each of those distinguished colleagues in sponsoring this proposal because it seemed to me, as it did to the senior Senator from Idaho, that it provided the best vehicle to permit the people of the Pacific Northwest to solve their own problems and to do so without the significant additional costs which are required if construction of WPPSS plant 3 is closed down and then restarted at some point in the future.

The distinguished chairman of the Appropriations Committee was gravely concerned about the impact of the proposal on the important Interior appropriations bill. When we obtained

his agreement to vote with us in overruling the point of order lodged shortly before the August recess against this amendment, we did so on the basis that we would attempt to use the August recess to create a consensus in the Pacific Northwest in favor of a particular and specific solution.

In pursuing that consensus, the chairman of the Committee on Energy and Natural Resources and I held an all-day hearing in Seattle on this subject. That consensus is not yet a reality.

As my new colleague from the State of Washington has just reported, there are not only many views among the general public on this subject but there are at least three distinct entities, the Bonneville Power Administration, the Northwest Power Planning Council, and the Luce Commission, attempting to determine whether or not the completion of construction of WPPSS 3 is cost effective and, if so, when its reinstitution and completion will be most cost effective.

We expect each of those entities to come up with an answer within a relatively short period of time, but not within a period of time short enough to hold up this appropriations bill in order to include this rider.

Wisely, the distinguished senior Senator from Idaho has introudced a bill identical to the impact of the amendment which has been before the Senate. It is now before his committee. I am convinced that we will, through the efforts of many people working together in the Pacific Northwest, reach an answer which is supported by a broad consensus of thoughtful public opinion in our part of the country. When we do so, there is no question but that we will be back again asking Members of this body and of the House of Representatives not to provide any kind of bailout for the people of the Pacific Northwest, but to help them solve for themselves what is a very serious and a very grave problem which simply is not going to go away.

(Mr. QUAYLE assumed the chair.)

Mr. McCLURE. Mr. President, I think perhaps we have covered this about as fully as it is useful to cover it.

But I do want, just for the record, to state a response to the Senator from Ohio with respect to the meaning of the procedural vote that we had earlier. I will not reiterate what that issue is, except to say that the Senator from Ohio has a different view and he has expressed that and my silence on that issue should not be taken as an agreement with his statement.

Finally, it has been stated here in this debate, and outside of this Chamber on other occasions, that in some way this amendment would cost the taxpayers of this country. You would have to assume that the completion of WNP-3 was not cost effective, that there was no market for its power, and that Bonneville Power Administration would default upon its obligation to repayment before there could possibly be any adverse impact upon the taxpayers of this country.

Now, as I have outlined in some detail, I think those assumptions are far beyond any reasonable ascertainment of what the facts are. I simply do not believe that that is possible—it is not a possible rational construction of the effects of this amendment.

In response to the suggestions made by the Senator from Oregon, the chairman of the Appropriations Committee, and for the reasons I have stated, I have been willing to leave this subject now. But, as the Senator from Washington has just stated, we certainly will have to return to it at a later time.

AMENDMENT NO. 2141

(Purpose: To allow land surveyors to continue to prepare maps and plans for surface mining operations)

Mr. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. There is a committee amendment pending.

Mr. BYRD. Mr. President, I ask unanimous consent that it may be in order for me to offer this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD) proposes an amendment numbered 2141.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following:

"( ) Notwithstanding section 507(b)(14) of the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87), cross-section maps or plans of land to be affected by an application for a surface mining and reclamation permit shall be prepared by or under the direction of a qualified registered professional engineer or geologist, or qualified registered professional land surveyor in any State which authorizes land surveyors to prepare and certify such maps or plans."

Mr. BYRD. Mr. President, I have discussed this amendment with the managers. I will briefly state the purpose of the amendment.

Mr. President, section 507 of the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87, 30 U.S.C. 1201) conflicts with State laws in that it preempts registered land surveyors from a lead role in the preparation and certification of maps, plans, and cross-sections of land to be affected by surface mining activity.

This amendment restores to land surveyors the ability to prepare such materials as a lead professional. Any State which does not authorize surveyors to perform such work would not be affected by the amendment.

There are 62 registered surveyors in West Virginia who will be put out of business in the near future if the current requirement of the Surface Mining Act remains in force. At present, a Federal district court in West Virginia has stayed the implementation of this requirement, pending congressional action. Other States will be affected in the same way when their permanent surface mining regulatory program takes effect.

Mr. President, this amendment deals with an emergency situation affecting the livelihood of land surveyors in West Virginia. Surveyors in other States will also be adversely affected if action is not taken on this amendment.

The Surface Mining Control and Reclamation Act of 1977 authorizes registered professional engineers and geologists to perform design and planning work for mining projects. The act does not permit professional land surveyors to take the lead in preparing and certifying mine maps and plans.

That provision is in conflict with the laws of at least 12 States, in which registered land surveyors are authorized—and in some States are directed—to be the lead professionals responsible for mine area mapping. Land surveyors in West Virginia and other States are subject to rigorous certification requirements, and in some States mine maps cannot be legally recorded unless a registered land surveyor has signed and sealed such maps.

The provision of the Surface Mining Act that bars land surveyors from acting as lead professionals has been implemented on a State-by-State basis. As the Federal Office of Surface Mining approves each States' permanent mining regulations, the land surveyors provision becomes effective in that State. West Virginia's permanent regulations became effective during the recent congressional recess.

Consequently, the Office of Surface Mining informed the West Virginia Department of Natural Resources that land surveyors would no longer be able to prepare mine maps and plans, except under the direction of a registered professional engineer or geologist. The practical effect of this ruling is to deprive professional land surveyors in my State of their livelihood.

The West Virginia Association of Land Surveyors obtained a temporary delay in the effective date of the new regulations by requesting a Federal district court to issue a stay. The stay expires on October 10, 1983. The district court action is not permanent. The delays granted by the courts have

provided the Congress with an opportunity to rectify this problem.

The Senate has passed this amendment on a previous occasion. In 1980, this amendment was offered by the distinguished Senator from South Carolina, Mr. THURMOND and it was adopted by voice vote. The legislation that contained this amendment was the Surface Mining Act Amendments of 1980. The House took no action on that legislation, so the provision affecting land surveyors was not enacted. Since 1980, efforts have been made to remedy the surveyors' problem by legislative and administrative means, to no avail. The main problem has been an unwillingness to touch the Surface Mining Act. On that score, I can state that Representative UDALL, the chairman of the House Committee on Interior and Insular Affairs, is a cosponsor of legislation similar to my amendment.

It is important to note that any State that does not authorize land surveyors to prepare maps, plans, or cross-sections for mining operations would not be affected by my amendment. The most notable example is the Commonwealth of Kentucky. Since Kentucky law does not authorize surveyors to act as the lead professional in these matters, surveyors in Kentucky would have no new authority if the amendment is adopted. Engineers and geologists would continue to perform mapping and planning functions in Kentucky and any other State with similar statutory restrictions on its surveyors.

I regret the necessity of offering this amendment to the Interior appropriations bill. However, this legislation funds activities of the Office of Surface Mining, and has a chance of being enacted before the expiration of the stay that is delaying the effect of the permanent surface mining regulations.

I want to thank the distinguished Senator from Kentucky, Mr. FORD, for his cooperation in this matter. I also appreciate the efforts of the distinguished chairman of the subcommittee, Mr. MCCLURE, to expedite consideration of my amendment.

I ask unanimous consent that a copy of a letter to me from the chairman of the Government Affairs Committee of the National Society of Professional Engineers, in support of my amendment, as well as a policy statement of the American Institute of Professional Geologists, be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL SOCIETY OF
PROFESSIONAL ENGINEERS,
September 7, 1983.

Hon. ROBERT BYRD,
Hart Senate Office Building,
Washington, D.C.

DEAR SENATOR BYRD: We have been advised that when the Senate reconvenes, you may be offering an amendment to H.R. 3363, the Interior Appropriations bill, to elevate the registered land surveyor to the traditional role of lead professional in the preparation of cross section maps or plans required by Sec. 507(b)(14) of the Surface Mining Control and Reclamation Act of 1977.

The National Society of Professional Engineers, on behalf of its 80,000 members, some of whom provide surveying as well as engineering services, supports your amendment. We believe that as shown by the legislative history, the omission of reference to registered land surveyors in Sec. 507(b)(14) to provide cross section maps or plans was an inadvertent oversight and that such reference should be restored. The restoration of the reference to registered land surveyors will permit the members of that profession to provide such services along with those presently included—professional engineers and professional geologists.

Sincerely,

KERMIT L. PRIME, JR.,
P.E., Chairman, Legislative and Government Affairs Committee.

APRIL 14, 1980.

AMERICAN INSTITUTE OF PROFESSIONAL GEOLOGISTS

[Policy Statement Concerning the Respective Professional Responsibilities of Geologists, Engineers, and Land Surveyors vis-a-vis PL 95-87, Section 507(b)(14)]

The American Institute of Professional Geologists (AIPG) fully supports the rights and responsibilities of all professions to practice in their respective areas of expertise as established by virtue of their formal academic training and professional experience.

Section 507(b)(14) of the Surface Mining and Reclamation Act of 1977, PL 95-87 clearly sets forth the nature of the information required on cross-section maps or plans to be effected. Most of the information is of a geological or geotechnical nature, specifically including "the nature and depth of the various strata of overburden; the location of subsurface water, if encountered, and its quality; the nature and thickness of any coal or rider seam above the coal seam to be mined; the nature of the stratum immediately beneath the coal seam to be mined; all mineral crop lines and the strike and dip of the coal to be mined, within the area of land to be affected; * * * ; the location of aquifers; (and) the estimated elevation of the water table; * * *." Provisions of Section 507(b)(14) requiring extensive input by professional geologists include "the location of spoil, waste, or refuse areas of top-soil preservation areas; the location of all impoundments for waste or erosion control; * * * ; constructed or natural drainways and the location of any discharges to any surface body of water on the area of land to be affected or adjacent thereto; * * *." The provisions of Section 507(b)(14) not normally requiring extensive geological or geotechnical input, except possibly in the planning phase, concern information on "existing or previous surface mining limits; the location and extent of known workings of any underground mines, including mine openings to the surface; * * * ; any settling or water treatment facility; * * * ; and profiles at appropriate cross sections of the anticipated final surface configuration that will be achieved pursuant to the operator's proposed reclamation plan."

AIPG fully supports the rights of land surveyors to their appropriate practice of cadastral and topographic surveying and mensuration and the preparation of maps, plats, and profiles depicting topography, property boundaries, and the location of certain other surface features and underground workings. Accordingly, AIPG also supports the rights of land surveyors to have the "lead" or primary role for the preparation and certification of documents pertaining to such work. On the other hand, the "lead" or primary role for preparation and certification of geological and geotechnical documents is the sole responsibility of professional geologists or of registered professional engineers qualified in the earth sciences.

Mr. McCLURE. Mr. President, we have had the opportunity to review this amendment. I have no objection to its adoption.

Mr. BYRD. I thank the distinguished manager of the bill and the chairman of the subcommittee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment (No. 2141) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2142

(Purpose: To violate certain access permits in Back Bay National Wildlife Refuge, Virginia)

Mr. HELMS. Mr. President, I have an amendment at the desk which I call up and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS), for himself and Mr. EAST, proposes an amendment numbered 2142.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 82, after line 15, add the following:

SEC. . (a) Section 3 of Public Law 96-315 is amended—

(1) in the first sentence of subsection (a) by striking out "December 31, 1979" and inserting in lieu thereof "July 1, 1982, and who held a valid Fish and Wildlife Service access permit for improved property owners at any time during the period from July 29, 1976 through December 31, 1979";

(2) in the second sentence of subsection (a) by inserting after "Lighthouse" the following: ", or, for anyone in continuous residency since 1976, passing through a point on the east-west prolongation of the centerline of Albacore Street, Whaleshead Club Subdivision, Currituck County, North Carolina"; and

(3) by adding at the end thereof the following:

"(f) Notwithstanding any other provision of this section or any other provision of law, the Regional Director of the Fish and Wildlife Service shall grant restricted access to noneligible permanent fulltime residents as of April 1, 1983, who can substantiate that access is essential to their maintaining a livelihood (e.g., a fulltime employee in Norfolk, Virginia).".

Mr. HELMS. Mr. President, on behalf of my colleague from North Carolina (Mr. EAST) and myself, I am offering this amendment to relieve the extreme hardship a handful of North Carolina citizens are experiencing at the hands of the Federal Government. My proposal is limited in scope and will not cost the taxpayers a penny. Simply stated, my proposal will grant to about 10 or 12 families living full time on the Currituck Outer Banks the privilege of traveling through the Back Bay National Wildlife Refuge in southeastern Virgina—a privilege some of their neighbors currently enjoy.

For years, Mr. President, anyone wishing to travel from the Outer Banks of North Carolina to Tidewater Virginia could simply jump into a car and drive. In the early 1970's, the Department of Interior determined it was necessary to protect the Back Bay Refuge from automobile traffic and used its management authority over the refuge to restrict access almost entirely. At the time, the Fish and Wildlife Service estimated that about 348,000 vehicles were crossing the area each year and that continued travel would pose a significant threat to the vulnerable dunes behind the beach. The Fish and Wildlife Service quickly moved to limit access through the refuge to all but 39 full-time permanent residents of the Currituck Outer Banks. About 100 or so individuals owning homes in the area but living there only a portion of each year were left out.

Mr. President, I am certainly not unmindful of the need to protect our refuge property from harmful encroachments. Nor am I overlooking the need to safeguard the waterfowl and other land mammals that inhabit the area. I am simply attempting to provide for the basic and necessary access a few individuals desperately need. And desperation is indeed the case. Without these access passes my amendment will provide for, these 10 families must drive 125 miles each way to their jobs, hospitals, shopping centers and places of worship, instead of 30. Even if access is granted, it will not be uninhibited. Residents must comply with current regulations, which restrict access to no more than two round trips per day between the hours of 5 a.m. and 12 midnight. In addition, current regulations limit refuge traffic to the beach, below the high tide mark and away from the fragile dunes. My amendment would neither expand the curfew nor divert traffic from the beach into what the Fish and Wildlife Service believes are more fragile areas.

Mr. President, I do not believe my proposal is contrary to the access policy of the Fish and Wildlife Service. In fact, officials of the Service are moving forward at this very minute to amend their regulations to accommodate these few families. I have spoken with Ray Arnette, Assistant Secretary for Fish and Wildlife and Parks, about the matter and he is cognizant of my interest.

I hope my colleagues will join me in supporting this amendment.

Mr. EAST. Mr. President, I am pleased to join as a cosponsor to the unprinted amendment offered by the distinguished senior Senator from North Carolina, Senator JESSE HELMS. This amendment would allow a small number of additional families access through the Back Bay National Wildlife Refuge from the Currituck Outer Banks. I support it wholeheartedly.

For many years, Back Bay National Wildlife Refuge was open to the public for a variety of uses. Vehicular access was permitted not only across the beach portion of the refuge but throughout the beach environment. By the early seventies it became apparent that unrestricted access was in conflict with refuge objectives. The Fish and Wildlife Service moved to control vehicular use when refuge visitation rose to 348,000 people per year and threatened to harm the refuge property.

In an effort to avoid undue hardship on permanent outer banks residents, the Fish and Wildlife Service published a rule which provided access for those permanent residents. Later, Congress, by law, extended access through the refuge to full-time residents. The trend of habitat damage had been mitigated, but in the process several families were caused hardships because they were inadvertently excluded. Their number is small, and the access issue is currently pending a rulemaking before the Department of the Interior.

This amendment corrects the problem of access for improved property owners on the Currituck Outer Banks. It is an equitable policy and is compatible with the intent for which the refuge was established. It continues certain restrictions imposed to minimize cumulative effects of increased permittee access. It continues to prohibit recreation-oriented travel. And it meets with Fish and Wildlife refuge objectives.

I commend this amendment to my colleagues for their support.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUSBY HIGH SCHOOL NORTH CHEYENNE INDIAN RESERVATION

Mr. MELCHER. I want to ask the Senator's cooperation in dealing with a problem with the Busby High School on the Northern Cheyenne Indian Reservation.

The Busby High School was operated by the Bureau of Indian Affairs for many years until 1972. The Northern Cheyenne Tribe assumed control of the high school originally under a buy Indian contract. This was subsequently changed to a Public Law 95-638 contract. The contract stipulated that the Bureau of Indian Affairs was responsible for maintaining the facilities up to the Montana State standards for schools.

However, the Bureau of Indian Affairs has failed, to date, to meet its obligations under their agreement with the Northern Cheyenne Tribes. The tribe has repeatedly applied for funding for the maintenance of the building. However, because of the Bureau of Indian Affair's failure to comply with the contract, in the 1981-82 school year the tribe was forced to close down the two dorm facilities due to their hazardous condition. In 1982, the high school building was abandoned for the same reason.

Many of the students attending this high school have been unable to function in the public school system. Some suffer from alcohol and drug dependency problems, as well as intolerable home situations. The school designed a program to meet the special needs of these students.

The school has had a low enrollment, but the Cheyenne people contend this is due to the deplorable conditions of the facilities. Even so, many parents continued to send their children to Busby, because they believe in

the continuance of a tribally controlled alternative high school in their community.

The BIA has recommended that the high school students remain in the elementary school building, because of its low enrollment. To me this is unwise, considering the kinds of problems that some of the students have and the effect they would certainly have on elementary schoolchildren. Even if all of the students were regular high school students it would not be in their best interest to remain in an elementary school setting, because the needs of high school students are so different from the needs of elementary students.

Mr. Chairman, I want you to join with me in directing the BIA, in cooperation with the Northern Cheyenne Tribal Council, and the tribal school board to review the school program and especially the physical plant, and provide recommendations for the education of the students who had been or otherwise would be attending the Busby school.

The BIA shall present their proposal to the Senate Select Committee on Indian Affairs and the Senate Subcommittee on Interior Appropriations within 60 days of the enactment of H.R. 3363. This is not an unreasonable request. I ask that the conference report on H.R. 3363 also include language reflecting the sense of this request.

Mr. McCLURE. Mr. President, the Bureau of Indian Affairs has told us that prior to its closure, the Busby High School had an enrollment of approximately 50 students. Not all of these students, however, were Indians, so the Bureau was providing funding for only 30 students and the school board determined that it was not feasible to operate a high school program with such limited resources.

The facilities are in need of repair. A contract has recently been signed to upgrade the Busby Elementary School so that the facility will meet all code requirements. The Bureau has also changed the distribution of operation and maintenance funds so that contract schools, such as Busby, will be treated in the same manner as the BIA operated schools.

In view of the fact that there is a public school on the reservation and in view of the low enrollment at the high school, it is unlikely that a new high school would score high enough on the Bureau's test for new facilities to be included in the priority list which we use as the basis for funding new construction.

I will, however, join with the Senator from Montana in requesting that Bureau personnel visit the school and meet with the board in an effort to insure that the Indian students currently have access to an appropriate high shcool education program.

ANIMAL DAMAGE CONTROL RESEARCH

Mr. DECONCINI. Mr. Chairman, I want to take this opportunity to thank you for your assistance and support on projects contained in this measure that are important to me and to the citizens of my State. I know the difficulties you face when attempting to design a bill that responds to many needy and worthwhile projects nationwide without placing further burdens on our growing deficit.

Before the Senate grants approval to this funding measure, however, I would like to raise an issue that is rather minor in its funding need but not in its level of importance and impact. Mr. Chairman, I am referring to an estimated $225,000 under the animal damage control research account for a taste aversion project and a livestock guard dog project to determine the effectiveness of these methods for controlling coyote predation. Sufficient funds were contained in the House bill for these two projects. The taste aversion project is to be conducted by researchers at Arizona State University and requires approximately $175,000 for fiscal year 1984. As you can imagine, Mr. Chairman, the work to be done at ASU on predator control is very important to the West and, especially, to this Senator.

While I do not wish to place further demands on this body which is trying to wrap up consideration of H.R. 3363, I do want to urge you to support the House provision of this modest amount during the conference and receive an indication of what you foresee in conference.

Mr. McCLURE. I thank my colleague for his gracious remarks and generous offer not to proceed with an amendment. As the Senator knows, I am supportive of projects like the one to be undertaken by Arizona State University and believe research on predator control is very important. However, I am concerned that the House has failed to include an estimated $297,000 under the research and development account for the operation of field stations at Olympia, Wash., and Bend, Oreg. These stations provide the base support for ADC research and I believe should receive first priority. In that context, Senator, I will try to convince House conferees to include funding for these stations and then give next priority under the ADC account to the taste aversion and livestock guard dog projects.

Mr. DECONCINI. Again, I thank the chairman for his support and clear understanding of this issue.

TREATMENT OF THE FEDERAL LANDS HIGHWAY PROGRAM

Mr. SYMMS. Mr. President, I would like to discuss the National Park Service's Federal lands highway program with the senior Senator from Idaho. In past years, authorizations for parkways and park highways have been provided out of general funds by title 23, United States Code. In practice, construction of roads in the national park system has been almost exclusively financed by using the authority in the Department of Interior's Organic Act to provide direct appropriations from general fund revenues.

In the Surface Transportation Assistance Act of 1982 Congress created a consolidated Federal lands highway program. Section 126 of that act instituted two major changes in the parkways and park highways program. First, a procedure was instituted to distribute funds on a needs basis, including a comparison of the relative needs of the various elements of the national park system, taking into account need for access. This program thus would operate in a manner similar to the regular Federal-aid highway program. Second, the Surface Transportation Assistance Act provides contract authority from the higheay trust fund as the appropriate source of financing for the program. The act authorized $100 million for road and bridge construction projects in the national park system in 1984.

A transition to this new system is currently underway. While a great deal of planning has gone forth for fiscal year 1984, the executive branch agencies have not yet completed the project selection process. Further adjustments may have to be made. However, the report associated with the bill before us includes the National Park Service's nationwide priority listing of park units on which the $100 million provided in the Surface Transportation Assistance Act would be spent. It is my understanding that this is a preliminary list which has not yet received final approval by either agency involved in the administration of the program.

Mr. McCLURE. The bill before us does provide the Park Service's preliminary listing of park units on which the $100 million for the Federal lands highway program from the highway trust fund would be used in fiscal year 1984.

The committee understands that the planning process mandated by the Surface Transportation Assistance Act has not yet been completed, and recognizes the possibility that the park units contained on a final list may differ from those on this preliminary list.

The committee requested the National Park Service to provide its proposed list so that the committee would be able to satisfy Member concerns about the need for funding for a specific project. Without this list being published in the committee's report, Members would not have the same level of information that a park unit of particular interest to them would receive funding in the budget year.

For this reason, the committee does expect the Park Service to notify it of proposed park unit changes when the mandated planning process is complete. In addition, it expects the administration to complete that process on a timely basis next year and provide such information with the fiscal year 1985 budget submission.

Mr. SYMMS. I thank the senior Senator from Idaho for his comments. The Senate Environment and Public Works Committee, as the committee responsible for the direct spending authority of this program, expects that the Federal Highway Administration and the National Park Service will notify it of any modification to this list and submit future lists on a timely basis.

HISTORIC PRESERVATION FUND

Mr. RUDMAN. Mr. President, the funding for the historic preservation fund concerns me. While I do not intend to offer an amendment to raise the amount, I would like to bring the issue to the attention of the Senator from Idaho.

The administration in its budget request for fiscal year 1983 made no provision for the historic preservation fund (HPF). This was the same situation we faced last year and Congress chose to fund the HPF at $51 million, including the $25 million to the State historic preservation offices (SHPO) for the development grant program, which will produce jobs within 90 days in the construction industry by sharing in the cost of rehabilitation, repair, preservation, and development of historic properties that may not be eligible for tax incentives.

The national trust for historic preservation and the SHPO's are grateful for past congressional support, and, in fact, hope that favorable consideration might be given to the development grants program in the future. However, while the SHPO's have had no problems with handling the additional workload or implementation of projects that the funding for development grants brought on, the increase in requests for certification of projects using historic preservation tax incentives has caused a significant increase in the workload for them. The number of projects requesting SHPO certification is expected to double between 1982 and 1984 if the National Park Service (NPS) projections are correct. Additionally, increased funding from the supplemental appropriations emergency jobs bill (Public Law 98-8) for Federal projects affecting historic properties will require additional reviews of these projects by the Advisory Council on Historic Preservation. This has also increased the workload for the SHPO's, who provide invaluable assistance to the Federal agency and the advisory council to evaluate the impact, recommend approaches to avoid or mitigate any harm, and expedite the process.

The committee has recommended $26 million for HPF, the same level as the current fiscal year. However, the national trust and the SHPO's have expressed concern that additional funding may be needed to supplement the SHPO's professional staffing capabilities and to meet the additional expenses associated with increased onsite project reviews and assistance. The SHPO's ability to provide onsite assistance is a critical element of the flexible and responsive system for administering projects using the 25-percent income tax credit for historic rehabilitation.

I would hope that should an excessive workload manifest itself, the subcommittee would look favorably upon any funding requests which might be forthcoming in the future.

Mr. McCLURE. I appreciate that the Senator has decided not to offer an amendment and agree with him that Federal funding, survey and planning activities are of the highest priority. I assure the Senator that I will give his figures every consideration at the next available opportunity.

HOOSIER NATIONAL FOREST CASCADDEN PROPERTY, AND HEMLOCK CLIFFS

Mr. LUGAR. I had intended to offer an amendment to appropriate $400,000 for land acquisition in two key project areas in the Hoosier National Forest, the Cascadden property and the Hemlock Cliffs. However, I understand that there is an appropriation in the House bill for acquisition of high priority recreation composites. Both of the Indiana areas are in recreation composites approved by the Bureau of Outdoor Recreation in 1975 and could be funded under the appropriation in the House passed version of H.R. 3363.

Mr. McCLURE. That is correct. The House bill contains $3.5 million for high priority recreation composite acquisitions in national forests. The Indiana areas you have mentioned could be purchased with funds from that account.

Mr. LUGAR. It is important that the two Indiana areas are acquired during fiscal year 1984. They are available on a willing-seller-willing-buyer basis.

The Cascadden property is on the shoreline of Lake Monroe, in the midst of a State wildlife refuge, a few hundred feet from the Charles C. Deam Wilderness which you and I helped to establish last year. It is a valuable piece of land that the State of Indiana and the nature conservancy agree is the most urgent acquisition of land that can be made in the Hoosier National Forest. It must be acquired to prevent development planned for the near future. Lake Monroe is the major water supply for the growing cities of Bloomington and Nashville. The extensive lake frontage of this tract make it especially important within this context. Lake Monroe is also a very popular recreation area, because it is the largest lake within 50 miles of Indianapolis, the State's major metropolitan area.

The Hemlock Cliffs area is important for very different reasons. It is the outstanding natural area in Indiana, but it is threatened by vandalism and overuse. By acquiring additional land—without condemnation—we can protect this outstanding geologic site.

Mr. McCLURE. I have examined these areas and I can appreciate your concern. I will do what I can in conference with the House to secure $400,000 for land acquisition in the Hoosier National Forest. There are other, similar items in the Senate bill for which I will also push for funding in conference with the House.

Mr. LUGAR. I thank the chairman for his leadership and appreciation of this great natural resource. Because this matter can be resolved in conference with the House, I am pleased to yield to the skill of the chairman and will not offer an amendment to fund these projects.

Mr. QUAYLE. I echo the comments made by my colleague, Senator LUGAR. These two areas in the Hoosier National Forest are important natural areas needed to be included in the forest. No condemnation of land will take place. These areas could be purchased through the $3.5 million allocated in the bill adopted by the House of Representatives for high priority recreation composite sites. My colleague is correct that these areas are urgently needed to be acquired. The Cascadden property is near to the recently created Deam Wilderness and its acquisition is urged by the State of Indiana to prevent development. The Hemlock Cliffs area is a prime geologic site with great diversity of flora and fauna.

These two sites would add a great deal to the Hoosier National Forest and I urge the distinguished chairman to do what is possible in conference with the House to include these sites for funding. The Senator from Idaho has been very helpful in the past regarding the Hoosier Forest and other public lands in Indiana and I appreciate his cooperation and interest in the concerns of Indiana.

SOUTH CAROLINA GROUND WATER RESEARCH

● Mr. HOLLINGS. Mr. President, as the distinguished chairman of our Interior Appropriations Subcommittee will recall, earlier this year I submitted to the subcommittee a proposal for Federal assistance to an expanded ground water research developed by the South Carolina Water Resources Commission. This expanded effort between the Water Resources Division of the U.S. Geological Survey and the State of South Carolina would delin-

eate, map, and quantify the ground water resources of the State and better characterize its quality, chemical properties, and potentials.

Nearly 60 percent of South Carolina's population is supplied by ground water, as are many industries and farming enterprises. However, in contrast to this dependence, the State possesses a limited knowledge on the nature and extent of the resource as well as limited capabilities to deal with current and future problems. These limitations present a very real danger to the resource, and to its users who are largely unaware of the impacts resulting from these uses. Our Water Resources Commission is presently making every effort to address an array of serious problems ranging from coastal saltwater intrusion to ground water contamination at the Savannah River plant.

The proposed program cannot be pursued without additional technical and financial support of the U.S. Geological Survey, Water Resources Division. A statewide effort of this scope will require a special 5-year program of cooperative research, and we originally sought $500,000 annually in Federal appropriations to the U.S. Geological Survey earmarked for South Carolina. The funding would be in addition to the cooperative agreement funds now expended in South Carolina by the U.S. Geological Survey for surface and ground water monitoring, and it was anticipated that it would be excluded from the non-Federal matching requirements of the cooperative program.

In view of the overall fiscal constraints, such a program was beyond the ability of the committee to fund. After I reported that back to our State officials, the Water Resources Commission took a hard second look at their proposal. Last month by a letter from Alfred H. Vang, the executive director, they let me know that they still required the full planned program. However, they assured me that they "will be able to accrue an additional $250,000 in order to match" the provision of an equal amount from the cooperative program of the Geological Survey.

Mr. President, the Water Resources Commission has put the ultimate stamp of approval on this proposal by coming up with half of the additional funds required for this critical project. I wonder if that action puts this proposal in a different light with respect to the chairman of the subcommittee?

Mr. McCLURE. Let me assure the distinguished junior Senator from South Carolina that I am aware of and share his interest in the ground water situation in South Carolina. This summer we enacted the Supplemental Appropriations Act where he and the distinguished junior Senator from Georgia (Mr. MATTINGLY) first brought to the Congress attention the water problems associated with restarting the L reactor at the Savannah River plant.

As my distinguished colleague noted, it was impossible for the subcommittee to embrace the original proposal due to the overall constraints on the bill. The action of the State in coming up with half the needed funding is indeed impressive.

While I am hesitant to direct the Geological Survey to fund a specific project, I would join the Senator from South Carolina in encouraging the U.S. Geological Survey to give this proposal every possible consideration within the priorities established for the Federal-State cooperative research program.

Mr. HOLLINGS. I appreciate the chairman's support of this urgently needed research which is characteristic of his concerns for the problems addressed by agencies funded by this bill. While he may be reluctant to direct that funds be allocated to this project, his endorsement will certainly mean much to the Director of the Geological Survey as he reviews South Carolina's needs.●

THE RED BIRD RANGER STATION

Mr. HUDDLESTON. Mr. President, early in the development of the fiscal year 1983 budget, the regional forester for the Daniel Boone National Forest included in his request $333,500 for the construction of a ranger station to serve the Red Bird purchase unit.

The current structure was built in the 1920's, when the Ford Motor Co. owned the forest. It is in desperate need of replacement, since it poses both safety and health hazards.

I would also note that the present structure serves not only as the quarters for the park rangers, but as the depository of area surveys, plats, and grant records made by the Ford Motor Co. during its ownership of the forest. As such, the facility is utilized by the public. Local residents and others come to the station to review these historical documents to trace property transfers and boundaries, and for historical purposes.

The construction of a new station is viewed to have a lasting value. It was dropped from the fiscal year 1983 budget request under the assumption that funds would be available and could be reprogramed for the station's construction. It has just recently been realized that reprograming procedures do not permit new starts, and therefore preclude the use of reprogramed funds for the station.

I view the construction of the station to be of such priority that the Congress should, to the extent that funds are available, provide the funds needed for this project.

Knowing that the committee staff has reviewed the problems associated with the reprograming of funds and the need for the project, I would ask the distinguished floor manager if he concurs with my view that the Congress should approve the use of available funds for the Red Bird ranger station?

Mr. McCLURE. I do.

BROADER DATA BASE IN DIRECT COAL UTILIZATION

Mr. SASSER. Mr. President, I would like to ask the distinguished chairman of the subcommittee his understanding concerning report language on page 77 of the committee report. The report states,

> The committee urges the Department to begin development of a broader data base in direct coal utilization, including but not limited to transport, cleanup, burning, and ash formation and deposition.

I would ask the chairman if he is aware of the expertise of the University of Tennessee Space Institute in Tullahoma, Tenn., in research in direct coal utilization and related environmental investigations?

Mr. McCLURE. I would say to the distinguished junior Senator from Tennessee that I am aware of the particular expertise of the University of Tennessee Space Institute in this area.

Mr. BAKER. If the distinguished chairman of the subcommittee will yield, is it his understanding that the University of Tennessee could be an appropriate location to accomplish the work contemplated in the committee report?

Mr. McCLURE. I would say to the senior Senator from Tennessee that the University of Tennessee Space Institute would certainly be an appropriate facility to carry on the development of a broader data base in direct coal utilization.

MOUNT EDGECUMBE BOARDING SCHOOL

Mr. STEVENS. Mr. President, I wish to clarify a matter which was addressed in the fiscal 1983 supplemental appropriations bill. The Senate provided $22 million in the budget of the Bureau of Indian Affairs which was to be transferred to the State of Alaska on the condition that the State agreed to operate a secondary education program at the Mount Edgecumbe boarding school.

The accompanying Senate report stated:

> The Committee directs that the Bureau obtain assurance from the State of Alaska that priority will be given to upgrading or replacing the electrical distribution system and the water distribution systems that serves both the boarding school and the Indian Health Service hospital. No charge is to be assessed to the Indian Health Service for this work.

Is it the understanding of the chairman of the subcommittee that this is to be a total upgrading of the electrical distribution system on the IHS property including poles, transformers, lines, the electrical drop, and electrical meters and that all this work is

to be funded from the $22 million which was made available in the supplemental?

Mr. McCLURE. Mr. President, the Senator is correct. I understand that under State law, Alaska must have an interest in the property in order to make capital investments. It is for this reason that the bill language was amended in conference granting the State title to the IHS hospital in the event that the facility ceases to be used for health care. I believe this does give the State an interest in the property. The estimate for the onsite electrical work exceeds $750,000. There is simply no room in the IHS budget to allow them to absorb this cost. It should come from the $22 million provided in the supplemental.

Mr. STEVENS. I thank the Senator.

RIVERS AND TRAILS TECHNICAL ASSISTANCE PROGRAM

Mr. CHAFEE. Mr. President, I would like to inquire of the distinguished floor manager of the bill, my friend from Idaho, as to the level of funding for the National Park Service rivers and trails technical assistance program.

Mr. McCLURE. There is $645,000 appropriated for that program.

Mr. CHAFEE. I would say to my colleague that I have a strong interest in this program. It is playing an important role in the conservation of our Nation's water resources and recreation areas, especially in New England. Just last month, the National Park Service, the State of Rhode Island, and several local governments in the State entered into a formal agreement whereby the Service would provide technical assistance from this program to fund a joint study to develop a protection strategy for the Wood River in Rhode Island. The study is expected to be concluded during fiscal year 1984; however, I am concerned about the availability of funds to finish the study. This endeavor is important to the people of Rhode Island. As you know, we are a heavily populated State with a limited number of open areas for our residents to enjoy. If the Wood River area can be protected for outdoor recreation, it would benefit the citizens of our State immensely.

Mr. McCLURE. I would ask my colleague from Rhode Island, does the study for Wood River qualify for funding under rivers and trails technical assistance program?

Mr. CHAFEE. That is correct. On June 30 of this year, the National Park Service, the Rhode Island Department of Environmental Management, and several local governments formally agreed to carry out a cooperative study to develop a State and local government and private landowner strategy to conserve the Wood River. My concern is that the funds from the technical assistance program may not be forthcoming in fiscal year 1984.

Mr. McCLURE. I share my colleagues' concern and his enthusiasm to work for the conservation of outdoor areas. He makes a good point—Rhode Island is a small State, our smallest State—with a very large population. Outdoor recreation areas are limited. This study, as he described it to me, sounds most worthwhile and the committee has no objection to the Park Service funding this study within the overall priorities of the technical assistance program.

Mr. CHAFEE. I thank the distinguished chairman of the Interior Appropriations Committee. Not only has he worked long and hard to bring this bill to the floor but also in his capacity as chairman of the Energy and Natural Resources Committee.

I would like to raise one other matter. When the House passed H.R. 3363, it contained a provision sponsored by Congressman ST GERMAIN from Rhode Island and Congressman EARLY from Massachusetts which provided $100,000 for the National Park Service to study the Blackstone River's potential as a park. This provision is very important to me as well as my colleague, Mr. PELL, who has worked hard to secure funds for a study.

The river area to be studied runs a distance of about 45 miles—from Worchester, Mass., to Providence, R.I. This river has played a key role in the industrial development of the region and Rhode Island and Massachusetts are working to establish parks along the waterway. It is a beautiful area rich in history and I believe it is well worth studying as potential parkland. I note however that funds for this study are not included in the Senate bill.

Mr. McCLURE. That is correct. There is only so much money to go around. The House bill is already $442 million over the amount of the bill we are now considering and I have had to make difficult decisions not to fund this project and many other worthwhile projects in order to keep spending down.

Mr. CHAFEE. I share the Senator's concern. His task is a most difficult one and I understand that he has had to make many hard choices on funding for a variety of programs but I believe this study for the Blackstone River has much merit. Rural New England's industrial landscape was born in the Blackstone River Valley. Samuel Slater's cotton mill—the first in America—was followed by many others up and down the valley, so many that the river soon came to be known as "the hardest working old stream in the world." This river forms an integral part of our national heritage dating back to our early industrial roots and certainly it is most appropriate for us to study this area to see if it cannot be preserved for future generations.

Mr. McCLURE. May I suggest to my friend from Rhode Island that we not include funds for the study now in the bill but we review the matter when we go to conference with the House. As he stated, funds for the study are in the House bill so it will be a conference item. I can assure my colleague that I will carefully review this matter in the conference committee and make every effort to see if it is possible to retain funding in the conference report.

Mr. CHAFEE. I thank my good friend and colleague. He has been most kind and attentive in this matter and also on the Wood River study. These studies are important to many people in my State and I appreciate his assistance in securing funds for these projects.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2142

Mr. McCLURE. Mr. President, we had temporarily set aside the amendment of the Senator from North Carolina (Mr. HELMS).

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. Mr. President, I ask unanimous consent that that amendment be the pending matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, this amendment has been cleared on both sides of the aisle. We have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2142) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I express my appreciation to the managers on both sides of the aisle for their accepting this amendment. I thank them very much.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2143

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator has to have unanimous consent to set aside the pending amendment.

Mr. GORTON. I so request, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself, Mr. ANDREWS, Mr. BOSCHWITZ, Mr. CRANSTON, Mr. DURENBERGER, Mr. EVANS, and Mr. PRESSLER, proposes an amendment numbered 2143.

On page 58, line 21, delete "$734,151,000" and insert in lieu thereof "$742,151,000".

Mr. GORTON. Mr. President, the purpose of this amendment is to restore $8 million in appropriations for urban health services provided by the Indian Health Service. This is equal to the fiscal 1983 appropriation level, and is $1 million below the level proposed by the House of Representatives.

The urban Indian health centers are a critical component of the health care delivery system for Indians. In my State, we operate two such centers. These centers provide a number of very important services to the sizeable Indian population which lives off reservation, in and around the two cities in which the clinics are located. During the last year, over 60,000 patient visits were provided by these two clinics. Numerous other clinics around the country provide similar services.

The populations which utilized these clinics has very special health needs. Not only do they suffer disproportionately from a number of serious health problems, but they are often poorly served by other health providers. For a number of reasons, the Indian health clinics are able to provide services in a more congenial and culturally appropriate environment, and thus are able to reach a number of patients who might otherwise not be served at all.

In addition, the population served by these clinics is poor. At the clinics in my State, 80 percent of the patient families have incomes at or below the Federal poverty line. Most have no other sources of health care coverage.

The urban Indian health clinics are an important part of the historical Federal commitment to Indian health. The amount of money required to fund these clinics is small. Adoption of this amendment would not cause this bill to come into conflict with the first concurrent budget resolution. I urge my colleagues to join me in supporting this very important amendment.

● Mr. ANDREWS. Mr. President, I am pleased to cosponsor this amendment to restore $8 million to the Interior appropriations bill for fiscal year 1984 for the Indian urban health programs.

I, like many of my colleagues, do not represent a State with a health program for the Indian urban population. However, during recent hearings of the Select Committee on Indian Affairs, which I chair, on the reauthorization of the Indian Health Care Improvement Act of 1976, title IV of which authorizes the urban programs, I have learned a great deal and become a strong supporter of the urban clinics. As the other cosponsors of this amendment point out, the population served by this program has needs that are largely unmet by other health providers and programs. The urban health clinics are able to address the serious health problems of Indian people as well as the specific emotional needs of a population often far from home and in a totally alien environment.

I urge my colleagues to join in supporting funding for this crucial program and I urge the conferees, when the House and Senate meet in conference on this bill, to accept the House's recommendation and continue funding this program.

I thank my colleagues for this opportunity to speak on this most important issue.●

● Mr. BOSCHWITZ. Mr. President, I wish to join my distinguished colleagues from the State of Washington to add my support for continued funding of the urban Indian health program. In my State of Minnesota, we also have a fine program that has my full support.

As we know, the Senate Appropriations Committee has recommended a zero funding level for urban Indian health programs. I understand the knowledgeable Senator for Idaho would like to see some changes in this program, and I will support him in his efforts. I want the Senator to realize, however, that many of the urban Indian health programs are effective and it would be tragic to see this entire program discontinued.

The Indian Health Board of Minneapolis was one of the original model programs to demonstrate the health care needs of American Indians in urban setting. It is an excellent program and has been consistently referred to as "one of the best." The Minneapolis program has been especially effective in providing direct health care services to a large and needy Indian population located in the Twin Cities and surrounding area. If funding for this program is denied, it would result in an immeasurable decline in the quality of life for many of the Indian people in Minnesota. I believe it would be a grave mistake to eliminate this program.

In past years, the conference committee has seen fit to add funds into the appropriations bill for this program. I hope that with the support of the distinguished Senator from Idaho, we can find additional funds to keep this program operating.●

● Mr. DURENBERGER. I am pleased to join Senator GORTON's colloquy and wholeheartedly support his efforts to restore funding for urban Indian health care. I am hopeful that Senator MCCLURE, and the other conferees, will support these very valuable programs through continued funding in conference.

Passage of the Indian Health Care Improvement Act in 1976, marked a major legislative effort of Congress to "raise the status of health care for American Indians and Alsakan Natives, over a 7-year period, to a level equal to that enjoyed by other American citizens." As part of that act, title V—Urban Indian health—was designed to "assist urban Indians both to gain access to those community health resources available to them as citizens and to provide primary health care services where those resources are inadequate or inaccessible."

I can speak specifically of one program in Minnesota that was the original model program to demonstrate the health care needs of American Indians in urban settings. This is the Indian Health Board of Minneapolis, Inc. which is a nonprofit corporation formed in 1972. The Indian Health Board has documented and presented to Congress evidence indicating that disease and mortality rates for urban Indians are just as high, and in some cases, higher than rates for reservation Indians.

Since the Indian Health Board began providing dental and medical outpatient services, in 1973 and 1974, there has been a significant decrease in the infant mortality rates of urban Indians. Expansion into mental health care and linkage with other community service providers has completed the service model for health care and treatment.

I believe these programs should, and can, continue to be operated in such a manner to offer the necessary services specified in the Indian Health Care Improvement Act. They offer appropriate health care services to medically underserved populations conditioned to episodic and emergency room care.

I urge my colleagues to support the promotion and improvement of the health status of Indian people by encouraging continued funding for urban Indian health programs.●

● Mr. EVANS. Mr. President, I join with Senator GORTON and my other colleagues in urging the Senate's sup-

port for continued funding for urban Indian health clinics. I am familiar with the special health needs of Indians living off-reservation in our Western States. I know that some Senators question the need for special programs in urban areas, where, in general, there are adequate numbers of health personnel and adequate facilities. But this is not sufficient reason to terminate the urban Indian health clinics. There are special health needs in this population which are often only poorly addressed by the traditional health system, and I know that the two clinics in my State are providing a service that often is simply unavailable from other sources.

The health care system in my State will be poorly prepared to absorb the additional demands that will be made of it if the urban Indian health clinics are not funded. In the past, these clinics have provided services to over 16,000 Indians and Alaskan Natives. For the most part, these people are poor, and could not turn to the private sector for their health care. If they do not have the urban health clinics, they will simply do without.

Allowing this to happen by failing to fund these clinics would not be consistent with the traditional Federal responsibilities in the area of Indian health. These responsibilities do not end at the reservation boundary.

I urge my colleagues to join in supporting this amendment.●

● Mr. PRESSLER. Mr. President, I support this amendment to restore $8 million for title V of the Indian Health Care Improvement Act. Our urban Indian health programs are in dire need of assistance.

The movement of our Indian people to cities resulted in their unknowingly forfeiting their access to Federal health care and BIA services. The transition to the urban way of life produced a low level of health care utilization.

The first Federal Indian Health Service funding for an urban Indian health program was provided in 1972. Since that date, more and more programs have come to the aid of our Indian people.

In 1976, Congress recognized the serious health problems of the urban Indian people by enacting the Indian Health Care Improvement Act. I am pleased to see that, today, the IHS is providing at least partial support for 38 urban Indian health programs which serve nearly 285,000 Indian people. In my home State of South Dakota, our urban Indian health care programs have proved most successful.

I urge the adoption of this amendment, which will allow these important urban programs to continue to meet the needs of our Indian people.

It is our duty to provide quality health care to all Americans.●

Mr. McCLURE. Mr. President, I appreciate the remarks of my colleagues. I know that many of the urban Indian health clinics around the country have done a good job of providing some very important health services. I would ask, however, that they consider withdrawing their amendment. The committee considered this issue in light of the overall Indian Health Service appropriation, and in light of what the House proposed. I would say that I am not an opponent of the urban health services. I believe the program is a good one. I will certainly listen very hard to the House conferees on this issue, because I recognize there is a great deal of support for this program. At this time, I would not want to support the amendment the Senators are proposing, but I think I can assure them that their voices are heard, and I can promise to give urban Indian health services funding very serious consideration in conference with the House.

Mr. GORTON. Mr. President, I thank the Senator from Idaho. I understand the complexity of the position he finds himself in, and I would not want to force a vote on this issue if it would be counterproductive. I appreciate his assurances of his careful consideration in conference. The Senator from Idaho has always been most attentive to my requests, and I am appreciative of that. Mr. President, I withdraw my amendment.

Mr. McCLURE. I thank the Senator.

The amendment (No. 2143) was withdrawn.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I ask unanimous consent to set aside the pending committee amendment in order to consider two amendments I shall send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2144

Mr. GORTON. Mr. President, I ask that the amendments I send to the desk be considered.

The PRESIDING OFFICER. The amendments will be stated.

The bill clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. EVANS, proposes an amendment numbered 2144:

On page 11, line 8, strike $28,600,000 and insert in lieu thereof $30,600,000.

On page 16, line 9, strike $149,650,000 and insert in lieu thereof $151,650,000.

Mr. GORTON. Mr. President, the two amendments which I have just offered are important to the State of Washington. They propose to add $2 million to the fish and wildlife and parks, U.S. Fish and Wildlife Service, land acquisition appropriation; and the fish and wildlife and parks, National Park Service, land acquisition and State assistance, respectively.

The first amendment I am offering appropriates $2 million to complete the land acquisition at Protection Island. On October 15, 1982, President Reagan signed Public Law 97-333, the Protection Island National Wildlife Refuge Act. This act authorized $4 million for land acquisition by the U.S. Fish and Wildlife Service of property in Jefferson County, Wash., for the Protection Island National Wildlife Refuge; $2 million was appropriated in fiscal year 1983 and $2 million is needed in fiscal year 1984 to complete the land acquisition. The fiscal year 1984 House Interior appropriations bill includes $2 million for this purpose.

Protection Island is the most significant seabird nesting area in the Puget Sound region. It provides habitat for thousands of birds, including several endangered species. The U.S. Fish and Wildlife Service is currently in the process of establishing a protection plan for the refuge and it has just completed the appraisal process for the privately owned land on the island. During the appraisal process, it become apparent that the $2 million appropriated last year will fall short of allowing the Fish and Wildlife Service to purchase all of the land of willing sellers. An additional appropriation of $2 million is needed to insure that the remaining willing sellers can be bought out. Since the mid-1970's, a building moratorium has been imposed on the island because an acceptable source of water has not been found. Few lots have therefore been developed, and most owners are anxious to sell.

The second amendment I am offering with my distinguished junior colleague (Mr. EVANS), who is also a cosponsor of the first amendment, would appropriate $2 million out of the land and water conservation fund to complete acquisition of lands in Olympic National Park in Washington State. Olympic National Park contains the largest remaining contiguous stands of undisturbed old-growth coniferous forest and rain forest in the United States. The park contains outstanding examples of wilderness coastlines and primeval stands of coastal hemlock, spruce, and western cedar. It is the only natural area administered by the Park Service outside of the State of Alaska to have substantial numbers of native anadromous salmonoids, and it is also that home of the only major Roosevelt Elk herd in the United

States living undisturbed in its natural environment.

The $1 million of this appropriation would be used for land acquisition in the park's newly added Lake Ozette/Point of Arches area. These areas were added to the park in 1976 by Public Law 94-578. The other $1 million would be used to continue land acquisition from willing sellers in the Lake Crescent and Elwha Rivers areas, as well as the purchase of other scattered inholdings within the park. Most of these funds would be used to acquire tracts from sellers who qualify as hardship cases who have been attempting to sell to the park for years, but who have been unable to do so due to the Park Service's lack of land acquisition funds. The fiscal year 1984 House Interior appropriations bill includes the $2 million needed for land acquisition in the park.

Mr. President, both of these amendments are important to my State and are necessary to avert the development of lands within the Protection Island National Wildlife Refuge and Olympic National Park, areas which Congress has determined should be protected.

Mr. McCLURE. Mr. President, we are caught a little bit the way we were last year in regard to these issues. Neither of these was included in the administration's budget submission. I assured the Senator last year when he raised these issues that we would be willing to give sympathetic attention to this in the conference. Moneys are included for both of these projects in the House-passed bill.

It would be my expectation that in all likelihood it will have the same kind of result that it had last year; that when we got to the conference and sat down with the conferees and worked out the details of the legislation, more than sympathetic attention would be given to it. I can make the same assurance to the Senator from Washington that I made last year but hope that he will withdraw the amendments.

Mr. GORTON. The Senator from Idaho was most gracious to me and Senator Jackson last year when we made these proposals. He was understanding of the urgent necessity of going forward on the Protection Island National Wildlife Refuge and of the justice of the claims of people who are inholders within Olympic National Park and have been for many, many years. That thoughtful and gracious consideration last year did exactly what the Senators from Washington wished. The Senator from Washington hopes the same will be true this year. Because of the thoughtfulness and consideration of my friend from Idaho, I will now withdraw the amendments.

Mr. McCLURE. I thank the Senator.

The PRESIDING OFFICER. The amendments are withdrawn.

The question recurs on the committee amendment.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily laid aside for the consideration of three amendments which I will offer.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2145

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 2145.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 9, strike the number "$5,064,000" and insert the following new number in lieu thereof: $2,564,000"

Mr. McCLURE. Mr. President, I ask unanimous consent that a second amendment may be considered en bloc with the first and that the clerk report the second amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

On page 21, line 7, strike the italicized number "$127,425,000" and insert the following new number in lieu thereof: "$129,925,000"

Mr. McCLURE. The first amendment, Mr. President, simply adds $2,500,000 in new budget authority to the Bureau of Mines. The second amendment reduces by the same amount funds which had been set aside for the purchase of a new facility at Bruceton, Pa., but which had been used to offset new budget authority in this 1984 bill. The House of Representatives and the Senate committee had included this offset in their bills because the Bureau had not moved expeditiously to determine just exactly what type of new facility was needed. At the same time, the facility they are now using could not be turned over to Carnegie-Mellon University as is stipulated in the law.

The Bureau has just recently informed the committee that its plans now call for the construction of a new facility costing approximately $2,500,000. These amendments result in providing $129,925,000 in new budget authority and $2,564,000 in offset from the Bruceton account, leaving $2,500,000 in the Bruceton account for the construction of the new building.

It is my understanding my colleagues on the other side of the aisle have no objection to these amendments.

Mr. SPECTER. Mr. President, I rise in support of Senator McCLURE's amendment to increase the amount for the mines and minerals account by $2,500,000. As the chairman of the Interior Subcommittee has stated, these funds are for construction or renovation of a building at the Bureau of Mines research facility near Bruceton, Pa.

In the 96th Congress, a bill was enacted to allow the Carnegie-Mellon University to buy a building from the Bureau of Mines for $5.4 million. As part of the transaction, the Bureau of Mines was promised a new facility outside of Pittsburgh to replace the building to be purchased by Carnegie-Mellon. The appropriation was needed to provide for the new building for the Bureau of Mines before Carnegie-Mellon could purchase and occupy the Bureau of Mines facility. There would be no cost to the Government because Carnegie-Mellon would eventually purchase the old building for the fair market value.

Unfortunately, a contract of sale was not accomplished until May of this year. According to the Director of the Bureau of Mines, Robert C. Herton, this delay "was not caused by inaction on the part of either party, but by the difficulty of establishing the fair market value within the constraints and requirements of applicable law." In the meantime, the Bureau of Mines has reassessed its needs and concludes that only $2,500,000 is required to build a suitable building.

Completion of this transaction is necessary in order that the University may continue to expand its research facilities. I am informed by officials of the Carnegie-Mellon University that they have been striving to purchase this property for over 26 years and as you can well imagine they are most anxious to have this transaction completed as soon as possible. The Senator's amendment will help finalize this action.

I thank the distinguished Senator from Idaho for his assistance in this matter.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 2145) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2146

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 2146:

On page 14, line 1 strike the word "Service" and insert the following new word in lieu thereof: "System"

Mr. McCLURE. Mr. President, this is simply a technical amendment to correct a typographical error.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 2146) was agreed to.

AMENDMENT NO. 2147

Mr. McCLURE. Mr. President, I have two amendments to send to the desk, and I ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 2147.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 46, line 10, delete "$24,787,000", and insert in lieu thereof: "$24,362,000";

On page 46, line 12, delete "$232,832,000", and insert in lieu thereof: "$233,257,000."

Mr. McCLURE. The committee has recommended $1,320,000 to continue construction of the Lake Kincaid recreation area in the Kisatchie National Forest. The committee provided all of these funds in the construction of facilities category for the Forest Service. However, the project includes $425,000 for access road construction and $895,000 for facilities. These two amendments do not increase the amount appropriated for this project but revise the allocation to accurately reflect the types of costs included.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 2147) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BURDICK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2148

(Purpose: To increase funds available for firefighting under Forest Service activities)

Mr. PRESSLER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes an amendment numbered 2148.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On Page 45, line 11, strike out "$51,730,000" and insert in lieu thereof "$52,155,000".

On page 45, line 15, strike out the period and insert in lieu thereof ": *Provided further,* That $14,425,000 shall be available for fire protection.".

Mr. PRESSLER. Mr. President, the amendment I am offering to the Interior appropriations bill would restore the funding level for the rural fire prevention and control program to the fiscal year 1983 level and to the level recommended by the House of Representatives. The rural fire prevention and control program was funded at $14.4 million in fiscal year 1983 and at approximately the same level in 1982. The House bill includes funding for the program at the same $14.4 million level in fiscal year 1984, but the Senate Committee recommendation is only $14 million.

Earlier this year, I introduced a resolution, which has 11 cosponsors, calling for the continuation of the rural fire prevention and control program at no less than fiscal year 1983 levels. The program has been cut drastically in the last 5 years and our rural areas cannot afford to have the program cut any further. In fiscal year 1979, funding for the program was at $30.6 million and it was cut to $14 million by fiscal year 1982. Few Government programs have suffered such drastic funding reductions.

The rural fire prevention and control program is one of the Federal Government's most effective and essential programs. This modest $14 million program provides fire protection to approximately 880 million acres of non-Federal wildlands in all 50 States. Almost 9 acres of land are protected from fire for each penny spent by the Federal Government. This is a small price to pay for fire protection.

The program is so effective because most of these areas are served by volunteer fire departments. The volunteer fire departments are largely financed by donations, but they also need other assistance. The rural fire prevention and control program helps to provide this much needed additional funding.

Each State forester works in cooperation with the Department of Agriculture to administer the rural fire prevention and control program. The State forester, either through State efforts or through local rural fire departments, uses these funds to protect non-Federal range and forest land. This money is used to train volunteer firemen, purchase equipment, collect data, and provide fire protection through various other programs. The program helps to protect valuable resources such as timber, livestock, human lives, and wildlife.

Mr. President, the rural fire prevention and control program is a very cost-effective program and is vital to rural areas. I urge my colleagues to join me in support of this measure.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of moneys, in tabulation form, State by State, territory by territory.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Rural fire prevention and Control Program—1983 State payments

[In thousands of dollars]

State:	
Idaho	219.9

Mr. McCLURE. Mr. President, this matter is similar to one we had in prior years and, most recently, last year. If I recall correctly, there was a similar budget request for this account last year.

The Senator has come to the floor of the Senate in prior years and has made a very persuasive case, and the Senate has then voted for the inclusion of additional rural fire protection funds. I can say that those actions were a result of the actions taken by the Senator.

When we came again to this item in the budget this year, with the budget request of about $3 million, remembering what had been done on the floor and the support that was generated by the Senator for this program in prior years, we elected not to make any fight again. As a matter of fact, we added nearly $11 million to the account because of the actions the Senator has taken in prior years.

There is virtually no difference between the amount in this bill and the amount in the House bill. They are virtually the same amounts of money, very little difference between the two.

I think the Senator can take credit for the fact that the administration, in looking at this question, has moved a long way toward accommodating what is very obviously the view of the Senator from South Dakota and certainly the view of the majority of the Members of the Senate.

So I think the battle has virtually been won already, and the Senator from South Dakota can take credit for that having been the case.

Mr. PRESSLER. Mr. President, I thank the Senator from Idaho, and I thank him for his leadership on this bill and the hard work he and his staff have done on the bill.

As he points out, this amount has been increased by $11 million at my request and at the request of others. It has been a fight. Last year, we brought this matter to a rollcall vote and won. This year, the committee voluntarily increased it before the matter came to the floor. I want to make that point so that the increase to this level is not lost in conference.

It had been my intention to ask for a rollcall vote today, because the actual increase we are asking for here is less than a million dollars—a few hundred thousand dollars. The Senator from Idaho has increased it to the $14 million level, at my request and several other Senators, and because of his own support, which has been very outstanding.

Therefore, with the assurance that the Senator has given me today, indicating that he will fight in conference for this, and the House already has agreed to this level, I withdraw my amendment.

I thank the Senator from Idaho for the outstanding job he has done in this regard.

The PRESIDING OFFICER (Mr. RUDMAN). The amendment is withdrawn.

Mr. McCLURE. Mr. President, I commend the Senator for the action that he took last year. As the Senator did note, I supported the action that he took. The Senate supported it very strongly.

With that kind of background, I do not think there is the likelihood that anyone will move to reduce this amount. Therefore, the action that he has taken I think is sufficient.

I thank him very much for his leadership.

Mr. PRESSLER. I thank the Senator, and I think his remarks make it unnecessary to have a rollcall vote.

I thank him for his cooperation and leadership.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question recurs on the committee amendment.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2149

Mr. BAUCUS. Mr. President, I have an amendment and I send it to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. BAUCUS) proposes an amendment numbered 2149:

On page 22, line 24, before the period insert the following: "*Provided further*, That $1,000,000 of the funds made available to the State of Montana for State reclamation grants pursuant to section 402(g)(2) of Public Law 95-87 shall be used for reclamation of the Colorado tailings site in Montana".

Mr. BAUCUS. Mr. President, this amendment would direct the Office of Surface Mining to release $1 million of Montana's State share funds to the Governor of Montana to reclaim the Colorado tailings site near Butte, Mont.

I have discussed this amendment with the distinguished chairman of the committee, Mr. McCLURE, and the ranking member, Mr. BYRD, and I understand they are agreeable to accepting the amendment.

Mr. McCLURE. Mr. President, I have no objection to the amendment.

Mr. BAUCUS. Mr. President, I thank the Senator from Idaho, my distinguished colleague.

At this point I wish to say a word or two about the amendment before we put it to a vote.

Mr. President, my amendment will permit the State of Montana to clean up Montana's worst heavy metal and acid polluting mine waste site: the Colorado tailings, on Silver Bow Creek near Butte, Mont. This is an abandoned mine waste site that poses a substantial hazard to the health and safety of the residents and waste users of Silver Bow Creek.

The State of Montana and the Environmental Protection Agency have ranked a 24-mile stretch of Silver Bow Creek as the No. 1 hazardous waste site in the State of Montana. In fact, Mr. President, it is No. 24 on the EPA's national Superfund inventory list. Since we in Montana pride ourselves as having a State that is virtually pollution free, to be ranked No. 24 nationwide is something that concerns us greatly. Reclamation of the Colorado tailings site, which this amendment addresses, would reduce the heavy metal and acid pollution in the creek by 66 percent.

This site, and Silver Bow Creek, have been intensively studied since 1977. The State has developed a reclamation plan to remove the mine wastes from the creek channel and flood plain, thereby substantially re-

ducing ground and surface water pollution. The State intends to build a temporary pipeline to transport these concentrated wastes to the north dump, a secure toxic wastes storage facility operated by the Arco Co. That company, which is not responsible for the pollution at the site, will assume future responsibility for storage of these tailings.

Mr. President, this amendment does not increase the appropriation recommended by the committee for State reclamation programs; nor does it authorize the expenditure of discretionary funds included in the bill for noncoal projects. All this amendment does is to direct the Office of Surface Mining to release $1 million from Montana's State reclamation program for the Colorado tailings project.

This amendment does not address any of the broad issues involving the abandoned mine reclamation program that have been raised not only in Montana but in many other Western States. Many reclamation projects are being held up because of disagreements between States and the Office of Surface Mining about the proper interpretation of the Federal Surface Mining Act and particularly the eligibility of 409(c), or noncoal, projects. There appears to be natural reluctance on the part of the Office of Surface Mining to grant funds for these projects. The State of Montana feels very strongly about this and, in that regard, has testified before various congressional committees on these issues.

Mr. President, I hope the Congress will act soon to resolve these difficulties and disagreements so we can move more quickly to clean up dangerous toxic sites like the Colorado tailings. In the meantime, I hope the Senate will agree to my amendment to take care of this dangerous site in the State of Montana. It is very clearly in the public interest.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 2149) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. STEVENS. Mr. President, I ask unanimous consent that the committee amendment be temporarily laid aside so that I might offer a series of amendments which I believe will be accepted.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2150

(Purpose: To provide for necessary funding for housing for PHS hospital personnel in Bethel, Alaska)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 2150.

"On page 58, line 21, strike $734,151,000 and insert in lieu thereof $734,651,000."

Mr. STEVENS. Mr. President, the purpose of the additional $500,000 I am proposing for the Indian Health Service in fiscal year 1984 is necessitated, happily, not by inefficiency or a bureaucratic foulup, but just the opposite.

Calista, a native corporation in the Bethel area, arranged financing to construct new housing to accommodate personnel at the Bethel Indian Health Service facility. Originally, Calista did not expect to have this project completed until some time late in the next fiscal year—which would have been late spring or summer of 1984. However, we have now been informed that the housing will be ready for habitation by November of this year, and this additional $500,000 is to defray the lease costs for this new housing that IHS will be leasing from Calista. I regret this matter did not emerge in time for us to deal with it at the committee level, but I hope that I will have the understanding of the chairman and the members of the committee as to the reasons why I did not put the amendment forward before. I do urge that it receive favorable consideration.

Incidentally, should the housing not be ready by November, as it is now anticipated, there obviously would be reduced costs. But we are saving funds in the long run by the new personnel housing, so I do believe this amendment is in the best interests of the Government.

Mr. McCLURE. Mr. President, as the Senator from Alaska has indicated, authority was granted to the Indian Health Service several years ago to lease quarters for staff serving the Bethel Hospital. As there had been some problems in the financing of the project, IHS did not anticipate that the quarters would be available during fiscal year 1984. It now appears, however, that the quarters will be available for occupancy in November.

Mr. President, I am willing to accept the amendment and I understand it has been cleared on the other side.

Mr. PRYOR. Mr. President, that is correct, the amendment has been cleared on this side.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Alaska (Mr. STEVENS).

The amendment (No. 2150) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table as agreed to.

AMENDMENT NO. 2151

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 2151.

On Page 82, at the end of the bill, add the following new section:

"Funds available in this Act for the purpose of contracting for services that require the utilization of privately owned aircraft shall be used only to contract for aircraft that are certified as airworthy by the Administrator of the Federal Aviation Administration as standard category aircraft unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services."

Mr. STEVENS. Mr. President, presently, the Department of the Interior, through the Bureau of Land Management, and the Department of Agriculture, through the Forest Service, contract with owners of aircraft to control brush and forest fires by means of dropping fire retardents from the air. In most instances, the aircraft used for these operations are former military aircraft which do not meet standard FAA safety requirements and, thus, are barred from operating in a normal environment. In order to avoid meeting FAA safety standards, the owners of these aircraft classify the aircraft as "public aircraft" and therefore do not come under the purview of the FAA. This is because the FAA only has jurisdiction over civil aircraft. These public aircraft however, can only be used in the service of a Government agency.

This amendment is intended to limit contracting for aircraft by the Department of the Interior and the Department of Agriculture to situations where there are no other aircraft available in the civil aircraft category. Some of the aircraft which have operated as public aircraft have had questionable safety records. I might say, Mr. President, in most instances, they are very much what we would call warweary aircraft.

The Department of the Interior and the Department of Agriculture, in my opinion, must be encouraged to contract for aircraft which meet all FAA safety requirements—something which

public aircraft, as I have noted, do not have to meet.

The safety of those people who are operating them on behalf of these Government agencies and those who might be required to be in the vicinity or to be part of the flight crew, I think, must be taken into consideration.

The two affected departments under this amendment would be required to contract with operators of aircraft which do meet FAA safety requirements and, thus, do not needlessly endanger the flight crew or people on the ground unless the head of the department certifies that such civil aircraft certified by the FAA are not reasonably available.

As a matter of fact, I think that standard ought to be even tougher because I think that these war-weary aircraft are jeopardizing the lives of many people involved in the brush and forest fire containment operations of these two departments.

I urge that this amendment be adopted. A similar amendment, I might add, was added several years ago. I urge the Congress to once again state that we do not favor the use of public aircraft if there are civilian aircraft available that are certified as meeting all of the safety standards of the FAA.

Mr. McCLURE. Mr. President, I want to point out that the amendment makes provision at the end for an exception. It says:

> Unless the Secretary and the contracting department determines that such aircraft are not reasonably available to conduct such services.

I mention that only because I think that the evidence that we have indicates that the Secretary says they use only FAA certified equipment and that they do not need to do otherwise.

I believe that they have, in many instances, used restricted aircraft under the public aircraft category. I want to make it possible for them to do that if, as a matter of fact, in the discretion of the Secretary, he determines that it is necessary or desirable to do so. It seems to me that the language in the amendment is well drafted and correct.

Mr. STEVENS. The amendment speaks for itself. Unless the aircraft are not reasonably available in the civil aircraft category, they should not be using the public aircraft category in these efforts.

Mr. McCLURE. Mr. President, I have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate? Is there objection to the amendment?

Mr. PRYOR. There is no objection on this side of the aisle, Mr. President.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 2151) was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2152

(Purpose: To prohibit the use of funds for the processing or issuance of prospecting permits in an area of the Mark Twain National Forest, Mo., to be designated as wilderness)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The question will recur on the committee amendment.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the committee amendment be temporarily laid aside and that I may offer my amendment.

The PRESIDENT OFFICER. Without objection, it is so ordered. the clerk will report.

The assistant legislative clerk read as follows:

> The Senator from Missouri (Mr. DANFORTH) for himself and Mr. EAGLETON, proposes an amendment numbered 2152.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

> On page 9, line 5, strike out the period and insert in lieu thereof ": *Provided further,* that subject to valid existing rights, no appropriations herein made shall be used by the Secretary of the Interior for the processing or issuance of prospecting permits in certain lands in the Mark Twain National Forest, Missouri, which comprise approximately 17,562 acres, as generally depicted on a map entitled 'Irish Wilderness—Proposed', dated December 1981.".

Mr. DANFORTH. Mr. President, this amendment is offered by myself and Senator EAGLETON. It relates to a bill which was previously passed by the Senate, S. 64, which set aside 17,562 acres of the Mark Twain National Forest as part of the National Wilderness Preservation System.

The House of Representatives has passed a companion bill which sets aside 15,500 acres. Therefore, the House and the Senate are just a little more than 2,000 acres apart. It is anticipated that this difference between the House and the Senate will be resolved in the very near future.

Right now, as of today, no applications for permits for exploration for minerals have been granted with respect to any land in the Irish Wilderness. However, a number of applications for lead prospecting permits for the Irish Wilderness are now pending in the U.S. Department of the Interior.

This amendment would prohibit the Department from taking further action on those pending permits. It would, therefore, preserve the status quo until Congress completes its action on S. 64, which, again, is expected to be completed in the very near future.

Mr. McCLURE. Mr. President, the Senator from Missouri does state the background correctly. The Senate has acted on this already. The House has acted on a different figure. There is no issue as to whether or not it is going to be done. The issue is the resolution of the exact number of acres involved. It seems to me that it is prudent under those circumstances to adopt the amendment that the Senator has offered so that no one is misled as to what we would like to have here.

I have no objection to the amendment. I think it is useful to this bill and useful to the directions of the administration.

The PRESIDING OFFICER. Is there further debate?

Mr. DANFORTH. I simply want to say to the Senator from Idaho, Mr. President, that he has spent an enormous amount of time and effort over a period of years on behalf of people of Missouri, many of whom have an intense interest in the future of the Irish Wilderness. It would not be important to the people of Idaho, but the Senator from Idaho, as he always is, has been very considerate and very helpful on this matter. This is a further example and I want him to know that I appreciate his help.

Mr. McCLURE. Mr. President, if we were more pressed, I would not take the time to respond to that very gracious statement, but since we are not pressed for time I will take a moment.

As the Senator knows, his State of Missouri is my grandfather's native State and that of my great-grandfather after coming from Ireland. How could I not but help the Irish Wilderness in Missouri? Certainly, the amount of time I have spent on it is not comparable to that which the distinguished Senator has spent on this matter. While on a scale of national importance it may not deal equally with the matter in Lebanon and the other great tensions facing this country, nevertheless to the people of that State this is a very important issue.

They are indebted to the Senator from Missouri for his steadfastness in this matter. I realize the difficulties he has had in dealing with the State and local pressures he has dealt with in trying to bring a resolution to this.

I thank the Senator for his remarks.

The PRESIDING OFFICER. Is there further debate?

Is there objection to adopting the amendment?

Mr. PRYOR. No objection on this side, Mr. President.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 2152) was agreed to.

Mr. DANFORTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside so that I may offer another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2153

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from Alaska.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 2153:

On page 10, line 18, strike "$14,050,000" and insert in lieu thereof "$19,585,000".

Mr. STEVENS. Mr. President, over two-thirds of the lands that are included in the National Wildlife Refuge System are in my State of Alaska. This amendment would facilitate ongoing Fish and Wildlife Service activities in Alaska. It would not result in an increase in the number of Service personnel or an expansion in the Service's activities in the State. This amendment would make available funds for the construction of office, operations and residential facilities to support Fish and Wildlife Service activities in Alaska; $1,500,000 would be appropriated for a residential housing project at Galena, $2,925,000 for a headquarters complex at Bethel, and $1,010,000 for a residential housing project at Tok.

In addition, the amendment would appropriate $100,000 for a study to identify the most cost-effective way to meet the Service's need for a vessel to use in the Alaska Maritime National Wildlife Refuge, which is a series of islands off Alaska.

Mr. President, I emphasize again that this is not to provide money to increase personnel or increase law enforcement activities. This is to meet the basic needs of the new people who have been sent to Alaska to help administer the sizable increase in the refuge system that came about with the passage of the Alaska Lands Act of 1980.

Mr. McCLURE. Mr. President, I have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate? Is there objection to the amendment?

Mr. PRYOR. There is no objection on this side.

Mr. STEVENS. Mr. President, I thank my two good friends, the Senator from Idaho and the Senator from Arkansas, for their consideration of this amendment. Some of it was highlighted by trips taken by members of the staff of the committee during the recent recess, so I am delighted to have the opportunity to present them and to have the cooperation of my two colleagues in their consideration of this amendment today.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2153) was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2154

(Purpose: to retain the operation and maintenance of the Warm Springs National Fish Hatchery within the Fish and Wildlife Service)

Mr. McCLURE. I ask unanimous consent that the pending committee amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. On behalf of the Senator from Oregon, the chairman of the full committee, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for Mr. HATFIELD, proposes an amendment numbered 2154.

On page 10, line 4, insert before the colon ", and of which $292,000 shall be available for the operation and maintenance of the Warm Springs National Fish Hatchery"

Mr. McCLURE. Mr. President, this amendment deals with the Warm Springs hatchery in the State of Oregon.

● Mr. HATFIELD. Mr. President, in committee, I raised a question regarding the appropriateness of transferring from the Fish and Wildlife Service to the Bureau of Indian Affairs a fish hatchery which is located on the Warm Springs Indian Reservation in Oregon. Senator McCLURE and I agreed at that time that if the hatchery operations principally benefits Indians, it would be transferred to the BIA, as planned. But, if the hatchery principally benefits non-Indians, it would remain under the jurisdiction of the Fish and Wildlife Service.

After further inquiry, we have learned that at least 95 percent of the fish reared and released at the hatchery are anadromous fish which benefit non-Indians throughout the entire Columbia River system. Moreover, for those few thousand rainbow trout which are released for on-reservation use, the Warm Springs Tribe pays the Fish and Wildlife Service $5,000 annually to offset the cost of feeding the trout while they are maturing at the hatchery.

Mr. President, I ask to have printed in the RECORD, a letter from Mr. Gary R. White, U.S. Fish and Wildlife Service Hatchery Manager at Warm Springs dated July 26, 1983, which outlines the numbers and species of fish reared and released at the hatchery in question.

The letter is as follows:

U.S. DEPARTMENT OF THE INTERIOR,
FISH AND WILDLIFE SERVICE,
WARM SPRINGS NATIONAL FISH HATCHERY,

July 26, 1983.

DELBERT FRANK, SR.,
Vice-chairman, Tribal Council, Confederated Tribes, Warm Springs, Oreg.

DEAR MR. FRANK: I was pleased to receive your letter of July 25, 1983 requesting information regarding operation of the Warm Springs National Fish Hatchery. Information provided is of fish reared and released from this hatchery.

Releases:

SPRING CHINOOK

	1980	1981	1982	1983
Spring release	178,890	355,100	142,880	194,260
Fall release	54,660	65,300	108,470	200,000
Total	233,550	420,400	251,350	394,260

All chinook were released at the hatchery at the proper time for immediate seaward migration. Size at release is six to seven inches. The fall 1983 release is anticipated numbers. Anticipated releases in 1984, 1985 and 1986 are 800,000, 900,000 and 1,200,000 respectfully.

STEELHEAD TROUT

	1979	1980	1981	1982	1983
Fingerlings	164,380	0	102,480	0	0
Fry	0	0	27,330	149,420	101,120

All steelhead have been released in reservation waters, destined for seaward migration.

RAINBOW TROUT

1979	1980	1981	1982	1983
52,600	15,500	17,770	23,000	11,500

Rainbow trout releases have been for on-reservation use. Anticipated numbers in 1984 and beyond are 13,500 fish per year.

Return: The hatchery has not been in operation long enough to have complete return data for any given year. Below is listed numbers of hatchery fish that have returned to the hatchery. Again, please remember this information is incomplete.

	1982	1983
Spring Chinook	890	415
Steelhead Trout	144	86

Annual Hatchery Budget:

Fiscal year 1983:	
U.S. Fish and Wildlife Service ..	$282,000
Warm Springs Tribe	5,000
Total.....	287,000
Fiscal year 1984 (Proposed):	
U.S. Fish and Wildlife Service ..	$292,000
Warm Springs Tribe	5,000
Total.....	297,000

As you can see the bulk of our funding is from the U.S. Fish & Wildlife Service. The tribe purchases fish feed in the amount shown above, to help defray the cost of Rainbow Trout production.

If you need more information, please don't hesitate to ask.

Sincerely,

GARY R. WHITE,
Hatchery Manager.

Mr. McCLURE. Mr. President, I am happy to accept the amendment offered by my colleague from Oregon and clarify for the record that the National Hatchery at Warm Springs is, in fact, a Mitchell Act facility which provides regional non-Indian benefits. Two other hatcheries will, however, be administered by the BIA because they are primarily Indian facilities. They will not be terminated, but rather transferred to that budget account which most appropriately reflects the beneficiaries of the program.●

Mr. President, I know of no objection to the amendment. I urge its adoption.

Mr. PRYOR. There is no objection on this side of the aisle, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2154) was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment was agreed to.

Mr. PRYOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HOLOCAUST MEMORIAL COUNCIL

● Mr. CHAFEE. Mr. President, concerning funding for the Holocaust Memorial Council, I notice that the Appropriations Committee, on page 109 of its report accompanying this bill, has indicated its reluctance to fund activities "outside the immediate scope of the Museum" absent action by the authorizing committees. I believe this is a sound approach, and I want to commend the committee and the chairman of the subcommittee, for adopting it.

In my view, the Holocaust Memorial Council, which was established by Congress nearly 3 years ago, has a valuable service to perform. I understand this mission to consist primarily of organizing the effort to create the Holocaust Memorial Museum here in Washington.

The Holocaust was an absolutely ghastly series of acts perpetrated by the government of Nazi Germany, and all of us should reflect on the causes of this historical tragedy and on its ramifications.

Mr. President, the fundamental purpose of this Museum is solely to memorialize the victims of the Nazi persecution as provided in Public Law 96-388, which states that the museum is intended to be "a permanent living memorial museum to the victims of the holocaust." The intent of Congress is clear.

Could I ask the Senator from Idaho if my remarks accurately reflect the intentions of the committee?

Mr. McCLURE. The Senator from Rhode Island is correct. The funds in this bill are provided to the Executive Director of the Holocaust Memorial Council to assist the Council in the planning and design work associated with a museum to commemorate the victims of the Nazi persecution. There are no funds provided for purposes beyond this.

Mr. CHAFEE. Mr. President, I applaud the language of the committee report outlining the position just outlined by the Senator from Idaho.●

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I rise today to express my concerns over one section of the fiscal year 1984 Interior appropriations bill—that section which deals with forest management.

Last year, the forest management budget was funded at a level of $7,674,000. The Appropriations Committee has recommended a funding level of $2,177,000 for fiscal year 1984.

Obviously, Mr. President, such a drastic reduction in funding of the forest management program would adversely affect State and private forestry programs. As you know, these programs are carried out by the U.S. Forest Service in cooperation with State foresters. These programs are designed primarily to aid private, nonindustrial landowners. These landowners own 58 percent of the Nation's commercial forest lands. These forests offer us the greatest opportunity to increase timber production, production needed to meet the projected 30-percent increase in domestic demand by the year 2000.

Mr. President, the committee has recommended a reduction of $5,497,000 in the forest management budget. I strongly believe that this is too large a reduction. I believe we need to increase production of forest lands and strengthen our Nation's global economic position by providing increased forest products for export to developing world markets.

Clearly, such a drastic cutback in funding would not help us reach these goals.

Mr. President, a survey of our State foresters indicates that this $5.497 million budget cut would eliminate 300 Forest Service positions. Several States have indicated they would eliminate their programs altogether if these proposed cuts are made. Others have stated that their programs would be reduced severely under the reduction. Losses of this magnitude would undoubtedly have an adverse impact on our State and private forestry programs.

It is unwise, I believe, at a time when our farmers are facing such financial stress, that we subject our forests and other holdings to an even greater risk of destruction by forest fires.

Mr. President, I had intended to offer an amendment that would change the committee's overall recommendation for funding State and private forestry programs from $51,730,000 for fiscal year 1984 to $57,227,000, restoring $5,497,000 to the forest management budget, thus bringing it to last year's level.

However, I have no desire to further delay this measure. It has already met with too many delays. Nonetheless, I did want to bring this reduction to the attention of my colleagues and let them know what impact the cut would have on their State and private forestry programs.

Mr. President, the House has recommended $5,177,000 for fiscal year 1984 for the forest management budget, compared to the $2,177,000 figure recommended by the Senate Appropriations Committee.

I feel the House figure is a more reasonable one, providing fairness and equity to our private, nonindustrial forest owners. Therefore, I wish to suggest, respectfully, to the distinguished chairman, Mr. McCLURE, that the Senate conferees look with favor upon the House figure, when the Inte-

rior appropriations bill goes to conference.

Mr. President, I sincerely believe this money is well spent and the House figure would be more in keeping with the needs of the Nation and our commitment to our State and private forestry interests.

Mr. McCLURE. Mr. President, the subcommittee recognizes the value of State and private forestry and the contribution that this program can make to it.

What we did in the deliberations of the subcommittee was simply take the budget recommendation in full because we do recognize that value. I am aware of the concern the Senator has stated. He has stated it to me numerous times privately, as is his wont, not necessarily abrasively, gently but persuasively, and he has done so again today. I am sympathetic to the needs of this program and the contributions that it can make. I say to the Senator that if we take no action today, and I hope we will not take action today, this matter will be considered very sympathetically in the conference.

It would be my expectation that if that is the case, we will probably come out of the conference with the amount of money that the House has suggested.

I particularly appreciate the leadership that the Senator has given. There is no one has been more determined and more steadfast in his determination that this program not be neglected. If we come out of the conference with that full figure, the people that are concerned about it certainly ought to be able to look to Senator HEFLIN for the credit that is justly due him for having kept this matter alive through the deliberations in the Senate and into the conference. I think I can safely say to the Senator that this is one that will probably be resolved in the conference in the manner which he would find pleasing.

Mr. HEFLIN. I appreciate the remarks of the distinguished chairman, and I thank him.

Mr. McCLURE. I thank the Senator.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, what is the pending question?

The PRESIDING OFFICER. The pending question is the committee amendment.

Mr. BAKER. Mr. President, I ask unanimous consent that the committee amendment, the pending question, be temporarily laid aside so that I may offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2155

Mr. BAKER. Mr. President, I send an amendment to the desk and ask that it be reported.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for himself and Mr. SASSER proposes an amendment numbered 2155:

On page 10, line 18, strike the number "$14,050,000" and insert in lieu thereof "$14,250,000".

Mr. BAKER. Mr. President, I will be very brief.

On September 13 of this year, my distinguished colleague, Senator SASSER, and I wrote to the chairman of the Subcommittee on Interior and Related Agencies of the Committee on Appropriations in respect to this matter:

It has been brought to our attention the urgent need for an additional appropriation of approximately $200,000 for the U.S. Fish and Wildlife Service to purchase machinery that will aid them and the Tennessee Department of Conservation in halting the rapid deterioration of Reelfoot Lake located on Obion County, Tennessee. This beautiful natual resource is in serious danger of dying due to the increased siltation and vegetation.

Under the terms of an agreement signed in 1941, the U.S. Fish and Wildlife Service in cooperation with the Tennessee Department of Conservation is responsible for maintaining Reelfoot Lake and Reelfoot National Wildlife Refuge. Recently, a Task Force was created by the Tennessee General Assembly, on which the Fish and Wildlife serves, to study proposals for the future revitalization of the lake. The purchase of aquatic machinery has been recommended to us by the Task Force as an interim measure. It is our understanding that the Fish and Wildlife Service does not have sufficient funds to cover this expense and that an additional appropriation is necessary.

Mr. President, that is the purpose of this amendment.

Mr. SASSER. Mr. President, I want to express my strong support for the amendment offered by my distinguished colleague. An additional appropriation of $200,000 to the U.S. Fish and Wildlife Service will enable it to fulfill it responsibilities to the Tennessee Department of Conservation in the management of Reelfoot Lake. These funds will be used to purchase the necessary machinery to start a revitalization effort already begun by the Tennessee General Assembly.

Mr. President, Reelfoot Lake is a national treasure created by the New Madrid earthquake of 1812. It is now threatened by siltation and overgrowth of vegetation. These funds will certainly move us forward in a preservation effort of this beautiful and unique lake for future generations.

Mr. McCLURE. Mr. President, we have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. DECONCINI. Mr. President, we have no objection to the amendment.

Mr. BAKER. Mr. President, I ask that my amendment be modified so that it will conform to the numbers contained in the status of the previous section amended today by the Senator from Alaska (Mr. STEVENS).

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment is as follows:

On page 10, line 18, strike the number "$19,585,000" and insert in lieu thereof "$19,785,000".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2155), as modified, was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank the manager of the bill, and I thank the minority leader for permitting me to transact this piece of business. I understand that he has an amendment that he wishes to offer.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Mr. President, the distinguished majority leader is welcome.

Mr. President, I ask unanimous consent that notwithstanding the fact that the committee amendment has not been adopted, I be permitted to offer this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2156

Mr. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD) proposes an amendment numbered 2156.

Mr. BYRD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, line 19, strike "$27,355,000" and insert "$27,555,000" in lieu thereof; and on page 16, line 9 strike "$149,650,000" and insert "$149,450,000" in lieu thereof.

Mr BYRD. Mr. President, this amendment has been discussed with the managers on both sides, and I will

not delay the Senate with any lengthy discussion.

The amendment would add no funds to the bill. It would simply transfer $200,000 in funds which were originally planned for land acquisition at the New River Gorge National River to permit the Park Service to construct visitor sanitation facilities. This past May I had the pleasure to dedicate the new temporary visitor center located on the rim of the New River Gorge. Visitor use of this new center is apparently far greater than was anticipated, and, as a result, the existing vault type restroom facilities have proved to be very inadequate to meet the additional demand. While the New River Gorge is just entering its land acquisition phase, and, therefore, land acquisition funds are very necessary, I believe that it is of utmost importance to establish adequate and sanitary restroom facilities as soon as possible. Mr. President, I urge that my amendment to shift these funds within the total funds recommended for the New River Gorge National River be accepted.

I thank the managers for what I believe will be their reponse in accepting the amendment, inasmuch as they have indicated that they have no objection.

Mr. McCLURE. Mr. President, we have reviewed the amendment. I agree with the statement the Senator from West Virginia has made. We have no objection to the amendment.

Mr. BYRD. I thank the distinguished manager of the bill.

Mr. DECONCINI. Mr. President, we do not object to the amendment on this side.

Mr. BYRD. I thank the acting manager of the bill on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2156) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside so that I may offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2157

Mr. COCHRAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Mississippi (Mr. COCHRAN) proposes an amendment numbered 2157.

Mr. COCHRAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. WILSON). Without objection, it is so ordered.

The amendment is as follows:

On page 16, line 2, insert before the period the following:

": *Provided further*, That up to $1,000,000, to be derived from the Historic Preservation Fund, shall be available until expended for the preparation of a feasibility report recommending measures necessary to provide protection from the severe sloughing of bluffs in Natchez, Mississippi, between the north limits of the National Cemetery and the U.S. Highway 84 bridge, where potential bluff sloughing is found imminent and historic properties, roads, streets, utilities and other improvements are threatened, such funds to be transferred to the Secretary of the Army for utilization by the U.S. Army Corps of Engineers".

On page 14, line 19, strike the number "$27,355,000" and insert in lieu thereof "$28,355,000"

Mr. COCHRAN. Mr. President, this amendment would appropriate $1,000,000 to the historic preservation fund for the purpose of entering into an agreement with the Corps of Engineers to do a survey/study of the problem of sloughing/caving along the Natchez Bluffs. This sloughing, if unchecked, threatens parts of four historic districts which contain 90 properties listed on the National Register of Historic Places.

The study would focus on the caving between the north boundary of the National Cemetery and the Highway 84 Bridge, a distance of approximately 1.5 miles. Several historic properties are in imminent danger of destruction at this time. Weymouth Hall, one of our most impressive Greek revival mansions, is now within 7 feet of the bluffs and in danger of being lost. The National Cemetery, established in 1867, is an 11-acre complex maintained by the Veterans' Administration which contains the graves of hundreds of known and unknown soldiers, including many black veterans such as Wilson Brown of Natchez who received the Congressional Medal of Honor. This cemetery is now within 20 yards of the bluff caving. Other threatened properties include the Gardens, Natchez City Cemetery, Charity (U.S. Marine) Hospital, Learned House, Smith-Bontura House, Edelweiss, the Parsonage, Rosalie, and the Briars.

The area to be studied contains some of the most important and unique examples of historic architecture and has become a tourist mecca and popular filming location.

The study that would be carried out with this appropriation is the only method available to determine the causes of the Natchez Bluffs problem. The Corps of Engineers is well qualified to investigate the problem to determine the cause for the bank caving and recommend solutions to protect these historic properties. The study would include compiling all available data on the soils peculiar to the region and allow the corps to take further soil borings to compile a complete inventory of the phenomena involved.

Mr. President, I ask unanimous consent to have printed in the RECORD a resolution approved by the city of Natchez and signed by its mayor, Tony Byrne.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, the City of Natchez, Mississippi, has a unique and rich history and the bluffs forming its westerly boundary along the Mississippi river have played a significant part in such history by being a momentous factor in the settlement, development and beauty of the City and are therefore of major importance to all the citizens of Natchez; and

Whereas, the City of Natchez and Adams County are recognized as a state and national treasure with four historic districts and ninety individual properties listed on the National Register of Historic Places; and

Whereas, the bluffs are presently in very real and serious danger from natural slides and sloughs which, if unchecked, will continue and lead to further loss of life and property, including property unique to the architectural history of Natchez, and the State of Mississippi, and the United States; and

Whereas, a group of individuals interested in saving the bluffs are currently making efforts to call attention to the problem and seek possible solutions thereto; and

Whereas, it is in the best interest of the City of Natchez and its citizens both to support such efforts and to implement any and all means at their disposal to stabilize the bluffs;

Now, be it resolved, that the City of Natchez does hereby express and declare its unqualified support in finding a practical and feasible solution to the problem of the bluffs and the present efforts of its citizens in achieving same.

Mr. COCHRAN. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution of the Adams County Board of Supervisors and a letter from the president of the National Trust for Historic Preservation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, Adams County, Mississippi, has a very unique and rich history and the bluffs forming its westerly boundary along the Mississippi River have played a significant part in such history by being a momentous factor in the settlement, development and beauty of the County and are therefore of major importance to all the citizens of Adams County; and

Whereas, the City of Natchez and Adams County are recognized as a state and national treasure with four historic districts and ninety individual properties listed on the National Register of Historic Places; and

Whereas, the bluffs are presently in very real and serious danger from natural slides

and sloughs which, if unchecked, will continue and lead to further loss of life and property, including property unique to the architectural history of Adams County, and the State of Mississippi, and the United States; and

Whereas, a group of individuals interested in saving the bluffs are currently making efforts to call attention to the problem and seek possible solutions thereto; and

Whereas, it is in the best interest of Adams County and its citizens both to support such efforts and to implement any and all means at their disposal to stablize the bluffs;

Now, be it resolved, that the Board of Supervisors of Adams County does hereby express and declare its unqualified support in finding a practical and feasible solution to the problem of the bluffs and the present efforts of its citizens in achieving same.

NATIONAL TRUST
FOR HISTORIC PRESERVATION,
Washington, D.C., September 13, 1983.

Hon. JAMES MCCLURE,
Chairman, Committee on Appropriations, Subcommittee on Interior, Dirksen Office Building, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We understand that your Subcommittee is evaluating a proposal to include funding in the FY84 Interior and Related Agencies Appropriations Bill for a study of the fluff erosion problem in Natchez, Mississippi. The receding bluff is threatening five National Register Historic Districts. The National Trust for Historic Preservation would like to voice its concern for the threat to these significant properties and their inhabitants and urge favorable action on the proposal.

The National Trust's Southern Regional Office and its Advisor form Mississippi, Ronald Miller, have been actively involved in this issue at the local level. The five threatened historic districts are of national significance and contain one of the finest collections of antebellum homes in the South.

The erosion problem is reaching a critical stage. There is imminent threat to Weymouth Hall, an 1855 Greek Revival Mansion, which presently sits only seven feet away from the edge of the bluff. Recent slides have destroyed the Old Powder Magazine, sections of two streets and have taken two lives.

Unfortunately, the study to determine the cause of erosion and a method of arrest is beyond the financial resources of the National Trust as well as the local community. It is our hope that the Subcommittee will appropriate money to solve the bluff erosion problem before further losses are incurred.

Thank you for the opportunity to express our support on this important issue.

Sincerely,

MICHAEL L. AINSLIE,
President.

Mr. STENNIS. Mr. President, I support the amendment offered by my colleague from Mississippi, Senator THAD COCHRAN, which will provide for a study of a very serious situation in Natchez, Miss. There in that historical city there is a problem which has come about as a result of the sloughing of bluffs overlooking the Mississippi River. These bluffs, which provide the border of a designated "National Historical District," have been eroding for several years and have reached a point that they are perilously close to some national landmarks.

Mr. President, Senators may recall in 1980, in that same area, two people were killed and much damage occurred to property when heavy rains caused a massive mud slide. This is the kind of thing that could happen again if we do not look at some possible solutions.

The money provided in this amendment would make it possible to study the situation to see if anything can be done and how much it would cost if it is possible. I think that the chairman and ranking member of this subcommittee and others who are familiar with this problem realize this study is urgently needed.

Therefore, I urge the adoption of this amendment.

Mr. COCHRAN. Mr. President, we have discussed the amendment with the managers of the bill, and we have been working with the staff in connection with this proposal. We hope that the managers will be able to recommend to the Senate that the amendment be accepted.

Mr. MCCLURE. Mr. President, I cannot commend the Senator from Mississippi too highly for having brought this amendment to the floor. When I say that, I mean it most sincerely, because there is a problem here.

There is no real legal precedent for this kind of action.

We, I think, should be very careful in taking this action that we do not casually invade land and water conservation funds for this kind of activity.

There would be those who would agree that an analysis of the statutes would say that the legal authority is at best questionable. As to what might be done, we do not really know whether this is the appropriate vehicle for the solution to the problem.

These particular historic features are not the highest on the priority list, and there may be some who would question the propriety of moving them forward as rapidly as this would do.

I should also mention the fact that whenever you are trying to take action of this kind, it is very uncertain as to whether or not we will be successful in reversing what others might say is the inexorable natural tendency of erosion in areas of this kind.

But after having said all of that, I say I do not know any other way to reach the problem that he is trying to reach. Since I know of no other way, I have to commend him for the ingenuity and for his persuasiveness in coming forward with this amendment, and say that it has our approval.

I add that the preliminary estimates indicate that we probably could accomplish this work for maybe half the full amount, and I wish the record to reflect that we do not expect them to spend $1 million. If indeed they can get by with an expenditure of half that amount, of $500,000, we would expect that they do so in the most prudent and most economical way to do it.

But, as I said at the outset, I know of no other way to get done what the Senator very rightfully suggests needs to be done. Therefore, we do support the amendment and hope that the amendment is adopted. If others in similar circumstances arise, we will take a look at them also. But it is very hard to conceive of exactly the same kind of circumstances arising at other times and in other places.

Once again I commend the Senator from Mississippi.

Mr. DECONCINI. Mr. President, the minority has no objection to this amendment.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the senior Senator from Mississippi be listed as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, I thank very sincerely the managers of the bill for their support of this amendment and the recommendation they are making to the Senate.

I agree with the distinguished Senator from Idaho that we hope the study can be accomplished for less than the amount shown in the amendment. This is a study hoping to find whether or not there is a feasible solution to the problem that is being experienced in the Natchez area.

I appreciate very much the consideration of both sides of the aisle in support of the amendment.

Mr. DECONCINI. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate?

Is there objection to the amendment?

The question is on agreeing to the amendment of the Senator from Mississippi.

The amendment (No. 2157) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MCCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. MCCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily laid aside in order to provide for the consideration of the amendment of the Senator from Wyoming.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wyoming is recognized to offer an amendment.

AMENDMENT NO. 2158

Mr. SIMPSON. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON) (for himself and Mr. WALLOP) proposes an amendment numbered 2158:

On page 23, line 23, delete "$819,260,000" and insert in lieu thereof "$819,360,000"

Mr. SIMPSON. Mr. President, the Lander, Wyo., U.S. Fish and Wildlife field unit has been an important contributor to the preservation, evaluation, and development of some of the best trout fishing in the United States. This field station has been active for many years in assisting two of our Indian tribes in the State of Wyoming, the Shoshone and Arapaho Indian tribes in management of fisheries and wildlife habitats and in learning proper sampling and evaluation techniques.

The results of this assistance are clearly discernable. Trout streams and lakes that have been stocked are indeed, teeming with fish. Lakes that had no trout or that just had rough fish now contain healthy populations of new trout. In addition, the field station has contributed greatly to the training of Indian tribal members, so that one day the Wyoming tribes may assume total primacy for fish and wildlife management on the Wind River Indian Reservation.

Unfortunately, funding levels for the Lander unit have fallen below a minimum operational level in recent years. The Fish and Wildlife Service and the Bureau of Indian Affairs both recommend an increase in funding for this station and its related programs. The Wyoming tribes have consistently contributed funding for part of the Fish and Wildlife management on the reservation—over $200,000 per year for almost the past decade—yet Federal funding has fallen from a comparable level to less than $50,000.

For these and various other reasons, I propose this amendment to the Interior appropriations bill that would increase the appropriation by $100,000. This is the minimum level needed to keep the station open and functional.

Previously, I have had conversations with the chairman of the Interior Subcommittee, Mr. MCCLURE, on this issue. Unfortunately, we simply ran out of time and were not able to accomplish this addition during committee markup.

It is my understanding that the committee has no objection to this amendment, and that it has been cleared with the committee staff.

I believe that the amendment might be adopted and I submit it on behalf of MALCOLM WALLOP of Wyoming, my friend and colleague.

I ask for adoption of the amendment.

● Mr. WALLOP. Mr. President, I am pleased to join my colleague from Wyoming, Senator SIMPSON, in offering an amendment to H.R. 3363 which will provide $100,000 for the Fishery Assistance Station in Lander, Wyo.

This amount will help to remove the uncertainty over the future of the program which has stifled any long range planning, and research.

The Fish and Wildlife Service originally established the Lander unit to provide technical assistance in both fish and wildlife management to the Shoshone and Arapaho Tribes located on the Wind River Indian Reservation in west central Wyoming. This is a formidable job. The reservation contains over 2 million acres of land which is the natural habitat of numerous species of game including elk, deer, mountain sheep, grizzly bear, moose, and antelope. In addition, the Wind River is 1,109 miles of streams and 263 lakes that contain some 27 different species of fish.

Although the funding for the wildlife portion of the unit was previously cut, the fishery research continues to provide valuable information which is critical to the tribes, the State of Wyoming and the surrounding region.

This money which we are now requesting will be combined with contributions from the tribes to insure that this program is not lost.●

The PRESIDING OFFICER. Is there further debate?

Mr. MCCLURE. Mr. President, we have no objection to the amendment. We urge its adoption.

Mr. DECONCINI. Mr. President, I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (No. 2158) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I appreciate the patience and understanding of Senator MCCLURE and Senator DECONCINI.

Mr. MCCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily laid aside in order to provide for the consideration of an amendment to be offered by the Senator from Virgina.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Virginia is recognized.

AMENDMENT NO. 2159

(Purpose: To provide funds for the Mary McLeod Bethune NHS)

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia (Mr. WARNER) proposes an amendment numbered 2159.

On page 13, line 18, strike out the period and insert in lieu thereof "*Provided further*, tht $200,000 shall be available for a cooperative agreement for the Mary McLeod Bethune NHS to carry out the provisions of Public Law 97-329."

Mr. WARNER. Mr. President, last year, along with the Senator from Oregon, Senator HATFIELD, I introduced legislation to designate the Mary McLeod Bethune "Council House" here in Washington, D.C. as a national historic site. I was pleased that the bill passed the Congress and was signed into law by President Reagan.

I am now offering this amendment to earmark, from available funds in the Senate Interior Appropriations bill, $200,000 authorized by that legislation in order to assure the preservation, maintenance and interpretation of "Council House."

"Council House," located at 1318 Vermont Avenue NW., was the last official residence of Mrs. Bethune, a great American and prominent black leader. The house also served as the first national headquarters of the National Council of Negro Women.

It was from this historic building that Mrs. Bethune and others labored to develop the strategies and programs which advanced the interests of black women and the black community.

Mrs. Bethune worked tenaciously to achieve goals which many thought impossible at the time. She had the fortitude, persistence, and confidence to believe that if one was willing to work hard, even the greatest barriers could be overcome. She is an example of the spirit and hope upon which America was founded.

Heads of State, government officials and leaders from around the world were received at "Council House" which now serves as the site of the Mary McLeod Bethune Memorial Museum, and the National Archives for Black Women's History.

During my tenure as administrator of the Nation's Bicentennial, the Bicentennial Administration made a grant to the National Council of Negro Women to assist in this program. I have a continuing personal interest in this repository of black American history of which Mrs. Bethune and her associates are so much a part.

Mr. President, that effort during the bicentennial was during the period of 1974 through 1976, so my association

with this project goes back some considerable period.

Mr. President, I ask unanimous consent that the section on Mary McLeod Bethune from the work Black Women in America: Contributors to Our Heritage by Dr. Bettye Collier-Thomas be printed in the RECORD so that we may have a better understanding of the contributions to our society by Mrs. Bethune. Dr. Collier-Thomas is the director of the Bethune Museum Archives.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BLACK WOMEN IN AMERICA—CONTRIBUTORS TO OUR HERITAGE

Mary McLeod Bethune was the fifteenth of seventeen children of Samuel and Patsy McLeod, slaves on the McLeod Plantation in Mayesville, South Carolina. Born after the Emancipation, Mary McLeod was a free woman. Seeing the overriding importance of real freedom and equality, she became a powerful force in the emerging struggle for civil rights. Beginning as an educator and founder of a school which bears her name, she became the valued counselor to four presidents, the director of a major government agency, the founder of a major organization for human rights (the National Council of Negro Woman), and a consultant to world figures seeking to build universal peace through the United Nations.

Mrs. Bethune obtained prominence as an educator. Her work, building the Daytona Normal School for Negro Girls into Bethune-Cookman College, brought her into contact with important political and financial figures. Under President Calvin Coolidge, and later Herbert Hoover, the national government began utilizing Mrs. Bethune's considerable experience for the National Child Welfare Commission. However, it was Franklin Delano Roosevelt who recognized the important role Mary McLeod Bethune could play in the implementation of his "New Deal" policies. Roosevelt created the office of Special Advisor on Minority Affairs in 1935. This position later became a part of the National Youth Administration (NYA).

As Director of the Division of Negro Affairs from 1936-1944, Mary McLeod Bethune was in a position to do much to further the interest of the Negro in America. She saw her task as one of interpreting the needs of black people to the directors of government. Equality of employment, housing, and personal freedom were immediate needs. To expedite these ends, she actively campaigned for the inclusion of blacks on the staff of federal agencies and other key positions of power. Perceiving the need for establishing concrete guidelines for the improvement of the position of blacks in the U.S., Mrs. Bethune organized three major national conferences of black leaders. Representatives came from all regions and political and religious persuasions. The conferences on problems of the Negro and Negro youth were highpoints in the career of Mrs. Bethune and in the struggle for civil rights. Recommendations from these conferences were submitted to President Roosevelt accompanied by Mrs. Bethune's urgings for implementation.

A fighter for the rights of all, Mary McLeod Bethune had a special interest in the rights and abilities of women, particularly black women. Recognizing the then almost untapped resource of America's women, she sought out other women who were aware of the contributions they could make for the advancement of world interests. She perceived in the united efforts of women a bridge to the unity which world governments sought. On December 5, 1935, a group of notable black women leaders representing a spectrum of national women's organizations joined together to form an umbrella organization to further the efforts of each affiliate. Among the thirty attendants were Mary Church Terrell and Charlotte Hawkins Browne. Mary McLeod Bethune was unanimously elected President of the new organization—the National Council of Negro Women. Working through this organization of organizations, Mrs. Bethune was able to realize the implementation of numerous programs addressing the problems of black women, the black community and the world community.

In 1955, feeling that death was imminent, Mrs. Bethune wrote her "Last Will and Testament," which defined the meaning of her life and her hopes for her people. Known as the Bethune "Legacy," this document, distributed throughout the world, is recognized as a truly great literary work.

Mr. WARNER. Mr. President, I would also like to thank Ms. Dorothy Height, president of the National Council of Negro Women, for her leadership on this issue and Mr. Guy C. McElroy, curator/assistant director of the Bethune Museum, for his assistance.

Mr. President, I urge the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. McCLURE. Mr. President, we have no objection to the amendment.

Mr. DECONCINI. Mr. President, we have no objection to the amendment on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia (Mr. WARNER).

The amendment (No. 2159) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DECONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WARNER. Mr. President, I wish to thank the distinguished managers of the bill for their cooperation and support in this matter.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I ask unanimous consent that I be added as a cosponsor of the amendment offered by the distinguished minority leader relating to surface mining.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending committee amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2161

(Purpose: Technical Amendment to Amendment 2111.)

Mr. McCLURE. Mr. President, on behalf of Senator EXON, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), on behalf of Mr. EXON, proposes an amendment numbered 2161.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

The last sentences of amendment numbered 2111 is amended to read as follows:

The last sentences of amendment numbered 2111 is amended to read as follows:

Withdrawals from the public domain as they pertain only to the lands described in this paragraph under Secretarial Orders of February 11, 1903, and July 24, 1917, for purposes of the North Platte Project, are revoked by conveyance of the rights, title, and interests as set forth in this paragraph.

Mr. McCLURE. Mr. President, this is simply a technical amendment. Prior to the August recess, we had adopted an amendment offered by the distinguished Senator from Nebraska. That amendment had in it one technical error and this would correct that technical error in an amendment already agreed to by the Senate. I think there is no controversy and I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Idaho (Mr. McCLURE).

The amendment (No. 2161) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DECONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, the distinguished majority leader is on the floor and this might be a good time to suggest to him that we have made as much progress on this bill as we are

likely to be able to make today. Just as a kind of a scorecard on it, we have considered and adopted 17 amendments today. We have considered two which were withdrawn by their sponsors after discussion. We have had colloquies with respect to interpretation of the bill on 12 different points.

My understanding is that there are 12 amendments remaining to be considered. Three of those might be considered as amendments which would require some debate, and the balance would be of the nature we have discussed today and can be handled relatively expeditiously on tomorrow. I understand there are three or four other subject matters upon which Members may wish to have some colloquy.

I believe, in view of the order and the arrangement the majority has made, that if we will get at this promptly tomorrow and attend to the business of the Senate on this, we can finish the bill in good time on tomorrow with the remaining business that we know of.

Mr. BAKER. Mr. President, I thank the Senator for the report, and a very good report it is indeed. I, too, hope we can finish this bill during the day tomorrow.

Mr. President, there will be no more votes today. I believe there is no other matter that can be disposed of on this measure.

IN SUPPORT OF H.R. 3363, THE INTERIOR APPROPRIATIONS BILL

Mr. WILSON. Mr. President, I rise in support of H.R. 3363, the Interior appropriations bill for fiscal year 1984, but I do so with two grave reservations. In one instance, too much money is made available by this bill. I am referring to the conspicuous absence of any language which would preclude the Department of the Interior from spending moneys to offer for lease certain Outer Continental Shelf tracts off my home State of California.

In the second instance, not enough money is made available for an important park project near Los Angeles—the Santa Monica Mountains National Recreation Area. In fact, the committee has recommended zero funds for needed parkland acquisition at this site.

These faults—too much money on one hand and too little on the other—relate to different but important needs of the 25 million people of California.

Let me speak first of the absence of any Outer Continental Shelf moratorium language. In recognition of the concerns that have been expressed by California's coastal communities, the Department of the Interior recommended that moneys not be appropriated in fiscal year 1984 for Outer Continental Shelf leasing in central and northern California. Despite this recommendation, the Appropriations Committee bill, as presently written, does allow Outer Continental Shelf leasing in this area.

And to make the situation much worse, the committee refused to include nearshore tracts off southern California in even a 1-year moratorium. Indeed, the committee strips the bill of this needed protection which was added by the House to allow time for resolution of serious questions that remain unanswered. This action was taken by the committee over my strenuous objections and those of my distinguished senior colleague from California, and of those coastal communities that would be directly threatened by Outer Continental Shelf leasing. The objections registered by the cities of San Diego and Los Angeles and a score of counties, business groups, city councils, and concerned citizens went unheeded.

These objections were voiced loudly and clearly most recently on July 26 at a series of public hearings in San Diego, Ventura, and Long Beach on proposed Outer Continental Shelf lease sales No. 80. In San Diego alone, over 100 witnesses testified. Except for the statements made by the oil and gas industry, all those who testified argued strenuously against the proposed lease sale. Included in this testimony was a statement by the San Diego Chamber of Commerce—an organization to which Secretary Watt looks to for support of his leasing program. The chamber's endorsement is anything but unqualified. Rather, the chamber voiced many concerns which have not been adequately addressed by the Department of the Interior. Their testimony can best be summarized as highly qualified support for the prudent and careful development of our natural resources, but not for what they fear will be at the cost of substantial environmental degradation or economic damage.

I share the chamber's sentiments. It has never been my purpose to impose a total ban on OCS development off California. To the contrary, what Senator CRANSTON and I seek to do is give California only the same protection enjoyed by other coastal States, and in what amounts to but 2½ percent of the billion acres Secretary Watt plans to lease. And in fact, California makes a substantial contribution to national energy self-sufficiency. As the fourth largest oil-producing State in the Union, California is a leader in oil and gas production. Recent oil strikes on the Outer Continental Shelf off the coast of Point Arguello have been making national headlines in the last several months.

All that my colleagues from California and I, and all that the House are proposing at this time, is the deferral for 1 year on leasing certain near shore southern California tracts; and we would join the Department of the Interior in supporting exclusion of central and northern California. In southern California, we specifically seek protection for Santa Monica Bay and a 12-mile buffer zone from Newport Beach to the Mexican Border. Even with these deferrals, key oil and gas fields are left open for development.

The committee should have recommended protection for California that the Department of the Interior has already provided for the eastern gulf, sections off the State of Massachusetts, and elsewhere. California is not Camelot, but it does deserve fair and equitable treatment commensurate with that received by other States.

Let me now move to the other serious shortcoming I see in this bill—the absence of any moneys for parkland acquisition at the Santa Monica Mountains National Recreation Area. This park was authorized in 1978, yet Congress has failed to make moneys available for parkland acquisition in the last 2 years. If we continue this pattern—as the Appropriations Committee would have us do—we stand to seriously jeopardize the good-faith standing of the U.S. Government on park-related matters.

By not following through on our commitment to make certain acquisitions in the Santa Monica Mountains National Recreational Area, we are committing a grave injustice to those individuals that have private inholdings. With the creation of this national recreation area, these individuals have effectively been stopped from developing their property. These landholders would have few objections if they could sell their property to the Park Service. Unfortunately, the Park Service will have no money to make these purchases if the bill before us today is enacted into law.

Equally as important as fairness to the property owners is the opportunity we have to provide wholesome and needed outdoor experience to millions of nearby Los Angeles residents. Due to socioeconomic circumstances, some of these people might not otherwise have the opportunity to enjoy the outdoors. As many of my colleagues know, I am currently embroiled in the midst of a very contentious debate on the question of how many acres should be added to the national wilderness system in California. While many of these proposed wilderness areas have merit, none can offer the same kind of access to so many urban-area residents—many of limited personal resources and in need of outdoor recreation to ease the pressures of urban living—as can the Santa Monica Mountains National Recreation Area. The committee, in my view, failed to recognize the importance of this asset by not recommending appropriations for this national recreation area.

As disappointed as I am about the failure to provide for OCS moratorium language and funding for the Santa Monica Mountains National Recreation Area, I do very much appreciate other recommendations that have been made by the committee. In particular, land and water conservation fund moneys for land acquisition in the Golden Gate National Recreation Area and at Lake Tahoe have my full endorsement. These projects are of special importance to my northern California constituents. Evidence of the popularity of the Golden Gate National Recreation Area, for example, can be seen in the 2.4 million visitors recorded in 1982. The Lake Tahoe project, on the other hand, is a project that provides not for parkland access, rather for the acquisition of environmentally sensitive tracts. Purchase of these lands will aid in the protection of this pristine national treasure.

In conclusion, I support this bill, but with the serious reservations I have stated. My only consolation is that changes are likely to be made before this bill goes to the President. I hope and ask that conferees will make the changes I seek to cure its defects. By doing so, they will earn the deep gratitude of my colleague from California and me, and of the millions of Californians we represent.

Mr. CRANSTON. Mr. President, I cannot support H.R. 3363, the fiscal year 1984 interior and related agencies appropriation bill, as reported by the Senate Appropriations Committee and intend to vote against its passage. While I have several objections, the most important are the failure of the bill to address two issues of vital concern to Californians, and to millions of non-Californians who value the scenic beauty California offers.

First, H.R. 3363 fails to provide any moneys in fiscal year 1984 for the Santa Monica Mountains National Recreation Area. Yet there is no national park in the country in greater need of Federal acquisition funds. Authorized in 1978, the Santa Monica Mountains NRA to date has received less than one-third—or just $41 million—of the total $155 million authorized for land purchases. If this bill is enacted, this will be the third consecutive year that the park's needs have not been met. No moneys were appropriated in fiscal year 1983 and only $5 million was made available in fiscal year 1982. At the same time, the parklands are under intense pressures for development. Without Federal funds forthcoming, local governments have no incentive to deny zoning for subdivisions in this highly scenic area of southern California. As a result, some superb parklands have already been lost.

The House of Representatives—at the urging of 30 Members of the California congressional delegation—approved $25 million for the Santa Monica Mountains NRA in its version of H.R. 3363. This sum would enable the National Park Service to double the size of the existing recreation area by acquiring top priority parcels of undeveloped lands entirely from willing sellers. Plainly this is a critical year for the Santa Monica Mountains. I fervently hope that the conference report on this bill will include an adequate level of funding—as much of the $25 million as possible—for the Santa Monica Mountains National Recreation Area.

Second, the Senate Appropriations Committee has also stripped out of H.R. 3363 all language protecting select portions of the California coastline from overzealous attempts at offshore oil and gas leasing by the Department of the Interior.

For the past 2 years the Congress has recognized the importance of preserving California's spectacular northern coastline by prohibiting in the Interior appropriation bill the use of funds to lease certain areas. This year—as the Secretary of the Interior proposes to offer for sale in February 1984 the entire southern California coast from Point Conception to the Mexican border—the House has protected certain close in, environmentally sensitive areas of the southern California coast. The House took this action after a full hearing, and with the support of 23 members of the California delegation, both California Senators and the unanimous support of the cities, towns, and counties of the affected region. The House action also has the support of the California Coastal Commission, the body established by Federal law to manage the development of California's coastal zone.

The proposed lease sale makes no economic sense. It would risk destroying far more valuable economic interests to prospect for oil in places where energy resources estimates are low. It makes no environmental sense. It would threaten the air quality and the ecology of an especially vulnerable region. And it makes no energy sense. It depresses the amount the public will receive for leasing public lands for development at a time when the west coast will be glutted with an oversupply of oil for the foreseeable future, as the oil companies themselves admit.

Senator WILSON and I have introduced bills to ban oil and gas leasing in those close-in coastal waters where oil and gas exploration would threaten recreational and commercial activities, commercial and sport fishing, marine life, air quality and even the military training areas off San Diego County. Although our bills differ slightly, they are in agreement totally on the California offshore areas which deserve to be protected from oil and gas leasing. Our bills do not affect recovery from the promising new oil finds off Point Arguello in the southern Santa Maria Basin.

Companion legislation to our bills has been introduced in the House and hearings have been held. The language approved by the House in H.R. 3363 would have given Congress time to examine this legislation and act before the next lease sale takes place.

However, the Senate Appropriations Committee has ignored the history of this vital House provision, the expressed will of Congress and the compelling reasons for including this provision in the bill just as it failed to include funds for the Santa Monica Mountain National Recreation Area. Both the California coastline and the Santa Monica Mountains are precious national assets which can be fatally wounded by this failure to protect them. I urge my colleagues to join me in urging the restoration to this bill of provisions protecting these two priceless areas of California.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business of not to exceed 5 minutes in length in which Senators may speak for not more than 1 minute each.

The PRESIDING OFFICER. Without objection, it is so ordered.

HENRY M. JACKSON

Mr. COCHRAN. Mr. President, the sudden and unexpected death of Senator Scoop Jackson has cast a mood of gloom on the Senate as no other event has since I have been a Member of this body.

This is explained simply by acknowledging that Scoop was genuinely respected and loved by his colleagues.

He was very competent and conscientious in the representation of his constituents, and in his relationship with fellow Senators he was always friendly and thoughtful.

I will always consider it a distinct privilege to have served in the Senate with him.

I admired him greatly and enjoyed being with him very much. He was so unpretentious and so openly warm and caring with everyone he encountered.

He was, at the same time, a talented legislator who used his skill and unusual abilities to gain passage of some of the most important legislation of our generation.

Scoop Jackson will be remembered and revered for a long, long time.

MESSAGE FROM THE PRESIDENT

Messages from the President of the United States were communicated to

the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriated committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

At 12:35 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolutions:

S. 118. An act provide for the establishment of a Commission on the Bicentennial of the Consititution;

S.J. Res. 131. Joint resolution designating "National Cystic Fibrosis Week"; and

H.J. Res. 353. Joint resolution condemning the Soviet criminal destruction of the Korean civilian airliner.

The enrolled bill and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

At 12:54 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 3391. An act to improve worker training under the Trade Act of 1974, and for other purposes;

H.J. Res. 283. Joint resolution designating the week beginning November 6, 1983, as "National Disabled Veterans' Week"; and

H.J. Res. 311. Joint resolution to proclaim March 20, 1984, as "National Agriculture Day."

HOUSE MEASURES REFERRED

The following bill and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3391. An act to improve worker training under the Trade Act of 1974, and for other purposes; to the Committee on Finance.

H.J. Res. 283. Joint resolutions designating the week beginning November 6, 1983, as "National Disabled Veterans' Week"; to the Committee on the Judiciary.

H.J. Res. 311. Joint resolution to proclaim March 20, 1984, as "National Agriculture Day"; to the Committee on the Judiciary.

HOUSE MEASURE PLACED ON THE CALENDAR

The following joint resolution was read the first and second times by unanimous consent, and placed on the calendar:

H.J. Res. 132. Joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week."

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, September 19, 1983, he had presented to the President of the United States the following enrolled bills and joint resolution.

S. 118. An act to provide for the establishment of a Commission on the Bicentennial of the Constitution.

S. 675. An act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes.

S.J. Res. 131. Joint resolution designating "National Cystic Fibrosis Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1744. A communication from the Assistant Secretary of the Army for Civil Works transmitting a draft of proposed legislation to terminate authorization for Lake Brownwood modification project, Pecan Bayou, Tex.

EC-1745. A communication from the Assistant Secretary of the Interior for Indian Affairs transmitting, pursuant to law, a plan for the use of Indian judgment funds awarded to the Standing Rock Sioux Tribe; to the Select Committee on Indian Affairs.

EC-1746. A communication from the Assistant Secretary of the Interior for Indian Affairs transmitting, pursuant to law, a plan for the division and use of judgment funds awarded to the Sisseton and Wahpeton Sioux; to the Select Committee on Indian Affairs.

EC-1747. A communication from the Mayor of the District of Columbia transmitting, pursuant to law, a two-part report entitled "Legislative History, District of Columbia Statehood Constitutional Convention" and a petition for the admission of the District of Columbia to the Union of States as New Columbia, the 51st State; to the Committee on the Judiciary.

EC-1748. A communication from the Executive Associate Director for Budget, Office of Management and Budget, transmitting, pursuant to law, a report on the need for a supplemental appropriation for compensation, pensions, and readjustment benefits for the Veterans' Administration; to the Committee on Appropriations.

EC-1749. A communication from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs transmitting, pursuant to law, a report on certain properties to be transferred to the Republic of Panama in accordance with the Panama Canal Treaty of 1977; to the Committee on Armed Services.

EC-1750. A communication from the Secretary of the Treasury transmitting, pursuant to law, a report on activities under the Olympic Commemorative Coin Act of 1982, to the Committee on Banking, Housing, and Urban Affairs.

EC-1751. A communication from the Assistant Secretary of the Interior transmitting a draft of proposed legislation to withdraw and reserve for the Army certain public lands in the McGregor Range, Otero County, N. Mex., for use as a training and weapons testing area; to the Committee on Energy and Natural Resources.

EC-1752. A communication from the Secretary of Defense transmitting, pursuant to law, a report on the mineral potential of the Special Mining Management Zone, Clear Creek, Idaho; to the Committee on Energy and Natural Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without recommendation without amendment:

S. Res. 187: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 856 (Rept. No. 98-229).

S. Res. 189: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 500 (Rept. No. 98-230).

S. Res. 192: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1001 (Rept. No. 98-231).

By Mr. STAFFORD, from the Committee on Environment and Public Works:

A report regarding section 302(b) of the Congressional Budget Act (Rept. No. 98-232).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. TRIBLE:

S. 1852. A bill to extend the expiration date of the Defense Production Act of 1950; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. TOWER (for himself and Mr. JOHNSTON):

S. 1853. A bill to amend the Tariff Act of 1930 to exempt from duties equipments and repairs to certain vessels, and for other purposes; to the Committee on Finance.

By Mr. CRANSTON:

S.J. Res. 164. A joint resolution to support the Contadora peace process; to the Committee on Foreign Relations.

By Mr. MATHIAS:

S.J. Res. 165. A joint resolution to commemorate the bicentennial anniversary of the constitutional foundation for patent and copyright laws; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MURKOWSKI (for himself and Mr. STEVENS):

S. Res. 223. A resolution to express the appreciation of the American people for the efforts of the Japanese Government in connection with the Korean Airlines tragedy; to the Committee on Foreign Relations.

By Mr. GORTON (for himself, Mr. PRESSLER, Mr. TRIBLE, Mr. DANFORTH, Mr. SARBANES, Mr. HUDDLESTON, Mr. ABDNOR, Mr. EAGLETON, Mr. STENNIS, and Mr. WARNER):

S. Con. Res. 67. A concurrent resolution expressing the sense of the Congress that it is not appropriate at this time to transfer ownership or management of any civil meteorological satellite system and associated ground system equipment to the private sector; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. TRIBLE:

S. 1852. A bill to extend the expiration date of the Defense Production Act of 1950; to the Committee on Banking, Housing, and Urban Affairs.

EXTENSION OF THE DEFENSE PRODUCTION ACT

Mr. TRIBLE. Mr. President, I send to the desk a bill to extend for 5 years the authorities of the Defense Production Act of 1950 which expire on September 30, 1983.

The Defense Production Act (DPA) is the foundation for our Nation's defense preparedness capability both in times of war and times of peace. This act provides the President with the authority to divert certain materials and facilities to defense purposes; reduce the time required for full mobilization; insure availability of strategic and critical materials, including energy; insure productive capacity and supply; and develop preparedness programs.

Hearings to be held by the Banking Committee later this week will examine proposals put forward by the Department of Defense to use the Defense Production Act to establish price supports for a variety of defense-related materials. In addition these hearings will consider elements of House legislation which would establish several new programs under the authorities of the Defense Production Act. Finally the committee will consider the need for any amendments to the act which may be necessary in light of the Supreme Court's decision with regard to the legislative veto.

The Defense Production Act has been the continuing victim of uncertainty as the result of a succession of short-term extensions of its authorities. The Department of Defense, the Federal Emergency Management Agency and the General Accounting Office have all pointed out in forceful terms the negative consequences of an expiration of the Defense Production Act. For this reason, I am strongly advocating a 5-year extension of the act at this time.

In addition to extending the DPA for 5 years, the legislation I am introducing would make statutory the Defense Department's existing criteria for the evaluation of project proposals under title III of the Defense Production Act. The General Accounting Office, in reporting to our committee, has praised DOD for developing these criteria for DPA projects, but questioned whether they had been strictly or consistently applied. The inclusion of this provision will insure that DOD conducts a rigorous evaluation of a proposed project before it is submitted to the Congress.

Finally, in response to the Supreme Court's decision in the Chadha case concerning the legislative veto, this bill removes the legislative veto provisions from sections 301 and 302 of the act, replacing them with requirements that the Congress approve proposed loans, or loan guarantees with an authorization bill or joint resolution rather than disprove them with a legislative veto devise. Congressional approval would also be required for price guarantee proposals under section 303, which are not currently subject to adequate congressional control.

I am hopeful that this 5-year extension and these minor amendments to the DPA can be promptly reported by the Senate Banking Committee and that the Senate can act on this legislation well before the September 30 deadline.

The extension of the Defense Production Act will provide the continued availability of many of the authorities necessary to continue improvement in our Nations ability to mobilize resources in times of national emergency and I am pleased to introduce this legislation.

By Mr. TOWER (for himself and Mr. JOHNSTON):

S. 1853. A bill to amend the Tariff Act of 1930 to exempt from duties equipments and repairs to certain vessels, and for other purposes; to the Committee on Finance.

OVERSEAS REPAIR OF U.S.-FLAG VESSELS

● Mr. TOWER. Mr. President, today I am introducing, along with my colleague, Senator JOHNSTON, legislation to remedy an inequity presently existing for U.S.-flag vessels.

Currently, these vessels are assessed a 50-percent ad valorem duty on the cost of equipment, parts or materials purchased for, and repairs made to, U.S.-flag vessels in a foreign country, unless necessitated by emergency. The apparent purpose behind this duty is to have nonemergency repairs and work done in U.S. shipyards. However, there is a certain impracticality in expecting vessels regularly trading for protracted periods between distant ports of the world to return to the United States solely for these repairs. Indeed, Congress earlier recognized this inequity when it chose to amend section 466 of the Tariff Act of 1930. The act was changed in order that shrimp boats and other "special purpose" craft such as barges, oil drilling rigs, and oceanography vessels remaining away from U.S. ports for 2 or more years would be exempt from this duty.

The bill we are introducing today would broaden that exemption such that U.S.-flag cargo and passenger vessels will be included. This bill, S. 1853, is nearly identical to Public Law 91-654 which exempted special purpose vessels remaining away from U.S. ports for 2 or more years. Under our bill, the statutory requirement that a duty be levied on any repair work done in the first 6 months a vessel is away from a U.S. port would remain intact. Additionally, the requirement that a U.S.-flag vessel be away from a U.S. port for 2 or more years in order for equipment and repairs to achieve "duty-free" status would not be changed. Further, our bill includes a proviso that does not appear in current law. This proviso would forbid duty-free status for repairs if a cargo or passenger vessel is taken overseas for the sole purpose of obtaining these repairs, regardless of how long it may thereafter be absent for whatever reason.

In my view, this legislation will have little, if any, impact on shipyards in the United States with regard to the ship repair business. This is particularly ture since return of the vessels to the United States would impose a prohibitive economic burden for out-of-service and steaming costs. Yet, at a time when the competitive posture of the U.S. merchant marine is under severe constraints, due to the cost advantage enjoyed by foreign competitors and the trading protections being imposed by an increasing number of our maritime partners for the benefit of their own fleets, it is appropriate that U.S. merchant vessels regularly deployed abroad for extended periods be relieved of the further cost disadvantage of a duty on foreign equipment repairs if ultimately returned to the United States.

Our proposal is also consistent with a recommendation by the Comptroller General of the United States in a 1981 report to the Congress in which he noted that the 50-percent duty on foreign equipment and repairs inhibits subsidized U.S.-flag operators and recommended that Congress consider alternative U.S. policies for promoting the U.S. ship repair industry with the objective of making them more equitable to U.S.-flag operators.

Impact of the duties collected on the Federal budget is de minimus. In fiscal year 1981 duties on foreign vessel repairs amounted to only $12 million, or about 0.13 percent of the $9.3 billion of customs duties collected that year.

By contrast, that $12 million represented a substantial cost imposition on the carriers against which the duties were assessed.

Finally, I would note that the Tariff Act of 1930 was further amended in 1979 to exempt all U.S.-registry commercial aircraft from applicability of the duty in question, regardless of period of absence from the United States, to enhance their operators' international competitive position. Since U.S. commercial aircraft have the ability to return to the United States quite rapidly from any point in the world at substantially less operating and lost opportunity cost than ocean-going vessels, the case for also exempting the relatively small number of U.S.-flag merchant vessels engaged in foreign-to-foreign service rather than in the U.S. import and export trades is indeed compelling.

I ask unanimous consent that the text of S. 1853 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1853

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 466(e) of the Tariff Act of 1930 (19 U.S.C. 1466(e)) is amended to read as follows:

"(e) In the case of any vessel referred to in subsection (a) that arrives in a port of the United States two years or more after its last departure from a port in the United States, the duties imposed by this section shall apply only with respect to (1) fish nets and netting, and (2) other equipments, and parts thereof, and repair parts and materials purchased, or repairs made, during the first six months after the last departure of such vessel from a port of the United States: *Provided,* That if such vessel is designed and used primarily for transporting passengers or property, this subsection shall not apply if the vessel departed from the United States for the sole purpose of obtaining such equipments, parts, materials, or repairs.".

SEC. 2. (a) The amendment made by the first section of this Act shall apply with respect to entries made in connection with arrivals of vessels on or after the date of the enactment of this Act.

(b) Upon request therefor filed with the customs officer concerned on or before the ninetieth day after the date of the enactment of this Act, any entry in connection with the arrival of a vessel used primarily for transporting passengers or property—

(1) made before the date of the enactment of this Act but not liquidated as of January 1, 1983, or

(2) made before the date of enactment of this Act but which is the subject of an action in a court of competent jurisdiction on the date of introduction of this Act, and

(3) with respect to which there would have been no duty if the amendment made by the first section of this Act applies to such entry,

shall, notwithstanding the provisions of section 514 of the Tarriff Act of 1930 (19 U.S.C. 1514) or any other provision of law, be liquidated or reliquidated as though such entry had been made on or after the date of the enactment of this Act.●

● Mr. JOHNSTON. Mr. President, today Senator TOWER and I are introducing legislation to correct an inequity imposed on owners of U.S.-flagged vessels when their vessels are overseas 2 or more years. The inequity is this:

Under current law (19 U.S.C. 1466) there is a 50-percent ad valorem duty on repairs made overseas on a U.S. vessel.

For example, if a gulf coast company's offshore supply vessel returns to a U.S. port after 8 years overseas, the company must pay the U.S. Government a duty equal to 50 percent of the company's repair costs while it was overseas—an offshore supply vessel carries pipe, mud, equipment, and so forth to an offshore drilling rig or platform and is less than 500 gross tons.

Current law (19 U.S.C. 1446(e)) exempts mobile drilling units and certain special-purpose vessels, such as a derrick barge, from the 50-percent duty if the exempted vessel was overseas for 2 or more years; but if that vessel incurred repairs within 6 months of departing a U.S. port, then the vessel's owner is subject to the 50-percent ad valorem duty on those repairs.

This legislation we are introducing today would amend 19 U.S.C. 1466(e) by extending its provisions to all U.S.-flag vessels, plus an additional limitation that the exemption would not apply to those vessels, not previously exempted, which left the United States for the purpose of obtaining repairs.

In other words, the legislation provides that—

A U.S.-flag vessel would not be subject to the 50-percent ad valorem duty on repairs made 6 months after departing the United States if:

First. The vessel was overseas for 2 years or more; and

Second. The vessel, if not previously exempted, did not depart the United States for the purpose of obtaining repairs.

The legislation would amend current law in the following manner, with words in brackets to be deleted, and words in italic to be added:

§ 1466(a) The equipments, or any part thereof, including boats, purchased for, or the repair parts or materials to be used, or the expenses of repairs made in a foreign country upon a vessel documented under the laws of the United States to engage in the foreign or coasting trade, or a vessel intended to be employed in such trade, shall, on the first arrival of such vessel in any port of the United States, be liable to entry and the payment of an ad valorem duty of 50 per centum on the cost thereof in such foreign country . . .

(e) In the case of any vessel [designed and used primarily for purposes other than transporting passengers or property in the foreign or coasting trade which] *referred to in subsection (a) that* arrives in a port of the United States two years or more after its last departure from a port of the United States, the duties imposed by this section shall apply only with respect to (1) fish nets and netting, and (2) other equipments and parts thereof, and repair parts and materials purchased, or repairs made, during the first six months after the last departure of such vessel from a port of the United States: *Provided, That if such vessel is designed and used primarily for transporting passengers or property this subsection shall not apply if the vessel departed from the United States for the sole purpose of obtaining such equipments, parts, materials or repairs.*

Section 2 of H.R. 3330 sets forth the proposed effective date of the new section 1466(e) as follows:

SEC. 2. (a) The amendment made by the first section of this Act shall apply with respect to entries made in connection with arrivals of vessels on or after the date of the enactment of this Act.

(b) Upon request therefor filed with the customs officer concerned on or before the ninetieth day after the date of the enactment of this Act, any entry in connection with the arrival of a vessel used primarily for transporting passengers of property—

(1) made before the date of the enactment of this Act but not liquidated as of January 1, 1983, or

(2) made before the date of enactment of this Act but which is the subject of an action in a court of competent jurisdiction on the date of introduction of this Act, and

(3) with respect to which there would have been no duty if the amendment made by the first section of this Act applies to such entry,

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, be liquidated or reliquidated as though such entry had been made on or after the date of the enactment of this Act.

The reasons for enacting this legislation are several. First, when a vessel is overseas for 2 or more years, it is unreasonable, as well as uneconomical, for that vessel to return to the United States for routine and special repairs. Thus, current law, which is designed to protect U.S. shipyards and their workers, is not logical when applied to a U.S. vessel that is overseas 2 or more years because such a vessel will not use a U.S. shipyard for repairs.

Also, when a U.S. vessel is overseas for long periods of time, as is often the case with vessels in the service of the offshore oil and gas industry, the overseas U.S. presence helps the U.S. economy and lowers the U.S. trade deficit.

Another reason is that when a U.S. vessel is overseas many years, current law is very difficult to administer. Frequently, it takes 2 to 3 years after a vessel arrives in a U.S. port to determine the 50 percent ad valorem duty. For example, one U.S. company had vessels overseas in Indonesian waters for nearly 10 years. It is thought that tracking down the invoices of all repairs made in Indonesia in that 10-year period will take 1½ to 2½ years.

Finally, current law, exempting vessels which do not carry passengers or property if overseas for 2 or more

years, has spawned numerous disputes and expensive litigation. For example, a tug or a vessel used primarily as a tug overseas, might be exempt. A vessel of the same type as a tug, but used frequently to carry supplies, may be liable for the duty. Obviously, when a vessel has had a mixed use overseas, confusion and disputes arise when the Treasury Department tries to administer current law.

In conclusion, the present 50-percent ad valorem duty on repairs on U.S. vessels overseas for more than 2 years serves no purpose, hurts the U.S. economy, and is very difficult to administer.

The revenue impact of this legislation is very minor. The limited exemption provided would result in a $2 to $3 million reduction in revenues to the Treasury on an annual basis.

Mr. President, we have examined this legislation carefully. Because it is impossible for vessels that are overseas for more than 2 years to return to the United States for needed repairs, this legislation will not impact on U.S. shipyards.

We seek prompt consideration of this legislation by the Senate Finance Committee.●

By Mr. CRANSTON:

S.J. Res. 164. A joint resolution to support the Contadora peace process; to the Committee on Foreign Relations.

CONGRESSIONAL RESOLUTION EXPRESSING SUPPORT FOR THE CONTADORA PEACE PROCESS

Mr. CRANSTON. Mr. President, last month I traveled to Latin America, accompanied by Congressman Esteban Torres of California, to talk with the leaders of the four democracies who met on Contadora Island off Panama last January to chart a path to peace with the nations of Central America.

When I left for Venezuela, Colombia, Panama, and Mexico, I was uncertain about the practicality of the Contadora approach. After 6 days of nonstop discussions, I returned to the United States both encouraged and discouraged. I was encouraged by the great opportunity we have to contribute to the success of the Contadora process. I was discouraged by the great dangers apparent in current U.S. policies.

These dangers lie in an American policy that alienates potential friends in the region by emphasizing military solutions when the region's leaders know that military force cannot cope with the fundamental causes of the turmoil in Central America.

One Contadora President I met seemed to speak for all when he admonished America against continued military intervention. He quoted Robert Kennedy, who said, "In Vietnam, we are gaining territory but losing the spirit of the people." This President then implored me: "Senator, don't make the same mistake in Latin America."

We in the United States debate this Vietnam analogy.

But there is palpable fear on the part of our neighbors that their countries are becoming an ideological battleground between East and West—that they, too, will soon be "another Beirut, another Saigon."

These leaders fear military intervention from any outside source, but what concerns them most is intervention by the United States, on the one hand, and by Cuba backed by the Soviet Union, on the other.

They are distressed by Cuba's training of guerrillas that are active in several Latin American countries—by the presence of so many Cuban military advisers in Nicaragua and the increasing closeness of the Sandinistas to Havana—and by Cuban backing of the rebels in El Salvador.

They fear an East-West confrontation because of the elimination of moderates and the strengthening of Marxists and reactionaries in the Salvador civil war, because of the CIA's bank-rolling Somocista thugs, because of the deployment off Nicaragua of the largest U.S. fleet ever to sail Latin American waters, and because of the growing role of the military and the diminishing role of civilians in Honduras.

These Contadora leaders made a strong impression on me as men who fervently share our basis goals in the region. Their countries are closer to the crisis than ours. It is their freedom and security that will suffer first should our policies fail. Their regional leadership will play an essential role if Central Americans are to know any peace and stability in the years ahead. Any American policy that ignores their historical perspective is doomed to failure.

The Contadora leaders hear Reagan administration assertions that the U.S. goal is to thwart outside intervention. But they see hypocrisy in this position given the legacy of U.S. military intervention throughout the hemisphere, the gunboats off Panama in 1903, the border incursions against Mexico, and the seizure of Vera Cruz in 1914, the occupation of Nicaragua from 1927 through 1932, the CIA-orchestrated overthrow of the democratically elected Guatemalan Government in 1954, the travesty of the Bay of Pigs, and the destabilization of the Allende government in 1973.

The Guatemalan case is a particularly galling memory for leaders of Latin American democracies.

It was a caricature of American policy gone bad, a macabre tale of corporate interests working with CIA operatives to orchestrate the military overthrow of a democratically elected government, albeit one led by a fumbling leftist. In the name of anticommunism, the United States propelled to power a series of ruthless military dictatorships in Latin America—not hesitating to fabricate evidence of communist military intervention, as we did in 1954 in Guatemala.

The leaders of democracies there hear the Reagan administration denounce foreign arms supply to the region. But they cite our practice of extensive military supply of anti-Arbenz Guatemalans, anti-Castro Cubans, and anti-Sandinista Nicaraguans.

They hear the Reagan administration lambast the Sandinistas for delaying free elections and they hear the administration's rhetorical commitment to civilian rule and democracy in Central America. But they notice administration silence in the face of rightwing dictatorships in Chile, Guatemala, and the faraway Philippines. They witness administration indifference to the continued systematic murder of civilians by the Salvadoran army. And they see the nascent Honduran democracy daily shaken by the growing influence of White House favorite General Alvarez.

If U.S. national interests in Latin America are to be secured, our policy must be grounded in an awareness of this legacy and we must not repeat past mistakes. U.S. policy should reflect the basic understanding that most Contadora leaders share our primary goals for the region: democracy, stability, and economic development.

They oppose communism. They want peace. They want the means to grow and to trade with their neighbors.

We must do more to help them reach those goals. Rigid support for rightwing dictators and oligarchical rule does not help. It merely sows the seeds of violent revolution. It allows Moscow and Havana to become parasites, feeding on the poverty and injustice that foster violent revolution. And, as even the United Fruit Co. eventually learned in Guatemala, dictatorships are not good for American business. As long as we fight the inevitable social change that must take place in Latin America, there will be instability and violence, and business will suffer.

If we support any government, no matter how brutal, as long as it is not Marxist, then when the inevitable social change occurs, those who bring it about and who come to power as a consequence will not be favorably disposed toward us and our business.

In Mexico, I met an academic leader who told me the story of why his best friend from his undergraduate days became a revolutionary in Guatemala. After graduation, his friend was hired as an accountant for the United Fruit Co. One day in a company ledger he found the name of every high-ranking

government official on the United Fruit payroll—at the same time the Guatemalan Government was refusing land reform for the people. His friend put down the ledger and picked up a gun.

The U.S. policy must be on the side of needed change—or else our policy will fail.

As John F. Kennedy warned several decades ago, "Those who make peaceful revolution impossible will make violent revolution inevitable."

U.S. policy must reflect an appreciation of the basic fact that nationalism is today a far more potent driving force in Latin American nations than capitalism or communism. Parading American military macho in the region may make Ronald Reagan feel good today. But it will do a great deal of harm to our long-term interests.

Nowhere is this more evident than in Nicaragua. Administration backing of the hated remnants of Somoza's National Guard daily consolidates nationalist support for the Sandinistas. Administration policy is used to justify the Sandinistas' otherwise unjustifiable military buildup. And it undermines efforts of democratic opponents to focus attention on the Sandinistas' betrayal of pledges for a free press and free elections.

U.S. policy toward Nicaragua stands in direct contravention of the OAS charter, which prohibits nations from intervening in the affairs of other signatories. The Reagan administration never took its case to the OAS. If the administration has a case that there is a significant arms flow from Nicaragua to El Salvador, it should make it before the OAS. But the available evidence suggests that this alleged arms flow is an insignificant trickle.

The Reagan administration's reliance on military force in Central America could get American troops simultaneously embroiled in hostilities on two continents. American Marines are already being shot at and killed in the civil war in Lebanon. Unless hotheads in the Pentagon and the White House are restrained, more Americans may soon be shot at and killed in El Salvador and Nicaragua.

Contadora leaders reject the counterproductive contra effort. They view with skepticism U.S. policy in El Salvador, which they argue has produced absolutely no progress in respect for human rights. I share their skepticism of our Salvadoran policy.

For 2 years Congress has granted most of the administration's Salvadoran funding requests. Over 4 billion in U.S. taxpayers' dollars have been sent or are on request from the Reagan administration for the civil war in El Salvador.

What are the results of this enormous infusion of guns and ammunition?

More than 30,000 civilians have been killed in El Salvador, the majority of them by government security forces and assassination squads armed with American guns and bullets. We have already spent more than $140,000 for each of the estimated 7,000 armed Salvadoran guerrillas.

Today, administration estimates of guerrilla size are drifting upward while military strategists anticipate that fighting will intensify during the coming dry season with no end in sight. If poverty and human rights are not adequately addressed, there can be no military solution in El Salvador. Our best chance for peace is to work through the Contadora process.

I came away from my trip impressed by what the Contadora countries have already accomplished.

They have produced not only the general framework but also the specific proposals that could bring peace to the region.

They seek an end to foreign arms supply, the withdrawal of foreign military advisers and a halt in the use of one nation's territory for attacks on neighbors, secure free elections, and regional economic development.

In the process, what I see as four key U.S. objectives have been advanced.

Regional leadership has emerged as an alternative to the U.S. interventionism that historically has set back our interests in Latin America.

Traditional enemies in the region are engaged in discussions seeking a comprehensive regional peace.

Nicaragua's Sandinista regime has abandoned its opposition to multilateral peace negotiations and now has joined in them.

Fidel Castro, according to two senior Contadora nation diplomats who talked with him in Havana recently, has stated a willingness to cooperate fully with the Contadora plan for peace.

All of this of course must be put to a hard test: Will actual steps toward peace ensue? Success depends on U.S. cooperation, as well as that of the Cubans.

Yet despite the substantial developments that have occurred, most Contadora leaders feel their effort is being undermined by the Reagan administration.

Administration officials mouth qualified support for the regional peace effort.

Yet President Reagan totally ignored Contadora in his postsummit comments in Mexico last month, just as he ignored it in his address to Congress in April.

Contadora efforts are hurt by the CIA-funded covert war against the Sandinistas.

Contadora leaders point out to me that within hours of Secretary Shultz's meetings on peace prospects in Mexico City last April, the U.S.-backed Contras launched their first major attack against Nicaragua, thus raising serious questions about the administration's commitment to the peace process.

The Reagan administration's "gunboat diplomacy" is also frustrating Latin American peace efforts.

Contadora leaders pointed out to me that within 24 hours of the July 17 proposal by the Contadora presidents of a comprehensive 10-point peace plan, the Reagan administration undercut it by announcing the deployment of the enormous U.S. flotilla, as well as plans to land up to 5,600 U.S. troops in Honduras for military exercises.

One Contadora president sarcastically told me that when he heard of this American move:

> I was convinced Castro's agents had infiltrated your State Department because it was so certain to stir up anti-American sentiment and solidify support for the Sandinistas.

Talking with the Contadora leaders made clear to me some of the risks inherent in the administration's military escalation.

Will the administration simply withdraw the U.S. armada 6 months hence if the status quo is unchanged in Nicaragua and El Salvador?

What will happen if American troops maneuvering in Honduras close to the Nicaraguan border encounter hostile fire, or if an incident at sea off the Nicaraguan coast results in American casualties?

How can the United States insist on prompt Nicaraguan elections when we are sponsoring a war against them, led by terrorists who just last week dropped bombs on the civilian Managua airport?

How will the CIA rein in these paid gunmen if the Sandinistas do speed up their timetable for Presidential elections in 1985?

The brewing financial crisis in the region—the total Latin America international debt is $300 billion—also threatens efforts to achieve peace in the region.

Economic sacrifices necessary to service the debt will increase existing domestic political strains throughout Latin America.

Costa Rica is everyone's model democracy in the region.

But it has the highest per capita debt in the world—currently running at 92 percent of its GNP.

War has obviously dimmed hopes for economic growth in El Salvador and Nicaragua.

Both have a per capita income of less than $1,000 per year.

And the GNP in El Salvador has declined 25 percent over the past 3 years.

But a development aid package for these nations will not succeed unless,

like the Marshall plan, it is carried out under democratic institutions after the shooting has stopped.

These are but a few of the many questions left unanswered by the Reagan administration's emphasis on a military solution.

Critics of administration policy have an obligation to spell out an alternative course.

I believe we should give the Contadora process our full support and press our allies in Costa Rica, El Salvador, Guatemala, and Honduras to do likewise. This would improve the prospect that Nicaragua and Cuba will cooperate.

There are two specific steps we should take now to advance the Contadora program.

First, the United States should recall the huge fleet patrolling off Nicaraguan shores and curtail the maneuvers in Honduras.

Second, the United States should terminate all funding for the covert war against Nicaragua.

There are three parallel, more long-term efforts that we should undertake to secure U.S. national interests in the region and to fulfill Contadora goals:

One, the United States should work with allies in OAS, and OECD, and with international financial institutions to advance a package of development assistance and debt refinancing for Central American nations.

Two, the United States should join with other nations in the region to press for secure, internationally supervised elections in El Salvador, Nicaragua, and Guatemala. These elections should provide for unfettered opposition access to media and physical security if they are to be meaningful.

Three, the United States should encourage the Contadora nations to pursue their dialog with Cuba and we should be prepared to enter into that dialog either indirectly through them, or directly, if necessary. Diplomatic recognition of Cuba—which sets off such a firestorm of political protest whenever it is mentioned in our country—is not the issue here.

Recognition is not at the top of our bilateral agenda, nor of Cuba's.

The issue is simply whether the United States can demonstrate the political maturity necessary to participate in a regional dialog including Cuba. Every one of the Contadora leaders I met said that this is essential for long-term regional peace.

Cuban policy is clearly part of the problem: discussions with Havana and agreements involving Havana will have to be part of any enduring solution—involving for example withdrawal of foreign military advisers and halting foreign arms supply. The Contadora process gives our Government a framework for pursuing such discussions that we can no longer afford to shun.

Whether the Contadora process succeeds or not, the Sandinista movement is in Nicaragua to stay. But the Contadora process could secure a halt to the efforts the Reagan administration alleges the Sandinistas have undertaken to foment revolution elsewhere.

A Sandinista regime freed of a compulsion to rely on Havana and Moscow for defense against invasion would not be likely to threaten our own security nor our vital interests in Central America.

It is very much in our interests, of course, to promote democracy, not dictatorship, whenever possible. But let us not pretend that the Sandinista leaders are going to cooperate eagerly in ushering in a democratic and pluralistic society in Nicaragua not dominated by Marxist-Leninists. They are not. Nor are the well-to-do rulers of El Salvador and Guatemala and the generals who are their partners going to give up all their power and prerogatives willingly. They would not.

The best hope of the Contadora approach is that it would lead to an end to the violence in Central America and promote progress on human rights, economic development, and a slow evolution toward democracy.

Do we really have a viable alternative to Contadora? I think not. The only alternative seems to be the Reagan administration's pursuit of a policy that inevitably leads from cruel, authoritarian dictatorships through guerrilla warfare to Marxist regimes. This is the same, dead-end policy that supported Batista in Cuba and produced Castro. It is the same, fatal policy that installed and backed Somoza in Nicaragua and ended up with the Sandinistas. And it is the same misbegotten Vietnam policy that supported totalitarian Saigon and got totalitarian Hanoi.

It is a policy that supports the status quo—any status quo no matter how unjust—so long as it is not Marxist.

It is a policy that forefeits any moral right to leadership of the forces of liberty, justice and wise restraint.

The root causes of the violence that wracks Central America are clear: hunger, poverty, and the denial by the obligarchies' military strongmen of any access for the impoverished and the middle classes to political power.

The Soviet Union and their Cuban proxies in Central America have preyed on these circumstances.

But they did not create them.

U.S. policy in Latin America has too often betrayed the commitment of our own revolution to greater freedom and human rights. We have used military force to quash agitation for change. We have left the militaristic, totalitarian Cuban revolution as the only alternative model for millions of oppressed peoples in the region, and as their only strong ally in their struggle.

One Contadora president gravely reminded me that the Communists and the military rightists share but one common objective: They both want to eliminate the political center, to eliminate any democratic alternative to civil war and totalitarian rule.

If we are to have any realistic hope of achieving our goals in Latin America we must combat such extremism while strengthening the centrist forces that are committed to democratic pluralism.

In 1936 I returned to the United States to warn Americans of the dangers posed by Adolf Hitler.

I urged then that we prepare to fight Hitler's forces, which posed a threat to freedom everywhere.

Last month I returned from Venezuela, Colombia, Panama, and Mexico, and I am urging now that we muster a different kind of courage—the courage to turn away from the counterproductive path of brute force, and to support the forces pushing for social change and democratic development in Latin America.

If we had shown greater wisdom and political maturity 20 years ago, the Gulf of Tonkin incident might not have led to the loss of more than 50,000 young American lives in Southeast Asia.

Time is running out on the Reagan policy of military brinksmanship in Central America.

I believe this policy is doomed to fail and that the Contadora peace effort offers the only promising alternative to secure U.S. national interests in the region.

Twenty years ago, Walter Lippmann saw clearly the perils of militaristic policies in Latin America. In the aftermath of the Bay of Pigs disaster, he wrote:

> A policy is bound to fail, which deliberately violates our pledges and our principles, our treaties and our laws. In the great struggle with communism, we must find our strength by developing and applying our own principles, not in abandoning them.

That in sum, is the clear and present challenge we all face.

Mr. President, for these and other reasons today I am introducing a joint resolution of Congress, that expresses U.S. support for the Contadora group's 10-point peace proposal.

I ask unanimous consent that the text of my proposed resolution be printed in the RECORD.

Mr. President, I also ask unanimous consent that the entire text of an article that I wrote with Representative Esteban Torres be printed in the RECORD. The article, "Ignoring Contadora Defeats Our Purposes," appeared in the Los Angeles Times on August 26, 1983.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S.J. RES. 164

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas the United States has an important national interest in encouraging peace, stability and democratic development in Central America; and

Whereas the escalating military conflict in Central America threatens these important U.S. national interests; and

Whereas four key Latin America democracies close to the turmoil in Latin America—Colombia, Mexico, Panama and Venezuela—initiated a regional dialogue in a January 1983 meeting on Contadora Island, Panama; and

Whereas leaders of these so-called "Contadora nations" have made significant and substantial progress in subsequent discussions towards agreement on goals for a comprehensive regional peace; and

Whereas the Contadora nations have proposed a ten-point peace plan for the region involving commitments to:

(1) "End to all existing warlike situations";

(2) "Freeze existing offensive weapons";

(3) "Agree to control and reduce the present inventory of armaments, with adequate supervisory mechanisms";

(4) "Prohibit the existence of foreign military installations in their territories";

(5) "Give previous notice of troop movements near a border";

(6) "Carry out joint border patrols or international supervision of borders as needed";

(7) "Form joint security commissions to prevent, and if necessary, to settle border incidents";

(8) "Establish internal control mechanisms to prevent the supply of arms from the territory of any country in the area to another country";

(9) "Promote a climate of detente and trust in the area"; and

(10) "Coordinate systems of direct communications among the governments in order to prevent armed conflicts and to generate an atmosphere of reciprocal political trust"; Now therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

(1) That the United States government expresses its full support for the objectives of the Contadora negotiations and its support for the ten points outlined by the presidents of the Contadora nations.

(2) That the President of the United States should encourage all the nations of Central America to give their full support to the Contadora peace process.

(3) A copy of this resolution shall be provided to the ambassadors from Colombia, Mexico, Panama and Venezuela.

[From the Los Angeles Times, Aug. 26, 1983]

IGNORING CONTADORA DEFEATS OUR PURPOSES

(By Esteban Torres and Alan Cranston)

The United States has critical national interests at stake in Central America—fundamentally, the achievement of peace, stability and democracy in the region. This cannot be achieved unilaterally, yet we are increasingly becoming isolated from friends in Latin America who share our goal.

Earlier this year, representatives of Mexico, Colombia, Venezuela and Panama met on Panama's Contadora Island to initiate a multilateral peace process. We have just returned from meeting with key officials in each of these democracies. While we are greatly impressed with the progress that they have achieved, we also are alarmed at the negative effect that Reagan Administration actions have had in systematically undermining the Contadora Group's efforts.

Contadora has already produced not only the general framework but also specific proposals that could bring peace to the region. The participants have pursued commitments to halt foreign arms supply, withdraw foreign military advisers, secure free elections, promote regional economic development and bar the use of one nation's territory for attacks on neighboring countries. In the process, four key U.S. objectives have been advanced.

Regional leadership has emerged as an alternative to the U.S. interventionism that historically has set back our interests in Latin America.

Traditional enemies in the region are cooperating to engage in a dialogue for comprehensive regional peace.

Nicaragua's Sandinista regime has embraced the idea of a multilateral peace negotiation.

Fidel Castro has shown a willingness to make compromises that would facilitate Cuba's reentry into the Latin American family of nations.

Despite these substantial developments, the Contadora process is suffering.

It is suffering from serious neglect by the Reagan Administration. When pressed, Administration officials pay lip service to the regional peace effort. Yet President Reagan ignored Contadora in his post-summit comments in Mexico this month, just as he ignored it in his address to Congress in April.

Contadora is suffering from U.S. attempts to pressure Nicaragua with a show of force. Just 24 hours after the Contadora nations' presidents proposed a 10-point peace plan, the Reagan Administration announced the deployment of the largest U.S. flotilla ever to sail Latin waters, as well as plans to land up to 5,600 U.S. troops in Honduras for "military exercises." One Contadora president told us that when he heard the news from Washington, he was convinced that Castro's agents had infiltrated the State Department, for the move could only stir up tremendous anti-American sentiment and solidify support through those whom it was designed to intimidate. The Contadora leaders, who share U.S. aspirations for democracy in the region, repeatedly expressed dismay that the Reagan Administration's rhetoric of peace is consistently contradicted by its military actions.

And Contadora efforts are suffering from the CIA-funded "covert" war against the Sandinistas. This hapless venture is seen as counterproductive by virtually every Contradora leader. U.S. backing of the universally hated remnants of Anastasio Somoza's National Guard justifies the Sandinistas' otherwise unjustified military buildup, and undermines efforts of democratic opponents to focus attention on the Sandinistas' betrayal of pledges for a free press and free elections.

The leadership of the Contadora nations offers the best means to achieve U.S. goals in Nicaragua, El Salvador and Guatemala, and to secure the imperiled democracies of Honduras and Costa Rica. The Contadora nations, which face a far more immediate threat than we do if the gathering storm erupts, are united in agreement that an essential step is dialogue between the United States and Cuba. While diplomatically necessary, such a dialogue has been blocked for reasons of domestic U.S. politics. With the Contadora process, our government has a framework for pursuing discussions that we can no longer afford to shun.

The United States must now demonstrate political maturity. We should withdraw our naval flotilla, stop CIA funding of the war against the Sandinistas; prepare to join Contadora parties in a dialogue with Cuba; press for secure, internationally supervised elections in El Salvador, Guatemala and Nicaragua, and advance a package of development assistance and debt refinancing for Central American nations.

Instead of the Reagan Administration paying lip service to the Contadora peace process, it should undertake these specific steps, giving Contadora the unequivocal support that it must have if long-termed U.S. national interests are to be secured.

By Mr. MATHIAS:

S.J. Res. 165. Joint resolution to commemorate the bicentennial anniversary of the constitutional foundation for patent and copyright laws; to the committee on the Judiciary.

PATENT AND COPYRIGHT LAWS

Mr. MATHIAS. Mr. President, today I introduce a joint resolution to commemorate the bicentennial anniversary of the constitutional foundations of our patent and copyright laws.

Mark Twain wrote in "A Connecticut Yankee in King Arthur's Court:"

A country without a patent office and good patent laws is just a crab and can't travel any way but sideways and backways.

And, although no Marylander cares to bad-mouth a crab, sideways and backways is no way for a country to proceed.

Our Founding Fathers knew this very well. As worldly, practical men, they also knew that the best way to move this young Nation frontways in a hurry would be by encouraging native invention. The result, of course, was article I, section 8 of the Constitution, where they empowered Congress to pass laws to preserve ownership rights in intellectual property. The importance of these rights in the minds of the founders is underlined by the fact that this section contains the only instance of the word "right" in the body of the original Constitution.

We have heard this clause over and over again, but I would like to cite in the RECORD today these 34 simple, direct words that have for almost two centuries spurred American inventive genius:

The Congress shall have the power to promote the progress of science and the useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.

My resolution simply calls for special recognition of the bicentennial of these words, in the form of appropriate programs and activities, and for a Presidential proclamation.

Many years ago, Dr. Samuel Johnson, the great 18th century moralist, philosopher and lexicographer, ob-

served, with characteristic asperity: "No man but a blockhead ever wrote except for money."

If as thoughtful and experienced a man as Dr. Johnson recognized the importance to creative writers and scholars of the prospect of accumulating a kind of property right in their writings as an incentive to work and ambition, it would underscore the interest of society which benefits from such creative work.

Much has changed since the drafting and adoption of our Constitution. But through it all, man's nature has been one of the constants, and our protection of intellectual property has served the great interest of society. I think this constitutional wellspring for our intellectual, cultural and industrial vitality deserved special attention as we approach the bicentennial year of that document, and I urge all my colleagues to join me in this effort to celebrate it.

I ask unanimous consent that the resolution be printed in the RECORD after my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 165

Whereas 1987 is the bicentennial year of the United States Constitution;

Whereas a clause in Article I, Section 8 of the Constitution empowers Congress "To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;"; and

Whereas this clause is the foundation of all patent and copyright laws and is worthy of special recognition during such bicentennial year: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That special recognition be given during 1987, the bicentennial year of the United States Constitution, to the constitutional foundation for patent and copyright laws, and the President is authorized and requested to issue a proclamation upon the enactment of this joint resolution calling upon the people of the United States to foster such recognition through appropriate programs and activities.

ADDITIONAL COSPONSORS

S. 128

At the request of Mr. ROTH, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 128, a bill entitled the Equal Opportunity Retirement Act of 1983.

S. 617

At the request of Mr. STENNIS, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 617, a bill to promote the use of energy-conserving equipment and biofuels by the Department of Defense, and for other purposes.

S. 657

At the request of Mr. DOLE, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 657, a bill to amend the Animal Welfare Act to insure the proper treatment of laboratory animals.

S. 919

At the request of Mr. DOMENICI, the name of the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 919, a bill to amend the Equal Access to Justice Act, and for other purposes.

S. 1001

At the request of Mr. COHEN, the names of the Senator from Missouri (Mr. DANFORTH), and the Senator from Florida (Mr. CHILES) were added as cosponsors of S. 1001, a bill to authorize appropriations for the Office of Federal Procurement Policy for an additional 5 fiscal years.

S. 1003

At the request of Mr. DENTON, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 1003, a bill to extend and revise the provisions of the Child Abuse Prevention and Treatment Act and the Child Abuse Prevention Treatment and Adoption Reform Act of 1978.

S. 1029

At the request of Mr. SASSER, the name of the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 1029, a bill to amend the Equal Access to Justice Act to include appeals to a board of contract appeals.

S. 1069

At the request of Mr. CHAFEE, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 1069, a bill to amend the Federal Power Act to limit the recovery by public utilities of certain costs of construction work in progress through rate increases.

S. 1163

At the request of Mr. GLENN, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Illinois (Mr. DIXON), the Senator from Kansas (Mr. DOLE), the Senator from Maryland (Mr. MATHIAS), the Senator from Delaware (Mr. ROTH), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from New Jersey (Mr. BRADLEY), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 1163, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes.

S. 1164

At the request of Mr. GLENN, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1164, a bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize payment of benefits with respect to public safety officers who die of certain medical conditions sustained in the performance of duty.

S. 1171

At the request of Mr. HEINZ, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 1171, a bill to authorize and direct construction of certain navigation projects of critical national and regional importance, to provide jobs during construction, to foster and encourage economic revitalization and increased employment opportunities through provision of efficient, economical, and dependable inland waterway transportation, and to provide for coordinated use and enhancement of the upper Mississippi River system.

S. 1197

At the request of Mr. STEVENS, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1197, a bill to admit certain passenger vessels to the coastwise trade.

S. 1448

At the request of Mr. BYRD, the names of the Senator from Mississippi (Mr. COCHRAN) and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of S. 1448, a bill to designate the square dance as the national folk dance of the United States.

S. 1566

At the request of Mr. ROTH, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 1566, a bill to amend title 5, United States Code, to provide civil penalties for false claims and statements made to the United States, to certain recipients of property, services, or money from the United States, or to parties to contracts with the United States, and for other purposes.

SENATE JOINT RESOLUTION 121

At the request of Mr. ABDNOR, the names of the Senator from Maryland (Mr. SARBANES), the Senator from Oklahoma (Mr. BOREN), the Senator from Tennessee (Mr. SASSER), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to designate November 1983 as "National Diabetes Month."

SENATE JOINT RESOLUTION 148

At the request of Mr. KENNEDY, the names of the Senator from Vermont (Mr. STAFFORD), the Senator from North Dakota (Mr. ANDREWS), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Kansas (Mrs. KASSEBAUM) were added as cosponsors of Senate Joint Resolution 148, a joint resolution to designate the week of May 6, 1984, through May 13, 1984, as "National Tuberous Sclerosis Week."

SENATE JOINT RESOLUTION 155

At the request of Mr. WILSON, the names of the Senator from Colorado (Mr. ARMSTRONG), the Senator from North Dakota (Mr. BURDICK), the Sen-

ator from West Virginia (Mr. BYRD), the Senator from Mississippi (Mr. COCHRAN), the Senator from California (Mr. CRANSTON), the Senator from New Jersey (Mr. LAUTENBERG), the Senator from Georgia (Mr. MATTINGLY), the Senator from Indiana (Mr. QUAYLE), the Senator from Wyoming (Mr. SIMPSON), the Senator from Vermont (Mr. STAFFORD), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 155, a joint resolution designating the week beginning November 6, 1983, as "National Disabled Veteran's Week."

SENATE JOINT RESOLUTION 160

At the request of Mr. BYRD, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Senate Joint Resolution 160, a joint resolution to designate the week of October 17, 1983 through October 24, 1983, as "National Adult Continuing Education Week."

SENATE JOINT RESOLUTION 161

At the request of Mr. CHAFEE, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of Senate Joint Resolution 161, a joint resolution to designate the week of April 15, 1984 through April 21, 1984, as "National Child Abuse Prevention Week."

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MATTINGLY, the names of the Senator from Massachusetts (Mr. TSONGAS) and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Concurrent Resolution 62, a concurrent resolution to direct the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan outlining the steps which might be taken to correct the social security benefit disparity known as the notch problem.

SENATE RESOLUTION 183

At the request of Mr. CHAFEE, the names of the Senator from Indiana (Mr. LUGAR), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Illinois (Mr. PERCY), the Senator from Alabama (Mr. HEFLIN), the Senator from Hawaii (Mr. INOUYE), the Senator from California (Mr. CRANSTON), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of Senate Resolution 183, a resolution dealing with the prevention of arson.

SENATE RESOLUTION 201

At the request of Mr. PRESSLER, the names of the Senator from Indiana (Mr. LUGAR), the Senator from Mississippi (Mr. COCHRAN), and the Senator from Florida (Mr. CHILES) were added as cosponsors of Senate Resolution 201, a resolution expressing the sense of the Senate concerning the use and/or provision of chemical warfare agents by the Soviet Union.

SENATE CONCURRENT RESOLUTION 67—RELATED TO CIVIL METEOROLOGICAL SATELLITES

Mr. GORTON (for himself, Mr. PRESSLER, Mr. TRIBLE, Mr. DANFORTH, Mr. SARBANES, Mr. HUDDLESTON, Mr. ABDNOR, Mr. EAGLETON, Mr. STENNIS, and Mr. WARNER) submitted the following concurrent resolution, which was referred to the Committee on Commerce, Science, and Transportation:

S. CON. RES 67

Whereas the Federal Government has traditionally provided weather forecasts which rely significantly upon data gathered by civil meteorological satellites;

Whereas within the United States the Federal Government is the principal user of data gathered by civil meteorological satellites;

Whereas the Federal Government has the responsibility for providing forecasts and warnings regarding severe weather in order to protect property and public safety;

Whereas the United States has engaged for over 100 years in the free international exchange of meteorological data;

Whereas civil meteorological satellite systems and associated ground-system equipment are essential components in ensuring the national security of the Nation, through their use in conjunction with satellites operated by the Department of Defense;

Whereas transfer to the private sector of ownership or management of any civil meteorological satellite system and associated ground system equipment would likely create a government-subsidized monopoly and jeopardize the cost-efficiency and reliability of data gathered by such system and equipment;

Whereas it is highly unlikely that, under the current plan for transfer of civil meteorological satellites, any significant new commercial venture involving marketing of weather data would develop;

Whereas continued consideration of the transfer of civil meteorological satellite systems only serves to complicate and delay the pressing decision about the future of the civil land remote sensing satellite system;

Whereas no satisfactory explanations or proposals have been advanced for the transfer of ownership or management of any civil meteorological satellite and associated ground system equipment to the private sector: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that it is not appropriate at this time to transfer ownership or management of any civil meteorological satellite system and associated ground system equipment to the private sector.

Mr. GORTON. Mr. President, I rise today to introduce a resolution expressing opposition to the proposed sale to the private sector of the Government's civil meteorological satellite (Metsat) systems. I am pleased that nine of my distinguished colleagues have joined me in doing so.

Last March, the President announced his intention to transfer the Government's weather satellites and the land remote sensing satellites (Landsat) to the private sector. The transfer was justified on the basis of more cost efficient and broader delivery of services to the public, if the services were provided by the private sector. We believe that it is not appropriate at this time to transfer the weather satellites.

We believe that it is important for the public, the Government, the prospective bidders for the satellite systems, and for the future of the Landsat system that the administration and the Department of Commerce realize the sense of the Congress that the transfer of the weather satellites is not appropriate at this time.

On July 11, 1983, I wrote Commerce Secretary Baldrige about my strong skepticism as to whether a compelling case could be made for the transfer of the weather satellites. The Committee on Commerce, Science, and Transportation, on which I sit, reported language in the authorization bills for NASA and NOAA this year which requires the Secretary of Commerce to secure congressional approval prior to the transfer of either satellite system. The NASA authorization was signed by the President on July 15, 1983.

Last month, I chaired a hearing in my home State of Washington on the Nation's weather satellites and services, in which representatives of many users of weather information expressed their views on the Metsat proposal. Spokespersons from the agricultural, marine, aviation, and foresty communities all raised reservations about the ability of a private operator to provide the reliable weather information on which they depend.

As I wrote the Secretary of Commerce, I do not oppose the transfer of the weather satellites if greater efficiencies, improved services, and assurance that obligations of international agreements and national defense can be achieved. These issues have been examined in detail by the Department and we have followed the process closely. We conclude that there is not a compelling case for the transfer. The Government is and will, very probably, remain the overwhelmingly predominant user of data from the weather satellites; a broader commercial market does not seem a promising prospect.

There are, at the same time, a number of reasons not to pursue the transfer at this time.

Continued consideration of the transfer of the weather satellites serves only to complicate and delay the pressing decision about the future of the land remote sensing satellite (Landsat) system. Our present Landsat satellite will have a much shorter lifetime than anticipated and its replacement is the last Landsat satellite that the Government is authorized to procure. Observational capability will cease by 1987 unless a follow-on satel-

lite is launched, an event which is unlikely before the end of the decade unless authorized very soon. Current Landsats cost about $300 million; alterative, probably less costly, technologies, Government or private, cannot be readied in time unless decisions on the future of land remote sensing are made soon. These decisions will be longer in coming while the weather satellites are a candidate for transfer.

It is becoming clearer that transfer of the weather satellites would require very careful reconsideration of international agreements which derive from a heritage of 100 years of free international exchange of data. Availability of international weather data has important defense, as well as civil, implications. Maintenance of this international data availability may be possible only if the terms of the weather satellite transfer are very carefully drawn and accepted by other parties to our international agreements. The American Meteorological Society, among other groups, doubts that such an agreement can be reached.

The Federal Government has a longstanding responsibility for providing forecasts and warnings critical to public safety, forest and crops protection, the fishing industry, and aviation, among others. These responsibilities will remain with the Government and will depend in part on weather satellite data.

For these reasons, and others, the transfer of the weather satellites does not seem appropriate at this time. The future of the land remote sensing satellites, however, must be addressed very soon, whether as a private or a public responsibility.

Mr. PRESSLER. Mr. President, I am pleased to join my distinguished colleague from Washington in introducing this resolution today, expressing Congress' opposition to the proposed sale of our Nation's weather satellites. This issue has been of vital interest to me over the years. I appreciate the chairman's cooperation and attention in this matter.

When I introduced legislation last February concerning this issue, I expressed grave concerns that the transfer would result in a Government-subsidized monopoly benefiting a huge corporation at the expense of American taxpayers. Among my other concerns mentioned then included the possible reduction in weather information and services now available to the American public, and the scientific research community, and so forth. Mr. President, my concerns in these areas remain. Indeed, after further research—more studies, arguments, and debate—I have become even more convinced that a transfer of our civil remote sensing satellites is inappropriate at this time.

It is healthy for the Government, from time to time, to stand back and assess its role in supplying goods and services as a matter of public policy. I applaud the administration's efforts in this area. Whenever private enterprise can responsibly and effectively assume control of Government operations, the transfer should be made. But the evidence against the case for commercialization of these satellites is so overwhelming as to justify ending this review now.

We are simply prolonging the agony and unnecessarily causing great anxiety to those employees, users, and the general public who rely on our present satellite system. By virtue of our current state of indecision and uncertainty in the commercialization issue, we are further muddying the waters for the future of the other half of a civil remote sensing program—the land sensing satellites (Landsats). We have to make some tough decisions on the Landsat program very soon. Resolution of the commercialization issue is crucial in addressing these other very important and timely concerns.

So I urge my fellow colleagues to join me in support of this resolution, and to act as swiftly as possible so we can address the concerns and anxiety of the American people, and get on with other important business at hand. Thank you.

SENATE RESOLUTION 223—RESOLUTION THANKING THE JAPANESE GOVERNMENT FOR THE ASSISTANCE IN CONNECTION WITH THE KOREAN AIRLINES TRAGEDY

Mr. MURKOWSKI (for himself and Mr. STEVENS) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 223

Whereas the United States and Japan have both condemned the Soviet action against Korean Airlines flight 007 resulting in the loss of 269 lives;

Whereas the Japanese Government made the decision to release the transcript of the Soviet pilot's transmissions to the ground control post;

Whereas that transcript has provided a basis for international efforts to obtain the truth regarding this tragedy;

Whereas the Japanese Government has joined with the United States in taking action against Aeroflot;

Whereas the Japanese Government has facilitated international efforts to search the seas in the area near the crash site;

Whereas the Japanese Diet has considered and already passed resolutions condemning the Soviet action: Now, therefore, be it

Resolved by the Senate, That it is the sense of the Senate that—

The United States owes the Japanese a debt of gratitude for their full and complete cooperation, which reflects the strong ties between our two peoples and governments.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he further transmit such copy to the Government of Japan.

Mr. MURKOWSKI. Mr. President, I am sending to the desk a resolution to express the appreciation of the American people for the efforts of the Japanese Government in connection with the Korean Air Lines tragedy. I hope that the resolution will receive expeditious consideration by the Senate Foreign Relations Committee and the full Senate.

The United States-Japan partnership is strong and enduring. On this floor, from time to time, it is true that criticism can be heard of Japan. Friction in a relationship as close as ours is inevitable. Trade disputes and U.S. interest in the Japanese making a greater contribution to Western security are two topics that are often covered in Senate speeches on United States-Japan relations.

But it is my view that we should never lose sight of Japan's crucial and sometimes quiet support for its ally and partner, the United States. By coordinating closely in the aftermath of the Korean Air Lines tragedy, the United States and Japan have once again demonstrated a unity of outlook and purpose.

Mr. President, we should all be aware that it was a difficult decision for the Government of Japan to release the Japanese intelligence tape which recorded the Soviet pilot's communication with the ground command post. Though it was reportedly an extrasensitive tape with national security implications, the Japanese Government decided to release it during the televised session of the U.N. Security Council meeting in order to expose the truth to the world. It was shortly after the release of the tape that the Soviet Union admitted shooting down KAL 007.

That tape exposed the Soviet Union in a way in which no number of U.N. speeches could have. The truth became unavoidable, even for a nation as experienced in evasion and untruth as the Soviet Union.

The Japanese Government has paid a price for its contribution. I understand from press reports that Japanese access to Soviet communications has been reduced substantially.

The Japanese Government, on behalf of its people, has strongly demanded from the Soviet Union a full explanation and formal apology. Both Houses of the Japanese Parliament, the National Diet, have adopted resolutions unanimously denouncing the Soviet Union. The Government has also decided to suspend Aeroflot flights and Japan Airline flights between Japan and the Soviet Union for 2 weeks.

Even today, Japanese and American efforts are continuing with close con-

sultation and coordination to search the seas in the area near the crash site.

Mr. President, my resolution thanks the Japanese for their contributions. Our gratitude is well deserved and I hope that this resolution will receive the unanimous approval of my colleagues.

Mr. President, I wish to read into the RECORD a portion of a telegram received from Mike Mansfield, the U.S. Ambassador to Japan, which reads as follows:

I understand that the Senate is, or will shortly be, considering a resolution thanking Japan for its cooperation with the United States on the Korean airliner shooting down. I heartily agree with this approach since the Japanese have been extremely helpful and forthcoming.

The telegram is signed by Mike Mansfield, Ambassador to Japan from the United States. I have excluded certain other parts of the telegram.

Mr. STEVENS. Mr. President, in the past 2 weeks we have seen Soviet explanations concerning the Korean Air Line's tragedy dismissed as misleading and misinformative. The unraveling of the Soviet fabrications would have been much more difficult had it not been for the Japanese Government's decision to release the tape of the Soviet pilot's communications with his ground control station. The decision was not without cost to the Japanese, as releasing the tape notified the Soviets extent to which their communications were being intercepted. Further, Japan's efforts in the search for wreckage of the aircraft are appreciated by all nations interested in justice.

I commend Senator MURKOWSKI for submitting this resolution of gratitude and for his efforts in further strengthening the ties between the peoples and Governments of Japan and the United States.

In light of the Japanese Government's role in the search for truth behind the Korean Air Line's tragedy, I am honored to be an original cosponsor of Senate Resolution 223

AMENDMENTS SUBMITTED

DEPARTMENT OF INTERIOR APPROPRIATIONS, 1984

BYRD AMENDMENT NO. 2141

Mr. BYRD proposed an amendment to the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, as follows:

At the appropriate place in the bill, add the following:

"( ) Notwithstanding Section 507(b)(14) of the Surface Mining Control and Reclamation Act of 1977 (P.L. 95-87), cross-section maps or plans of land to be affected by an application for a surface mining and reclamation permit shall be prepared by or under the direction of a qualifed registered professional engineeer or geologist, or qualified registered professional land surveyor in any State which authorizes land surveyors to prepare and certify such maps or plans."

HELMS (AND EAST) AMENDMENT NO. 2142

Mr. HELMS (for himself and Mr. EAST) proposed an amendment to the bill (H.R. 3363) supra, as follows:

On page 82, after line 15, add the following:

SEC. . (a) Section 3 of Public Law 96-315 is amended—

(1) in the first sentence of subsection (a) by striking out "December 31, 1979" and inserting in lieu thereof "July 1, 1982, and who held a valid Fish and Wildlife Service access permit for improved property owners at any time during the period from July 29, 1976 through December 31, 1979";

(2) in the second sentence of subsection (a) by inserting after "Lighthouse" the following: ", or, for anyone in continuous residency since 1976, passing through a point on the east-west prolongation of the centerline of Albacore Street, Whaleshead Club Subdivision, Currituck County, North Carolina"; and

(3) by adding at the end thereof the following:

"(f) Notwithstanding any other provision of this section or any other provision of law, the Regional Director of the Fish and Wildlife Service shall grant restricted access to noneligible permanent fulltime residents as of April 1, 1983, who can substantiate that access is essential to their maintaining a livelihood (e.g., a fulltime employee in Norfolk, Virginia).".

GORTON (AND OTHERS) AMENDMENT NO. 2143

Mr. GORTON (for himself, Mr. ANDREWS, Mr. BOSCHWITZ, Mr. CRANSTON, Mr. DURENBERGER, Mr. EVANS, and Mr. PRESSLER) proposed an amendment to the bill, H.R. 3363, supra, as follows:

On page 58, line 21, delete "$734,151,000" and insert in lieu thereof "$742,151,000".

GORTON (AND EVANS) AMENDMENT NO. 2144

Mr. GORTON (for himself and Mr. EVANS) proposed an amendment to the bill, H.R. 3363, supra, as follows:

On page 11, line 8, strike $28,600,000 and insert in lieu thereof $30,600,000.

On page 16, line 9, strike $149,650,000 and insert in lieu thereof $151,650,000.

McCLURE AMENDMENT NOS. 2145 THROUGH 2147

Mr. McCLURE proposed three amendments to the bill H.R. 3363, supra; as follows:

On page 21, line 9, strike the number "$5,064,000" and insert the following new number in lieu thereof: "$2,564,000".

On page 21, line 7, strike the italicized number "$127,425,000" and insert the following new number in lieu thereof: "$129,925,000".

AMENDMENT No. 2146

On page 14, line 1 strike the word "Service" and insert the following new word in lieu thereof: "System".

AMENDMENT No. 2147

On page 46, line 10 delete "$24,787,000" and insert in lieu thereof: "$24,363,000".

On page 46, line 12 delete "$232,832,000" and insert in lieu thereof: "$233,257,000".

PRESSLER AMENDMENT NO. 2148

Mr. PRESSLER proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 45, line 11, strike out "$51,730,000" and insert in lieu thereof $52,155,000".

On page 45, line 15, strike out the period and insert in lieu thereof ": *Provided further,* That $14,425,000 shall be available for fire protection.".

BAUCUS AMENDMENT NO. 2149

Mr. BAUCUS proposed an amendment to the bill H.R. 3363, supra; as follows:

Page 22, line 24, before the period insert the following:

": *Provided further,* That $1,000,000 of the funds made available to the State of Montana for state reclamation grants pursuant to sec. 402(g)(2) of Public Law 95-87 shall be used for reclamation of the Colorado Tailings site in Montana"

STEVENS AMENDMENT NOS. 2150 AND 2151

Mr. STEVENS proposed two amendments to the bill H.R. 3363, supra; as follows:

AMENDMENT 2150

"On page 58, line 21, strike $734,151,000 and insert in lieu thereof $734,651,000."

AMENDMENT 2151

On Page 82, at the end of the bill, add the following new section:

"Funds available in this Act for the purpose of contracting for services that require the utilization of privately owned aircraft shall be used only to contract for aircraft that are certified as airworthy by the Administrator of the Federal Aviation Administration as standard category aircraft unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services."

DANFORTH (AND EAGLETON) AMENDMENT NO. 2152

Mr. DANFORTH (for himself and Mr. EAGLETON) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 9, line 5, strike out the period and insert in lieu thereof" ": *Provided further,* that subject to valid existing rights, no appropriation herein made shall be used by the Secretary of the Interior for the processing or issuance of prospecting permits in certain lands in the Mark Twain National Forest, Missouri, which comprise approximately 17,562 acres, as generally depicted

on a map entitled "Irish Wilderness—Proposed", dated December 1981.".

STEVENS AMENDMENT NO. 2153

Mr. STEVENS proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 10, line 18, strike "$14,050,000" and insert in lieu thereof "$19,585,000".

HATFIELD AMENDMENT NO. 2154

Mr. McCLURE (for Mr. HATFIELD) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 10, line 4, insert before the colon ", and of which $292,000 shall be available for the operation and maintenance of the Warm Springs National Fish Hatchery"

BAKER AND WARNER AMENDMENT NO. 2155

Mr. BAKER (for himself and Mr. WARNER) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 10, line 18, strike the number "$19,585,000" and insert in lieu thereof $19,785,000.

BYRD AMENDMENT NO. 2156

Mr. BYRD proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 14, line 19, strike "$27,355,000" and insert "$27,555,000" in lieu thereof; and on page 16, line 9 strike "$149,650,000" and insert "$149,450,000" in lieu thereof.

COCHRAN AND STENNIS AMENDMENT NO. 2157

Mr. COCHRAN (for himself and Mr. STENNIS) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 16, line 2, insert before the period the following:

: *Provided further*, That up to $1,000,000, to be derived from the Historic Preservation Fund, shall be available until expended for the preparation of a feasibility report recommending measures necessary to provide protection from the severe sloughing of bluffs in Natchez, Mississippi, between the north limits of the National Cemetary and the U.S. Highway 84 bridge, where potential bluff sloughing is found imminent and historic properties, roads, streets, utilities and other improvements are threatened, such funds to be transferred to the Secretary of the Army for utilization by the U.S. Army Corps of Engineers

On page 14, line 19, strike the number "$27,555,000" and insert in lieu thereof "$28,555,000"

SIMPSON (AND WALLOP) AMENDMENT NO. 2158

Mr. SIMPSON (and Mr. WALLOP) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 23, line 23, delete "$819,260,000" and insert in lieu thereof, "$819,360,000".

WARNER AMENDMENT NO. 2159

Mr. WARNER proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 13, line 18, strike out the period and insert in lieu thereof ": *Provided further*, that $200,000 shall be available for a cooperative agreement for the Mary McLeod Bethune NHS to carry out the provisions of Public Law 97-329."

DEPARTMENT OF STATE AUTHORIZATION ACT, 1984

DeCONCINI AMENDMENT NO. 2160

(Ordered to lie on the table.)

Mr. DeCONCINI submitted an amendment intended to be proposed by him to the bill (S. 1342) to authorize appropriations for the fiscal years 1984 and 1985 for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting, and for other purposes, as follows:

On page 24, between lines 19 and 20, insert the following new section:

DOMESTIC POLITICAL ACTIVITIES OF AMBASSADORS

SEC. 122. (a) Section 7323 of title 5, United States Code, is amended by inserting "(other than an ambassador or minister)" after "Senate".

(b) Paragraph (3) of section 7324(d) of such title is amended by striking out "in its relations with foreign powers or".

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

EXON AMENDMENT NO. 2161

Mr. McCLURE (for Mr. EXON) proposed an amendment to the bill H.R. 3363, supra, as follows:

The last sentence of amendment numbered 2111 is amended to read as follows:

"Withdrawals from the public domain as they pertain only to the lands described in this paragraph under Secretarial Orders of February 11, 1903, and July 24, 1917, for purposes of the North Platte Project, are revoked by conveyance of the rights, title, and interests as set forth in this paragraph."

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Senate Committee on Governmental Affairs will hold a mark up on budget reconciliation on Thursday, September 22, at 10 a.m. in room SD-342 of the Dirksen Senate Office Building. For further information, please contact Ms. Mary Lewis at 224-4751.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources on the alternative funding plan for completing the Clinch River Breeder Reactor Plant project recommended by the administration on August 1, 1983, for consideration and action by the Congress.

The hearing will be held on Thursday, September 22, beginning at 2 p.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the record should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Paul Gilman of the committee staff at 224-4431.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be deemed to have been authorized to meet during the session of the Senate on Monday, September 19, to hold a hearing on S. 1679, the Honest Budgeting Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAKER. Mr. President, I ask unanimous consent that the Armed Services Committee be authorized to meet during the session of the Senate on Tuesday, September 20, at 10 a.m., to hold an open session to receive testimony from outside experts on organization and decisionmaking procedures of the Department of Defense.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, September 20, at 3 p.m., to meet in executive session with the German Defense Committee members.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, September 20, at 2:30 p.m., to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL EYE CARE PROJECT A SUCCESS

● Mr. GORTON. Mr. President, Washington was one of three States that recently participated in the successful pilot phase of the national eye care project, a program designed by the American Academy of Ophthalmology to offer medical eye care to all citizens over age 65.

The program was cosponsored by the Washington State Academy of Ophthalmology, and nearly all of Washington's 200 ophthalmologists volunteered to participate.

Cary Grant, Gene Kelly, and James Mason appeared in media announcements advertising that any person over age 65 could call a toll-free number for information about medical eye care. If they had no personal ophthalmologist, they were given the name of an ophthalmologist in their area who had volunteered to provide care. If the caller did not have medicare or other health insurance and was truly needy, the care was provided free of charge. I am speaking of actual medical, and in a few cases, surgical treatment—not merely routine screening—provided at no cost if the patient had no means to pay.

I am pleased to note that in Washington, more than 1,500 seniors called the toll-free helpline during the pilot 8-week period. More than 900 callers were put in contact with eye physicians who provided care for them. The program was equally successful in the two other pilot States, Michigan and West Virginia. In all three States, a total of more than 4,100 calls were received and 2,375 persons were referred to physicians.

The American Academy of Ophthalmology's national eye care project is an excellent example of private sector dedication. Most of the equipment and services were donated by private firms and individuals. The Government was not involved, except in the official White House ceremony to launch the program. President Reagan said:

> This (Project) is volunteerism at its finest. It is the kind of concerned, neighborly help that Americans are offering to each other with increasing frequency and increasing generosity.

Words of support and encouragement for the national eye care project have come from key administration officials. Chief of the medicare program, HCFA Administrator Carolyne A. K. Davis, Ph. D., said in a letter to the academy:

> As you and I well know there are many elderly individuals who have very limited resources and do not recognize the importance of medical eye care to protect their vision. Your effort to reach these individuals is in the very finest tradition of American voluntarism in caring for the elderly poor . . . It could become, I hope, a model for other professional organizations who would like to offer their skills in a very worthwhile cause.

Assistant Secretary for Health, Edward N. Brandt, Jr., M.D., said:

> I commend you and the membership for the compassion, initiative and innovation that this project signifies. It is in keeping with the highest of the ideals of the medical profession.

Assistant Secretary for Planning and Evaluation, Robert J. Rubin, M.D., said:

> I am pleased that the Academy has taken the lead in this important preventive health area.

There are now plans to expand the national eye care project to all 50 States if sufficient private sector support can be obtained. I heartily endorse the academy's efforts. Sight is vitally important at any age, but as a person grows older, three things happen that have a direct effect on seeing well.

First is the deterioration of vision itself. Many diseases and disorders of the eye are associated with the aging process. Many conditions can be corrected, improved, or at least arrested with proper medical eye care—but the tragedy is that many elderly persons are under the impression that decreasing vision is an unavoidable penalty of growing old.

Second, older people have difficulty remaining within the health care network. In many instances, their personal physicians have retired. The older person sometimes has fewer close friends or associates who can assist in putting him or her back in contact with a practicing physician. Mobility is increasingly difficult. These phenomena are common to all medical conditions, but are particularly acute for medical eye care, where only ophthalmologists are qualified to deliver the needed services.

Finally, there is the problem of lack of resources to pay for care a difficulty for many elderly. It is a long tradition in medicine to offer care without charge to the needy. Ophthalmologists and other physicians have continued this practice in the several instances where Federal, State, or private health insurance does not provide benefits to cover the individual. Estimates vary, but some studies indicate that approximately 4 to 5 percent of U.S. residents over age 65 do not qualify for medicare. Some are not citizens, some did not establish a long enough employment history to qualify for social security, and some simply do not enroll, for whatever reason. It is safe to estimate that many of these people urgently need professional medical eye care, lack the resources to pay for it—and fail to seek help because of this deficiency.

Mr. President, an excellent article by columnist H. Scott Wilson explained the national eye care project and appeared in the Grandview, Wash., Herald and other Washington newspapers. I ask that it be printed in the RECORD.

The article follows:

[From the Grandview (Wash.) Herald, May 12, 1983]

VISION HELP AVAILABLE

(By H. Scott Wilson)

Medical help is now available for any person age 65 or older who has a medical eye problem, according to Richard P. Mills, M.D., president of the Washington State Academy of Ophthalmology.

Dr. Mills said older adults who have or suspect having a medical eye problem can receive help by using the toll-free number of the American Academy of Ophthalmology. The toll-free number is 1-800-222-EYES. The letters E-Y-E-S correspond to the numbers 3937 on your telephone.

Any person 65 or older who phones that number will receive helpful information. If he is needy and has no ophthalmologist he will be directed to an ophthalmologist in this area who will provide, without charge, the medical help he needs.

This offer, a pilot project, expires June 17, 1983. The offer is being made available in only three states—Michigan, West Virginia and Washington.

Personally, I have met many senior citizens in the past three years who have benefited from eye surgery from a doctor in the Yakima Valley.

Just this morning I spoke to a woman, not a senior citizen, who benefited from surgery to remove cataracts more than 13 years ago. Her vision is vital to her occupation. Regaining her sight was like a miracle. During the past three years I have heard many similar statements, usually by people past 65, some up in their eighties.

People past 65 who need eye care by a doctor should not hesitate to seek advice. It won't cost a cent to ask. It may save your sight. Remember, the call is toll-free. Just dial 1-800-222-EYES.

EYE CARE SAVES SIGHT

Nearly a million Americans past age 65 suffer severe loss of vision, according to the American Academy of Ophthalmology. The Academy says people past 65 comprise half of blind Americans although they represent only 12% of the total population.

The most prevalent vision problems are: glaucoma, diabetic eye diseases, macular degeneration and cataracts. The Academy estimates 30% of the people past 65 have cataracts, a condition characterized by a clouding of the lens. Typically, cataracts cannot be seen from outside the eye unless the disease is extremely advanced.

Although there are many cataracts, most are caused by changes in the chemical or protein composition of the lens. Surgery is the only effective treatment for cataracts, the Academy claims. Cataracts cannot be reduced or dissolved by eye drops, ointments, special diets or eye exercises, the Academy says.

Cataract surgery is highly successful, according to the Academy. They claim more than 90% of patients regain useful vision after surgery. Often the improvement in vision is dramatic. The patient feels a miracle has occurred, since sight has been regained. This claim corresponds with my casual observation the past three years.

Once the cloudy, natural lens has been removed, a substitute is required, either in the form of glasses, contact lens or an intraocular lens permanently implanted in the eye.

There are many misconceptions about cataracts. It is time to "de-bunk" these false notions. Cataracts are not related to cancer, are not a new growth of skin over the eye, and do not spread from eye to eye, although they can develop in both eyes at the same time. Further, cataracts are not caused by overuse of the eyes, and using your eyes does not make a cataract worse.

For further information, phone the National Eye Care HELPLINE. Again, the toll-free number is 1-800-222-EYES.●

THE PROPER ROLE FOR THE INTERNATIONAL MONETARY FUND

● Mr. ARMSTRONG, Mr. President, the recent debate about the International Monetary Fund and the world debt situation has done much to raise the consciousness of the Congress about the role of the IMF. Mr. Fred Smith, director of Government affairs for the Council for a Competitive Economy recently wrote an excellent article regarding the proper role for the IMF. The article appeared in the July 26, 1983, issue of the Wall Street Journal. I commend it to my colleagues, and ask that it be printed in the RECORD.

The article follows:

[From the Wall Street Journal, July 26, 1983]

HOW THE IMF COULD BECOME A REAL S&P FOR INTERNATIONAL DEBT

(By Fred L. Smith Jr.) [1]

Should the U.S. donate an added $8.4 billion to the International Monetary Fund? IMF opponents, of course, answer "No." They claim that increased IMF funding only would bail out the big banks. Generally, however, IMF supporters favor the increase. They view the IMF as a vital credit-rating agency, a political Standard & Poor's that also lends. And, certainly, accurate credit-assessment is necessary if private institutions—the developing nations' primary source of funds—are to continue foreign lending.

But the IMF's proponents fail to consider the S&P example fully. Why do we need an imitation S&P? Why not S&P itself, or some other private-sector concern? A close examination of the S&P model suggests that the IMF functions are better handled privately, and that the IMF's lending role be eliminated—not expanded.

To see this, let us briefly review how the IMF functions. A debtor nation calls upon the IMF when it discovers a foreign-exchange shortage. The IMF then sends a "mission" to determine what steps the nation should take to regain economic well-being, and those steps are defined in a "conditionality" agreement. If the debtor nation accepts these conditions, it gets a direct IMF loan and—far more important—access to the world's private credit markets. The IMF then monitors the debtor nation's adherence to these agreed-upon conditions. If problems develop—as they have in recent years with distressing frequency—the IMF threatens to suspend loan payments, the private sector follows suit and negotiations begin again.

The main reason that countries accept such restrictions or conditions is their desire for private-sector loans that are predicated on the IMF's credit approval. The IMF's direct lending role plays at most a minor part, because private sources historically provide almost 80% of the funds made available through IMF operations. Private lenders accept the IMF's ratings largely because they trust its accuracy and honesty.

But this trust is compromised by both the IMF's political nature and its direct lending role. The political problems are obvious. Suppose the U.S. government rated municipal bonds. Democratic administrations would be accused of favoritism by Republican mayors and vice versa. In contrast, while Moody's and S&P receive occasional criticism—no borrower likes his credit rating lowered—their overall reputations remain intact. The reasons for this are clear. Like any private concern, S&P must sell its product—in this case, its credit assessments—to survive. In contrast, the IMF needn't meet any such market test, and thus is free to play politics. Not surprisingly, the IMF has been accused of political bias in its decisions on loans to such nations as South Africa and Nicaragua.

The IMF's lending role creates an equally obvious problem. Suppose S&P had to rate New York City's bonds while it simultaneously held them. S&P would have a strong incentive to avoid any downgrading that would reduce the value of its own holdings. Instead, it would be tempted to "work with" city officials to arrive at a "sound economic program for gradual recovery." Naturally, city officials would take advantage of S&P's conflict of interest to argue against any "severe" readjustments. They would argue for increased city salaries and continued public spending. S&P thus would be exposed to the type of political blackmail that the IMF undergoes.

The private market outperforms the IMF in yet another way. Both Moody's and S&P provide far more credit information than the IMF. S&P, for example, uses a 20-tier rating system (triple-A to single-D) with credit availability and interest rates varying accordingly. On contrast, the IMF uses only two classifications—a nation either is or isn't meeting its agreement. This makes the IMF's enforcement role difficult. Suspending loan payments seems too severe for minor infractions, yet a series of minor infractions becomes significant over time. The results are bizarre. Unwise policies by U.S. mayors—but not Third World leaders—are immediately reflected in bond ratings and thus higher borrowing costs. Cities are given an immediate chance to rethink their policies, while debtor nations don't receive warning until their economies are in crisis.

The private sector tries to avoid conflicts of interest and diffusion of effort. S&P leaves the business of lending to others, which leaves it free to let the rating chips fall where they may. Also, S&P elects not to play the paternalistic role assumed by the IMF and does not dictate any "recovery" plan. S&P doesn't consider itself competent to run a sovereign government, and is well aware that if mayors want management advice, they can hire professional consultants. The IMF would benefit from a similar concentration of function.

And the S&P approach works. Cities are aware of the basis of S&P ratings and determine their policies accordingly. Of course, S&P stands ready to discuss its decisions and may elect to revise them if the city modifies its policies. But S&P doesn't dicker with the city or offer to relax its usual grading terms in hopes of advancing the "bargaining process." Only the city's officials decide whether the policy is worth the higher borrowing costs.

Further, S&P, unlike the IMF, judges results, not merely intent. Thus, S&P avoids the dilemma confronting IMF when it finds that a debtor's economic prospects have been reduced by uncontrollable events or actions not circumscribed by the conditionality agreement. The changed economic prospects suggest further belt-tightening, but as the nation has lived up to its agreement, it wouldn't be "fair" to penalize it. The S&P approach is superior. S&P provides information about the prospects for debt repayment—not moral judgments about the debtor's intent.

Finally, the S&P model has the attraction of being self-financing. The costs of rating and monitoring a bond issue over its lifetime are paid by the concerns or governments issuing the debt.

In brief, the market has much to teach the IMF's supporters. In particular, the market's separation of lending and credit-assessment tasks argues against any expansion of the IMF's lending role. Such an expansion merely would exacerbate an already serious conflict of interest. More generally, S&P and its private-sector competitors demonstrate the superior approach that the IMF should seek to imitate. Congress should avoid any act that moves us further from this ideal.●

[1] Mr. Smith is director of government affairs for the Council for a Competitive Economy, a Washington-based business membership organization.

THE AGRICULTURAL DISASTER

● Mr. PRYOR. Mr. President, I want to take a few minutes today to bring to the attention of the Senate the agricultural disaster in the State of Arkansas. I know many Members of this Chamber know how devastating the drought has been in their States, and I hope the Secretary of Agriculture will aggressively use the powers he has under existing law to alleviate many of the problems our farmers are experiencing as a result of the drought. The resolution recently introduced by many of my colleagues, including Senator HUDDLESTON, the ranking Democratic member of the Senate Agriculture Committee, and by me outlines some of the steps the Secretary should take to deal with this very serious situation. Of course, Mr. President, there are other things that should be considered and I hope we will take a hard look at many of these options in the days and weeks ahead. There is no doubt that much of the Central and Southern regions of the country are experiencing the worst drought in many decades, and conditions are worse than they were in 1980, the most recent year in which many parts of our Nation were suffering from a lack of rainfall.

In the State of Arkansas, Mr. President, crop conditions are dismal. Many soybean fields will not even be harvested, and in many, many others yields will be at least 50 percent below last year. The most recent crop report from the Department of Agriculture

estimated that the average soybean yield in Arkansas for this year will be about 18 bushels per acre, a figure which I believe to be optimistic based on the fields I have seen. The rice crop has been damaged by the hot, dry weather, and the drought has seriously damaged the cotton crop. In addition, there has been considerable damage to pastures, and livestock and poultry producers have had to make many adjustments in an effort to cope with the drought.

Mr. President, this most recent drought comes on the heals of 3 bad years. In 1980 we also had a drought in many areas of the country, and in 1981 and 1982, 2 years when harvests were good, our farmers saw commodity prices drop to low levels. In short, the last 4 years have been awful, and I hope the Secretary of Agriculture would use the many tools we have given him in the farm bill to help many of these hardworking men and women through an extraordinarily difficult period. They deserve our help and assistance and I think if the Secretary would use these tools it would be of great benefit. We must also consider other measures, and I know many members of the Senate Agriculture Committee will want to discuss what can be done. I look forward to working with them, and I commend the Senator from Kentucky for his efforts.

The resolution calls for:

First, Presidential disaster declaration which would make special disaster assistance available and would automatically trigger the Farmers Home Administration emergency disaster loan program;

Second, immediate deployment of special emergency teams in drought-affected States to organize and train the temporary personnel which will man the field offices handling disaster-relief requests;

Third, making disaster payments available to wheat, feed grain, upland cotton, and rice producers—under the discretionary authority provided in the Agriculture and Food Act of 1981—where needed in severely affected areas;

Fourth, under certain conditions with respect to wheat, feed grains, upland cotton and rice, making advance deficiency payments available to producers of 1984 crops;

Fifth, reopening the emergency livestock feed payment program to aid farmers who have lost crops that would have been used to feed livestock;

Sixth, designating counties under the FmHA emergency disaster loan program before harvest time to aid small agriculture-related businesses in their planning for the 1984 crop year and to encourage lenders to extend credit;

Seventh, returning the authority for making FmHA county disaster designations to the State FmHA director to speed up the process by putting the decision in the hands of the authority closest to the people affected;

Eighth, accepting individual applications for Farmers Home Administration natural disaster emergency loans bases on estimated losses;

Ninth, providing loans and loan guarantees through the Small Business Administration and the Farmers Home Administration programs to rural businesses adversely affected by the drought and the payment-in-kind program.●

INTERCOLLEGIATE STUDIES INSTITUTE

● Mr. EAST. Mr. President, for the past 30 years, the Intercollegiate Studies Institute (ISI), headquartered in Bryn Mawr, Pa., has educated a generation of American leaders in the principles of liberty and the foundations of their national and civilizational heritage. I want to congratulate ISI and its president, Mr. E. Victor Milione, for this generation of educational work, and I would like to take this opportunity to say something about the importance of ISI to American conservatism and to America.

Thirty years ago, American conservatives were, in many respects, disorganized and uncertain of their future. A few of them—Frank Chodorov, Frank Meyer, and Richard Weaver, among others—saw these weaknesses and attempted to correct it. Through their work in ISI, they undertook the task of restoring a proper understanding of what America is, where it came from, and where it should go. Never a brainwashing exercise, ISI, through its publications, seminars, and summer schools, has encouraged wide-ranging and often intense debate, interdisciplinary studies, and philosophical inquiry as the means by which conservative ideas would have consequences.

Today, we see these consequences in the administration of Ronald Reagan, in this distinguished body, in the House of Representatives, and in positions of academic and business leadership throughout the country. I do not believe the political and intellectual gains of conservative ideas of the last few years would have been possible or would have come to pass without the important work of ISI. I am proud to have taken part in that achievement, and I salute the officers and staff of the Intercollegiate Studies Institute for working for it. Recently, I sent a letter of congratulations to Vic Milione, and I ask that it be printed in the RECORD.

The letter follows:

U.S. SENATE,
Washington, D.C., September 19, 1983.

Mr. E. VICTOR MILIONE,
President, Intercollegiate Studies Institute, Bryn Mawr, Pa.

DEAR VIC: I want to take this opportunity to offer my congratulations on the occasion of the thirtieth anniversary of the Intercollegiate Studies Institute.

Throughout the past generation, I.S.I. has been the major conservative intellectual and educational organization in the United States. It has taught a generation of students the meaning of the principles of the rule of law, freedom of the person, and the life of reason. Your leadership of I.S.I. in particular has accounted for much of its success, in my opinion.

Today, in the Reagan Administration, the Congress, in universities and businesses, and in every field of leadership, we see the fruits of Richard Weaver's precept that ideas have consequences. Many of these consequences I know are directly attributable to I.S.I.

Congratulations again, and may you and I.S.I. enjoy another thirty years of success.

Sincerely,

JOHN P. EAST,
U.S. Senator.●

YOUTH DRUG ABUSE PREVENTION PROGRAMS IN OUR SCHOOLS

● Mrs. HAWKINS. Mr. President, recent reports have detailed the decline of marihuana use among school-age children. Many people have taken this as a sign of victory in the battle against substance abuse. Unfortunately, I fear this is not true. Now more than ever, students are substituting more powerful, more pernicious drugs is place of marihuana. In the most vulnerable group—junior and senior high students—cocaine use rose almost 30 percent between 1979 and 1982; LSD and PCP are also regaining their former popularity. The widespread nature of drug use is proven by the fact that now more than one in every four teenagers take drugs at least three times a week.

Drugs are readily available in our Nation's schools. Friends and even relatives are often eager to supply unwary children. Bathrooms, playgrounds, and even classrooms are transformed from their original purpose into a veritable bargain basement drugstore. This kind of drugstore does not sell magazines or shampoo; it sells grass, coke, smack, or angel dust. The combination of a plentiful supply of drugs, the power of peer pressure, and the lack of an adequate educational campaign in most school systems have made our schools a haven for drug dealers and their wares. The virtual epidemic of substance abuse among our children can be directly traced to our failure to produce the right environment in school.

However, I do not mean to sound as the voice of doom. A number of educators have launched highly successful programs to eradicate the drug presence in their schools. Instead of rely-

ing on strong arm tactics, they have with patience taught their students the fallacy of drug abuse. With the devotion of education and parents, I am sure more schools will develop such laudable programs.

Mr. President, one such model program is presently achieving remarkable success in the Bronx. I ask that a May 31, 1983 New York Daily News article, entitled "Pot Scrubbers at PS 81," be printed in the RECORD.

The article follows:

[From the New York Daily News, May 31, 1983]

POT SCRUBBERS AT PS 81

(By Alex Michelini)

You could call it the cleanest school in town. Public School 81, at 5550 Riverdale Ave., Bronx, is the only school among 36 surveyed by the state Divison of Substance Abuse Services that continues to turn up positive ratings—that is, there has been no drug peddling observed in and around the school. What's PS 81's secret of success?

"The students are interested in school," said Bernice Schatz, principal of the 350-pupil school, who pointed out that 86% are reading at or above grade level. "They like coming to school. And we run the type of school where children feel very free to talk about the problems they may be having at home."

"Maybe that keeps you off drugs because you don't need something to make you feel high when you've got a problem. I want children to feel that no matter what bothers them, it can be discussed with us. Almost on a daily basis, there are kids who ask to see me for a few minutes. They'll see me walking through the hallways and they'll share something with me. We're always there ready to listen to them whether it's a scrape on the knee or a divorce problem."

Schatz, who has headed the school for 12 years, said the parents also deserve credit, because they're "very tuned into the needs of their children and to their problems." And she pointed to an effective drug prevention program administered by District 10 officials in which representatives go from school to school talking to fifth and sixth-graders about the dangers of drugs.

But while the pupils at PS 81 are hooked on education, all too often it is heroin and pills and marijuana that have the attention of youngsters elsewhere.

Since Sept. 17, 1981, when members of the Police Department's Street Enforcement Program launched Operation 3-Rs, 6,623 persons have been arrested at city schools—424 of whom were students and the rest outsiders. In the last two months alone, arrests were made at or near 275 schools.

The Rev. Terence Attridge, director of the Substance Abuse Ministry for the New York Archdiocese, lives at St. John's Rectory in the Bronx and has seen first-hand the damage wrought on the young by drugs. Some of the children are as young as 8, he said. Alcohol and other drugs, he said, are "equal opportunity destroyers," crossing social and economic lines, affecting parochial as well as public schools.

In partnership with school officials and police in the Bronx, Attridge is leading a community war against drugs as part of DARE (Drug, Alcohol Rehabilitation Education). He has helped train 750 persons as substance abuse ministers. They, in turn, have involved more than 5,000 people in combating drug abuse and its causes. Part of it involves a direct appeal to merchants.

"We've gotten people to go around to stores, telling them not to sell alcohol to minors, not to self wrapping paper (for joints) to minors," Attridge said.

[From the New York Times, July 30, 1983]

NEIGHBORHOODS SET UP GROUPS TO BATTLE CRIME

(By E. R. Shipp)

In Greenwich Village, some residents are up in arms about street prostitution.

Exasperated by what they see as the Criminal Court's lack of response to the situation, they have taken matters into their own hands. They record the license numbers of cars whose occupants patronize the prostitutes, then contact the registered owners and threaten to expose them to friends, families and employers.

In Brooklyn's Bedford-Stuyvesant section, as in Manhattan's Chelsea district and several areas of the South Bronx, people are outraged that illegal numbers establishments are springing up in residential enclaves.

In the Gramercy Park area of Manhattan, in Long Island City, Queens, and in the Hunt's Point section of the Bronx, residents are also complaining about prostitution.

In Manhattan's Washington Heights, elderly residents are fighting to rid their buildings and blocks of drug dealers. In Chelsea, residents are trying to reclaim a neighborhood park from the drug pushers. In Brooklyn, the Bronx and Queens, people are trying to force the "smoke shops"—shops that sell paraphernalia generally used by drug dealers and users—out of business.

To many residents, the criminal justice system, particularly the Criminal Court, is seen as a stumbling block to their efforts.

So throughout New York City, they have formed neighborhood groups to exert pressure on legislators, law enforcement officials and judges to do something about the very crimes that the Criminal Court is unable to do much about: low-level drug use and drug dealing, gambling and prostitution.

The groups have begun petition and letter-writing campaigns aimed at judges, district attorneys, police officials and legislators. They have organized volunteer patrols and block watchers to detect crimes, and they have held meetings to discuss their progress.

Several groups now have plans to set up court-monitoring units that will visit Criminal Court, to determine whether the judges are doing their jobs.

There is some criticism of the Police Department for failing to crack down on the most blatant criminal activities. But Deputy Chief Emil A. Ciccotelli of the Organized Crime Control Division said in an interview what the citizens' groups said they were often told by officials in their precincts: "We don't have the manpower to attack this totally on a citywide basis."

Chief Ciccotelli estimated that there were from 500 to 800 smoke shops in the city and at least 5,000 illegal gambling establishments.

Although the police do not escape unscathed, the brunt of the criticism is reserved for the Criminal Court, which has a branch in each of the city's five boroughs and handles several hundred thousand cases a year. Members of several groups said the police often told them that the crime problem existed in part because of the judges' failure to impose adequate punishment.

THEY HAVE TO BE JAILED

"There is a lot to be desired from the courts," said Thomas L. Granger. He, along with his neighbors in the Riverside-Edgecombe Neighborhood Association, is trying to combat the drug problem in upper Manhattan.

"Something greater than taking a few dollars out of their pockets has to be done," he said. "They have to be jailed and that's not being done."

Mr. Granger said that in the lobby of the West 157th Street building in which he lives, young men can be seen transacting drug deals and smoking marijuana. In the last five years, he said, the problem has grown worse.

Mr. Granger, who is 73 years old, said he had been "fighting this kind of thing" since 1937, when he moved to New York City. At first, he lived in the Bronx, where eventually, he said, "you would see people growing marijuana and shooting up on the streets."

TIRED OF RUNNING

"So I ran to Bed-Stuy," he said. "Then I ran back to the Bronx. And, 26 years ago, I ran here to Manhattan. I've just gotten tired of running, and I'm trying to fight it."

The Riverside-Edgecombe Neighborhood Association, known as RENA, has been writing to elected officials, meeting with representatives of the 34th Precinct and gathering signatures for petitions.

In Laura Cruz's Bronx neighborhood—the Burnside-Morris Heights area—"the problem is drugs," she said.

"According to the police, they say when they close down the storefronts, they close them today and the following day they are back," Mrs. Cruz said. "The police blame it on the court system. I think it's correct, but we also need more police in the area."

Mrs. Cruz is an active member of People for Change, one of several neighborhood anticrime groups organized through the Roman Catholic churches of the Bronx. She and her neighbors have taken a petition bearing 2,000 signatures to the police, demanding more foot patrols, and have been meeting with their precinct officials on a regular basis.

LeRoy F. Smith, a Bedford-Stuyvesant resident, is one of the founders of a group called the Bed-Stuy Coalition of Block Associations. It came into being last April to force an illegal numbers establishment out of business.

"To give you an idea of this particular area," he said, "if Eubie Blake was living, he could look right into that numbers place from his back window."

PIE-IN-THE-SKY DREAM

Numbers businesses, Mr. Smith said, are "a menace."

"They are killing us in our community," he said. "They don't put anything back into the community over all. They take everything out. They are feeding some black people a pie-in-the-sky dream and that may be fine for a while when you've got so much unemployment. But they are not doing the community any good."

A survey last April turned up 240 numbers parlors in the community, he said.

The coalition has held two public meetings and has been lobbying elected officials to do something about this problem, as well as about smoke shops.

One of the most organized groups seems to be the Greenwich Village group called Villagers Against Crime, which is trying to

stamp out transvestite prostitution in a residential section of the West Village.

They have held community meetings with legislators and law enforcement officials in attendance; have written letters to all the Manhattan Criminal Court Judges to register their concern about their neighborhood and their desire to have the judges impose stiff penalties, and have monitored cases and followed up by sending letters and petitions to judges they thought were too lenient.

"The fault in our opinion," said Harry Malakoff, an organizer of Villagers Against Crime, "lies with the judges. They don't realize the impact this has on the quality of life. Both the prostitutes and the johns are from outside the neighborhood. It's outsiders coming in to turn our neighborhood into their bedrooms."

[From the Daily News, July 31, 1983]

DOPE HAS EAST SIDE ON THE ROPES

(By Murray Weiss, Patrick Clark, and Stuart Marques)

Those are voices from "Alphabetland," the heart of the lower East Side—an area bounded by Delancey and 14th Sts. and Avenues A and D, and plagued by a problem.

Always a home to poor immigrants on their way up the ladder and out to suburbia, the lower East Side now is a neighborhood where the major industry is the sale of narcotics.

The crime rate is among the highest in the city. Twenty major drug-pedding operations—each grossing $30,000 to $100,000 a day—have turned its busiest corners into open-air dope markets that supply heroin and cocaine to junkies and Wall Street workers alike.

Dealers and junkies have taken over abandoned buildings and converted them to hollow fortresses faster than the city can seal or raze them. Law-abiding citizens live in constant fear or try to make an uneasy truce with drug merchants and junkies.

Violence is everywhere. Carmen Rivera, 15, was shot to death July 23 as she walked past a holdup near her home on E. Eighth St. Two days later, Jeanette Rivera (no relation), 13, was shot in the hand as she walked past two men who were fighting over drugs.

Heroin addicts sprawl across sidewalks and stoops, and uneducated young men and women earn up to $100 a day steering buyers to dealers selling brand-name drugs such as "Executive," "Menudo" and "Toilet."

Drug arrests have more than doubled since the city began a crackdown in the area last August. But few of the junkies and dealers go to jail for more than 90 days, and dozens wait to take their places.

"It is the No. 1 drug-sale area in the Northeast," says Lt. David Lynott of the Manhattan South narcotics unit. "Hundreds of millions of dollars in cash and narcotics change hands there. It's wide open. They get off the subways in droves beginning at 6 a.m.; from three-piece suits to shorts, girls and guys. They buy drugs on the street and then go to work. This place never shuts down."

Arrests are constant but, some say, almost futile. Police made 6,441 drug arrests in the area from July 1, 1982, to May 31, 1983.

The 40-member Manhattan South narcotics unit made 797 drug arrests in the first six months of 1983, compared with 328 in the same period last year. Precinct street enforcement teams in the area made 1,766 arrests in the first six months of the year, compared with 827 for the first half of 1982.

A city study of 594 drug arrests in the area last August shows that, of the 452 completed cases, only 103 people were given jail terms. Only 27 were jailed for more than 90 days.

"Most crimes here are drug-related." says Capt. Raymond Abruzzi, commanding officer of the E. Fifth St. station. "Narcotics is the No. 1 problem in my command, and from narcotics come most other problems."

The hotbeds of activity are the corners of Eldridge and Rivington Sts., Second St. and Avenue B. and Rivington and Essex Sts. On busy days, dozens of people line up four and five abreast waiting to make a buy.

Dealers operate out of abandoned buildings honeycombed with escape tunnels and getaway routes. Buyers sell their wares—at profits of 1.000% or more—from behind locked steel doors or walls with one or two bricks missing. The money goes through a peephole or missing brick, and the dope comes out the same way.

In an effort to get the dealers out, the city has sealed 121 abandoned buildings and razed 65 others in the area since last August. But police say the dealers just hopscotch from building to building—generally one step ahead of them.

"The profits are incredible, that's why this exists," says Capt. John Healy of the Manhattan South narcotics unit. "They run it like a business—very professional. But look what it does to the neighborhood. It brings noise, attracts undesirables and destroys the quality of life."

"It's like the Wild West here," says Luis Nieves, 35, director of the community-based Lower East Side Coalition. "The police make arrests, but it's mostly street junkies. The numbers look impressive, but they don't get the big guys. But it's not hopeless. If the city would provide more money for homesteading, we could do more."

Graham Hodges has lived on E. Third St. since 1975, and he says things are as bad as ever. "I don't sit outside anymore. The junkies are dying on their feet in front of you. We're being forced to live amidst something terrible. It's evil . . . The dealers are always armed. They could start shooting anytime. The potential for injury or death is always there. It's deeply depressing."

Capt. Healy sits in his office, shuffles some papers and says he thinks the city is making headway in cleaning up the drug operations. But he is a realist. "Sometimes I feel like I'm shoveling sand against the tide."●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in several of the covering letters are available to Sentors in the office of the Foreign Relations Committee, room SD-423.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 12, 1983.
In reply refer to I-01909/83ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover Transmittal No. 83-52, concerning the Department of the Navy's proposed Letter of Offer to Pakistan for major defense articles and services in excess of $14 million. Since most of the essential elements of this proposed sale are to remain classified, we will not notify the news media.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL NO. 83-52

Notice of Proposed Inssuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Pakistan.

(ii) Total estimated value:

Major defense equipment[1]	[Deleted]
Other	[Deleted]
Total	[Deleted]

[1] As definded in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: [Deleted.]

(iv) Military department: Navy (ABD).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid:

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Case not included in Section 28 report.

(viii) Date report delivered to Congress: September 12, 1983.

POLICY JUSTIFICATION

[Deleted.]

[Deleted.]

(U) This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense. Pakistan plays an increasingly greater role as a stabilizing force in the Indian Ocean region. It is strategically important in the defense of sea lines of communication in the Arabian Sea and approaches to the Persian Gulf.

[Deleted.]

[Deleted.]

(U) Implementation of this sale will require the assignment of contractor representatives to Pakistan beginning in March 1986 approximately as follows: nine persons for six months and two persons for one year.

(U) There will be no impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 12, 1983.
In reply refer to I-02861/83ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-53 and under separate cover the classified annex thereof. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $145 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

WALTER B. LIGON
Acting Director.

TRANSMITTAL NO. 83-53

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Egypt.
(ii) Total estimated value:

	Millions
Major defense equipment [1]	$112
Other	33
Total	145

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Ninety-four M60A3 tanks with tank thermal sights, machine guns, smoke grenade launchers, concurrent spare parts, related communications equipment, special tools, test equipment, major assemblies supporting these vehicles, and ancillary support items.

(iv) Military department: Army (UEV).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: September 12, 1983.

POLICY JUSTIFICATION

EGYPT—TANKS

The Government of Egypt has requested the purchase of 94 M60A3 tanks with tank thermal sights, machine guns, smoke grenade launchers, concurrent spare parts, related communications equipment, special tools, test equipment, major assemblies supporting these vehicles, and ancillary support items at an estimated cost of $145 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the U.S. to support Egypt which is an important force for modernization in the region.

The Government of Egypt will use these tanks to equip an additional armored brigade. This continues the ongoing program of replacing aging Soviet equipment with modern U.S. equipment.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Warren, Michigan.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 13, 1983.
In reply refer to I-02522/83ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-55, concerning the Department of the Air Force's proposed Letter of Offer to Korea for defense articles and services estimated to cost $71 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL NO. 83-55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Korea.
(ii) Total Estiamted Value:

	Millions
Major defense equipment [1]	$0
Other	71
Total	71

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Cooperative logistics supply support arrangement, requisition case (FMSO II), for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin.

(iv) Military department: Air Force (KBR).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 30 June 1983.

(viii) Date report delivered to congress: September 13, 1983.

POLICY JUSTIFICATION

KOREA—AIRCRAFT SPARE PARTS

The Government of Korea has requested the purchase of a cooperative logistics supply support arrangement, requisition case (FMSO II), for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin at an estimated cost of $71 million.

This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in Eastern Asia. This sale will help to ensure that aircraft previously obtained by Korea from the U.S. are maintained in a mission-ready status to the maximum extent practicable.

This cooperative logistics supply support arrangement is necessary to ensure an uninterrupted flow of spare parts to support the C-123K, F-4D/E, F-5A/B/E/F, T-33, and A/T-37 aircraft, and other systems and subsystems of U.S. origin. The Korean Air Force will have no difficulty in absorbing the articles.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from the many contractors providing similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Korea.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 13, 1983.
In reply refer to I-02705/83ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHARIMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-56 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $40 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL NO. 83-56

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Egypt
(ii) Total estimated value:

	Millions
Major defense equipment [1]	$25
Other	15
Total	40

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: A quantity of 16 RGM-84D Harpoon missiles, two Harpoon missiles with training warheads, test and maintenance equipment, spare parts, and weapon station design and construction.

(iv) Military department: Navy (AAG).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending 30 June 1983.

(viii) Date report delivered to Congress: September 13, 1983.

POLICY JUSTIFICATION

EGYPT—HARPOON MISSILES

The Government of Egypt has requested the purchase of a quantity of 16 RGM-84D Harpoon missiles, two Harpoon missiles with training warheads, test and maintenance equipment, spare parts, and weapon station design and construction at an estimated cost of $40 million.

This proposed sale will contribute significantly to U.S. foreign policy and national security and objectives by helping to increase the security of a friendly country of vital interest to the United States.

The Government of Egypt intends to equip two "Descubierta" class corvettes being provided by Spain with the Harpoon missiles, which will be a significant factor in the defensive capabilities of these corvettes. Based upon its ability to assimilate the advanced technology of other weapons systems currently being delivered, Egypt should be able to absorb this weapons system.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be McDonnell Douglas Astronautics of St. Louis, Missouri.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 14, 1983.

In reply refer to; I-02960/83ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-58, concerning the Department of the Army's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $33 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL NO. 83-58

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Saudi Arabia.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$25
Other	8
Total	33

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Forty-two 155mm M198 towed howitzers with required support equipment and spare parts.

(iv) Military department: Army (VFM).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 30 June 1983.

(viii) Date report delivered to Congress: September 14, 1983.

POLICY JUSTIFICATION

SAUDI ARABIA—M198 HOWITZER

The Government of Saudi Arabia has requested the purchase of 42 M198 155mm towed howitzers with support equipment and spare parts at an estimated cost of $33 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of the Saudi Armed Forces.

The purchase of the M198 howitzer by the Saudi Arabian Land Forces (SALF) will permit improvement of current ground force artillery support by replacing aging M114 155mm towed howitzers with a modern artillery piece with an extended range. This improvement is required as part of the ongoing military modernization plan to build a ground force capable of deterring external attacks. Acquisition of this equipment by the SALF will not introduce a new military capability into the region.

The sale of this equipment and support will not affect the basic military balance in the region.

The principal work will be done at the Rock Island Arsenal in Rock Island, Illinois.

Implementation of this sale will require the assignment of approximately 10 additional U.S. military personnel to Saudi Arabia for 18 months.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 14, 1983.

In reply refer to I-03098/83ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-51 under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Spain for defense article and services estimated to cost $64 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

WALTER B. LIGON,
Acting Director.

TRANSMITTAL NO. 83-51

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Spain.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$11
Other	53
Total	64

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Four P-3A aircraft with modifications and rework; the modification and rework of two Spanish Air Force P-3A aircraft; and complete logistics support to include spares, repair parts, support equipment, training, and contractor engineering technical services.

(iv) Military department: Navy (SCF).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: Case not included in Section 28 report.

(viii) Date report delivered to Congress: September 14, 1983.

POLICY JUSTIFICATION

SPAIN—P-3A AIRCRAFT, MODIFICATIONS, REWORK, AND SUPPORT

The Government of Spain has requested the purchase of four P-3A aircraft with modifications and rework; the modification and rework of two Spanish Air Force P-3A aircraft; and complete logistics support to include spares, repair parts, support equipment, training, and contractor engineering technical services at an estimated cost of $64 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Spain; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

The Spanish Air Force has been operating outdated P-3A aircraft in a maritime patrol capacity since the mid-1970's. While they would like to replace them with new production aircraft, budget constraints dictate that they replace those that they now lease from the U.S. (four aircraft) with aircraft that are of the same approximate age as those they own (two aircraft). Using this approach and modifying all six aircraft with identical capabilities will enable the Spanish Air Force to keep pace with U.S. forces in equipment commonality and continue to carry out its mission of surface/subsurface surveillance in the IBERLANT/Mediterranean area.

The sale of this equipment and support will not affect the basic military balance in the region.

There will be no prime contractors associated with this sale. All of the rework and installation of modifications are planned to be accomplished at the Naval Air Rework Facility, Alameda, California.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel to Spain; however, three U.S. contractor representatives will be required in Spain for one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

50TH ANNIVERSARY OF THE ORDINATION OF BISHOP JOHN J. DOUGHERTY

● Mr. LAUTENBERG. Mr. President, on Saturday, September 24, 1983, friends and admirers of Bishop John J. Dougherty will be joining him to celebrate the 50th anniversary of his ordination. A concelebrated Mass followed by a reception and dinner will be among the highlights of the day.

Bishop Dougherty is a popular and beloved figure in the church and education and broadcasting circles. He is a true son of New Jersey, who was born in Jersey City and has made a distinguished career almost exclusively in his home State. He was a college student at Seton Hall, later returning to teach and become president of the university. He has also taught at Immaculate Conception Seminary in Darlington, N.J. During his career he has

studied in Rome, earned a law degree from Rutgers University, and been involved in both radio and television broadcasting. After his service as president of Seton Hall, he served for a number of years as pastor of St. Rosa of Lima Church in Short Hills. In 1963, 30 years after he was ordained as a priest, Father Dougherty became a bishop.

Currently Bishop Dougherty is a scholar in residence at Seton Hall where is is continuing his longtime interest in Bibical studies.

The celebration of Bishop Dougherty's ordination anniversary is indeed a happy occasion. He has served his church and his State with honor and distinction. I am pleased to join with his many friends in recognizing the bishop's service. May there be many more such celebrations in the years to come.●

MARKETING ORDERS FOR FRUIT AND TREE NUTS

● Mr. TOWER. Mr. President, I want to take this opportunity to attempt to correct for my colleagues some of the misconceptions that have surrounded the recent discussion of changes in marketing orders for fruit and tree nuts. I also want to reemphasize my support for the marketing order concept and underline the crucial role that marketing orders play in stabilizing farm income while insuring a steady supply of quality food products for consumers. These two goals are accomplished with minimal cost to the U.S. Treasury along with guarantees that we have a strong domestic citrus and nut industry.

Federal marketing orders direct the quality and distribution of over half of the fruit and tree nuts and about 15 percent of all the vegetables produced in the U.S. marketing orders impose important quality standards on fruits and nuts, and insure an even flow of good quality products to the marketplace. In addition, product image and consumer demand are greatly enhanced. Ultimately, consumers benefit from increased quality, as foreign producers are forced to adhere to the same standards as domestic producers.

Like other farm programs, marketing orders are designed to bring stability to sectors of our farm industry which are inherently unstable. Although I strongly support our return to market systems which work efficiently with as little Government intervention as possible, several factors make it necessary for Government involvement in many aspects of our agricultural industry, so that we can continue to have a strong domestic supply of food. Agriculture production is highly dependent on the unpredictable forces of nature. Demand for farm products is flexible, thus slight changes in supply cause large price fluctuations. Marketing orders, like most other farm programs, provide some protection against these uncontrollable events which could prevent farmers from receiving a fair investment at harvest time.

However, unlike other farm programs whose costs have escalated up to over $20 billion in recent years, the marketing order system is effective while also providing a bargain to the American taxpayer. The citrus industry self-imposes marketing orders; that is, marketing orders are proposed within the industry, determined within the industry, administered within the industry, and terminated within the industry. Barely 9 percent of the cost of the marketing order system is paid by the taxpayer, and this fraction is a proper regulatory expense of the U.S. Department of Agriculture. The other 90-plus percent of the cost is borne by the industry.

No fruits and vegetables covered by marketing agreements are being subsidized by the Federal Government. Even though the citrus industry has been facing some severe times, I have heard nothing from the industry to request the type of subsidies that many other agriculture producers in the United States are receiving. Marketing agreements and orders are intended to be self-help programs that allow our domestic food producers to survive the unstable circumstances they face in the industry. This is being accomplished in all parts of the country, and it only costs the U.S. Department of Agriculture $2.6 million of their overall $20-plus billion budget. Considering the current problems facing many of the citrus and nut producers, I do not agree with the current proposals to recover these minimal costs to the U.S. Department of Agriculture through the imposition of user fees. In my view, this is no way to say thanks to a group of farmers who have stayed off the rolls of government subsidized farm programs for so long and have worked so well under a system that has proven itself to be effective at a low cost to the U.S. Treasury.

Mr. President, whereas the benefit of the marketing order system to the taxpayer is a bargain, the cost to the taxpayer of an agricultural industry without marketing orders would, in my view, be great. An agricultural market for these crops historically covered by marketing orders without the continuation of their marketing orders is an agricultural market out of control. An agricultural market out of control would utltimately require the attention of Congress. Surely, any legislation required to stabilize the fruit and nut industry, in the absence of marketing orders, would be costly.

Let me add, Mr. President, that I am well aware of the recent study of the current marketing order system by the Vice President's Regulatory Review Task Force. As a result of this study, a new set of guidelines was issued which would phase-out several quantity controls now in effect for a number of marketing orders. I believe the review established guidelines eliminating some wasteful standards while preserving the general concept. Although I invite the continued study of quantity controls in an effort to expose severe and wasteful policies I will continue to emphasize my strong support for the marketing order program and will oppose any efforts to undermine its strength.

In conclusion, Mr. President, I support the use of marketing orders for the fruit and nut industry. Furthermore, I urge my colleagues to be mindful of the crucial role that these orders play in assuring both a stable income for farmers and a quality product for consumers.●

SMALL BUSINESS COMPETITION IN CONTRACTING ACT OF 1983

● Mr. D'AMATO. Mr. President, I rise today in support of S. 1730, the Small Business Competition in Contracting Act of 1983. This legislation, which I have cosponsored, was introduced by my distinguished colleague from Illinois, Senator DIXON.

S. 1730 would open up the procurement process of the Department of Defense to small businesses and eliminate the continued waste of taxpayer dollars. As a member of the Small Business Committee, I applaud such worthy goals. Today, small firms have the virtually impossible task of trying to enter the Federal Government's procurement process. Throughout both the defense and nondefense procurement processes, however, emphasis is placed on the ability of individual businesses to market their products. This practice affords large companies an unfair advantage over small businesses. In the end, taxpayer dollars are needlessly wasted and the backbone of the Nation's economy, small business, suffers.

In response to this problem in the nondefense sector, I introduced S. 1794, legislation that would reform the General Services Administration's multiple award schedule program. The multiple award schedule is a roughly $3 billion program that has been criticized by the General Accounting Office for gross inefficiency. Products are listed on the schedule for Federal agencies to select from at prices above retail. S. 1794 would remedy this inefficiency by mandating local purchasing by Federal agencies whenever both the price and quality of a product is the same or better than the comparable product listed on the multiple award schedule. Through local purchasing, small business participation

will increase and taxpayer dollars will be saved.

The Small Business Competition in Contracting Act of 1983 will achieve the same results in the Department of Defense's procurement process. Numerous studies have shown that 50-percent savings and greatly reduced delivery times could be achieved through increased use of competitive bidding. At this time, only 10 percent of all defense contracts are negotiated on a competitive basis. The balance of the contracts are negotiated on a sole source basis. This is both wasteful and bad for small business.

S. 1730 will make the following changes in defense procurement procedures:

First. Require DOD to obtain and make available design data on all major weapons systems. DOD does not currently have available this data, which prohibits the creation of competitive bidding packages.

Second. Require all Federal agencies to publicly post and make available for inspection all bid documents relating to agency solicitations.

Third. Providing small businesses with a greater opportunity to participate in major weapons systems, component systems, and spare parts procurements.

Fourth. Close loopholes created by procuring agencies to avoid the certificate of competency process for small business; and

Fifth. Require a report by the Comptroller General to Congress 3 years after this legislation has been enacted. The report will review the compliance with the act.

I urge my colleagues to join me in support of S. 1730.●

CLINCH RIVER—TIME TO SUBMIT SEPARATE LEGISLATION

● Mr. HUMPHREY. Mr. President, as I noted before in a RECORD entry of September 14, if the promoters of alternative financing for the Clinch River breeder reactor project truly believe their plan to be sound, they should submit it in the form of separate legislation before it is considered on the Senate floor. By using such normal procedures, the backers of such financing would assure that their plan would be reviewed by all the appropriate authorizing and appropriating committees in the House and Senate.

They also would eliminate the stigma that would naturally be associated with any effort to end-run normal procedure by trying to attach complex and controversial legislation on a continuing appropriations resolution at the last minute. Finally, by submitting separate legislation, the backers of the plan would avoid breaking the Senate rules' own stricture against legislating on an appropriations bill.

In fact, by the Department of Energy's (DOE's) own admission, alternative financing legislation for Clinch River is not simply an appropriation, but gives the Secretary of Energy new authority to contract, first, to share ownership in the plant or the revenues it produced; second, to repay participants if the plant is terminated; third, to insure revenues from the plant; fourth, to indemnify participants against changes in Federal laws affecting their participation; fifth, to indemnify participants and the operator against uninsured liabilities; and sixth, to purchase and sell power from or for the project. Finally, the plan would give DOE new multiyear spending authority for the project—currently the project is not authorized for fiscal year 1984—totaling $1.5 billion.

Since the Senate Energy and Natural Resources Committee has agreed to hold hearings September 22 on the plan, it makes sense to submit separate legislation on it. Until now, DOE has refused to submit such legislation and has said that it will not. This is odd since DOE has been working day and night preparing such legislation and has had some version of it for the last 2 months or more. In fact, recently, the House Energy and Commerce Oversight Subcommittee obtained copies of DOE's work. Apparently, DOE has been attempting to do the Senate Energy and Natural Resources Committee's work since DOE not only has a complete draft bill dated September 12, 1983, but a suggested committee report draft dated September 12, 1983, and a complete clause-by-clause analysis of the bill as well.

Mr. President, given that the Congress asked DOE to perfect a substantive cost-sharing plan for the Clinch River project nearly a year ago and DOE submitted its suggestions in March, it is simply inexcusable that the backers of the plan have refused to submit separate legislation and instead have been holding out to attach this legislation at the last-minute on the continuing appropriations resolution where full and measured consideration of the plan will be most difficult.

I ask that the full text of DOE's draft legislation, draft committee report, and clause-by-clause analysis be printed in the RECORD along with a copy of the formal request I have made of the Energy and Natural Resources Committee to submit DOE's draft legislation as a separate bill before hearings are held this Thursday.

The information follows:

WASHINGTON, D.C.,
September 20, 1983.

JAMES A. MCCLURE,
Chairman, Senate Energy and Natural Resources Committee, U.S. Senate, Washington, D.C.

DEAR JIM, I want to thank you for scheduling Senate hearings on the off-budget Clinch River financing plan for next Thursday. As Senator Bumpers and I have noted several times before, it is essential that separate legislation for this plan be submitted and referred to the various authorizing and appropriating committees so that no question of the Senate's willingness to cooperate with the House is raised in this matter.

I believe that proceeding with separate legislation also is the most prudent course and especially so since the Department of Energy has already made available an alternative financing bill, a clause-by-clause analysis, and draft committee report (see attachments). Certainly, if the supporters of alternative financing for the project believe this plan is sound, they have nothing to fear from submitting it to Congress in the form of separate legislation. As Senators Bumpers, Hart, Boschwitz and I have stated before, we would welcome such legislation's expeditious consideration.

Since a draft of this legislation is now available and the Energy and Natural Resources Committee has scheduled hearings for this Thursday, I would hope this bill would be submitted as a matter of course. Indeed, with such draft legislation now available, it would be a mistake to burden the continuing appropriations resolution by attempting to amend it with Clinch River legislation. Such an attempt, I fear, would not only violate existing rules against legislating on an appropriations bill, but force a lengthy and tedious debate on the floor.

With warmest regards, I am

Sincerely,

GORDON J. HUMPHREY,
U.S. Senator.

[DOE Draft Bill, September 12, 1983]

CLINCH RIVER BREEDER REACTOR

For construction and operation of the Clinch River Breeder Reactor project, $1,500,000,000, to be available until expended but contingent upon commitments, satisfactory to the Secretary of Energy, for utility and private sector financial participation for a minimum of 40 per centum of the Department of Energy estimate of remaining capital costs as reported to Congress on March 15, 1983.

In addition to the amounts herein appropriated and in consideration for such financial participation, the Secretary is authorized to contract incontestably to (1) provide to participants ownership interests in the project, products, services and/or revenues from the project, (2) repay funds invested by the participants subsequent to the passage of this Act, plus interest, if the project is terminated, not completed or not licensed for operation, (3) insure revenues from the project, (4) indemnify participation against changes in Federal tax laws, regulations and rulings affecting the tax consequences of their financial participation in the project, (5) indemnify participants and the operator against uninsured liabilities with respect to the project, and (6) purchase and sell power, products and services from or for the project.

Such contracts may be assigned and shall be enforceable against the United States in accordance with their terms except in the

case of fraud by the assignee. Participation in the project shall not subject a participant to regulation under the Public Utility Holding Company Act of 1935. All monies received by the Secretary under this heading may be retained and obligated for the purposes of the project without further appropriation and shall remain available until expended.

Of the $1,500,000,000 appropriated by this heading, up to $270,000,000 may be obligated during fiscal year 1984, of which $135,000,000 may be obligated not withstanding any other provision of this heading; and up to the following amounts may be obligated during the following fiscal years: $285,000,000 during 1985; $290,000,000 during 1986; $290,000,000 during 1987; $185,000,000 during 1988; $75,000,000 during 1989; $105,000,000 during 1990 and beyond. Notwithstanding any other provision of this Act, the authority provided in this heading shall be available until fully utilized.

[DOE Draft Committee Report, September 12, 1983]

COMMITTEE REPORT ON CLINCH RIVER BREEDER REACTOR APPROPRIATION

This Act appropriates $1.5 billion (60 percent) of the March 15, 1983 DOE estimated costs to complete the CRBR Project, $135 million of which is unconditionally available in fiscal year 1984 and the balance of which is available only if utility and private sector commitments are obtained to finance the remaining $1 billion (40 percent) of such costs and if such commitments are satisfactory to the Secretary. Private sector financing could be a combination of debt and equity or, if equity can only be obtained at costs or on terms which the Secretary determined are unreasonable, all debt. Such commitments would include 750 electric utilities (including TVA) and project contractors, in addition to the $150 million which they will have contributed by the end of the fiscal year 1983, as well as underwriting agreements with investment bankers for the purchase and sale of securities, contracts for borrowings from institutional investors and/or banks, and/or contracts for equity funds from corporations which would obtain customary tax benefits from the investment of such funds which they could otherwise obtain from the investment of such funds in other projects.

All private sector commitments are expected to include conventional conditions to the private sector financing as well as the condition that certain Federal contracts be in full force and effect. Such commitments would be satisfactory to the Secretary if he has a reasonable basis to believe that such commitments will be met and that such financing would be provided by such commitments, after considering such matters as he deems relevant, which may, but need not necessarily include, (i) the financial condition of the proposed private investors who made such commitments; (ii) the terms of any conditions to such financing and whether it appears to him that such (terms are reasonable) conditions have a reasonable possibility of being satisfied; and (iii) the qualifications and experience of any underwriters which will obtain such financing.

The federal government has been and will continue to be the principal designer and construction manager of the Project which will be operated by TVA. Under the contemplated arrangements, private sector investors will have no control of the Project during any portion of its useful life. This Act authorizes the Secretary to contract on a long-term basis to provide assurances to such investors that (a) the Project will be completed, (b) its revenues will be adequate to pay its expenses, including debts service, (c) expected tax benefits (will be maintained despite) due to any changes in the tax laws, regulations of IRS interpretations although their individual tax situation may not permit them to realize such benefits, and (d) private participants and the operator will not be liable for uninsured risks with respect to the Project this Act also authorizes contracting for shared ownership of the Project by the government and private investors and for the sale of power.

The Federal contracts which private sector investors will require are the types of contracts specifically excepted from the Anti-Deficiency Act. The investors may decide not to commit to make investments in the Project unless such contracts are incontestable, provide the kinds of assurances which are essential to obtaining utility and private sector financing as described in the June 29, 1983 Breeder Reactor Corporation (BRC) Task Force Report to the Secretary presenting the BRC plan for private financing for the project in response to the December, 1983 Congressional directive to the DOE ". . . to . . . explore proposals . . . that would reduce Federal budget requirements for the CRBR Project . . . and secure greater participation from the private sector."

The BRC plan would (1) make no change in existing Project objectives or management arrangements including decision making authority and responsibility for safety, (2) make no change in current licensing procedures or requirements, (3) does not require any further review of financial qualification and (4) makes no changes in the environmental aspects of the Project. Current Project contracts will be honored under the BRC plan, although it is expected that the TVA will no longer be the sole purchaser of electricity generated by the plant and will not exercise its option to purchase the entire plant after completion of the demonstration period. This Act, therefore, authorizes a modification to the existing Project arrangement which would otherwise require that power produced by the plant be acquired by TVA.

CRBR APPROPRIATIONS LEGISLATION—CLAUSE BY CLAUSE ANALYSIS

For construction and operation of the Clinch River Breeder Reactor project, $1,500,000,000, to be available until expended but contingent upon commitments, satisfactory to the Secretary of Energy, for utility and private sector financial participation for a minimum of 40 per centum of the Department of Energy estimate of remaining capital costs as reported to Congress on March 15, 1983.

The appropriated $1.5 billion represents 60 percent of the March 15, 1983 DOE estimate of remaining construction costs. This appropriation may be used for the continued design and construction of Clinch River Breeder Reactor, but if such costs are less than $1.5 billion, the remainder of this appropriation could be used for operating, maintenance, upgrading and other Project costs during the useful life of the reactor. The penultimate sentence (discussed below) of the Appropriation provides that $135 million of such appropriation will be available during fiscal year 1984 while the commitments for private sector financing are being obtained. Further appropriations, the remaining $135 million for fiscal year 1984 and the sums appropriated for following years will be available only if utility and private sector commitments are obtained for at least the remaining 40 percent (approximately $1 billion), excluding interest, paid by the private sector investors during construction, of the March 15, 1983 DOE estimated remaining construction costs, and if such commitments are satisfactory to the Secretary.

Private sector financing could be a combination of debt and equity or, if equity can only be obtained at a cost or on terms which the Secretary determines are unreasonable all debt.

Private sector financial commitments could take the form of (a) conventional underwriting agreements executed and delivered by investment banking firms, which would obligate such underwriters to purchase for resale to private investors specified securities, the proceeds of which would be invested in the Project; (b) contracts with banks or institutional investors, such as insurance companies, to loan funds to the Project, and (c) contracts with corporations or other persons to directly or indirectly invest equity funds in the Project in order to obtain certain tax benefits derived from an ownership interest in the Project assets, which corporations or other persons may include suppliers to, or contractors for, the Project. Each such underwriting agreement and contract would have certain conditions that must be satisfied before funds are actually provided by the private sector investors thereunder; such conditions would include (but not be limited to) the requirements that certain Federal contracts (described below) be in full force and effect, and that private sector investors receive satisfactory opinions from counsel to the Department of Energy, and, perhaps, other governmental agencies concerning the enforceability of such Federal contracts, the legal status of the CRBR Project, and other related matters.

Also, over 750 electric utilities (including the Tennessee Valley Authority) and project contractors will have contributed more than $150 million for research and development by the end of fiscal year 1983. Furthermore, if the Project goes forward, the utilities and the contractors will contribute an additional $175 million (including interest) to the Project for research and development.

The Secretary will similarly require that appropriate conditions be satisfied before Federal money (other than the initial $135 million in fiscal year 1984) is actually obligated under this Appropriation. Such conditions would include (but not be limited to) the requirement that the private sector financial commitments which are then in effect be satisfactory to the Secretary. It is expected that the Secretary will be satisfied with the utility and private sector financial commitments if he has a reasonable basis for believing, that such commitments will be met and that such funds would be provided to the Project, after considering such matters as he deems relevant, which may, but need not necessarily include, (i) the financial condition of the proposed private investors who made such commitments; (ii) the terms of and conditions to such financing and whether it appears to him that such terms are reasonable and such conditions have a reasonable possibility of being satisfied; and (iii) the qualifications and experience of any underwriters which will obtain such financing.

In addition to the amounts herein appropriated and in consideration for such finan-

cial participation, the Secretary is authorized to contract incontestably to (1) provide to participants ownership interests in the project, products, services and/or revenues from the Project, (2) repay funds invested by the participants subsequent to the passage of this Act, plus interest, if the project is terminated, not completed or not licensed for operation, (3) insure revenues from the Project, (4) indemnify participants against changes Federal regulations and rules affecting their financial participation in the project, (5) indemnify participants and the operator against uninsured liabilities with respect to the project and (6) purchase and sell power, products and services from or for the Project.

The second sentence of the bill provides long term contract authority, in addition to the $1.5 billion of appropriated funds, under which the Secretary is authorized to enter into contracts in advance of funding. Contracts entered into by the Secretary pursuant to this authority would be the types of contracts specifically excepted from the Anti-Deficiency Act, and such authority enables the Secretary of Energy to contract to provide the Federal government assurances which are essential to attract debt and equity investors to the Project, as follows:

"In addition to the amounts appropriated and in consideration of such financial participation,"

Private sector debt and equity investors will participate in the project by investing capital in the CRBR Project, either directly or through corporations, partnerships or other organizations commonly used for financial investments. Any person or organization investing in the Project or facilitating such investments may be considered by the Secretary to be a "participant" in the Project. The Secretary may under this authority contract with private investors for the required CRBR funding which would assure that the Secretary could continue the construction and operation of the CRBR under the present project arrangements. Such long term contracts in consideration for such funding, may provide a number of assurances specified below.

"the Secretary is authorized to contract incontestably to"

Private sector investors have available a vast array of possible investments, some of which are supported by financial commitments of the Federal government; almost all of which Federal financial commitments have been entered into pursuant to legislation which provides that the government's commitments thereunder are "incontestable." [1] Thus, in order to make investments in the CRBR Project at least as attractive to private sector investors as investments in other federally-supported investments, and to induce such investors to make investments in the CRBR Project, it is necessary that CRBR financing contracts similarly be "incontestable." The Appropriation authorizes, but does not require the Secretary of Energy to make such contracts incontestable. Such contracts may be of a duration coextensive with the financing period. It is expected that the incontestability of such contracts would be subject to the conditions of such contracts and would not be incontestable with respect to fraud or misrepresentation on the part of the holder of such contract.

[1] See, for example, 42 U.S.C. § 5919(f) [Alternate fuel demonstration facilities]; 45 U.S.C. § 664(b) [Emergency rail services]; 46 U.S.C. § 1273(e) [Federal ship financing].

(1) provide to participants ownership interests in the project, products, services and/or revenues from the project,

Private sector investors will not invest in the CRBR Project unless they derive benefits from such investments.

Tax benefits associated with investments in any project are only available to investors which have a direct or indirect ownership interest in its assets; thus, it is necessary to authorize the Secretary to grant to private sector equity investors ownership in the CRBR Project so that such tax benefits will be available to them as a result of such investment.

Equity investors also conventionally participate in the profits or losses, if any, of a project in which they have an ownership interest, and parties which loan funds to a project frequently require that the repayment of the principal of and interest on such funds be secured by a pledge of revenues from the project or some other form of credit; thus, it is necessary to authorize the Secretary to provide to private sector equity investors and/or parties loaning funds for the Project, on a long term basis, property interests in the CRBR Project, products, services and/or revenues so that they may be induced to make such investments and loans. It is contemplated that the term of such contracts may be coextensive with the term of any capital borrowed from the private investors.

The extent, term and nature of ownership interests in the CRBR Project and its revenues provided by the Secretary of Energy would be established by negotiations between the Secretary and private sector investors providing the financial commitments which must be satisfactory to the Secretary.

(2) repay funds invested by the participants subsequent to the passage of this Act, plus interest, if the project is terminated, not completed or not licensed for operation.

This clause authorizes the Secretary to provide the first of the specific assurances which will be required by private sector investors in this Federally managed and controlled research and development project as described in the BRC task force report submitted to the Secretary of Energy on June 29, 1983 as follows:

"1. Assurances as to completion, licensability and operability Governmental contracts to provide sufficient funds to repay all construction loans, private equity and other investments in the Project if it is not completed satisfactorily, fully licensed and placed in commercial operation in a timely fashion, in which case the investors would be entitled to recover their capital plus interest or a return thereon."

Such contracts will define the conditions which constitute completion, licensing, operation, and termination of the CRBR Project for purposes of the private investments in the CRBR Project and any capital costs. In general, "completion" of the CRBR Project may contemplate that it be fully licensed and operating at a level of electric generation over a period of time sufficient to demonstrate its operating reliability, and capability of producing sufficient revenues to enable it to pay its operating and maintenance costs and to provide negotiated returns of and on private debt investments made in the CRBR Project. Research and development contributions made by utilities (including TVA) pursuant to their existing contracts would not be recovered by them under any circumstances.

(3) insure revenues from the project.

This clause authorizes the Secretary to provide the second of the specific assurances which will be required by private sector investors as described in the June 29, 1983, BRC task force report as follows:

"2. Assurances that all debt service obligations of the Project as well as its obligations to equity investors will be met under any and all circumstances Governmental contracts to provide sufficient funds to cover all obligations to private investors plus all construction and operating costs, taxes and other claims, with respect to the CRBR Project, and to receive a portion of the proceeds from the sale of the power and any other revenues from the CRBR Project up to the amount of such funds, whether or not there are any such other revenues or power."

Long term contracting authority which will insure the availability of an agreed upon level of revenues from the sale of power, steam or other products or services from the Project after its completion is necessary so that the Project will be able to pay its costs, including its private sector capital costs. The amount to be provided by the federal government will be offset to the extent of revenues actually derived from operation of the Project. The CRBR Project will be operated, managed and totally controlled by the Federal government, and private sector investors will not assume operating and management risks over which they have no control.

(4) indemnify participants against changes in Federal laws, regulations, and rulings affecting their financial participation in the project.

This clause enables the Secretary to provide the third of the specific assurances which will be required by private sector investors as described in the June 29, 1983, BRC task force report as follows:

"3. Assurances that all tax credits, deductions and other tax incentives, related to the privately-financed portion of the Project, will be available to the private investors as planned Governmental contracts to provide sufficient funds to make appropriate repayments to private equity investors if tax incentives are not made available as planned.

Private sector equity investors would commit funds to the Project based upon an assumed after-tax rate of return on their investments, an important element of which is the realization by such investors of Federal income tax benefits associated with their ownership interest in the Project.

Such contracts will require the Federal government to pay to private sector equity investors funds in such amounts which, after any Federal, state and local taxes on such payments, will provide such investors with the originally contemplated rate of return on their investments if such benefits, which include investment tax credits, depreciation expenses, and related matters are not available to such investors.

Each investor will bear the risk that its particular tax situation may limit or prevent it from actually using such tax benefits.

(5) indemnify participants and the operator against uninsured liabilities with respect to the project.

This clause, and the one immediately following, authorize the Secretary, in addition to maintaining indemnifications outstanding under existing Project arrangements, to provide the last of the specific assurances required by private sector investors, as de-

scribed in the June 29, 1983 BRC task force report as follows:

"4. Assurance against liabilities for replacement power costs and all uninsurable tort liabilities, resulting from the CRBR Project Governmental contracts to provide such assurances."

Such contracts would insure the operator (TVA), private sector investors and contributors against risks for which insurance cannot reasonably be obtained from commercial sources. Such assurances are necessary for private sector investors and contributors because they may be co-owners of the Project but will have no control over the operation or management of the CRBR Project, or the conditions under which such liabilities could arise.

The CRBR Project will be operated by the Tennessee Valley Authority under a full cost-reimbursement contract with DOE; but the TVA will not own the Project, or the electricity produced therefrom, nor will the TVA obtain any economic benefits from the CRBR Project. Therefore, as operator, the TVA must be fully indemnified against uninsurable risks which otherwise could adversely affect its customers, just as would be the case if the TVA were to contract to operate any facility for another organization.

and (6) to purchase and sell power, products and services from or for the project.

This clause, as noted above, makes it clear that the Secretary is authorized to enter into long term purchase contracts and/or sales contracts as another means of providing financial assurances to the private sector investors. For example, the Secretary may, under this authority, decide it to be in the best interest of the government to acquire the CRBR output for use by the DOE facilities in the geographical area of the Project.

Such contracts also will require the Federal government to pay for any power or steam purchased to enable the Project to deliver power or steam pursuant to contracts for sale, if and when such power or steam is not available from the CRBR Project. Such a situation could arise if, in order to obtain a higher price for the power or steam produced from the Project, the Project is obligated to deliver power or steam which it is temporarily or otherwise not able to produce.

Such contracts may be assigned and shall be enforceable against the United States in accordance with their terms except in the case of fraud by the assignee.

The third sentence of the Act will provide a degree of liquidity to investors in the CRBR Project by assuring that, in accordance with the terms of their contracts, such investment may, with the consent of the Secretary, be assigned or transferred and will remain enforceable against the Federal government except, of course, in the case of fraud by the holder of such investments.

Participation in the project shall not subject a participant to regulation under the Public Utility Holding Company Act of 1935.

The fourth sentence of this Appropriation exempts participants in the CRBR Project which are not presently subject to regulation under the Public Utility Holding Company Act of 1935 from regulation under that Act arising in any manner out of their participation in the CRBR Project.

The sources of the largest potential equity investments in the CRBR Project are business corporations, institutional investors and, perhaps, some individual investors, which are not regulated utility companies. Private sector investors will not accept any ownership interest in the CRBR Project if there is any risk that they would be regulated under the Holding Company Act, pursuant to which the Securities and Exchange Commission regulates the terms of securities and their issuance, the capital structure, and certain corporate functions of entities which are subject to regulation thereunder.

Under the Holding Company Act, any "organized group of persons, whether incorporated or not . . . which owns or operates facilities used for the generation . . . of electric energy for sale . . ." is defined as a "public utility company".[2] This definition would apply to any entity which has an ownership interest in the CRBR Project. Any entity which owns, controls or holds five percent or ten percent of the voting securities of, or directly or indirectly exercises a controlling influence over, a public utility company will be regulated as an "affiliate" of a holding company or a "holding company" under the Act. Exemptions from regulation under the Holding Company Act which are presently available are neither sufficiently broad nor permanent, nor can they be obtained by SEC rule or other action in a timely fashion, to provide potential investors with the assurance that they will not become regulated thereunder as a result of their investment in the CRBR Project.

If an entity is, or otherwise becomes, regulated under the Holding Company Act and participates in ownership of the CRSR Project, it would continue to be or become regulated in the same manner following such investment. The Appropriations legislation is not intended to change the nature or extent of regulation of any Project participants under the Holding Company Act, if they already are, or for some other reason become, regulated thereunder.

All monies received by the Secretary under this heading may be retained and obligated for the purposes of the project without further appropriation and shall remain available until extended.

Such monies could be obtained by the Secretary from the sale of products and services from the Project, and could be used to pay all or a portion of the obligations of the Secretary under contracts with private sector investors, or for operating, maintenance, modernization and other Project costs.

Of the $1,500,000,000 appropriated by this heading, up to $270,000,000 may be obligated during fiscal year 1984, of which $135,000,000 may be obligated notwithstanding any other provision of this heading and up to the following amounts may be obligated during the following fiscal years: $285,000,000 during 1985; $290,000,000 during 1986; $290,000,000 during 1987; $185,000,000 during 1988; $75,000,000 during 1989; $105,000,000 during 1990 and beyond.

The penultimate sentence of the Appropriation divides the $1,500,000,000 appropriation into portions to be available during each fiscal year from 1984 through 1990, all of which, except for $135 million unconditionally available during fiscal year 1984, are contingent upon there being commitments for private sector financing. The funds appropriated for fiscal years 1984 through 1990, with the funds provided by the utility and private investors under the BRC plan, would provide sufficient financing to assure the construction of the project in accordance with the construction schedule.

Notwithstanding any provision of this Act, the authority provided in this heading shall be available until fully utilized.

The final sentence assures that the authorities provided in this Appropriation will survive beyond the term of the Continuing Resolution.●

[2] 15 U.S.C. § 79b(1)-(3), (5).

LAND REFORM IN EL SALVADOR

● Mr. PACKWOOD. Mr. President, many Members are aware of, and supportive of, the land reform program now being carried out in El Salvador. The purpose of that program is to give the peasants of that country title to the land they have tilled for so many years without reaping the benefits of their labor. What many are not aware of is that the constitutional basis for agrarian reform in El Salvador could be negated or greatly curtailed by the draft constitution now being debated in the Constitutent Assembly.

Mr. President, today's New York Times carried a story about the efforts of Farm Unions in El Salvador to defeat the damaging articles in the draft constitution. This story points not only to the imminent problem of the draft constitution and its potential effect on agrarian reform in El Salvador, but also to the many other problems facing land reform and those who support it.

I believe the land reform program in El Salvador is critical to our interests in that country. I think the New York Times article does a good job of outlining some of the real obstacles facing that program.

Mr. President, I ask that the New York Times article be placed in the RECORD at this point.

The article follows:

[From the New York Times, Sept. 19, 1983]

FARM UNIONS IN SALVADOR FACING BATTLE TO PRESERVE LAND PROGRAM

(By Lydia Chavez)

SAN SALVADOR, Sept. 18.—Farm workers' unions in El Salvador will face a major test of strength in the next few weeks when the Constituent Assembly considers three articles of a draft constitution that deal with the country's land redistribution program.

As drafted by an Assembly committee, the three articles—103, 104 and 105—could severely set back the land program, according to political and union leaders and labor advisers.

They said the issue would test the ability of the 200,000 organized farm workers to remain unified in the face of threats by the far right to kill some of their leaders. The outcome, they said, would also indicate how much weight the political parties give to the union vote.

The articles which are vaguely worded, could restrict farm workers' cooperatives in determining the kind of crops they will grow and permit the sale of land. Such sales, which are now frozen, would allow owners to break up large parcels of land among family members, bringing each plot below the minimum area under which it can be considered for land redistribution.

At present, the Assembly appears evenly divided over the articles, with 30 members in favor of changes favoring the unions and 30 against. All political parties say publicly that they support the land redistribution program, but labor leaders said the degree to which they are willing to make compromises in the three articles will be a measure of that support.

Under the land program, more than 20 percent of the country's land has been redistributed among some 83,000 families. According to labor advisers, however, many potential beneficiaries have not applied to buy the land they rented because they fear retribution from landlords or because it is in the fighting zones and they have been unable to farm it.

3 GET DEATH THREATS

The tone of the battle over the three articles has already been set. Three leaders of the Popular Democratic Union, an umbrella organization representing four farm workers' unions, have received death threats. In recent weeks, the Secret Anti-Communist Army, a far-right death squad, has taken responsibility for murdering two union members and planting a bomb in the truck of a union leader.

The threats come from a clandestine group that says it has no relation with any political party. But an American labor adviser said he was concerned that through these threats and assassinations the far right could weaken the will of union members.

"The problem is that terrorism works," the labor adviser said. "When things fall apart it's because they're scared."

So far, the union leaders show no signs of backing down, but their coalitions are fragile and their membership rolls are filled with the names of people who have memories of family and friends who have been victims of rightwing terrorism and therefore might be intimidated.

'WAR AGAINST THE UNIONS'

"I am sure that this is the beginning of a war against the unions," said Jorge Camacho, a director of the Popular Democratic Union. "I believe they basically want to break the movement's morale so that we won't demonstrate the day that they are going to talk about the articles in the Assembly."

Mr. Camacho, whose truck was destroyed by a bomb set by the Secret Anti-Communist Army and who has received a warning to leave town, is living under heavy security in the offices of the American Institute for Free Labor Development, the A.F.L.-C.I.O.'s international advisory group.

"We are not only going to continue our fight, we are going to increase our fight," Mr. Camacho said. "I am not going to leave the country."

LEADERS VOW UNITY

José Luis Grande, the director of the General Workers' Confederation, an independent union that says it has 40,000 members, said, "If they pass these articles, there will really be a civil war here because the campesinos will not give back their land easily."

Already this year the labor movement has shown its strength, amassing more than 6,000 farm workers in the parking lot of the Constituent Assembly in March and pressing it into extending a part of the land redistribution program.

"They were taken by surprise at their own strength in March, and they basically want to make sure they can do it again and have some influence on the elections," a labor adviser said.

Directors of the Popular Democratic Union said they intended to stick together through the Assembly's debate on land redistribution and into the elections tentatively set for early next year. If they are unsatisfied with the support they win the Constituent Assembly over land redistribution, union leaders said, they may form their own political party.

While this is the stated strategy, there are already rumblings that the largest of the four unions in the umbrella group, the Salvadoran Communal Union, which represents 100,000 farm workers, is making its own deal with the moderate Christian Democrats to support them in the elections in return for Cabinet positions.

DISTRUST IS NOTED

"The problem is that all of these people simply do not trust each other," an American labor adviser said.

The country's other large labor umbrella organization is the United Union and Guild Movement, which has some ties to the Salvadoran left and represents some 36,000 workers, including textile, construction and housing employees.

This union has been planning a general strike of its workers over wages, but so far only one of its affiliates, which represents more than 550 housing institute employees, has started a work stoppage.

"They can't do anything effective" without the Popular Democratic Union, said one labor adviser. At present, Mr. Camacho said, the Popular Democratic Union has no plans to join a general strike, but there is the possibility that if it does not win changes in Articles 103, 104 and 105 it will refuse to harvest the coffee crop.

All of the labor leaders interviewed said they maintained informal contacts with the left and the extreme right, but that any union leaders who advocated a violent, nondemocratic movement were ostrasized by the group.

"Here the violence is not like they say, it has not been generated only by Communism," said Mr. Grande of the General Workers' Confederation. "It has been generated by social injustice, exploitation and the lack of guarantees for the union movement."●

QUORUM CALL

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DECONCINI). Without objection, it is so ordered.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR SPECTER ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, the distinguished Senator from Pennsylvania (Mr. SPECTER) be recognized on a special order of not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, at the expiration of time for the special order or the yielding back of that time, there be a period for the transaction of routine morning business to extend not past the hour of 11:45 a.m., in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, at 11:45 a.m., or at such time as morning business is closed, the Senate will resume consideration of the Interior appropriations bill, which is the unfinished business.

ORDER FOR RECESS FROM 12 NOON UNTIL 2 P.M. TOMMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that at the hour of 12 noon on tomorrow the Senate stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I may say for the benefit of the RECORD that on Tuesday Members on both sides of the aisle meet in caucus off the floor of the Senate. These caucuses are of a quasi-official nature and contribute significantly to the progress of the Senate in its deliberations on many issues.

Mr. President, I hope that we can finish the Interior appropriations bill tomorrow and proceed to other matters, as well.

RECESS UNTIL TOMORROW AT 11 A.M.

Mr. BAKER. Mr. President, I am advised that the minority leader will not return to the floor for the formality of the recess. I therefore move that, in accordance with the order previously entered, the Senate stand in recess until the hour of 11 a.m. tomorrow.

The motion was agreed to, and the Senate, at 5:28 p.m., recessed until Tuesday, September 20, 1983, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate September 19, 1983:

THE JUDICIARY

Nan R. Huhn, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for a term of 15 years, vice David Luke Norman, retired.

IN THE ARMY

The following-named Army Medical Department officers for appointment in the U.S. Army to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent major general

Brig. Gen. William P. Winkler, Jr., xxx-xx-x... xxx-... Medical Corps, U.S. Army.

Brig. Gen. Tracy E. Strevey, Jr., xxx-xx-xx... xxx-... Medical Corps, U.S. Army.

HOUSE OF REPRESENTATIVES—*Monday, September 19, 1983*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, creator of the world, sustainer of the nations, and the strength of all who turn unto You, be with us this day and cause Your blessing to be upon us. Take away any selfishness that clouds our actions and remove any undue pride that allows us to think more highly of ourselves than we ought. Fill us instead with the bounty of Your love, a love that forgives and pardons and makes us whole. Comfort, O God, those who are anxious about the day and may Your spirit give all Your people peace and confidence. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 864. An act to amend the Volunteers in the Parks Act of 1969, and for other purposes.

CONSENT CALENDAR

The SPEAKER. This is the day for the call of the Consent Calendar. The Clerk will call the bill on the Consent Calendar.

AUTHORIZING CONVEYANCE OF CERTAIN LANDS IN LANE COUNTY, OREG.

The Clerk called the bill (H.R. 1062) to authorize the Secretary of the Interior to convey, without consideration, certain lands in Lane County, Oreg.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WORTLEY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. This concludes the call of the Consent Calendar.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
September 16, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, the Clerk received at 9:30 a.m. on Friday, September 16, 1983, the following message from the Secretary of the Senate: That the Senate passed H.J. Res. 353.

With kind regards, I am

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

COMMUNICATION FROM THE CHIEF OF POLICE OF THE U.S. CAPITOL POLICE

The SPEAKER laid before the House the following communication from the Chief of Police of the United States Capitol Police:

U.S. CAPITOL POLICE,
Washington, D.C., September 16, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to inform you, pursuant to the provision of House Rule L (50), that *James M. Powell, Chief, U.S. Capitol Police,* has received a subpoena from the *Superior Court for the District of Columbia.* In the matter of *United States District of Columbia* vs. *Roger Ludwig,* Docket Number M3763-83.

After consulting with counsel, I have determined that compliance with the subpoena is consistent with the privileges and rights of the House.

Sincerely,

JAMES M. POWELL,
Chief of Police.

IMPROVED EDUCATIONAL FACILITIES PROMISED BY PASSAGE OF COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, an editorial appearing in this morning's Washington Post highlights an important recommendation of two national studies released last week: That improved working conditions for teachers would result in better teaching and a better education for our students. These two reports, released by the National Science Board and Ernest L. Boyer of the Carnegie Foundation for the Advancement of Teaching, respectively, are the latest in a growing list of national studies concluding that immediate action is necessary to maintain and improve the quality of education in the United States.

Tomorrow the House will begin consideration of a measure that offers the opportunity to improve working conditions for teachers and learning environments for students by upgrading school buildings and academic facilities. I am speaking of H.R. 1036, the Community Renewal Employment Act introduced by Mr. HAWKINS. This bill would provide desperately needed employment for persons out of work for 15 weeks or longer, many of whom have exhausted all unemployment benefits. Title III of the bill would allocate funds to allow local school districts and institutions of higher education to hire these workers to repair and renovate buildings and academic facilities. Many of these are badly in need of repair as a result of economy measures, schools have been forced to adopt, due to revenue shortfalls in recent years.

Mr. Speaker, I am certain that as the current national debate on how best to improve education continues, the House will be giving its attention to measures aimed at the improvement of education. Passage of H.R. 1036 this week would be a decisive first step toward this improvement which I urge my colleagues to support.

BAN SOVIET GOLD COIN IMPORTS

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute.)

Mr. ANNUNZIO. Mr. Speaker, all Americans were shocked and horrified by the barbaric act of the Soviet Union in shooting down an unarmed civilian jetliner, murdering 269 people. Since then people have constantly asked what we can do to punish the Soviet Government for its outrageous act. I have one small suggestion that I intend to offer.

Over the past 4½ years, the Soviet Union has exported almost 46 million dollars' worth of gold coins to the United States. I see no reason why we should permit the Soviet Union to sell coins in the United States to raise money to pay its coldblooded fighter pilots. Therefore, when the Export Administration Amendments Act, H.R. 3231, comes to the floor, I will offer an

amendment to ban the importation of gold coins from the Soviet Union into the United States.

I urge all my colleagues to join me in cutting off the flow of cash from our country to the outlaw Soviet Union.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1693 AND H.R. 953

Mr. REID. Mr. Speaker, I ask unanimous consent to withdraw my name as a cosponsor of H.R. 1693 and of H.R. 953.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Nevada?

There was no objection.

THE GOAL OF SECURING DEMOCRACY FOR THE PHILIPPINES

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, many issues are competing for our attention, but developments in the Philippines must not be overlooked. Because of its strategic importance and close ties to America, the Philippines are very important.

Its government institutions are modeled after our country, yet, despite fervent promises, the people have not been granted the democracy they crave.

If we do not use our leverage to help bring about democracy, the consequences could be dire.

Last week, I introduced a resolution—cosponsored by 55 of our colleagues—calling on the President to cancel his trip to the Philippines; calling for an impartial tribunal to investigate the cowardly assassination of Benigno (Benino) Aquino, the leader who died for democracy; and calling for free elections with a free press.

We want free elections in El Salvador and Nicaragua—we surely must want free elections in the Philippines. Let us be on the side of the Filipino people. This resolution is the first step.

KOREAN AIR LINES VICTIMS' CLAIMS ACT

(Mr. BONKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONKER. Mr. Speaker, I am today introducing legislation which would set in motion the process of obtaining restitution from the Soviet Union for the loss of American lives and property suffered in the destruction of Korean Air Lines flight 007 on September 1, 1983. The legislation would authorize and direct the U.S. Foreign Claims Settlement Commission to review the claims of the families and others with a beneficial relationship to the Americans lost in that horrible disaster, and to establish an appropriate value of those claims for loss of life and property. It directs the Secretary of State to initiate and conduct formal negotiations with the Government of the Soviet Union for the payment of such claims after they have been validated by the U.S. Foreign Claims Settlement Commission.

I am introducing this legislation, Mr. Speaker, with the cosponsorship of Mr. ZABLOCKI and Mr. MICA, and I intend to circulate the bill immediately for additional cosponsors. It is a measure which, I am sure, most Members of the House will want to support. As chairman of the Subcommittee on International Economic Policy and Trade, which has jurisdiction over claims of U.S. nationals against foreign governments, I plan to take prompt action on this and any other proposals that will lead to compensation for the losses that have been suffered by the survivors of our countrymen who were so unjustly and deliberately murdered by the trigger-happy defense forces of the Soviet Union with the full knowledge and approval of the Soviet Government.

This legislation does not, in itself, assure payment of compensatory claims by the Soviet Union. No legislation or other unilateral action of the United States can achieve that. Full compensation, however, along with a formal and official apology for their action, from the Soviet Union seems to me the minimum prerequisite for stabilizing relations between our two countries in the wake of this extremely hostile and inhumane action, and for averting a serious decline in political and economic relations.

What this legislation would accomplish, Mr. Speaker, is to establish a precise and sound basis under United States and international law for the pursuit of U.S. claims arising from this incident, and to give the U.S. Government a clear mandate actively and aggressively to seek payment of the claims through direct negotiations with the Government of the Soviet Union. The families of the Americans lost should not be left to themselves to pursue their claims—an approach that would make it much easier for the Soviet Union to ignore its responsibility and almost certainly result in a failure of the families to gain compensation. The shooting down of flight 007 is an international incident affecting relations between the United States and Soviet Governments. The cause of the U.S. heirs and associates should be taken up and represented officially by the U.S. Government. The legislation I am introducing today would accomplish that by making appropriate amendments to the International Claims Settlement Act of 1949 under which we have successfully pursued and settled claims against various foreign governments over the past 30 years. We should waste no time in following the same procedures in this case through enactment of appropriate legislation.

No amount of restitution can bring back the Americans lost, nor fully compensate us as a nation or the families and friends of the victims. But it is only fair and reasonable that restitution be provided by those who took this wrongful action, and I urge my colleagues to support this measure taking a strong and concrete step in that direction.

□ 1210

SUPPORT THE COMMUNITY RENEWAL ACT

(Mr. FRANK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRANK. Mr. Speaker, last week several people from Massachusetts who have the responsibility of educating our children came to ask us to support the Community Renewal Act, which would have the dual purpose of helping us meet some unmet public needs and would put back to work people who through no fault of their own have long been out of work due to this serious recession from which we have just begun to emerge; yet the administration tells us we cannot afford it.

When the President can say, as he said earlier this year, that $600 million is an insignificant sum in his words if it goes to Central America to support his policies there and if he can ask us to pledge more than $8 billion of taxpayers' money to the International Monetary Fund to deal with loans which now turn out to be imprudently made, I do not understand his militant opposition to a relatively small amount of money that would put Americans back to work who seek to work and would meet some of our needs with regard to our infrastructure, our educational system, and other important public needs.

The Community Renewal Act would cost far less than the payment-in-kind program for agriculture which this administration sponsored, and the President's refusal to support it belies his proposed concern for working people.

THE REAGAN ADMINISTRATION HAS SKIRTED THE WAR POWERS ACT

(Mr. SIKORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKORSKI. Mr. Speaker, the Reagan administration has skirted the 1973 War Powers Act by claiming that the fighting in Lebanon does not constitute "hostilities." This supposed absence of "hostilities" has killed 4 marines; it has wounded 29 others.

To defend the Lebanese Army, President Reagan is willing to send 1,200 marines into Lebanon and station 17,000 American servicemen in support. But he refuses to defend the U.S. Constitution. For under our Constitution, the people of the United States through their elected Representatives in Congress, declare war. The framers of the Constitution realized that the flesh-and-blood commitment of war requires nothing less.

If the President will not obey the law, our troops should be brought home now. This is not a battle between the Congress and the President. It is a battle for the constitutional right of the American people to be consulted before sending their children to kill and be killed in wars thousands of miles away.

H.R. 3909, THE ATOMIC VETERANS RELIEF ACT

(Mr. ROWLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND. Mr. Speaker, as my colleagues know, beginning in 1945 and continuing until 1963, the U.S. Government exploded approximately 235 nuclear weapons in the atmosphere over the American Southwest and the Pacific Ocean.

The Department of Defense estimates that approximately 220,000 personnel participated in those tests. And additional personnel may have been exposed while in the occupation forces in Japan after the atomic bombings of Hiroshima and Nagasaki in 1945.

Unfortunately many of these troops were exposed to low-level ionizing radiation which may or may not have been accurately documented with proper exposure devices or methodologies. To compound the problem, there is a limited scientific understanding of the relationship between exposure to low doses of ionizing radiation and subsequent health problems. And efforts to analyze the cause-and-effect relationship often are more politically motivated than scientific.

At this time, the Veterans' Administration has initiated much research on the health effects of low-level ionizing radiation on veterans, utilizing the resources of the Interagency Radiation Research Committee and the National Library of Medicine.

In order to provide a group of eminently qualified scientists, professionals, and veterans to evaluate this information and make recommendations to the Administrator of the Veterans' Administration regarding this important issue, I, along with the ranking minority member of the House Committee on Veterans' Affairs, Mr. HAMMERSCHMIDT, have introduced H.R. 3909, the Atomic Veterans Relief Act.

This legislation authorizes an advisory committee to review radiation related research relevant to veterans' concerns, as well as the unique needs of such veterans with respect to compensation, health care, and rehabilitation, and provide advice to the Administrator concerning this matter.

H.R. 3909 will also authorize temporary disability benefits for veterans who may have been exposed to ionizing radiation in service and who are suffering from certain diseases that significant data has been presented to demonstrate a relationship to such exposure. My bill would authorize a temporary disability allowance for veterans who, within 20 years from the date of participation in a nuclear test or occupation of the atomic bombing sites in Japan, suffer from leukemia, polycythemia vera, and carcinoma—three diseases which are known to result from significant levels of exposure to ionizing radiation.

Although it may be many years before there is conclusive medical evidence to warrant the addition of these, or any other diseases, to the list of VA service-connected compensable illnesses, I feel very strongly that we have sufficient reason to provide temporary financial assistance to the atomic veterans while the ongoing research continues.

My bill contains a sunset clause whereby payments would terminate 1 year after the Administrator sends the Congress the first report due under Public Law 96-151. It is my belief we may have adequate information at that time to convert this to a permanent program and address a number of other diseases which may be shown to be related to ionizing radiation.

This is a bipartisan bill that offers hope to a large group of patriotic veterans that for too long have felt that their requests for recognition have gone unanswered. I urge my colleagues to join me and my distinguished colleague, Mr. HAMMERSCHMIDT, in supporting this legislation.

ANOTHER OIL CRISIS COULD LEAD TO ECONOMIC DISASTER

(Mr. ALBOSTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALBOSTA. Mr. Speaker, a very disturbing if not frightening article appeared today in the Washington Post charging that an oil crisis could very well lead to an economic disaster in this country. The article is based on information from a 2-month test coordinated by the International Energy Agency of how 20 countries, including the United States, are prepared to deal with a severe cut in oil supplies.

The IEA test clearly shows what would happen should world oil supplies be cut 10 percent or greater—those people and companies who can afford to pay for oil will get it, the rest will freeze, go out of business or bankrupt themselves. Sounds farfetched and frightening. Not really if one considers what happened during the Arab oil embargo in the 1970's when prices shot through the roof, black markets for oil developed, and long lines at the gas pump caused social unrest in certain areas of the country. Unfortunately, we are facing another similar situation or even worse if the current administration policies of relying completely on the free market to set prices and distribute oil during an energy emergency.

Even major oil companies seriously question whether the administration's energy emergency policies would work if they had to be used. The oil companies found many of the supply offers claimed by the administration in the IEA test "dubious."

The Wisconsin Department of Energy, one of the 12 State agencies providing information to the Federal Government for the IEA study, said:

> We hope it will not take the economic collapse of one of these cities, probably ensuing riots and accompanying death and destruction before the Administration realizes that its policies have failed the country and must be changed.

The Congressional Research Service study on the same topic concluded that a disruption in oil supplies from the Persian Gulf could "produce a catastrophic drop in the U.S. gross national product of as much as 28 percent."

These dire results need not occur. Congress approved the Energy Security Act of 1980 establishing the synfuels program. Instead of doing everything possible to gut the synfuels program and turn over energy policy to the big oil companies, this administration must change its course for the good of the country and promote the development of synfuels to make this country energy independent. We have it in our means to develop our own energy sources but the work must go on now, not during the next oil crisis when it will be too late.

THE PRESIDENT SHOULD INVOKE THE WAR POWERS ACT

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, the Constitution grants to Congress, and to Congress alone, the power to declare war. It thereby mandates that the sacrifice of American blood and

treasure in war be subject to the will of the people.

The aftermath of World War II brought with it the argument that the Chief Executive should—in time of quick-breaking emergency—be able to commit American troops on his own authority.

But during the long and tragic Vietnam conflict it began to be obvious that the pendulum had shifted too far. This was the origin of the War Powers Act of 1973.

It is clear that the original mission of the marines in Lebanon no longer exists. It is also clear that our men are being shot at and killed during a Lebanese civil war which the Columnist I. F. Stone has characterized as "a huge family fight in a bar room where the lights were long ago shot out."

The President himself should invoke the War Powers Act, and, if not him, then the Congress must. Hostilities have begun, and the long-term presence of the marines in Lebanon must be made subject to the will of the Congress. It is our peoples' desire, and it is the clear meaning of the law and of the Constitution of the United States.

THE RESURRECTION OF YASIR ARAFAT

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, I do not wish to revise and extend.

Mr. Speaker, news arrived over the weekend that Yasir Arafat, like some foul phoenix, has risen from the ashes of Lebanon to reassert his place as the premier terrorist of the Middle East. With his resurrection dies any notion that Lebanon's war is a civil war or that America should pull out its marines and leave Lebanon to the PLO, the Syrians, and the Russians.

We all know how Mr. Arafat conducts his war—through murder and massacre. Now, Mr. Speaker, we must decide how we are going to respond. Will we heed the wisdom of our Founding Fathers, who, through the "separation of powers" doctrine, entrusted foreign policy to the executive branch? Or will we bludgeon Presidential power to death with that blunt instrument of congressional arrogance, the War Powers Act?

When it comes to foreign policy, Mr. Speaker, I know many in this Chamber long to be the straw that stirs the drink. But do we really need 535 Secretaries of State? What will happen to our military effort when, in the words of the Wall Street Journal, "you have to get approval from mommy to continue fighting, as well as tell everyone how long you plan to keep it up."

No James Madison could have predicted an Arafat, Mr. Speaker. But our forefathers seemed wiser in the ways of the modern world than many of us who have the benefit of living in it, but seem to be blind to the true nature of our enemy.

THANKS FOR HUMANITARIAN RELIEF TO EL SALVADOR

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, today I am inserting into the Extension of Remarks a list of some of the many, many people who made it possible for more than 25 tons of medical supplies to be delivered to the homeless in El Salvador last month.

Some very kind remarks were made about me on the floor last week, concerning an emergency medical airlift operation which I initiated in early August to bring critically needed medicine and supplies to thousands of civilians—many of whom were living in poverty in displaced persons camps because of the war.

However, it took the time and dedication of many people to bring this about—and the generosity of many more. Our goal was to get medical supplies to the Salvadorans as quickly as we could. We were able to do this because of the rapid and overwhelming response on the part of everyone involved—most especially the pharmaceutical companies and other manufacturers who donated thousands of pounds of supplies practically at a moment's notice. At the same time dozens of central Florida individuals and businesses responded with more than $30,000 in donations to get these supplies on an aircraft and down to El Salvador.

Throughout this operation, the humanitarian relief organization Project HOPE was coordinating with us and providing the assistance and expertise we needed to accomplish our mission. Our joint efforts were heavily assisted by the U.S. Agency for International Development, and supported by the State Department, the U.S. Embassy in El Salvador, and the Salvadoran Government.

Today I would like to give these many people the recognition they deserve—and to thank them for their important roles in this "people to people" mission of mercy.

□ 1220

URGING MEMBERS TO REFUSE COMPLIMENTARY HUSTLER MAGAZINE SUBSCRIPTION

(Mr. WORTLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WORTLEY. Mr. Speaker, in this morning's mail I received an unsolicited copy of pornographic material called Hustler magazine from its publisher, along with a letter noting that I would continue to receive this filth on a regular basis.

I wrote him back immediately asking to be taken off his smut mailing list and that he cease and desist from promoting Dial-A-Porn services and other pornographic items that are inflicted on our young people.

In my opinion we are the victims of a sick publicity stunt by a man whose sole business is to degrade women, whose reputation as a purveyor of pornography and moral depravity is unquestioned.

I urge all my colleagues to not only trash this trash but to register their disgust and their rights by requesting their names to be taken off the complimentary subscription list.

LARRY FLYNT AND FIRST AMENDMENT RIGHTS

(Mr. SUNDQUIST asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SUNDQUIST. Mr. Speaker, today I received a magazine of unsolicited pornography. I assume that all other Members received the same copy of Hustler magazine.

Included is the letter enclosed by Publisher Larry Flynt:

HUSTLER MAGAZINE,
Los Angeles, Calif., September 14, 1983.

DEAR REPRESENTATIVE: Considering you are a public servant, who no doubt wants to stay well informed on all social issues and trends, I have taken the liberty of adding you to Hustler's complimentary subscription list. You now will receive on a regular, monthly basis the world's greatest porn magazine.

Hustler will keep you up-to-date in the latest cooze news, sex reviews, humor, and political satire, the finest in fiction and the most in-depth, investigative articles published anywhere. I am as committed to my pornography as the Pope is to his celibacy, so the quality of Hustler will never be compromised.

I am sure that your constituents, who appreciate good pornography, will be happy to know that you have a subscription to their favorite magazine.

Sincerely,

LARRY C. FLYNT,
Editor and Publisher.

Here is my answer:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 19, 1983.

LARRY C. FLYNT,
Editor and Publisher, Hustler,
Los Angeles, Calif.

DEAR MR. FLYNT: Your letter indicating you had placed my name on your complimentary subscription list, along with the first copy of your magazine, arrived in my office today. Enclosed you will find both your magazine, as well as your correspondence. Please be advised that I do not wish to receive your magazine.

Frankly, I was repulsed to receive unsolicited pornographic material through the mail of the U.S. House of Representatives. I read recently in People magazine where you said you were going to push your First Amendment rights to free speech as far as you can. Your outrageous gesture in sending copies of your trash to Members of Congress is certainly a manifestation of your desire to push your "rights" to the breaking point. It is not appreciated by me, and I'm sure it will not be received well by any other decent Member of Congress.

Please remove my name from your complimentary subscription list immediately.

Sincerely,

DON SUNDQUIST,
Member of Congress.

Frankly, I was repulsed to receive unsolicited pornographic material through the mail of the U.S. House of Representatives. I read recently in People magazine where Flynt said he was going to push his first amendment rights to free speech as far as he could.

I do not want to be acrimonious about it, but this outrageous gesture in sending copies of trash to Members of Congress is certainly a manifestation of Flynt's warped desire to push his rights to the breaking point.

It is not appreciated by me, and I am sure it will not be received well by any other decent Member of Congress.

Within the pages of filth in this magazine is an article urging readers to call telephone numbers to hear an obscene recording. I think the fact that this magazine was received in today's mail is ironic, because within the next couple of weeks, we probably will be considering a measure which will prohibit such obscene messages. The measure, which is contained in the Federal Communications Commission authorization bill, will prohibit them without regard to whether the sender of the message initiated the call. I strongly support this measure.

I also think the fact that we received this in the mail this morning underscores the fact that the judicial branch has not properly put sufficient controls on the kinds of material which can be sent through the mails unsolicited by the receiver.

Within a week, I will be introducing legislation which will call for a constitutional amendment to limit the tenure of Federal judges to 10 years with a provision for reconfirmation. I think this is in keeping with the spirit of the Constitution, and will allow the Senate the opportunity to review judges to insure that they are enforcing pornography laws, among the many others.

LET'S THINK ABOUT OUR VIETNAM VETS WHO SUFFER WITH AGENT ORANGE EFFECTS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute.)

Mr. RICHARDSON. Mr. Speaker, on Friday, I attended a ceremony of the Vietnam veterans trying to focus attention on H.R. 1961, providing for just compensation for agent orange. This is a tragedy beyond repair where we have men and women that served in Vietnam, many who came back maimed, injured, and under stress who simply want just compensation for combat-related afflictions that this administration claims are not scientifically linked to exposure to this defoliant.

Yet, many of these Vietnam vets came back to their country and asked for help, some of their children similarly afflicted, and all we can say to them is sorry, there are no funds in the budget, sorry, there is no scientific evidence to show that you were afflicted, and so you cannot be helped.

Mr. Speaker, we owe the Vietnam veteran, and here is a place to start.

Mr. Speaker, H.R. 1961 is a bill that corrects this injustice, and as we discuss insuring that U.S. troops are protected in Lebanon and Central America, let us not forget those unsung heroes who came back from Vietnam.

REASONS BEHIND THE SENDING OF HUSTLER MAGAZINE TO MEMBERS OF CONGRESS

(Mr. OXLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OXLEY. Mr. Speaker, I had not planned to speak today but after the eloquent words from my colleagues from New York and from Tennessee I could not help but comment on the mail that we received today from Hustler magazine, and the arrogance by which the letter stated the goals of Larry Flynt.

I am embarrassed at the fact that Larry Flynt used to reside in Columbus, Ohio, and wanted to make my apologies to the House for what I consider outrageous conduct on his part. The letter, however, was mailed from California.

As I said in my letter to Mr. Flynt today, canceling my subscription, he has given new meaning to the term "junk mail."

I think that all of us should follow the example that was set by our colleagues and remind Mr. Flynt of this.

I might point out, Mr. Speaker, there is a monetary reason behind Mr. Flynt's desire to seek publicity by doing this outrageous act, and that is because on at least two occasions he has been sued and had judgments against him for well over $40 million in two separate suits, one in Franklin County, Ohio, and one in New York City. I think there is a very good reason why he seeks this publicity in sending the Hustler magazine to all Members of Congress.

I urge my colleagues to do the same that our other colleagues did and cancel those unsolicited subscriptions immediately.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, September 20, 1983.

THE INSIDER TRADING SANCTIONS ACT OF 1983

Mr. WIRTH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 559) to amend the Securities Exchange Act of 1934 to increase the sanctions against trading in securities while in possession of material nonpublic information, as amended.

The Clerk read as follows:

H.R. 559

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as "The Insider Trading Sanctions Act of 1983".

SEC. 2. Section 21 of the Securities Exchange Act of 1934 is amended by redesignating subsection (d) as subsection (d)(1), and adding at the end thereof the following new paragraph:

"(2)(A) Whenever it shall appear to the Commission that any person has violated any provision of this title or the rules or regulations thereunder by purchasing or selling a security while in possession of material nonpublic information in a transaction (i) on or through the facilities of a national securities exchange or from or through a broker or dealer, and (ii) which is not part of a public offering by an issuer of securities other than standardized options, the Commission may bring an action in a United States District Court to seek, and the court shall have jurisdiction to impose, a civil penalty to be paid by such person, or any person aiding and abetting the violation of such person. The amount of such penalty shall be determined by the court in light of the facts and circumstances, but shall not exceed three times the profit gained or loss avoided as a result of such unlawful purchase or sale, and shall be payable into the Treasury of the United States. If a person upon whom such a penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Commission may refer the matter to the Attorney General who may recover such penalty by action in the appropriate United States District Court. The actions authorized by this paragraph may be brought in addition to any other actions that the Commission or the Attorney General are entitled to bring. For purposes of section 27 of this title, actions under this paragraph shall be actions to enforce a liability or a duty created by

this title. The Commission, by rule or regulation, may exempt from the provisions of this paragraph any class of persons or transactions.

"(B) No person shall be subject to a sanction under subparagraph (A) of this paragraph solely because that person aided and abetted a transaction covered by such subparagraph in a manner other than by communicating material nonpublic information. Section 20 of this title shall not apply to actions brought under this paragraph. No person shall be liable under this paragraph solely by reason of employing another person who is liable under this paragraph.

"(C) For purposes of this paragraph 'profit gained' or 'loss avoided' is the difference between the purchase or sale price of the security and the value of that security as measured by the trading price of the security a reasonable period after public dissemination of the nonpublic information.

"(D) No action may be brought under this paragraph more than five years after the date of the purchase or sale. This paragraph shall not be construed to bar or limit in any manner any action by the Commission or the Attorney General under any other provision of this title, nor shall it bar or limit in any manner any action to recover penalties, or to seek any other order regarding penalties, imposed in an action commenced with five years of such transaction.".

SEC. 3. Section 32 of the Securities Exchange Act of 1934 is amended by striking out "$10,000" in subsection (a) and inserting in lieu thereof "$100,000".

SEC. 4. Section 15(c)(4) of the Securities Exchange Act of 1934 is amended by inserting "14," after "section 12, 13,".

SEC. 5. The amendments made by this Act shall become effective immediately upon enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. OXLEY. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Colorado (Mr. WIRTH) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. OXLEY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. WIRTH. Mr. Speaker, this legislation is the result of a bipartisan effort by members of the Subcommittee on Telecommunications, Consumer Protection and Finance to give the Securities and Exchange Commission the tools it needs to combat insider trading and other abuses in the securities markets.

The bill was passed by a unanimous vote of the subcommittee, and it was reported by a unanimous voice vote of the Committee on Energy and Commerce. That demonstrates the committee's strong support for an aggressive SEC enforcement program to protect the integrity of the markets.

I want to acknowledge the important role Mr. RINALDO and his staff have played in developing the legislation. What we have developed is a bill that not only gives the SEC the deterrence it needs, but which, I believe, will be perceived by all as fair.

It is also important to ackowledge the SEC's work in developing this legislation. The SEC came to Congress 1 year ago and asked for help in its war against insider trading. The SEC's initiative is particularly commendable in this deregulatory time, when most agencies are simply cutting back, afraid to undertake new initiatives. Each of the five commissioners and the outstanding staff of the Commission who worked with us on the legislation deserve our thanks.

The legislation has three major provisions.

There are three major provisions of this legislation. The first increases the sanctions for trading while in possession of material nonpublic information—what we call generally insider trading. The need for increased sanctions to deter insider trading is well documented on the front pages of our newspapers. Insider trading threatens our capital markets by undermining the public's expectations of fair and honest securities markets where all participants play by the same rules.

Existing remedies do not effectively deter insider trading. This legislation would give the SEC the authority to ask a court to impose a civil penalty of up to three times the amount of profit gained or loss avoided in an insider trading transaction.

We have limited secondary liability under the bill. The committee's report is very clear as to when the new penalty will or will not apply to those persons who aid and abet violations. It also makes it very clear that existing theories under which the SEC now pursues insider trading by means or civil injunctive actions or other remedies are not affected by this bill and should be used aggressively in those situations where the new penalty may not apply. Those theories include aiding and abetting liability, respondeat superior liability and control person liability under section 20 of the Exchange Act.

We have also made it clear that this bill does not change the substantive law governing the kind of trading activity that may be deemed to be violative of the antifraud provisions of the Federal securities laws. We are, however, evaluating the impact of recent court decisions on the SEC's ability to pursue insider trading, and we have asked the SEC to report to the committee over a period of 2 years on the development of the substantive law and the effectiveness of its enforcement program against insider trading.

A second provision of the bill increases the maximum criminal fine for willful violations of the Exchange Act from $10,000 to $100,000. The current fine was established in 1934 when the Exchange Act was passed. Inflation has diminished the value of the fine since this time, and this legislation restores its deterrent impact.

The third major provision of the bill gives the SEC authority to bring administrative proceedings to remedy tender offer and proxy abuses. This authority is in addition to the SEC's current power to bring civil injunctive actions and use other tools to remedy violations of the tender offer and proxy provisions of the securities laws.

The committee's report covers each of these provisions in great detail.

Mr. OXLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the House is considering under suspension of the rules a very important piece of legislation, the Insider Trading Sanctions Act. This bill will strenthen Government enforcement of violations of the Federal securities laws involving insider trading. It was reported from the Committee on Energy and Commerce by unanimous voice vote.

This legislation was originally recommended by the Securities and Exchange Commission to provide increased deterrence of insider trading violations. It would amend the Securities Exchange Act of 1934 to give the SEC authority to go to court to seek a civil penalty of up to three times the profit gained or loss avoided by those profiting from insider trading.

The need for this legislation is well established. Insider trading violates fundamental expectations of fairness and honesty, and undermines public confidence in our Nation's securities markets, which are the best in the world.

Incidences of insider trading have become more prevalent in recent years, with the increase in corporate mergers and tender offers and the growth of the options market. The SEC has given insider trading violations a higher enforcement priority and has initiated an increased number of cases. During the past 4 years, more such cases have been brought than in all previous years combined.

However, present sanctions available to the Commission do not serve as a real deterrent when compared to the vast profits which can be gained so rapidly by trading with inside information. The most that the Commission can do at present is enjoin an inside trader from future violations and re-

quire him to disgorge his illegal profits. Clearly, neither of these remedies penalizes the trader's illegal conduct. Disgorgement of profits simply puts him back in the position he would have been in if he had obeyed the law in the first place.

This bill provides for increased deterrence by making a person involved in insider trading subject to a civil penalty of up to three times his profit. The bill does not change the underlying substantive law of insider trading. Insider trading violations of the securities laws will continue to be judicially defined. This bill only provides an increased penalty for such illegal conduct.

During consideration of this legislation in the Committee on Energy and Commerce, a number of issues were raised by representatives of the securities industry and the securities bar. These included whether the bill should include a definition of insider trading, secondary liability under theories of aiding and abetting and respondeat superior, the appropriate burden of proof, the right to trial by jury, and statute of limitations.

These issues received detailed consideration by the subcommittee and by the SEC. Based on careful review, the SEC recommended several changes in the bill which were adopted by the committee. These changes satisfy the legitimate concerns which have been raised without in any way undercutting the deterrent effect of the increased sanctions.

These provisions:

First, limit the application of the triple penalty for aiding and abetting violations to those who communicate inside information; that is, tippers. It also provides that employers and control persons would not be subject to the penalty under secondary liability;

Second, define the measurement of profit gained or loss avoided as the difference between the purchase or sale price of the security and the trading price a reasonable time after the inside information becomes public; and

Third, provide for a 5-year statute of limitations.

In addition to the insider trading civil penalty, the bill would increase the maximum fine for criminal violation of the Securities Exchange Act of 1934 from $10,000 to $100,000. The current fine of $10,000 was established in 1934. Inflation has greatly diminished its deterrent value, and an increase is therefore warranted.

Another provision of the bill would extend the SEC's authority to bring administrative proceedings to include proxy and tender offer violations.

I urge the House to suspend the rules and pass H.R. 559.

□ 1230

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspend the rules and pass the bill, H.R. 559, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

ETHICS IN GOVERNMENT ACT AMENDMENTS

Mr. SAM B. HALL, JR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2717) to amend the Ethics in Government Act of 1978 to make certain changes in the authority of the Office of Government Ethics, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2717

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO ETHICS IN GOVERNMENT ACT OF 1978

SECTION 1. Except as otherwise expressly provided in this Act, whenever an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Ethics in Government Act of 1978.

AUTHORITY OF DIRECTOR

SEC. 2. (a) Section 402(a) is amended by striking out "under the general supervision of" and inserting in lieu thereof "in consultation with".

(b) Section 402(b) is amended—

(1) in paragraph (1)—

(A) by striking out "and recommending to the Office of Personnel Management";

(B) by inserting "and the Office of Personnel Management" immediately after "Attorney General" and

(C) by striking out "President or the Office of Personnel Management" and inserting in lieu thereof "President or the Director";

(2) in paragraph (2)—

(A) by striking out "and recommending to the Office of Personnel Management";

(B) by inserting "and the Office of Personnel Management" immediately after "Attorney General" and

(C) by striking out "President or the Office of Personnel Management" and inserting in lieu thereof "President or the Director";

(3) in paragraph (6) by striking out "Office of Personnel Management" and inserting in lieu thereof "Director";

(4) in paragraph (12)—

(A) by inserting "and the Office of Personnel Management" immediately after "Attorney General" and

(B) by striking out "Office of Personnel Management" and inserting in lieu thereof "Director"; and

(5) in paragraph (15) by striking out "and recommending for promulgation by the Office of Personnel Management" and inserting in lieu thereof ", in consultation with the Office of Personnel Management, and promulgating".

(c) Section 404 is amended by striking out "Office of Personnel Management" and inserting in lieu thereof "Director".

(d)(1) Any rules or regulations issued under section 402 of the Ethics in Government Act of 1978 which are in effect immediately before the effective date of the amendments made by this Act shall remain in effect according to their terms until modified, superseded, set aside, or revoked on or after such effective date.

(2) The responsibilities of the Director of the Office of Government Ethics under paragraphs (6) and (12), respectively, of section 402(b) of the Ethics in Government Act of 1978 with respect to rules and regulations issued by the Office of Personnel Management before the effective date of the amendments made by this Act shall not be affected by this Act or any of the amendments made by this Act.

SEPARATE BUDGET LINE ITEM FOR OFFICE OF GOVERNMENT ETHICS

SEC. 3. Title IV is amended by adding at the end thereof the following new section:

"SUBMISSION OF BUDGET

"SEC. 407. (a) In the budget submitted to the Congress pursuant to section 1105(a) of title 31, United States Code, the President shall include estimated expenditures and proposed appropriations the President decides are necessary to support the Office of Government Ethics in the fiscal year for which the budget is submitted and the four fiscal years after that year.

"(b) In the statement of changes submitted to Congress with respect to the budget pursuant to section 1106(b) of title 31, United States Code, the President shall specify the effect of such changes on the information submitted pursuant to subsection (a) of this section.".

REVIEW OF FINANCIAL DISCLOSURE REPORTS OF HIGH LEVEL WHITE HOUSE AIDES

SEC. 4. Section 203(c) is amended by inserting after "designated agency officials," the following: "employees described in section 105(a)(2) (A) or (B), 106(a)(1) (A) or (B), or 107 (a)(1)(A) or (b)(1)(A)(i), of title 3, United States Code,".

LIMIT ON OUTSIDE EARNED INCOME FOR HIGH LEVEL WHITE HOUSE AIDES

SEC. 5. Section 210 is amended to read as follows:

"OUTSIDE EARNED INCOME

"SEC. 210. Except where the employee's agency or department shall have more restrictive limitations on outside earned income, all employees covered by this title—

"(1) who are compensated at a pay grade in the General Schedule of grade GS-16 or above and who occupy nonjudicial full-time positions appointments to which are required to be made by the President, by and with the advice and consent of the Senate, or

"(2) who are described in section 105(a)(2) (A) or (B), 106(a)(1) (A) or (B), or 107 (a)(1)(A) or (b)(1)(A)(i), of title 3 United States Code,

may not have in any calendar year outside earned income attributable to such calendar year which is in excess of 15 percent of their salary.".

REPORTS BY PRESIDENTIAL NOMINEES

SEC. 6. Section 201(b) is amended—

(1) by inserting "(1)" immediately after "(b)";

(2) by inserting after the first sentence the following: "Such individual shall, not later than the date of the first hearing to consider the nomination of such individual, make current the report filed pursuant to this paragraph by filing the information required by section 202(a)(1)(A) with respect to income and honoraria received as of the date which occurs five days before the date of such hearing."; and

(3) by adding at the end thereof the following new paragraph:

"(2) An individual whom the President or the President-elect has publicly announced he intends to nominate to a position may file the report required by paragraph (1) at any time after that public announcement but not later than is required under the first sentence of such paragraph.".

ETHICS AGREEMENTS

SEC. 7. Title II is amended—

(1) by redesignating section 211 as section 212; and

(2) by inserting after section 210 the following new section:

"NOTICE OF ACTIONS TAKEN TO COMPLY WITH ETHICS AGREEMENTS

"SEC. 211. (a) In any case in which an individual agrees with that individual's designated agency official, the Office of Government Ethics, or a Senate confirmation committee to take any action to comply with this Act or any other law or regulation governing conflicts of interest of, or establishing standards of conduct applicable with respect to, officers or employees of the Government, that individual shall notify in writing the designated agency official, the Office of Government Ethics, or the appropriate committee of the Senate, as the case may be, of any action taken by the individuals pursuant to that agreement. Such notification shall be made not later than the date specified in the agreement by which action by the individual must be taken, or not later than three months after the date of the agreement, if no date for action is so specified.

"(b) If an agreement described in subsection (a) requires that the individual recuse himself or herself from particular categories of agency or other official action, the individual shall reduce to writing those subjects regarding which the recusal agreement will apply and the process by which it will be determined whether the individual must recuse himself or herself in a specific instance. An individual shall be considered to have complied with the requirements of subsection (a) with respect to such recusal agreement if such individual files a copy of the document setting forth the information described in the preceding sentence with such individual's designated agency official, the Office of Government Ethics, or the appropriate committee of the Senate, as the case may be, within the time prescribed in the last sentence of subsection (a).".

BLIND TRUST AMENDMENTS

SEC. 8. (a) Sections 102(e)(7), 202(f)(7), and 302(f)(7) are each amended to read as follows:

"(7) Any trust may be considered to be a qualified blind trust if—

"(A) the trust instrument is amended to comply with the requirements of paragraph (3) or, in the case of a trust instrument which does not by its terms permit amendment, the trustee, the reporting individual, and any other interested party agree in writing that the trust shall be administered in accordance with the requirements of this subsection and the trustee of such trust meets the requirements of paragraph (3)(A), except that in the case of any interested party who is a dependent child, a parent or guardian of such child may execute the agreement referred to in this subparagraph;

"(B) a copy of the trust instrument (except testamentary provisions), a copy of the agreement referred to in subparagraph (A), and a list of the assets held by the trust at the time of approval by the supervising ethics office, including the category of value of each asset as determined under subsection (d) of this section, are filed with such office and made available to the public as provided under paragraph (5)(D) of this subsection; and

"(C) the supervising ethics office determines that approval of the trust arrangement as a qualified blind trust is in the particular case appropriate to assure compliance with applicable laws and regulations.".

(b) Sections 102(e)(5)(A), 202(f)(5)(A), and 302(f)(5)(A) are each amended by adding at the end thereof the following new sentence: "This subparagraph shall not apply with respect to a trust meeting the requirements for being considered a qualified blind trust under paragraph (7) of this subsection.".

APPLICATION OF FINANCIAL DISCLOSURE REQUIREMENTS TO STAFF OF FEDERAL ADVISORY COMMITTEES

SEC. 9. Section 201 is amended by adding at the end thereof the following new subsection:

"(j)(1) Any individual who performs staff functions in support of an advisory committee which is composed, in whole or in part, of special Government employees shall be subject to the provisions of this title as if that individual were such a special Government employee.

"(2) For purposes of paragraph (1)—

"(A) the term 'advisory committee' means any committee, board, commission, council, conference, panel, task force, or other similar group which is established—

"(i) by statute or reorganization plan,

"(ii) by the President, or

"(iii) by one or more agencies,

in the interest of obtaining advice or recommendations for the President or one or more agencies or officers of the Federal Government; such term includes any subcommittee or other subgroup of an advisory committee, but does not include the Advisory Commission on Intergovernmental Relations and the Commission on Government Procurement;

"(B) the term 'staff functions in support of an advisory committee' means such activities as the Director of the Office of Government Ethics by regulation prescribes which are carried out with respect to those functions for which the advisory committee was established as described in subparagraph (A) of this paragraph;

"(C) the term 'special Government employee' has the meaning given that term by section 202 of title 18, United States Code; and

"(D) the term 'agency' has the meaning given that term by section 551(1) of title 5, United States Code.

"(3) The Director of the Office of Government Ethics shall prescribe such regulations as may be necessary to carry out this subsection.".

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

SEC. 10. Section 405 is amended in paragraph (2) by striking out "four" and inserting in lieu thereof "nine".

EFFECTIVE DATE

SEC. 11. The amendments made by this Act shall take effect on October 1, 1983.

The SPEAKER pro tempore. Is a second demanded?

Mr. KINDNESS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. SAM B. HALL, JR.) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. KINDNESS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Committee on the Judiciary and the Committee on Post Office and Civil Service have reported H.R. 2717 to the House and recommended that the House pass H.R. 2717 as amended.

The purposes of H.R. 2717 are to reauthorize and strengthen the independence of the Office of Government Ethics. In addition, H.R. 2717 clarifies and strengthens several provisions of the Ethics in Government Act of 1978.

H.R. 2717 was reported by the Committee on the Judiciary on May 5, 1983. On May 16, 1983, the Committee on Post Office and Civil Service reported the bill with one substantive and several technical amendments. Since that time, the two committees have worked together to produce the compromise version of the bill which is before the House today.

I would like to express my appreciation to the chairman of the Post Office and Civil Service Committee (Mr. FORD) and to the gentleman from Michigan, chairman of the Human Resources Subcommittee (Mr. ALBOSTA) for their diligent work and assistance in producing this bill. I would also like to thank Mr. KINDNESS, the ranking minority member of the Subcommittee on Administrative Law and Governmental Relations for his assistance in working for his assistance in working on this legislation.

At the end of my statement, it is my intention to yield to the distinguished gentleman from Michigan (Mr. ALBOSTA) who will be handling the bill for the Committee on Post Office and Civil Service.

In 1977, the General Accounting Office studied executive branch procedures for applying and interpreting financial disclosure and conflict of interest requirements. GAO concluded that these procedures were inadequate and recommended that Congress establish an Office of Government Ethics as a central office to oversee

and improve the overall ethics program in the executive branch.

In response to this recommendation, the Congress included the establishment of the Office of Government Ethics as title IV of the Ethics in Government Act of 1978. Since 1978, this office has effectively and efficiently carried out its responsibilities under the law.

The Office of Government Ethics is responsible for providing overall direction of executive branch policies related to conflicts of interest. The Director of the Office is appointed by the President of the United States with the advice and consent of the Senate. Organizationally, the Office is located within the Office of Personnel Management.

The Office has a number of specific responsibilities under the act. These include: Implementing the executive branch financial disclosure requirements of the act; developing regulations regarding postemployment restrictions; monitoring and investigating executive agencies' ethics programs; interpreting rules and regulations concerning standards of conduct; and establishing a formal advisory opinion service for the executive branch.

The Office works closely with the Department of Justice on conflict-of-interest matters. It also works closely with the ethics officers of the various agencies and departments, acting as an adviser regarding the issues within the Office's jurisdiction.

The Ethics in Government Act authorized the appropriation of $2 million a year for the Office of Government Ethics through the end of fiscal year 1983. OGE's funding, which comes from appropriations to the Office of Personnel Management, has never reached this level. The Office's funding level for salaries and expenses for fiscal year 1983 is $1,016,000. The administration has proposed that the funding level of 1984 be $1,093,000.

One of the main purposes of H.R. 2717 is to reauthorize the Office of Government Ethics for a period of 5 years. This reauthorization would be continued at the current level of $2 million per year. Both the Judiciary Committee and the Post Office Committee have determined that this Office has carried out its responsibilities in a responsible manner and that it should continue to perform its important work.

During the course of consideration of the reauthorization of the Office of Government Ethics, the Judiciary and Post Office Committees inquired into the status of the Office of Government Ethics in relation to the Office of Personnel Management, of which the Office of Government Ethics is a part. After examining this relationship, both committees included provisions in H.R. 2717 to strengthen the independence of the Office of Government Ethics in two ways.

First, under current law, the Office can only recommend ethics regulations to the Office of Personnel Management, which is responsible for their issuance. H.R. 2717 grants the Office the authority to independently issue ethics regulations.

Second, H.R. 2717 strengthens the Office of Government Ethics by requiring that the President of the United States include a line item for the Office in his budget. The purpose of this provision is to assure that both the President and Congress consider the appropriate level of funding for OGE.

In addition to reauthorizing and strengthening the Office of Government Ethics, H.R. 2717 clarifies and strengthens other provisions of the Ethics in Government Act as they apply to officers and employees of the executive branch. Specifically, the bill—

Requires that the financial disclosure and outside income limitations are the same for high-level White House aides as for similarly situated Senate-confirmed Presidential appointees;

Provides a statutory basis for Office of Government Ethics' review of financial disclosure forms during Presidential transitions;

Requires Senate-confirmed Presidential nominees to update earned income information at the time of their confirmation hearing;

Requires reporting individuals who made agreements to divest or recuse themselves to affirmatively notify authorities when these actions are taken;

Clarifies the requirements for the blinding of certain trusts; and

Requires any individual who performs staff functions in support of an advisory committee whose membership includes one or more special Government employees (as defined by section 202 of title 18, United States Code) to file financial disclosure forms as if he were a special government employee.

The provision which imposes financial disclosure requirements on certain staff members of advisory committees is contained in section 9 of H.R. 2717. The Judiciary Committee version of H.R. 2717 did not contain any provision relating to advisory committees. However, the Post Office Committee version of the bill did contain such a provision. Section 9 of H.R. 2717 as it is before the House today sets forth the compromise reached by the two committees on this provision.

The intent of section 9 is to require financial disclosure by individuals who devote a substantial amount of time to assisting an advisory committee in carrying out the functions for which it was established. The section is not intended to cover individuals who have only a casual relationship with a committee. For example, the personal secretary of a corporate executive serving on an advisory committee should not be required to file simply because the secretary arranges meetings or types material which the executive uses in fulfilling advisory committee responsibilities. On the other hand, in the case of an individual who devotes substantial amount of time and effort conducting research, developing draft reports or recommendations, or assisting in policy formulation for the advisory committee, disclosure may be appropriate.

As a practical matter, existing law already distinguishes very effectively between individuals who have a casual role and those who may actually affect recommendations or actions. First 201(h) of the act excludes from filing requirements individuals who work less than 60 days in a calendar year. Second, even in an individual exceeds the 60-day limit, section 202(f) provides filing is not required unless the position held by the individual is determined to be a grade GS-16 or equivalent position. The bill does not affect these existing limitations on who must file.

Finally, under section 9, the Director of the Office of Government Ethics is authorized to define, by regulation, the term "staff functions in support of an advisory committee," and safeguard to insure the section 9 requirements do not become onerous.

Mr. Speaker, H.R. 2717 as amended reflects the joint efforts of the Committee on the Judiciary and the Committee on Post Office and Civil Service. H.R. 2717 will assure that the Office of Government Ethics will continue for the next 5 years to perform its duties. Since its creation, this Office has performed in a commendable fashion. In a most professional manner, it has assisted executive branch employees in complying with ethics and conflict-of-interest laws. It has also helped increase public confidence in the fair operation of the Federal Government. The changes made by H.R. 2717 to the other provisions of the Ethics in Government Act are needed to strengthen and clarify its requirements. Therefore Mr. Speaker, I urge adoption of this bill.

Mr. Speaker, at this point I would like to submit for the RECORD a section-by-section analysis of the compromise version of H.R. 2717 which is before the House today.

SECTION-BY-SECTION ANALYSIS OF H.R. 2717

SECTION 1: AMENDMENTS TO ETHICS IN GOVERNMENT ACT OF 1978

This section states that all amendments contained in this bill are amendments to the Ethics in Government Act of 1978.

SECTION 2: AUTHORITY OF THE DIRECTOR

This section amends sections 402 and 404 of the Ethics in Government Act to author-

ize the Director of the Office of Government Ethics to issue regulations pertaining to financial disclosure, conflicts of interest, and ethics in the executive branch. The Director is required to consult with the Office of Personnel Management (OPM) regarding the issuance of these regulations since OPM is generally responsible for employee discipline within the Executive Branch.

SECTION 3: SEPARATE BUDGET LINE ITEM FOR THE OFFICE OF GOVERNMENT ETHICS

This section adds a new section 407 to the Ethics in Government Act to require the President to include in the budget he submits to Congress a separate line item for the Office of Government Ethics. Presently, the Office of Government Ethics has no separate line item because its budget is included in the general budget for the Office of Personnel Management. This requirement assures Presidential and Congressional consideration of the appropriate level of funding for the Office.

SECTION 4: REVIEW OF FINANCIAL DISCLOSURE REPORTS OF HIGH LEVEL WHITE HOUSE AIDES

This section amends section 203 of the Ethics in Government Act to include high level White House Aides among those officials whose financial disclosure forms are filed with the Office of Government Ethics. Presently, these officials file only with the White House ethics official.

SECTION 5: LIMIT ON OUTSIDE EARNED INCOME FOR HIGH LEVEL WHITE HOUSE AIDES

This section amends section 210 of the Ethics in Government Act to extend the fifteen percent (15%) limit on the outside earned income to high level White House aides.

SECTION 6: REPORTS BY PRESIDENTIAL NOMINEES

This section amends section 201(b) of the Ethics in Government Act to require presidential nominees who must be confirmed by the Senate to update their financial disclosure information at the time of their first confirmation hearing. This requirement would apply only to earned income and honoraria as defined in section 202(a)(1)(A) of the Act that has been received as of 5 days prior to the hearing.

In addition, this section adds a new paragraph (2) to section 201(b) to provide a statutory basis for the Office of Government Ethics to review the financial disclosure forms of those persons whom a president or a president-elect has designated to be his nominee prior to their official nomination.

SECTION 7: NOTICE OF ACTIONS TAKEN TO COMPLY WITH ETHICS AGREEMENTS

This section adds a new section 211 to the Ethics in Governments Act to address those situations where an official or employee has made an agreement with an agency ethics official, the Office of Government Ethics, or a Senate confirmation committee to take certain actions to come into compliance with ethics requirements (for example, an agreement to divest or to recuse himself from involvement in certain matters).

This section requires the official or employee to notify the one with whom he made the agreement when he has complied with that agreement. If the agreement requires the individual to recuse himself from certain categories of decisions, notification will consist of filing a list of the subjects to which the recusal agreement will apply and a description of the process by which it will be determined whether a recusal is necessary in a specific instance.

SECTION 8: BLIND TRUST AMENDMENT

This section amends sections 102(e)(7), 202(f)(7), and 302(f)(7) of the Ethics in Government Act. These sections concern the "blinding" of existing trusts. The Office of Government Ethics recommended these changes because it has found the current provisions to be unworkable. These sections as rewritten would provide that existing trusts can be considered to be blind trusts if the following criteria are met:

(1) The trust instrument must be amended to comply with the same requirements that must be met by a newly created trust. If the trust instrument does not by its terms permit amendment, the trustee, the reporting individual, and any other interested parties must agree that the trust will be administered in accordance with those requirements.

(2) A copy of the trust instrument, copy of the agreement described in paragraph (1), and a list of the trust assets at the time of approval of the agreement must be filed with the supervising ethics office.

(3) The supervising ethics office must determine that the agreement regarding the trust assures compliance with the applicable ethics laws and regulations.

SECTION 9: APPLICATION OF FINANCIAL DISCLOSURE REQUIREMENTS TO STAFF OF FEDERAL ADVISORY COMMITTEES

This section adds a new subsection 201(j) to the Ethics in Government Act to require an additional group of individuals to file public financial disclosure reports. Any individual who performs staff functions in support of an advisory committee whose membership includes one or more special government employees (as defined by section 202 of title 18, United States Code) will be required to file as if they were a special government employee.

Thus, if the individual is employed in excess of sixty days in a calendar year and performs functions similar to those of a federal employee who is classified at GS-16 or G-7 or above, as determined by the Office of Government Ethics, the individual will be required to file the public financial disclosure report described in section 202 of the Act.

The amendment requires the Director of the Office of Government Ethics to prescribe regulations to implement this new subsection.

SECTION 10: EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

This section amends section 405 of the Ethics in Government Act to extend the authorization of appropriations for the Office of Government Ethics for five years at the current rate of $2 million for each year.

SECTION 11: EFFECTIVE DATE

The effective date for this Act is October 1, 1983.

□ 1240

Mr. KINDNESS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in March of this year the Judiciary Subcommittee on Administrative Law and Governmental Relations held hearings on the appropriations authorization for the Office of Government Ethics. This provided an opportunity for us to review the operations of the Office of Government Ethics since its inception in 1978. We heard from the agency itself, from the General Accounting Office and from Common Cause, which has taken an active interest in ethics in Government if not elsewhere.

All of the testimony we heard can be summarized in one sentence: "The Office of Government Ethics is working well and is effectively monitoring ethics within the executive branch of the Federal Government." I think it is significant that a newly created agency, dealing with the difficult and sometimes delicate problems relating to ethics and financial disclosure, has achieved such a high degree of credibility and respect.

The subcommittee was unanimous in its judgment that the Office of Government Ethics should be reauthorized for 5 years.

As with any new agency, however, we found that there were sections of the law and ethics which needed clarification or further definition. We concurred with the Senate that the agency should have a separate line item in the Presidential budget, and that the Office of Personnel Management should comment upon but not veto Office of Government Ethics regulations.

I am not certain personally that there was a strong need for that change in view of the functioning of the Office of Government Ethics up to this point, but it was suggested that this change would strengthen its functioning.

Our subcommittee added language regarding blind trusts, to make it possible for existing trusts to be blinded when an individual accepts Government employment. We also added language authorizing OGE participation in Presidential transitions, in effect ratifying its activities during 1981, and authorizing such activities for the future.

We rejected two other amendments, changing the structure of the OGE which were both unnecessary and unwise. The most significant of these would have given the OGE Director a fixed term, with the President limited to removal of the Director for cause only. Beyond the very serious constitutional problem with such a limitation on the power of the President over an executive function, an obvious double standard would be created since both the Congress and the Federal judiciary would control their own ethics functions, while the executive branch would lose such authority. The Judiciary Committee concluded that there is little reason to make such substantial structural changes in an agency when the current structure works.

The bill which is before you today is a compromise between the Judiciary Committee and the Post Office and Civil Service Committee. Because it is a compromise, the bill is not exactly as I would like to see it—that is the

nature of a compromise. Specifically, I do not like the amendment which requires some advisory committee staff members, who are not paid by the Government, to file financial disclosure statements. That kind of intrusion seems to me to discourage the active involvement of private sector people in Government, at a time when we need their advice.

But in the spirit of compromise, I urge my colleagues to support this bill, to insure that the important work of the Office of Government Ethics continues.

In addition I would also like to express my appreciation for the attention and guidance given to this legislation by the gentleman from Texas (Mr. SAM B. HALL), chairman of the Subcommittee on Administrative Law and Governmental Operations.

I think the support of the House of Representatives will be very great and I certainly urge passage under suspension of the rules of H.R. 2717.

Mr. Speaker, I reserve the balance of my time.

Mr. SAM B. HALL, JR. Mr. Speaker, I yield as much time as he may consume to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Speaker, we bring before the House today a bill to reauthorize the Office of Government Ethics for 5 years. This bill also makes a number of improvements in the Ethics in Government Act of 1978.

The first hearing in the 98th Congress by the Subcommittee on Human Resources dealt with the operation of the Office of Government Ethics and the act. At that session, loopholes in the Ethics in Government Act were discovered, and I am pleased that amendments to close those gaps are included in H.R. 2717.

While committee action was completed on this legislation on May 11, 1983, it had been my hope that the investigation into the unauthorized transfer of information from the Carter administration to the Reagan campaign would have been completed to allow us the opportunity to amend this bill and include any changes that may be necessary to discourage such unethical conduct by Federal employees.

That inquiry is not yet complete. Since the Office of Government Ethics will expire without congressional action on September 30, 1983, Chairman HALL and I agreed that we must move this legislation to the floor for passage. The Senate has already passed its version of this bill.

When the current inquiry of the subcommittee is complete, the results may well require that we turn our attention to the Ethics in Government Act again in the not-too-distant future.

One set of concerns raised regards the law and standards of conduct affecting Federal employees' stewardship of Government property and information and the use of their positions for personal gain. Are those standards adequate? Are they understood, enforced, or enforceable at all?

We may also be forced to return to the act to review such things as the confidential financial disclosure requirements, and the general understanding of executive branch employees about their standards of conduct, and to make amendments that may be appropriate.

The Office of Government Ethics and the White House are in the process of preparing a new executive order concerning financial disclosure requirements. This order may address questions that have arisen about the confidential disclosure requirements and systems that predate the 1978 act. Until the executive order is issued, or new regulations are promulgated by the OGE, the instructions that the OGE has issued to agencies to continue existing systems will be understood to reflect the executive branch interpretation of the law. The new executive order may recognize that specific information required by particular agencies or programs that is not available through general financial disclosure requirements is an important part of our financial disclosure system.

In any case, since we have not had the chance to review the act as interpreted and affected by the anticipated executive order, it may be necessary to return to the act for that purpose.

The bill before us today represents a bipartisan consensus of the Post Office and Civil Service Committee and the Judiciary Committee. I would like to commend Mr. CRANE, the ranking minority member of the Subcommittee on Human Resources, for his work on this legislation. Additionally, I would like to thank the chairman of the subcommittee on administrative law, Mr. HALL, for his efforts to work out this compromise legislation between the two subcommittees.

In addition to reauthorizing the Office of Government Ethics, we have included in the bill a number of improvements in the act. The bill provides greater independence for the OGE by providing the Office authority to issue its own regulations. Currently, any regulations must be approved by the Office of Personnel Management. It provides a line item in the President's budget for the OGE to insure that any reductions for the Office in the budget will be clearly visible for congressional review.

This bill also closes gaps in the law that were identified at the subcommittee hearing. It requires that information about the income of Presidential nominees be made current before their confirmation hearings. It requires that if agreements are made by Government officials to withdraw from meetings or actions where there could be a conflict of interest, then these agreements should be in writing and filed with their agencies to provide notice.

It also requires individuals to report when they have taken actions to comply with agreements made under the law to divest themselves of conflicting interests or to place those interests in a blind trust.

The bill clarifies the process for establishing blind trusts and corrects administrative problems in the act in regard to blind trusts.

In conclusion, I believe it is important that the ethics law governing the conduct of Federal employees should be as strong as possible. I have continually said that this law should be strong enough to discourage unethical conduct, without being so strong that it actually discourages quality people from serving their government. This is a fine distinction. I believe the bill before us makes that distinction. I urge its passage.

□ 1250

● Mr. FORD of Michigan. Mr. Speaker, I rise in support of H.R. 2717, a bill to amend the Ethics in Government Act of 1978.

This bill has been worked out through the cooperation of the Committee on Post Office and Civil Service and the Committee on the Judiciary. While it does not, and could not, address some of the ethical concerns which the gentleman from Michigan's (Mr. ALBOSTA) subcommittee is currently looking into, it does plug some loopholes we found in the 1978 act, and, most importantly, it does reauthorize the Office of Government Ethics (OGE) for 5 more years. Unless we act expeditiously on this legislation, OGE will go out of business on September 30.

I would like to direct the Members' attention to section 9 of the bill concerning the application of financial disclosure requirements to staff of Federal advisory committees. This provision was added as the result of an amendment I offered in committee and is intended to address the problems we encountered with the President's private sector survey on cost control, the so-called Grace Commission. As a result of discussions with the gentleman from Texas (SAM B. HALL, JR.), we have slightly modified the definition of "advisory committee" in section 9.

I am sure most Members by now are familiar with the Grace Commission. My Subcommittee on Investigations looked into the Grace Commission situation. What we found was an extraordinarily complicated organization which appeared to have been set up primarily to avoid the applicability of the Federal Advisory Committee Act, the criminal conflict-of-interest laws,

and the financial disclosure requirements of the Ethics in Government Act.

The survey itself consisted of about 150 top corporate executives and, by Executive order, the survey was designated as a Federal advisory committee. The advisory committee, however, was inactive. Instead a private foundation was established. This private foundation made use of over 1,000 corporate volunteers. These volunteers did the real work of the survey poking into every nook and cranny of the Federal Government ostensibly to find ways to increase Government efficiency. The foundation, it was claimed, was private and was not an advisory committee. The volunteers, it was claimed, were not staff of an advisory committee since they worked for the foundation. As a result, it was claimed, the Federal Advisory Committee Act, the criminal conflict-of-interest laws, and the Ethics Act were inapplicable, and the protections these laws provide to the public were not available.

Section 9 attempts to address this situation, at least so far as the applicability of the Ethics Act is concerned.

Section 9 amends the act to add a new section 201(j) which requires an additional group of individuals to file public financial disclosure reports. The amendment provides that any individual who performs staff functions in support of an advisory committee whose membership includes one or more special Government employees shall be considered a special Government employee—as defined by section 202 of title 18, United States Code—for purposes of the financial reporting requirements of title II of the act.

Thus, if the individual is employed in excess of 60 days in a calendar year and his position is classified at GS-16 or above or, in the case of the uniformed services at 0 to 7 or higher, or if the Office of Government Ethics determines that the individual's position is of equal classification, he will be required to file the public financial disclosure report described in section 202.

The intent of section 9 is to require financial disclosure by individuals who devote a substantial amount of time to assisting an advisory committee in carying out the functions for which it was established. The section is not intended to cover individuals who have only a casual relationship with a committee. For example, the personal secretary of a corporate executive serving on an advisory committee should not be required to file simply because the secretary arranges meetings or types material which the executive uses in fulfilling advisory committee responsibilities. On the other hand, in the case of an individual who devotes substantial amount of time and effort conducting research, developing draft reports or recommendations, or assisting in policy formulation for the advisory committee, disclosure may be appropriate.

As a practical matter, existing law already distinguishes very effectively between individuals who have a casual role and those who may actually affect recommendations or actions. First, section 202(h) of the act excludes from filing requirements individuals who work less than 60 hours in a calendar year. Second, even if an individual exceeds the 60-day limit, section 202(f) provides filing is not required unless the position held by the individual is determined to be a grade GS-16 or equivalent position. The bill does not affect these existing limitations on who must file.

Finally, the Director of the Office of Government Ethics is authorized to define, by regulation, the term "staff functions in support of an advisory committee," another safeguard to insure the section 9 requirements do not become onerous.

Mr. Speaker, H.R. 2717 is a good bill which addresses those problems we are currently aware of. If, as a result of recent revelations concerning possible unethical conduct of Government employees, additional actions need to be taken, I assure the Members they will be taken at the appropriate time. Right now, however, we need to pass this bill to insure the continued functioning of the Office of Government Ethics. I urge my colleagues to support this legislation.●

Mr. SAM B. HALL, JR. Mr. Speaker, I would like for the record to reflect that the administration supports enactment of H.R. 2717.

Mr. Speaker, I reserve the balance of my time.

Mr. KINDNESS. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I had hoped that today would not be the occasion for comments to be made about an investigation which has been described by the gentleman from Michigan. It is not the occasion for the discussion of such matters, but before we go to discussing matters of that sort which are said to have something to do with the Ethics in Government Act, and they do not inasmuch as we are talking about an area in that investigation, as I understand it, which is concerned with campaigns and campaign laws and the ethics of campaigns and non-Government employees or people who are not governmental employees at the present time. I would certainly not like to cast any shadow over the bill that is pending before the House, H.R. 2717, by expressing dissent about the contest of the debate today, but before we go talking about matters of the content of that investigation, we might very well bring up and clarify before this House of Representatives how we are going to deal with ethical questions such as "Altergate."

It is all very well to talk about ethics in Government if you are talking about somebody else. Let us talk about our House and cleaning up its problems if we are going to be talking about ethical matters.

I regret that this was brought into the discussion on H.R. 2717 today, but if we are going to tighten up on ethics considerations and provisions of law in any area, let us start right here in the House of Representatives.

● Mrs. SCHROEDER. Mr. Speaker, Congress devoted a great deal of time and effort to the passage of the Ethics in Government Act in 1978. We passed this legislation to eliminate conflicts of interest, require public disclosure of financial interests, and insure appointment of a special prosecutor when high officials were the subject of allegations of wrongdoing. In drafting that legislation, we tried to strike a balance between the need for a Government of integrity and the fear that would lose high quality individuals if we made the restrictions on Government service too onerous.

After 4 years of watching this act in operation, it has become obvious that we sacrificed too much to our concern about scaring away prospective public servants. I know of no documented case of individuals refusing Government service because of the requirements of the Ethics in Government Act. But there are, for sure, dozens of cases of questionable ethical conduct by political appointees of the Reagan administration which have occurred while the Office of Government Ethics has stood on the sidelines with no role to play.

The Wall Street Journal of June 24, 1983, states that, when asked about all the charges of ethical misconduct that have swirled around the Reagan administration, a senior White House aide sighs and says: "If only you knew about all the things I've been able to kill before you heard of them." Last May, I put together a rather sobering list of over 50 cases of alleged criminal wrongdoing, abuse of power and privilege, and unethical behavior of Reagan administration appointees. The quote in the Journal suggests that my list is woefully incomplete. The extent and variety of well-documented misdeeds within the current administration proves that a stronger eithics law is needed.

H.R. 2717 strengthens the act by providing greater independence for the Office of Government Ethics, by extending the reach of the act to include top While House officials, and by clarifying the requirements for blind trusts.

I strongly support H.R. 2717, and I urge its swift passage. But legislation alone can not insure high standars of conduct. The single most critical factor is an administration which

takes seriously its mission of public service and takes care to appoint only those individuals who can conduct themselves in an ethical and principled manner.●

Mr. SAM B. HALL, JR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. KINDNESS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. SAM B. HALL, JR.) that the House suspend the rules and pass the bill, H.R. 2717, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service and the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 461) to extend the authorization of appropriations for the Office of Government Ethics for 5 years, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 461

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO ETHICS IN GOVERNMENT ACT OF 1978

SECTION 1. Except as otherwise expressly provided in this Act, whenever an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Ethics in Government Act of 1978.

FIVE YEAR TERM FOR DIRECTOR

SEC. 2. Section 401(b) is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", and who shall serve for a term of five years. The Director shall be removed from office only for good cause.".

UPGRADING DIRECTOR OF OFFICE OF GOVERNMENT ETHICS TO LEVEL III

SEC. 3. Section 406 is amended to read as follows:

"ANNUAL PAY

"SEC. 406. (a) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following:

" 'Director of the Office of Government Ethics.'.

"(b) Section 5316 of title 5, United States Code, is amended by striking out the item:

" 'Director of the Office of Government Ethics.'.".

AUTHORITY TO ISSUE REGULATIONS

SEC. 4. (a) Section 402(a) is amended by striking out ", under the general supervision of the Office of Personnel Management,".

(b) Section 402(b) is amended—

(1) in clause (1)—

(A) by striking out "and recommending to the Office of Personnel Management"; and

(B) by striking out "President or the Office of Personnel Management" and inserting in lieu thereof "President or the Director";

(2) in clause (2)—

(A) by striking out "and recommending to the Office of Personnel Management"; and

(B) by striking out "President or the Office of Personnel Management" and inserting lieu thereof "President or the Director";

(3) in clause (6) by striking out "Office of Personnel Management" and inserting in lieu thereof "Director";

(4) in clause (12) by striking out "Office of Personnel Management" and inserting in lieu thereof "Director"; and

(5) in clause (15) by striking out "and recommending for promulgation by the Office of Personnel Management" and inserting in lieu thereof "and promulgating".

(c) Section 404 is amended by striking out "Office of Personnel Management" and inserting in lieu thereof "Director".

SEPARATE LINE ITEM FOR OFFICE OF GOVERNMENT ETHICS

SEC. 5. (a)(1) Section 1105(a) of title 31, United States Code, is amended by adding at the end thereof the following new paragraph:

"(25) a separate statement specifying the estimated expenditures and proposed appropriations the President decides are necessary to support the Office of Government Ethics in the fiscal year for which the budget is submitted and the four fiscal years after that year.".

(2) The second sentence of section 1106(b) of such title is amended by inserting a comma and "(a)(25)," after "section 1105(a)(1)(14)".

(b)(1) Notwithstanding any other provision of law or of the Standing Rules of the Senate or the Rules of the House of Representatives, it shall not be in order in the Senate or the House of Representatives to consider any bill, resolution, amendment, or any conference report on any bill or resolution, which provides appropriations for the Office of Government Ethics unless such bill, resolution, or conference report contains a separate provision specifying, or such amendment amends a separate provision of a bill or resolution specifying, or inserts into a bill or resolution a separate provision specifying, the amount appropriated for such Office.

(2) The provisions of paragraph (1) are enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

USE OF INSPECTORS GENERAL

SEC. 6. Section 403 is amended by inserting at the end thereof the following: "The authority of the Director under this section includes the use of the Inspectors General to investigate possible conflicts of interest and to conduct audits at the request of the Director.".

REPLACEMENT OF AGENCY ETHICS OFFICIALS

SEC. 7. Section 402(b) is amended by—

(1) striking out "and" at the end of clause (14);

(2) striking out the period at the end of clause (15) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following:

"(16) recommending the replacement of any agency ethics official where such official fails to properly and effectively perform his or her duties.".

OGE REVIEW OF FINANCIAL DISCLOSURE BY HIGH LEVEL WHITE HOUSE AIDES

SEC. 8. (a) Section 203(c) is amended by adding after "designated agency officials," the following: "employees of the White House Office who are compensated at or above a rate equivalent to level II of the Executive Schedule under section 5313 of title 5, United States Code,".

LIMIT ON OUTSIDE EARNED INCOME FOR TOP WHITE HOUSE AIDES

SEC. 9. Section 210 is amended by inserting after "consent of the Senate," the following: "and employees of the White House Office who are compensated at or above a rate equivalent to level II of the Executive Schedule under Section 5313 of title 5, United States Code.".

BLIND TRUST AMENDMENTS

SEC. 10. (a) Section 202(f)(4)(B) is amended by striking out "appointed to office by the President, by and with the consent of the Senate".

(b) Section 202(f)(7) is amended by—

(1) striking out clause (A);

(2) redesignating clause (B) as clause (A) and amending it to read as follows:

"(A) the trust is amended to comply with requirements of paragraph (3) or, if such trust instrument does not by its terms permit amendment, all parties to the trust instrument, including the reporting individual and the trustee, agree in writing that the trust shall be administered in accordance with the requirements of paragraph (3)(C) and a trustee is (or has been) appointed who meets the requirements of paragraph (3); and"; and

(3) redesignating clause (i) as clause (B).

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

SEC. 11. Section 405 is amended in clause (2) by striking out "four" and inserting in lieu thereof "nine".

EFFECTIVE DATE

SEC. 12. The amendments made by this Act shall be effective on October 1, 1983.

MOTION OFFERED BY MR. SAM B. HALL, JR.

Mr. SAM B. HALL, JR. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. SAM B. HALL, Jr., moves to strike out all after the enacting clause of the Senate bill, S. 461, and to insert in lieu thereof the provisions of the bill, H.R. 2717, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An Act to amend the Ethics in Government Act of 1978 to make certain changes in the authority of the Office of Government Ethics, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2717) was laid on the table.

GENERAL LEAVE

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

FEDERAL PHYSICIANS COMPARABILITY ALLOWANCE AMENDMENTS OF 1983

Ms. OAKAR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2077), to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes.

The Clerk read as follows:

H.R. 2077

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Physicians Comparability Allowance Amendments of 1983".

SEC. 2. Section 5948(d) of title 5, United States Code, is amended—

(1) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985"; and

(2) by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1987".

SEC. 3. Section 3 of the Federal Physicians Comparability Allowance Act of 1978 (Public Law 95-603; 92 Stat. 3018) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1987".

SEC. 4. (a) Any service agreement entered into on or after the date of the enactment of this Act pursuant to section 5948 of title 5, United States Code, as amended by section 2 of this Act, shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

(b) The amendments made by this Act shall not be construed to authorize additional or supplemental appropriations for the fiscal year ending September 30, 1983.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Ohio (Ms. OAKAR) will be recognized for 20 minutes, and the gentleman from California (Mr. DANNEMEYER) will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2077 and the Federal physicians comparability allowance program.

This bill amends title 5 of the United States Code to extend the Federal Physicians Comparability Allowance Act of 1978, which has already been extended twice, in 1979 and 1981. In particular, H.R. 2077 extends for 2 years, until September 30, 1985, the period during which the heads of agencies may enter into service agreements with physicians in exchange for special allowances. It also extends for 2 years, until September 30, 1987, the period of service which may be covered by such agreements. The bill explicitly provides that no additional or supplemental appropriations may be authorized for fiscal year 1983. In fact, all H.R. 2077 does is simply continue an existing program.

The Federal Physicians Comparability Allowance Act was enacted in the 95th Congress (Public Law 95-603). It authorized the heads of agencies to determine categories of physicians in which a significant recruitment and retention problem exists. The agencies may then enter into service agreements with Government physicians in these categories under which the physicians will agree to remain with the agencies in return for special allowances. The maximum annual allowance is $7,000 per year for a physician who has served 2 years or less and up to $10,000 per year if the physician has served for more than 2 years. These bonuses increase physicians' total compensation above their scheduled salary. Under current law, the authority to enter into these service agreements will expire on September 30, 1983, and no agreement entered into by that date may extend beyond September 30, 1985.

Under the General Schedule and certain other allied pay plans, the Federal Government currently employs almost 3,000 physicians in various categories or specialties. Of these, almost 1,300 physicians, or approximately 43 percent, receive comparability allowances that average $8,570. The Department of Health and Human Services is the largest employer of physicians, working in the U.S. Public Health Service, the National Institutes of Health, the Food and Drug Administration, and similar agencies. The Armed Forces are the next largest employers, supplementing their military cadre of physicians with almost 1,000 civilian doctors.

Regulatory responsibility for this program has been delegated by the President to the Director of the Office of Personnel Management (OPM), who must act in consultation with the Office of Management and Budget. One of OPM's responsibilities is to collect information on the administration and effects of the physicians' comparability allowance program. In May of this year, OPM released a report on the program which contained information from the 27 agencies who employ Federal physicians and statistical information on the program since 1980. None of the 27 agencies opposed renewal of the program, and OPM found that the need for the program continues. OPM cited the continuing difficulty that Federal agencies are having in recruiting and retaining physicians, given the higher pay that is available to physicians outside the Federal Government and in Federal agencies with separate authorities for physicians' pay and bonuses. The administration, therefore, supports H.R. 2077 and the continuation of the physicians' comparability allowance program, as does the General Accounting Office.

Mr. Speaker, if Congress does not extend this authority, our Federal physicians will flee the system, and agencies will find it increasingly difficult to recruit and retain physicians in the Federal service. These physicians play an important role in the health of our Nation, and I urge my colleagues to pass H.R. 2077.

□ 1300

Mr. Speaker, I reserve the balance of my time.

Mr. DANNEMEYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I wish to join the gentlelady from Ohio, the distinguished Chair of our Compensation and Employee Benefits Subcommittee, in supporting H.R. 2077, the "Federal Physicians Comparability Allowance Act of 1983."

This is a long title for a small program with a good purpose. Briefly, this bill continues for 2 years a 1978 program of extra allowances for some 1,300 Federal physicians whose jobs are hard to fill or to keep filled without extra pay. Both the Office of Management and Budget and the Office of Personnel Management support this 2-year reauthorization.

In fiscal year 1982, this program cost some $10.9 million. The Congressional Budget Office estimates that new service agreements in 1984 will require no more than $500,000, and for 1985, no more than $1 million. Budget authority beyond our first budget resolution is not required for this program since fiscal year 1984 and fiscal year 1985 spending have already been counted in budget projections. Although this bill was not reported by May 15 as provided in the Budget Act, I am advised that the House Budget Committee approves of its consideration today.

The problem addressed by this program is not a shortage of applicants

for these jobs. The problem is a current shortage of qualified specialists. OPM has found that over 3 years, the staffing success rate has fallen from 60 percent to 38 percent. Staffing success rate is the number of jobs filled over the number of jobs open.

Members may be interested to know briefly how this program works. First, this program covers only 2,966 Federal physicians. This excludes the vast number of physicians covered separately by the VA and the Defense Department. Of the 2,966, some 1,298 work for the Health and Human Services Department. Most of the M.D.'s works as clinicians and researchers. Only a few are involved in occupational health jobs.

Second, this is not an entitlement program. Of the 2,966 positions eligible for the allowance or "PCA," only 43 percent receive it. Federal managers, under OPM rules, determine which positions require an extra allowance ranging from $7,000 to $10,000. The average PCA in 1982 was $8,570. A VA study of average physicians pay reports that average pay of the PCA population—without the PCA—was $56,300; uniformed services physicians received a base pay of $73,200; HMO's paid an average of $78,500, and medical schools paid an average of $85,900.

Finally, I should reiterate that this legislation lasts only 2 years. OPM notes that there will be a 43-percent increase in the U.S. physician supply between 1978 and 1990 and, accordingly, urges that legislation be short term. Again, I thank the gentlelady for her leadership on this issue and urge my colleagues to swiftly approve this legislation.

Mr. DANNEMEYER. Mr. Speaker, I have no other requests for time, and I yield back the balance of my time.

Ms. OAKAR. Mr. Speaker, I simply want to thank the distinguished minority member, the gentleman from California (Mr. DANNEMEYER), for his fine cooperation, and also the chairman of our full committee for his cooperation.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Ohio (Ms. OAKAR) that the House suspend the rules and pass the bill, H.R. 2077.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on H.R. 2077, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. SMITH of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3222) making appropriations for the Departments of Commerce, Justice, and State, the judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Illinois (Mr. O'BRIEN) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

Mr. WALKER. Mr. Speaker, reserving the right to object, I would like to know, at the outset, what our plans are in terms of debate. I understand there will be general debate for an hour under the unanimous consent request. Is it the gentleman's intention then to go through the bill section by section so that appropriate points of order can be raised?

Mr. SMITH of Iowa. Mr. Speaker, if the gentleman will yield, it would be my intent to go through the bill section by section. However, if there are no amendments for several pages, I would ask unanimous consent to consider the bill as read for those pages up to the next amendment that I know of. If any Member who has an amendment will just tell me, I will not try to go beyond that.

Mr. WALKER. Is it the gentleman's intention to permit fund-limitation amendments to be offered at the conclusion of the bill?

Mr. SMITH of Iowa. No. At the end of the bill I intend to move that the Committee rise, and the reason is that there is not just one amendment in the nature of a nonlegislative limitation. As the gentleman knows, there are half a dozen amendments that Members want to offer. I just believe that at this point it would be the better part of wisdom to move to rise rather than have those amendments today.

□ 1310

Mr. WALKER. Further reserving the right to object, Mr. Speaker, there are a number of important items in this bill that relate to matters now before us. For example, there could be fund limitations offered to do something about those nations that voted against us at the United Nations the other day on the Korean Air Lines incident in the State Department portion of this bill. By precluding amendments of that type being offered, the gentleman rules out this House taking appropriate action.

Some Members might want to do something about the situation in Lebanon with fund limitations in this bill, and that is going to be precluded. I have regularly offered a school prayer amendment to this bill that has been adopted by the House on three occasions. That would be precluded by the gentleman's motion.

As the gentleman knows, the bill is filled with places where points of order could be raised, and it seems to me we jeopardize the bill itself with the idea that some of those points will be raised if we do not have an opportunity to offer the fund limitations that many of us feel are important at the end of the bill.

Could something be arrived at with the gentleman that would allow the House to work its will in both regards?

Mr. SMITH of Iowa. I agree with the gentleman. About 70 percent of the bill has not been authorized, so there is about 70 percent of the bill that could be knocked out on points of order. However, the scenario is this:

We are trying to pass the bill today. It will go to the Senate. There is almost no likelihood that a conference report will have been agreed to and be back here by the time the continuing resolution comes up in about a week. So any question that is not settled today can be settled on the continuing resolution.

What I would like to see done here is to settle the amounts for as many agencies in the bill as possible today, and if anybody has an objection to funding a department or an agency under a certain paragraph, he can knock it out on a point of order. However, I propose to put items that are stricken from the bill on a point of order in the continuing resolution at the level in this bill as reported to the House.

So to the extent we can, I would like to decide the funding levels of as many agencies as possible in this bill today, however, Member will have in about a week or 10 days a continuing resolution that will continue funding for those agencies eliminated from the bill on points of order, and at that point Members could make any kind of limitation they wanted to.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, would not the same philosophy apply to some of the things where there is funding limitation language that might apply? Would it not be well to

have the House work its will on some of those matters before we get to a continuing resolution so that if the House does endorse some of those things, they can be included in the continuing resolution as well?

Mr. SMITH of Iowa. It probably would, but we do not know for sure this is going to become law, and we know the continuing resolution is going to become law. If we decide some of those issues on this bill, there is a greater likelihood that the bill will not emerge from the Senate.

I just think that given the time constraints and everything else, we should try to get through with those items in the bill that nobody objects to on a point of order and send the bill to the other body. Then we will fight the rest of it out on the continuing resolution.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of by the gentleman from Iowa (Mr. SMITH)?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. SMITH).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3222) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes, with Mr. BROWN of California in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Iowa (Mr. SMITH) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. O'BRIEN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill appropriates the money for three departments, the Department of Commerce, the Department of Justice, the Department of State, and also for the Judiciary and for several independent agencies including the Federal Communications Commission, the Federal Trade Commission, the SEC, SBA, International Trade Commission, Legal Services Corporation, the Federal Maritime Commission, and the Marine Mammal Commission.

I will, in a very short time, if the Members will listen, recap the bill and the figures and indicate where we are with regard to this bill. Part of it I have already mentioned to the gentleman from Pennsylvania (Mr. WALKER) but I will recap it.

The bill appropriates a total of $10,691,200,000. Of that amount, only $3,235,046,000 has been authorized. Here we are at the beginning of fiscal year 1984, and 70 percent of the programs in this bill have not been authorized. Our committee would much rather deal with a bill where all of the authorizations have been passed, but that is out of our control. Some of these programs have not been authorized for several years. It would be much better to bring you a bill that had all been authorized, but that is not going to be possible again this year. So we are going ahead and doing our part of this process, even for those programs not yet authorized.

The President requested $9,744,502,000 for the programs that we appropriated for in this bill, and of those, we cut that by $169,853,000; that is, we cut his request by that amount. However, we added programs he did not ask money for, or we increased programs by $1,373,551,000. I would like to briefly explain what those are.

In NOAA, we added $198,667,000. For example, the President did not ask money for Sea Grant. We thought it was an important program, and to be continued we added $35 million. For Coastal Zone Management, we added $28.4 million. These were programs that we felt were very important to be continued.

The President did not ask anything for EDA. Last year, EDA had a total of $298 million in program funds and $26.7 million for salaries and expenses. We added $315 million for EDA programs. There is a new authorization for EDA, H.R. 10, that has passed the House. It passed the House overwhelmingly. It is for $500 million, but we put $315 million in the appropriation bill. There is some disagreement between the gentleman from Illinois and me on the amount of funding we ought to have for this program, but other than that, I think this bill is supported almost unanimously by our subcommittee.

For the International Trade Administration, we added $38.9 million. A good share of that is for trade adjustment assistance. For Legal Services, we put in $296 million. They had $241 million last year and they requested $257 million this year. However, I would like to point out that $296 million is $25.3 million less than they had in 1981, so it is still holding them down very considerably.

For INS, the Federal prison system, juvenile justice, and other programs in the Justice Department, we added $153.8 million. Since that time, however, the President has sent up a budget amendment for several justice programs.

□ 1320

For the Small Business Administration, we added at total of $253 million. However, it still leaves the Small Business Administration with $258.1 million less than it had a year ago.

So this is a rather stringent bill. It requests the money for new programs that were requested by the committees of $385 million, some of which had not been considered at that time by the administration. But we think this is a fairly stringent bill. I Also want to point out that under the budget process we are given an allocation for our subcommittee of part of the total allocation to the Appropriations Committee. This bill is within the 302 allocation to the subcommittee. We are over the President's budget, but we are under the congressional budget. What happened was that the full committee in its wisdom took a little bit more out of defense than they put into some other areas. Then the full committee gave us our allocation, which is above the President's budget, but we are within our congressional budget allocation.

So, Mr. Chairman, I think it is important that we go ahead with this bill at this time. We have the drug enforcement program that depends on the funds in this bill. The Immigration Service depends on this bill being enacted, as does international trade programs as well as our support for the Federal prison system. And then there are job programs like those in EDA and the SBA. And the administration has a good many foreign obligations in this day and age, and they need funding in this bill for the State Department which is included in this bill. Then, of course, there is a whole range of fisheries programs that are in the bill which I think are very imporant, especially for people on the west coast, the gulf, and the Pacific coast and the Great Lakes areas. They think they are very important, but they really are important for the whole country.

So as I explained to the gentleman from Pennsylvania a minute ago, 70 percent of the bill is not authorized, and any Member who wants to, can make a point of order against those sections of the bill. But if Members would instead disagree with the amount of money and offer amendments instead of making a point of order against the whole section, we could at least settle the amount of money today and not be settling that on the continuing resolution. So, Mr. Chairman, I hope that we can pass as much of this bill as possible today, and I am asking the Members to support the bill.

Mr. O'BRIEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as most of us already know, the bill contains funding for programs which the administration

opposes but which by and large receive the support of the House. Programs such as legal services, juvenile justice, EDA, and trade adjustment assistance programs were targeted for elimination by the administration because they were programs which were deemed to be ineffective or no longer necessary.

The House authorizing committees, on the other hand, with jurisdiction over these programs seemed to believe otherwise, as do numerous other special interest groups. We have included funding for these programs for another year, in many cases over the objections of the administration.

In this connection, I plan to offer an amendment which will reduce this bill's overall funding level by $100 million. It will not solve the administration's problem with the bill, but perhaps it will help.

I am aware of the political difficulties the bill will pose for the Members, and I would remind them that, at least in terms of the funding level problem, the Senate is considerably lower than we are, and it is not unlikely that we will reduce some of these programs in conference.

As a parting shot and a curtain-dropping word, Mr. Chairman, I urge an affirmative vote for H.R. 3222 on final passage.

Mr. Chairman, I reserve the balance of my time.

Mr. SMITH of Iowa. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, I want to thank the committee for the focus it has placed on economic development. I know that there are questions relating to authorization, but I would say that the targeted focus now placed in this appropriation on economic development is a very appropriate one.

In my district, which is indeed the economic heartland of the State of Connecticut, this program has produced more jobs than any other action taken by Congress in recent years. Funding in this area has been used to attract new industrial parks, and to provide the rail, the roads, the water, and the sewer for these facilities. This has also been used to rehabilitate old facilities in the copper, brass, and steel industries. Not only has there been a Federal involvement, but through an active program on behalf of the State of Connecticut, State funds have been used to match the Federal funds, so we have definitely leveraged capital in this job-creating area.

Above and beyond that, more than anything else, this program has been used to leverage private capital in the State of Connecticut. It is truly a job-producing program, and these are not make-work jobs, not push-a-broom jobs, not short-term jobs but long-term, private sector, private initiative jobs.

Sadly, as the gentleman from Illinois pointed out, this program, when we received the budget proposed by the administration in February of this year, was scheduled for zero funding. When David Stockman came before the Appropriations Committee, he said that really throughout the country this program had been abused and, therefore, he could not justify its continued authorization or appropriation.

I said to him at that time, and I say today, "Come to Connecticut, Mr. Stockman, and you will see the real value of economic development."

This is an appropriate program. It is targeted in the correct fashion. It is sensitive to the job needs of the country. It is a reasonable approach to a necessary program to solve a problem.

Mr. Chairman, on behalf of the committee, I urge its support.

Mr. O'BRIEN. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I think in this bill we can focus on some of the problems brought about by the rules, we adopted at the beginning of this Congress that were supposed to help us get through the process of appropriations, but now where we find ourselves frustrated by those rules, that is in terms of being able to deal with extremely important issues that face this country and this Congress.

The bill that we now have before us comes before us, as the subcommittee chairman has already explained, with numerous provisions in it which are subject to points of order because proper authorizations do not exist or because a reappropriation takes place within it in violation of the House rules. Therefore, we are faced with a situation where much of the bill could be ruled out on points of order.

I do not know that it serves the best interests of the House or the best interest of the country to proceed under that process, but certainly it should focus our attention on the fact that we are not doing our job properly around here if we bring appropriation bills to the floor when we have not previously gone through the authorization process.

That becomes important because the authorization process is the only way by which we can address some of the important issues that these appropriations are supposed to fund.

We have the State Department in this bill. There are a number of issues arising around the world at the present time which involve the expenditure of State Department moneys. Now, if we had an authorization bill before us where we could get in amendments to limit that funding in some of those areas, such as in Lebanon, or Central America, or the United Nations, with regard to the Korean plane incident, if we had a chance in the authorization bills to get at some of those issues, it would not be as crucial to address them in the appropriation bill. But the fact is that under the rules adopted by this Congress early on, we now will not be able to address them in the appropriation bill, and we have not had any authorization bills either.

So some of us are concerned. We are concerned about bringing appropriations to the floor that then offering no opportunity for Congress to address very legitimate issues.

I point out one issue in particular because it is an issue that I have addressed on several occasions when this bill has been on the floor in past Congresses. It is the issue of prayer in the schools; 80 percent of the people of America indicate that they want something done by this Congress to assure that appropriate voluntary prayer programs can be implemented. I have offered language in the past to say that the Justice Department cannot interfere with these programs if they are instituted at the local level.

□ 1330

Regularly this House had adopted that language in this bill. Because of the rules adopted earlier on in the Congress, we will be unable to address that issue this year. That seems to me to be wrong. This is the place where the House has expressed its will on several occasions and now the will of the House will not be able to be expressed in this regard.

I would hope that maybe we would get a reconsideration of this matter and that we would be permitted to offer appropriate amendments that are within the scope of this legislation.

Certainly the kinds of fund limitation amendments that would not fit the content of the bill have no business being offered. The funding limitations have given us a good vehicle for addressing legitimate issues of concern to the American people and I think it ought to be permitted and I think it ought to be permitted in this bill today. If we are not given those opportunities, then I think that the American people ought to look back at those rules that were adopted at the beginning of the Congress and question whether or not the people who voted in favor of those rules did in fact vote to take away an historic ability of legislatures to address funding limitations in a way which does express the will of the Congress on extremely important matters.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I think at least we agree on one thing. It would be much better to have authorization

bills determine the limitations on agencies and to fight out all those kinds of questions on authorization bills so that when we come to the floor with an appropriation, the principal thing we have to do is determine how much money should be appropriated for a particular program out of the total Federal budget. Unfortunately, that has not been the case for several years.

The problem is this. If we have limitations permitted at the end of this bill, then are we not really doing just what those people want to do who do not get their authorizations passed? In other words, we are letting them have their field day on this bill instead of bringing up an authorization bill and having the House work its will?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. O'BRIEN. Mr. Chairman, I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for the time.

Let me reclaim my time and answer the gentleman. The point is that the rules that we have adopted, though, have also given those same people encouragement never to bring their authorization bills to the floor. They know it will not shut down the Government. They know it will not in any way inhibit the operation of the Government if they do not bring those authorization bills out here, because we will go ahead and take care of everything through the appropriation process, or worse yet, through the continuing resolution process.

So, therefore, we never get those authorization bills out here. Anything which might prove controversial or might not fit the wishes of the leadership of this Congress with regard to authorization never gets to this House floor; so we go years and years with no authorization bills and we continue to appropriate without the authorization.

I agree thoroughly with the gentleman. I think we ought to have authorization bills out here; but then it seems to me we have got to start holding the Appropriations Committee responsible for the fact that if there is no authorization, there cannot be an appropriation, because if we do not do that, if we do not follow through with the second step, we will continue to appropriate with no authorization and we will never consider any authorization bills in this Congress.

That to me is a mistake, too. I understand the gentleman's point. It would be far preferable to act on the authorization bills, rather than go through the fund limitation business; but otherwise we never address the issues, period. If you do not have funding limitation amendments, the issues never get addressed, period. The authorizations never come before us. All we get is appropriations that allow us to go on without properly addressing the legitimate subjects within those areas.

Mr. SMITH of Iowa. Mr. Chairman, if the gentleman will yield further, I think the gentleman has a legitimate argument. He has his point of view and when we get to the end of the bill, that is something that ought to be addressed at that point. Perhaps when we are about one section from the end of the bill, anybody that wants to could move to strike the last word and debate this particular matter as to whether or not we ought to agree to a motion to rise at the end of the bill. I think that is a legitimate question.

Mr. WALKER. Mr. Chairman, I thank the gentleman. I think maybe that is something which will take place in the proper course.

I thank the gentleman for yielding the additional time.

Mr. O'BRIEN. Mr. Chairman, I yield 8 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, my observations will be directed at the provisions appropriating funds for the Legal Services Corporation. The basic question for us to consider today is whether or not the Federal Government should continue to support legal assistance to the poor. Of all the witnesses we on the Judiciary Committee heard from, not a one testified against the Legal Services Corporation on this principle.

We profess the belief in the rule of law. How can we have rule by law unless we make provisions for reasonable access to our system of justice. Access to justice is the foundation of any rule by law. As our laws become more complex, the service of a lawyer becomes more necessary and more costly. Money can and will remain a substantial barrier to the delivery of justice unless Government prevents this from happening.

Our President agrees that Federal moneys can be used for this purpose. Where there is a difference is in the method used to deliver these services. He believes that the same thing can be accomplished through block grants to the States. I fear that in my State of New York if block grant money is provided, legal services will suffer simply because there will be to much competition for that money. I suspect that is going to be the case in many States. This is the practical objection.

We cannot as a country afford to have 29 million poor persons disaffected from our system of justice. The tensions and strifes within a country of 228 million people must be adjusted—must be harmonized—must be accommodated, and like it or not, attorneys play an important part in providing that accommodation.

I believe it is important to put into proper perspective just who the Legal Services Corporation represents. They represent the 29 million poor persons earning less than $6,700 and families earning less than $12,500. They represent a disproportionate number of American minorities and a disproportionate number of America's elderly citizens. Legal Services attorneys spend most of their time helping these individuals. Of the 1.5 million legal matters handled annually by local programs, over 30 percent relate to family matters (divorce, custody, visitation problems, support, wills, and guardianships). Legal Services attorneys differ from lawyers in private practice in the large percentage of cases they handle in the income maintenance area, which are over 17 percent since January 1981. These cases include social security disputes, including aid to families with dependent children. Another 14 percent of the Legal Services cases fall into the area of consumer and finance law, which include collection, repossession, warranties, and debtor relief.

There is a far more fundamental reason why the Legal Services Corporation provides access to justice. The reason is grounded in the Constitution of this Nation which calls for "equal justice under law"—the words on the facade of the U.S. Supreme Court.

Justice Lewis Power, Jr., at an annual meeting of the American Bar Association in August 1976, may have said it best when he said that equal justice under law:

> . . . is one of the ends for which an entire legal system exists. And, central to that system is the precept that justice not be denied because of a person's race, religion, or beliefs. Also, it is fundamental that justice should be the same, in substance and availability without regard to economic status.

Mr. Chairman, the Committee on the Judiciary, in its markup of the Legal Services Corporation Act Amendments of 1983, carefully delineated the categories of aliens that can receive legal services. H.R. 3222 incorporates this work-product of the Judiciary Committee. Because Congress last year, in making further continuing appropriations for fiscal year 1983 (Public Law 97-377), adopted a more restrictive approach, I will discuss those categories of aliens that are covered by the pending legislation and not covered by Public Law 97-377. I believe the Committee on the Judiciary appropriately recognized that compelling policy considerations justify excluding these narrowly defined groups from the alien disqualification.

Public Law 97-377 excludes from access to legal services immediate relatives of lawful permanent resident aliens—relatives who have pending applications for permanent resident status and wish to contest action or inaction of the Immigration Service. The relatives H.R. 3222 protects—and

Public Law 97-377 overlooks—are parents, spouses, and unmarried sons and daughters (under age 21) of lawful permanent resident aliens. Depriving these aliens of legal representation will directly and adversely affect the rights of their immediate family members with lawful permanent resident alien status in the United States.

Other aliens that Public Law 97-377 excludes from possible representation are certain specified groups with legal status in the United States as a result of action taken by our own Government. The Committee on the Judiciary, in recognition of special circumstances, selected only a few out of a large number of classes of aliens legally in this country. Persons granted parole status are included because of the inconsistency inherent in providing various Federal benefits—and hearing and appellate rights—to these individuals and at the same time denying access to counsel. Cuban-Haitian "entrants" have possessed this special designation for several years already, have been resettled in this country, and undoubtedly will be permitted to remain permanently. H-2 workers, as the Judiciary Committee report on the Legal Services Act Amendments of 1983 points out, are "clearly in the United States as a result of decisions by the executive branch that such persons are a benefit to the American economy."

Asylum applicants are included in H.R. 3222 because the nature of the threat that awaits a legitimate refugee fully justifies providing the procedural protections of counsel for the persons who asserts a claim of persecution. Persons escaping persecution, it must be remembered, often cannot take with them resources to hire attorneys. The United States, in my view, must not have two essentially different processes for determining asylum status—depending on the finances of the applicant.

The Judiciary Committee also has recognized the special situation of individuals granted extended voluntary departure or indefinite stays of deportation. The Judiciary Committee, in our report, concluded that "it would be anomalous to refuse to return these individuals to another country because of human rights problems there, while at the same time denying them access to legal services here."

The Judiciary Committee reported bill, in contrast to Public Law 97-377, also allows access to legal services by aliens eligible for permanent resident status under the suspension of deportation and registry provisions of the Immigration and Nationality Act. The relief available under these provisions of immigration law are quite limited because of the stringent provisions on eligibility.

Most of the categories delineated by the Committtee on the Judiciary consist either of aliens with substantial ties to the United States or aliens who face great personal risk from expulsion. The committee, in my view, has been guided by considerations of basic fairness in developing a limited list of exceptions to the alien disqualification. I commend the Committee on Appropriations for incorporating this list by reference in H.R. 3222.

□ 1340

Mr. SMITH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield for a question?

Mr. SMITH of Iowa. I yield to the gentleman from North Carolina, the chairman of the committee on Merchant Marine and Fisheries.

Mr. JONES of North Carolina. The last paragraph on page 13 of the bill (H.R. 3222) prohibits the Maritime Administration (MarAd) from using any of its funds to promulgate or enforce any regulations concerning the repayment of construction differential subsidies (CDS). Am I correct in my understanding that the Appropriations Committee, in adopting this particular provision, was not aware of, and consequently did not intend to affect, MarAd's pending administrative proceeding concerning the vessel *Bay Ridge*?

Mr. SMITH of Iowa. The gentleman is correct. When the Appropriations Committee adopted this provision prohibiting so-called CDS payback, it had no knowledge of the pending MarAd proceeding concerning the *Bay Ridge*. Consequently, the Appropriations Committee did not intend to affect that MarAd administrative proceeding.

Mr. Chairman, I yield 8 minutes to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Chairman, I rise in support of the bill before us providing fiscal year 1984 funding for the Departments of Commerce, Justice, and State, and the Judiciary, and related agencies.

First, I want to take this opportunity to express my appreciation to the gentleman from Iowa (Mr. SMITH), our subcommittee chairman, to the other members of our subcommittee and to our staff. It has taken long hours, hard work, and cooperation to bring our bill to you for consideration.

This is a good bill. It is a balanced bill. The recommendations we are bringing to you provide positive, constructive, and responsible proposals. They address problems and needs which were cited during the more than 2 months of hearings our subcommittee conducted on budget requests for the coming year.

In addition to administration witnesses, we heard from more than 100 leaders of business, of State and local governments, of community service organizations and of education and technical service organizations and from Members of Congress from all over the Nation.

Funding recommendations in our bill are within the allocation to our subcommittee under the budget resolution. Congress has a constitutional duty to establish the policies and priorities for investing Federal funds in programs which our citizens have identified as those which they believe are in the best interest of our Nation. Thus, although our bill exceeds the funding the President requested, our recommendations are a responsible exercise of our constitutional duties.

During the debate on this bill, we will hear from many of our colleagues on various recommendations in this bill. In view of that, I want to limit my remarks to the funding our committee has proposed for two groups of programs.

For the past 15 months the number of our fellow Americans who are unemployed has ranged from above 10 million to 11.5 million. Last year the percentage of jobless Americans who went without employment for more than 6 months was greater than at any other time in four decades. And this year has started off as another recordsetter.

Our national unemployment rate has reached the highest levels since the Great Depression. The district I represent has 24 counties; 18 of them had double-digit unemployment rates in 1982. At the countywide level, the yearly unemployment rates since 1980 have grown by as much as 50 to 100 percent in my district. Thousands of our young people are completing their educations facing a grim future in the job market as a result of the sustained economic recession of the past 2 years and the slim prospects of rapid economic expansion in the near term.

The need for a job-stimulating partnership between Government and the private sector is greater now than it has been for a generation. The bill we bring before you today is a partial response to that need. It does not contain as much job stimulation funding as we would like, because of the stringent budget situation in which we find ourselves. But it is a step forward.

We are recommending the appropriation of $315 million for the continuation of the economic development assistance programs operated by the Economic Development Administration. President Reagan did not request this funding. But, the record EDA has compiled since its creation in the mid-1960's convinces us that these programs are both efficient and effective.

They should not be discarded on the heap of broken dreams and shattered

hopes for economic security that has grown to Mount Everest proportions during the past 2 years. EDA can help resurrect those dreams and hopes and should be given the opportunity to do so.

Since 1965 our Nation has had a policy of investing in the future of our workers and our communities. EDA has been an important part of that policy. With its "seed money" EDA has leveraged private sector investments. These have generated 1½ million long-term jobs. Holders of these jobs have paid into the Federal Treasury many times more dollars than the total amount of Federal money EDA has invested throughout its entire history.

The long-term, private-sector jobs that have been generated as a direct result of EDA investments have meant that our people had a realistic opportunity to earn the income they need to support themselves and their families.

For a State poor in financial resources like mine—Arkansas—EDA investments and the private-sector funding they leverage are vital to our prospects of enjoying our fair share of the economic vitality of our Nation. Arkansas' average household, family, and per capita income is only about three-quarters the national averages. In the First District, which I represent, the average household, family and per capita income is only about two-thirds the average for all Americans. Although we have progressed substantially—with EDA assistance—since Congress established the agency in 1965, we still have a long way to go.

From 1965 through July 1983, EDA had invested approximately $176.2 million in 345 projects in Arkansas. These had generated more than 70,000 jobs with an estimated annual payroll of $546 million. The holders of these jobs pay an estimated $112.7 million in Federal taxes annually. In other words, about every year and a half, the workers holding jobs generated through EDA investments pay taxes to the Federal Treasury equal to the total investment EDA has made in the State since its beginning. Few, if any, businesses can show a 100-percent return of their investment in so short a time or as often.

The number of direct, private-sector jobs EDA investments have generated in Arkansas is equivalent to almost one-third of all the manufacturing jobs in our State. EDA-generated private-sector jobs in the First District are almost equal to 20 percent of all the manufacturing jobs in my district. And these statistics do not even count the jobs that have come into being indirectly as a result of the economic activity stimulated by EDA investments.

At a time when we have almost 20 million Americans looking for work, the need for investments in job-creating projects is urgent. The need for the kind of effective Government private-sector partnership which EDA represents is critical. It is the wrong time to be proposing to shut down successful job-producing programs, as the administration did in its budget for fiscal year 1984.

A time of such high unemployment—a time when our Nation is struggling with the effects of record international trade deficits—is also the wrong time to be proposing, as the administration did, to close out a trade adjustment assistance program that helps people whose livelihoods are threatened by import competition. Because of this, our committee rejected the President's proposal to wipe out the trade adjustment assistance program. We are recommending funding this program at $40 million, an increase of $12.5 million over the current year.

There are an estimated 4 million American workers in 50,000 U.S. firms who are potential candidates for assistance under this program. Theirs are jobs and businesses to which import competition could deal a lethal blow if these Americans were deprived of the trade adjustment assistance under this program.

Last year alone, trade adjustment assistance centers around the Nation worked with firms employing 120,000 workers. Prorated on the basis of the 1982 funding for this program, these services represented an investment of $150 per worker. It is estimated that the workers paid into the Federal Treasury taxes equaling $204 million, or seven times the total trade adjustment assistance budget.

But that is not the whole story. Firms whose closure due to competition from imports was a certainty before they received trade adjustment assistance have not only been able to continue operation, they have expanded their employment of American workers. While some attrition may be inevitable with a dynamic economy, it is against the best interests of our people and our Nation to allow our businesses and industries—certainly our basic businesses and industries—to sink into oblivion because of import competition simply because our Government failed to make the minimal investments represented by the trade adjustment assistance program.

These two program groups, those of economic development assistance and trade adjustment assistance, are the kind of positive responses to the needs of our people that are contained in the bill before us today. They are investments in the present and future economic progress of our people.

Because of the authorization situation relating to many of the programs covered under this bill, we find ourselves bringing it to the floor under extremely difficult circumstances. I would urge—indeed, I plead—with all of my colleagues to search your conscience carefully, to consider how you will describe your action to the jobless people in your district, and to resist the pressure the White House brings to bear on you to get you to strike from this bill, on a technicality, a private sector job generating program that has benefited hundreds of thousands of Americans.

I would urge that we move expeditiously and vote for passage of this bill as it has been recommended by our committee.

□ 1350

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman and would like to associate myself with his remarks and compliment him on the leadership he has given in this committee and in the House generally in support of economic development legislation.

The gentleman has been very instrumental in shaping the driving force of economic development programs under the aegis of the EDA.

To support what the gentleman says, our subcommittee conducted intensive hearings on the operation and effectiveness of the EDA programs. To be sure, there are some shortcomings.

But over its 15 years of existence with $4.7 billion in Federal funds invested in distressed areas, $9 billion in additional private and non-Federal funds has been leveraged creating one-half million jobs and each year those jobs, which are still there in the work place, are generating $6.5 billion in Federal, State, and local taxes, meaning that ever year this program more than pays for itself.

I thank the gentleman for making that point.

Mr. ALEXANDER. I thank the gentleman for his contribution. He has stated the case far better than I could myself.

Let me simply conclude within the short time I have remaining by saying that since 1965 our Nation has had a policy of investing in the future of our workers and our communities through the Economic Development Administration, which has proven itself time and again to be an effective and efficient administrator of job-creating programs.

This bill contains money for a continuation of that program, and I have taken this time to alert my colleagues in hopes that they will vigorously support this bill and especially the Economic Development Administration provisions within it in order that this wonderful program can be continued.

Mr. O'BRIEN. Mr. Chairman, I yield 3 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Chairman, I would like to address just a couple of questions to the distinguished chairman of the State, Justice, and Commerce Subcommittee of the Appropriations Committee.

I understand from what has already been said by our colleague from Illinois that this bill is some $1.3 billion, approximately, over the President's budget request.

I wonder if the gentleman, though, could tell us how much more this bill is than last year's State, Justice, and Commerce appropriation bill, taking into consideration the supplementals, and so forth.

Mr. SMITH of Iowa. Will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. It is $560,000,000.

I would mention to the gentleman we are under our 302 allocation and we did cut the Presidential request for the things he wanted by $169.9 million. But we did add then $1,373,551,000, making a net of something like $1,203,698,000.

I reported earlier what those are for. They are quite largely for NOAA, EDA, the International Trade Administration, Legal Services, and some Justice programs and SBA.

Mr. LOTT. I thank the gentleman for that information and I do want to say at the beginning I know the gentleman does an excellent job with a very difficult task with this particular appropriation subcommittee. We all appreciate the job he had done there and the work he has done in the Rules Committee this year trying to find a way to get this bill to the floor with a rule.

I also say that about our distinguished ranking member, the gentleman from Illinois (Mr. O'BRIEN).

But, having said that, here comes the bad news. Who among us that has been home in the last month, and I said this last week, but who among us has not been hearing people complaining about deficits and Federal spending?

We read in the newspapers something must be done or it is going to have an impact on the economy. We are talking about State, Justice, Commerce, and the Judiciary appropriation bills.

Many of these are fine and excellent programs. I think that EDA in years gone by has been an excellent program.

These are all fine programs but, my colleagues, where are we going to start drawing the line? Every appropriation bill that comes through here is going to wind up being $500 million over the President's budget request, or a $1 billion over last year's bill, and we will never get a control of the Government's spending.

I have considered even making points of order. That is very hard to do the way the bill has come to the floor, and I realize the gentleman has made a legitimate case about how we need to move the appropriations bill.

But I would say to my colleagues, and in spite of the efforts that have been made by this subcommittee and the full committee, this bill is too much money.

We must begin saying "no," we are going to have to hold these bills below what we spent last year. If we cannot do it with State, where will we do it? There is $64 million in here for Justice Department administration.

State, Justice, the Judiciary. If we cannot get a control on spending in these areas where are we going to do it?

So I urge my colleagues to listen to the administration. Do not pass this bill in this form because it will be vetoed.

Mr. SMITH of Iowa. Mr. Chairman, I yield myself such time as I may consume.

I would like to point out to the gentleman from Mississippi (Mr. LOTT) that the amount in the bill for the State Department is under the President's request already. We cut the President's request.

The gentleman mentioned the Small Business Administration. It is $258 million under last year. They have taken their punishment.

What we really did here was to take the difference between the Congress and the President on the military budget. He wants to increase it by $35 billion. A part of that money was taken back by the full committee and redistributed to other subcommittees.

Mr. LOTT. Will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Mississippi.

Mr. LOTT. I heard the gentleman say that earlier. Do I understand correctly you are saying we are taking money out of the military budget and we are redistributing it among the other areas or the other subcommittees of the full Appropriations Committee? Is that correct?

Mr. SMITH of Iowa. The congressional budget did that. We reduced the President's military requests and increased some other requests like EDA and SBA and a number of other programs. That is what happened.

Mr. LOTT. So instead of reducing the spending or deficit by the amount we have taken out of the military budget, we redistributed it among all of the various departments?

Mr. SMITH of Iowa. We redistributed part of it but not all of it. We are under the 302(b) allocation on this bill.

So we are proposing to spend less money in total than the President, is but we are spending it in a different way.

Mr. LOTT. So you have told us those areas where you are under the budget. You mentioned the State Department, if you will yield further, but you have turned around and added this money in other areas such as the Legal Services Corporation; is that correct?

Mr. SMITH of Iowa. Yes; we added money for the Legal Services Corporation and we added for the trade adjustment assistance bill which passed the House by an overwhelming majority a few days ago.

Everybody wants ITA to enforce the dumping statutes and all of that, so we gave them some money to do so, what they said they needed. We also added funds for EDA and for these fisheries programs which are so important to the Gulf of Mexico and the Pacific coast and the east coast. We do not get any of it in Iowa, but I think these are important programs and they are good programs.

Mr. LOTT. I understand that, if the gentleman will yield. Certainly I represent an area that could benefit from these programs, but that is my point; we all say we want to do something about the deficit, but do not cut our programs and do not cut the ones I like.

If we do not draw the line, if we cannot hold spending levels at least to the level of last year, we are never going to be successful.

Mr. SMITH of Iowa. I would like to say this, and I should have said it earlier, our subcommittee heard the testimony. We got our letters and our communications from our colleagues in the House and we took them into consideration. Except for one item, this was a unanimous report of our subcommittee. Those of us that really heard all of these items, we decided that the money in this bill was needed. I would also point out that the total amount in the bill is within the 302 budget allocation to our subcommittee. So I think that I want to thank all of the members of the subcommittee for working together in putting this bill together.

Mr. LOTT. Will the gentleman yield for just one additional question?

Mr. SMITH of Iowa. I yield to the gentleman; yes.

Mr. LOTT. I know the gentleman is trying hard to get this legislation through and I am sorry that we could not get a rule out of the Rules Committee. As a matter of fact, as a member of the Rules Committee, I could have called that rule up that we had voted on earlier in the Rules Committee today but I did not think that was the way to do it.

But what I am worried about is with other appropriations bills this year, the committees have gotten very close

to what the administration has asked for and we have tried to avoid vetoes. They have been held down to just maybe a couple of million within what the President had asked for.

□ 1400

But this one, in its present form, is headed for a veto.

Will there be any additional amendments offered on the floor here that would try to get this bill down closer to a range that would be acceptable to the administration so that we would not be faced with that delay in funding?

Mr. SMITH of Iowa. Of course, anybody who wants to can offer an amendment to any one of the sections if they are not eliminated on a point of order. And I hope they can have their amendments considered, because that is the way to settle these issues.

I point out also that we have a considerable difference with the Senate on the bill. They added some things that we do not have in the bill. We know we are going to conference and we will probably not come out with this bill the way it is now.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield to me?

Mr. SMITH of Iowa. I yield to the gentleman from Illinois (Mr. O'BRIEN).

Mr. O'BRIEN. Mr. Chairman, in answer to the gentleman's (Mr. LOTT) question, I plan to offer an amendment to EDA that it would reduce it by $100 million, if the opportunity arises.

Mr. O'BRIEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I want to ask a question of the distinguished chairman of the subcommittee.

One of the parts of the bill that would be subject to a point of order is a part of the appropriation to ITA, that is the firm assistance under trade adjustment assistance.

The authorization bill passed here the other day and provided about $27,500,000 for firm assistance.

The gentleman's bill has at least $40 million in it, plus the guarantee authority, which I think is subject to a point of order, of $30 million. The President asked for nothing, and the House authorizing committee went to $27 million.

My question is: Is this bill high so that you can negotiate a little bit?

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield to me?

Mr. FRENZEL. I am glad to yield to the gentleman.

Mr. SMITH of Iowa. Sure, we will negotiate, especially if the House has approved an authorization that is less than the amount in our bill for this program. We certainly would pay attention to that.

Mr. FRENZEL. I thank the gentleman. I want to talk to him a little further because I am contemplating a point of order, but I am reassured by his statement.

Mr. O'BRIEN. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. HUNTER).

Mr. HUNTER. Mr. Chairman, in 1965, acting under provisions of a 1944 treaty between the United States and Mexico, the two countries, through the State Department's International Boundary and Water Commission, the IBWC agreed that the city of San Diego would accept domestic sewage from Tijuana, Mexico, into the city's metropolitan sewer under emergency conditions.

Now the term of this agreement is going to expire in 1985. The reason for the pact was to avert serious health and environmental problems in both countries due to the discharge of Mexican sewage into the two border communities or into the Pacific Ocean near the International Boundary.

A fee was paid for this service based on rates in effect at the time and on the assumption that Mexico's use of the emergency connection would be limited. Initially this was the case. During the first 10 years, San Diego treated Mexican sewage on an average of only 26.3 days per year; however in the mid-1970's the usage increased dramatically to a point where today we are treating approximately 80 percent of Tijuana's sewage daily.

Mr. Chairman, for the years 1978 through 1982 the city's average yearly excess of cost over revenue for the treatment of Mexican sewage was $834,000 and it is projected to be something like $1.7 million this year.

For that reason, Mr. Chairman, I am going to request an amendment that would reimburse the city of San Diego for some $800,000, or about half of the deficit that is caused by the agreement between the United States and Mexico, which puts a tremendous health burden and financial burden on the city of San Diego.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I will be happy to yield to the chairman.

Mr. UDALL. Mr. Chairman, I support the gentleman's proposed amendment. I have a similar one covered by the Hunter amendment relating to the city of Nogales, Ariz., with the city of Nogales, Sonora just across the border.

Mr. Speaker, the amendment I am offering today would appropriate an additional $100,000 to the International Boundary and Water Commission. The Commission is charged with the responsibility of maintaining and operating the international sewage treatment plant in Nogales, Ariz. The plant is used to treat effluent from Nogales, Sonora, Mexico, as well as effluent from Nogales, Ariz. The Commission is charged with apportioning costs between the two cities, according to the terms of an international agreement. Recently, however, the Mexican contribution has been delayed by as much as 12 months and those costs have been picked up by Nogales, Ariz., the operators of the plant.

My amendment would appropriate an additional $100,000 to the Commission, It is my hope and expectation, that the Commission would use those moneys to reimburse the city of Nogales, Ariz., for any unreimbursed expenses that it may incur in treating Mexican sewage.

I think the gentleman's amendment is sound. I certainly support it.

Mr. HUNTER. I thank the gentleman.

In Arizona as well as in California there is a critical health problem.

Mr. O'BRIEN. Mr. Chairman, may I inquire of the Chair how much time is left?

The CHAIRMAN. The gentleman from Illinois (Mr. O'BRIEN) has 7 minutes remaining.

Mr. O'BRIEN. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. MCCOLLUM).

Mr. MCCOLLUM. Mr. Chairman, this bill concerns a lot of different aspects of the appropriations involving the Committee on the Judiciary on which I serve. But the one that concerns me the most is the portion that deals with restrictions and, really, the authorization of the Legal Services Corporation.

I have in the past and in the last Congress supported the continuation of Legal Services Corporation because I believe there is a role for the Federal Government, on a limited basis, to provide legal services to the poor, really provide them.

What was wrong with Legal Services Corporation in the past and has continued to be wrong, though it has been corrected to some extent over the last year or so, is that many attorneys, many local boards and organizations that are implementing legal services have chosen to be more political, have established a political agenda rather than simply serving the poor.

They have become lobbyists in many cases, they have gone out of their way to expend Federal moneys in manners which do not serve the direct legal requirements and needs of the poor people but rather a social agenda they are interested in.

In the 97th Congress we changed a great deal of that by including in the appropriations continuing resolution, Public Law 97-377, restrictions found in the authorization bill that had passed this House, but which never passed the Senate.

This appropriations bill contains restrictions on legal services in the form of directing that the restrictions in the authorization bill out of the Committee on the Judiciary, which has never been heard or debated on this floor, be adopted.

Those restrictions are broader in scope that what we did before, but they obliterate the essence of what was done.

What I am talking about specifically is in two areas, one of them falls particularly in the lobbying area, which the gentleman from California (Mr. MOORHEAD) will offer an amendment to, if given the opportunity.

The second one which concerns me very greatly is in the composition of the local governing boards. Where under Public Law 97-377 the local bar associations now control them, under this bill they can no longer control the Legal Services Corporation operations locally and instead the Corporation will go back to the politicizing involvement which in essence is what was bad about the old law.

So I hope as we try to narrow the scope of what is done in this area in the amendment to this appropriations bill we not lose sight of that.

Despite my past support of the Legal Services Corporation, I will vote against any authorization or appropriation measure which removes the depoliticizing restrictions which were imposed by the 97th Congress. Although I expect that the amendments which I have in mind to correct the problems raised in this appropriation bill to be moot today because of points of order which will be raised, the issue will return to this floor within a few days as a part of a continuing resolution on appropriations, and I would like to elaborate on the amendments which I would propose to correct the problem.

There is one very simple amendment which I will offer at the appropriate time that would dispose of any complicated debate and a series of time-consuming amendments.

The pending appropriations bill adopts several very material changes in the operation of the Legal Services Corporation without the authorization bill, H.R. 2909, ever having been brought to the House floor for debate and vote. At the present, the Legal Services Corporation is funded pursuant to the continuing resolution, Public Law 97-377, which contains funding restrictions based upon the authorization bill which passed the full House in the 97th Congress, but which died without action in the Senate. I will offer an amendment which would continue the restrictions as they exist presently (Public Law 97-377) until such time as an authorization bill for 1984 becomes law.

If my amendment to continue the funding of the Corporation pursuant to current law is not successful, I will offer an amendment to keep the presently existing control of LSC local boards in the hands of local bar associations who represent a majority of the attorneys practicing law in the area governed by the board. One of the most critical reforms obtained in the 97th Congress is a requirement that all organizations receiving Corporation funds and doing legal assistance be governed by a board of directors controlled by a majority appointed by local bar associations who represent a majority of lawyers practicing in a given locality. The proposed changes in the appropriations bill would eliminate local bar control of Corporation activities and mean that control can return to the hands of a small minority in the local communities who may be more interested in a political agenda than in providing legal assistance to the poor, a condition which existed before Public Law 97-377.

The majority bar requirement is an important part of the depoliticizing of the Legal Services Corporation, and prevents capture of local programs by organizations with a political agenda. Without a majority bar requirement, specialty bars, often highly political, will have power to appoint attorney members and combine with other appointees to form the controlling majority of a local governing board.

Prior to the changes in the 97th Congress, such bar associations as the ACLU, the National Lawyers Guild, the organization of former Legal Services attorneys, Community Action Agencies, and many others were often molded together to control the activities of local boards providing legal services. The results were highly politicized activities by the Legal Services Corporation with a very liberal bent, but if the effort to depoliticize Legal Services is not allowed to continue, conservatives could do what liberals have done in the past and assign board seats to groups like Pacific Legal Foundation, Mountain States Legal, and the Conservative Caucus, or other groups.

Another amendment I may offer would prohibit legal services from being provided to any alien who is applying for political asylum, which is prohibited under present law, but would be allowed under the proposed appropriation language. There are thousands of aliens here illegally today who are using every device available to them to try to stay in this country, including applications for political asylum, even though the vast majority have no foundaiton for such a claim. Whatever one's view with regard to the right of such illegal aliens seeking political asylum, the task of representation should not be given to the already strapped Legal Services Corporation. With limited resources available to provide services to the poor who are American citizens, we certainly should not be charging the Legal Services Corporation with the duty to represent the thousands of illegal aliens who are now or may in the future be applying for political asylum. If there is a need for attorney representation, which the government should provide, then let us address that issue and provide the necessary resources directly to the problem rather than further spreading the limited resources that we provide to our poor citizens for legal services.

As I said earlier an amendment may be offered by the gentleman from California (Mr. MOORHEAD) to maintain the presently existing restrictions on the Corporation preventing lobbying of Federal, State, and local government legislators and officials, which restrictions would otherwise be removed by the appropriations language. This is also a crucial amendment I support.

It would be a travesty to have major reforms depoliticizing the Legal Services Corporation which were adopted in the last Congress reversed through the pending appropriations bills. We need a Legal Services Corporation to provide legal services for the poor, not to pursue a political agenda. The amendments I will offer are to accomplish this goal.

Mr. SMITH of Iowa. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. I thank the chairman for yielding.

Mr. Chairman, I rise to point out that some of the provisions of title II of the bill appropriate funds for the Department of Justice without a prior authorization, and therefore are subject to a point of order.

Rule XXI, clause 2 of the House Rules requires that any appropriation be "previously authorized by law." While I have stated that these provisions would be subject to a point of order, I shall not make such a point of order.

The Committee on the Judiciary in the execution of its oversight and authorizing jurisdiction held a series of hearings at the beginning of this Congress in order to fulfill our responsibilities and be prepared to authorize appropriations for the Department of Justice. Each of the subcommittees held hearings and the Attorney General himself came to testify concerning the authorization. The committee reported out H.R. 2912, the fiscal year 1984 authorization and filed a detailed report. We received a rule on June 21 and are fully prepared to take the bill to the floor.

It is my belief that the authorization process serves a very important function and that the Appropriations Committee may benefit from the authorizing committee's activities pursuant to

the authorization process. I feel that that was the fundamental reason behind the rule which requires that appropriations be previously authorized by law.

I am a strong believer in the orderly procedure of the legislature. It is my hope that in the future we may proceed in a more orderly fashion and that floor scheduling will accommodate both the letter and the spirit of rule XXI.

I know that the gentleman from Iowa is also a strong believer in prior authorization and I commend him for that philosophy.

In closing, I merely urge the leadership and the Members to help us return to the normal procedures of authorization and appropriation.

□ 1410

As I stated, I do not want to file a point of order and I will not do so. The process of authorization has been delayed, but I would urge that the leadership and the Members of the House get together and live up to the legislative process and live up to the rules of the House and bring authorization bills before this body so that when we are working on appropriations there may be better input.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, I want to thank the gentleman for his cooperation. The gentleman has been very cooperative and his committee has also been cooperative in working out the provisions in this bill under very difficult circumstances. And I might say in passing that I think 98 percent of the legislation in here that is legislation on an appropriations bill was put in because the authorizing committee either asked for it or though it would be a good thing to do.

We have tried to work together very closely with the gentleman and it is a difficult situation. I hope that the gentleman's bill is called up before we leave here this fall because it also contains the authorization for 1985. And that bill at least will get us an opportunity next year to come to the floor with an authorization for the Justice Department.

Mr. RODINO. I want to thank the gentleman for giving me this time and I want to point out again that the subcommittee chairman has been most cooperative in the way he has attempted to discharge his responsibilities.

Mr. O'BRIEN. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Chairman, let me say first what a distinct pleasure it has been for me, as the newest Republican member of the subcommittee, to work with the gentleman from Iowa (Mr. SMITH), my subcommittee chairman, and with my colleague from Illinois (Mr. O'BRIEN), the ranking minority member, on this bill.

The hearings were extremely interesting and productive and my pleasure in working with the members of the subcommittee could not be greater.

One matter that I want to point out to the Members of the House that came before our subcommittee in the course of our hearings and is a matter of great concern to me is the fact that in the Department of Justice, an agency for which I used to work, there is in the Antitrust Division a lack of enforcement in respect to vertical agreements to fix prices between manufacturers and retailers.

The chairman of the Antitrust Division, Mr. Baxter, testified before our committee and in response to questioning said that he did not intend to prosecute cases in this area.

Now, Mr. Baxter is an expert and we recognize his expertise, but this Congress, through the Sherman Act, and the Supreme Court of the United States through its interpretation of that act, has found that these agreements are in violation of the law. And any prosecutor, while he may have discretion not to prosecute an individual case, does not have discretion not to prosecute an entire area of the law, an entire group of cases.

We asked, and there was put into the report accompanying this bill language suggesting that Mr. Baxter ought to live up to his responsibilities as the head of the Antitrust Division of the Department of Justice. And I want to say that I think the Congress and this House should look upon the failure to prosecute the law, the failure, particularly of a Republican administration, to prosecute, in an area where competition is being restricted and where consumers are being hurt, as a matter of great gravity and concern to us.

Let me further say, Mr. Chairman, that this bill is not without controversy. It has already received a veto threat by the administration because it is $1.2 billion over the administration's budget request. I have my own problems with some of the funding levels proposed in the bill but I believe the majority of what is before us today is critical to the maintenance of existing worthwhile government activities and research efforts.

The bill includes funding for many programs the administration would like to eliminate. In many cases, I agree with the administration's judgment, though the minority does not generally have the votes on the subcommittee to succeed. In other cases, I disagree. Some of those programs the administration has proposed to zero fund are within the National Oceanic and Atmospheric Administration (NOAA) in the Department of Commerce. These NOAA programs have received continuing support from Members of Congress because of the valuable data the research initiatives have been able to produce. For example, programs such as the sea grant and the PACE weather modification study as well as the work underway at the Great Lakes Environmental Research Laboratory continue to be important to my State and to the entire Great Lakes region.

Also within this bill is an appropriation of $12 million for planning and construction grants for public telecommunications facilities. This matching grant program offers funding to eligible public television and radio stations, as well as nonbroadcast facilities for planning and construction. There are still many people in this country who do not have access to public radio and television and this matching grant program will continue to help spread public communications to those who reside in unserved areas.

Let me further expound on my earlier remarks regarding the Antitrust Division. In the committee report for the Department of Justice, the committee has seen fit to address the serious problem of the Justice Department's lack of enforcement of this Nation's antitrust laws. Price fixing actions, both vertical and horizontal, which have been denounced as illegal by the Congress and specifically found to be so by the Supreme Court, are being ignored by William Baxter, the head of the Antitrust Division. Instead of enforcement of these laws we seem to have a policy at the Justice Department of nonenforcement and nonaction in this area.

Some consideration was made, by members of the subcommittee, to cutting the appropriation for antitrust activities because we are not getting our money's worth. That is not a solution to the problem at this time. However, I cannot reiterate strongly enough how important it is that the antitrust division live up to its responsibility to enforce the law as it exists, regardless of whether Mr. Baxter agrees with it or not. Important language was placed in the report urging Mr. Baxter to prosecute antitrust cases in the area of vertical agreements between retailers and manufacturers. I trust that the Justice Department will adhere to this directive and do its duty to carry out the law as written by the Congress.

The bill includes $20 million for the cooperative agreement program, a program that gives financial assistance to our States and local governments that house Federal prisoners. This is an important program, and I support its inclusion.

Also in this bill is some very important funding for the Federal Prison System account for buildings and fa-

cilities. New prisons facilities are desperately in need in many parts of the country and my personal view is that the Department of Justice should do more to assist the States in this regard. We are all concerned about the high cost of new construction, but I feel the cost to society of releasing prisoners early—and in many cases there are dangerous individuals—because there is no longer room to house them, is a much greater concern. The situation in this Nation with regard to prison overcrowding is an outrage, and I would hope the Congress will take immediate, substantive action on this issue this year through the authorization process. The bill (H.R. 2747) I am cosponsoring with my colleague from Michigan (Mr. SAWYER) would go a long way toward providing a solution.

With regard to overcrowding in State prisons and local jails, the committee debated at length the possibility of transferring surplus Federal property to the States to house inmates. I am pleased that in the report for this bill, the Bureau of Prisons has been directed to conduct a survey of appropriate Federal surplus property that might be available for transfer to States and local governments for use as a prison or jail facilities.

Mr. Chairman, this is the first year I have served on the Commerce, State, Justice, and the Judiciary Subcommittee and I have appreciated the opportunity to work with Chairman NEAL SMITH and my good friend and Illinois colleague GEORGE O'BRIEN, the ranking minority member of the subcommittee. They, and all the members of the subcommittee, have produced a good piece of work in this bill and I hope the Members will see fit to approve it.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

First, I want to thank the gentleman for his contribution on this subcommittee. And I want to say that I agree with every word the gentleman said. The Antitrust Division is not doing its job. We are appropriating $43.9 million for the Division in this bill. As I told Mr. Baxter a year or 2 ago, I think we could take $2 million and give it to some law firm and they could do a better job than they are doing with $43.9 million. At least, a law firm would not come up here and tell us that they intend to intervene on behalf of defendants in civil lawsuits. It is unbelievable. And so we mean every word that is in the report.

What do we do about the problem? If we cut the money, then they say, "Oh, well, you didn't want us to enforce the law."

We are sort of in a bad position. But certainly the gentleman's contribution with regard to antitrust is important and we appreciate it on the subcommittee.

Mr. PORTER. I thank the gentleman.

Mr. O'BRIEN. Mr. Chairman, I have no further requests for time.

Mr. SMITH of Iowa. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. I thank the chairman for yielding to me.

Mr. Chairman, I rise to commend the gentleman from Iowa for the way he has dealt with the problem that we have had year after year concerning the amount of inspection positions of the Immigration Service along the Mexican border. As the chairman well knows, for many, many years, we have been short of inspectors at the border with Mexico. And last year the gentleman from Iowa was nice enough, his committee has been nice enough, to give us the sum of $5 million for 100 additional inspectors along the border.

Unfortunately, last year when that was done, the Immigration Service interpreted that provision to mean temporary employees.

This year I see that the gentleman has in the language of the bill and in the report appropriated $5 million to fund 100 additional permanent positions, which is what we have really needed all along. That temporary business was just a band-aid.

And in addition to that, I want to commend the gentleman for his concern over the continuing problem of delays of travelers and cargo at points of entry in the United States. There should be some kind of a system whereby all of the agencies that have jurisdiction over incoming traffic of passengers have some way of combining their services at primary inspection so that there will not be these tremendously long lines and long waits for people coming back into this country.

I am very happy to see that this concern has been addressed in the report. And again, I want to commend the gentleman and his committee for, first of all, their good understanding of these problems and their magnificent response to them.

Mr. SMITH of Iowa. I thank the gentleman. I want to say that our understanding has been greatly enhanced by the gentleman's comments from time to time to members of the committee because he is right there where he sees all the problems. We know that personnel alone will not solve these problems, but at least we ought not to overwork the INS employees who are there the way they have been at times in the past.

Mr. KAZEN. I thank the gentleman.

Mr. O'BRIEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to make reference to an amendment to be offered.

The 1983 appropriation for EDA came in two parts; $200 million for regular EDA programs and $100 million for emergency expenditures, which was known as the jobs bill.

For 1984 the administration requested no funding for EDA, planning to phase it out. Our subcommittee believed that this program should be continued and I support the continued funding at a level slightly above the 1983 figure. But the subcommittee funding level is $147,500,000 over the 1983 level. The $100 million in the 1983 jobs bill has been carried over to 1984.

The jobs bill appropriation was a one-time emergency antirecessionary effort, which I supported. It was not viewed as a recurring requirement.

I intend, if I can, to offer an amendment which would cut the $100 million of the jobs bill money out of the bill. It will not bring us into line with the administration's budget request, but it will get us a little nearer to that figure and perhaps a little further away from the possibility of a veto.

● Mr. SEIBERLING. Mr. Chairman, as a member of the Judiciary Committee and of the Subcommittee on Monopolies and Commercial Law, I was pleased to read the strong language in the Appropriations Committee report recommending that the Antitrust Division of the Department of Justice devote all of its resources to the vigorous enforcement of the Nation's antitrust laws.

I share the sympathies of the committee in this matter. The antitrust laws form the backbone of our free market system. If we want to continue to deregulate our economy, we must seek to strengthen, not weaken, the antitrust laws. Every time that the Assistant Attorney General for Antitrust comes before our subcommittee, the members inform him in no uncertain terms that he is expected to maintain strong antitrust policies and energetically enforce those laws. Unfortunately, I do not think he is getting the message.

As mentioned in the Appropriations Committee report accompanying H.R. 3222, the Antitrust Division has decided, as a matter of policy, not to enforce the prohibition on resale price maintenance, despite a long string of Supreme Court decisions and congressional action declaring that the law requires such a ban on retail price fixing. In fact, the Justice Department recently urged the Supreme Court in a private action to which the United States is not a party, to overturn the precedent that resale price maintenance is illegal.

Another example of the weakening of the Antitrust Division's efforts to

enforce the antitrust laws can be seen in its proposal to reallocate 55 positions and $2,759,000 from the Antitrust Division to U.S. attorneys offices around the country. One of the options the Department recommended for carrying out this proposal was to select the 55 employees first by asking for volunteers. If that were insufficient, the Department recommended closing the Cleveland field office of the Antitrust Division.

The Antitrust Division has maintained a field office in Cleveland for many years. The office currently has responsibility for antitrust enforcement in Ohio, Kentucky, West Virginia, and eastern Michigan, including such major metropolitan areas as Cleveland, Detroit, Cincinnati, Louisville, Toledo, and Columbus. The office covers one of the most economically diverse and industrialized regions of the country.

As a major headquarters city, Cleveland itself is ideally suited to host the office. The Cleveland-Akron-Lorain Standard Consolidated Statistical Area is home to 33 of Fortune magazine's 1,000 largest industrial headquarters with 29 Fortune 1,000 headquarters located in the city. But not only has the office in Cleveland allowed ready access to so many major businesses, it has been a very effective source of antitrust enforcement. According to Cleveland Mayor George Voinovich, from 1977 to 1982, the Cleveland office obtained fines totaling more than $11.8 million stemming from criminal antitrust convictions.

Consumers, businesses, State government agencies, and private counsel have experienced clear and substantial benefits from the Cleveland antitrust office. No acceptable justification has been advanced for its closing. For that reason, the Ohio congressional delegation has united in opposition to the move. And the House Judiciary Committee included in H.R. 2912, the fiscal year 1984 Department of Justice authorization bill, a provision limiting the Department's authority to transfer positions from the legal divisions to the U.S. attorneys offices. The committee was particularly concerned with the apparently unstudied manner in which the Department considered the closing of the Cleveland office. H.R. 2912 demonstrates the Judiciary Committee's opposition to any proposal to close the Cleveland office without a thorough review.

I must say that I was pleased last week when Assistant Attorney General William Baxter, appearing before a Monopolies Subcommittee oversight hearing, responded to my question on this subject that the Justice Department had gotten the committee's message and that the Cleveland office is "alive and well." He did say, however, that the matter is still "on hold" and that it will not be finally resolved until the overall funding issue of the Antitrust Division is resolved. I hope that in final consideration of this issue, the Department of Justice and the administration will recognize that the mission of the field offices of the Antitrust Division is vital to effective enforcement of the antitrust laws, that the specialized skills, experience, and expertise of the field office staff will not be casually disposed of, and that the Cleveland office in particular will be permitted to continue its work at full force.●

● Mr. WYDEN. Mr. Chairman, I hope our colleagues will strongly support H.R. 3222 which would appropriate $296 million for the Legal Services Corporation for fiscal year 1984. Now, more than ever, we cannot afford to close the doors of justice on the poor and the unemployed.

Take my home State of Oregon for example. Legal aid offices there are experiencing a nearly threefold increase in demand for legal assistance. The recession has left a record number of Oregonians unemployed. With this unemployment has come more legal troubles, not less.

The results of an undefended legal proceeding for one who is unemployed can be tragic. Homes can be repossessed and life savings lost if legal advice is not available to those who need it most. If we pass the recommended funding level of $296 million for the Legal Services Corporation, legal aid offices in Oregon will be able to maintain their current level of service, and at least some of these tragedies can be averted.

Both the Courts Subcommittee and the Appropriations Committee have recommended providing $296 million for the Legal Services Corporation. This figure represents a slight gain over last year's funding level, but it barely makes up for the drastic loss in funding LSC experienced 2 years ago.

To put the importance of this $296 million figure into perspective, let me point out that if we were to approve funding for LSC at last year's level of $241 million, three legal aid offices in Oregon would be forced to close. That is, 3 offices out of a total of 12.

In Oregon, legal aid offices are usually located in small rural communities. These communities are often hardest hit by the recession and have among the highest rates of unemployment in the country. Each legal aid office in Oregon serves about 10,000 eligible people. Of those 10,000 people who are eligible approximately one-half receive some type of assistance from a legal services program. That service may include actual handling of the case, rendering of advice where that may be sufficient, or referring the case to another lawyer or agency.

Thus, if we fund legal services at last year's level of $241 million, 10,000 to 15,000 Oregonians who cannot afford a traditional attorney will be forced to go without any legal assistance. Again, these are the very individuals who are really suffering the effects of the recession and the ones who need our help the most.

Likewise, if we approve a funding level of only $260 million, two legal aid offices in my State still will be forced to close. Ten to twelve staff members will be laid off and 10,000 needy Oregonians will not receive vital legal assistance.

With the effects of the recession still prevelent, now is not the time to be cutting back funds for a program which helps those in our society who are truly in need of justice. I urge my collegues to support the $296 million funding level for the Legal Services Corporation.●

● Mr. BOUCHER. Mr. Chairman, I am pleased to support H.R. 3222, legislation making appropriations for the Departments of Commerce, State, and Justice, for the Federal judiciary and for related agencies.

I am particularly pleased to note that the committee has included in the bill $296 million for the activities of the Legal Services Corporation, which provides legal counsel and other services to low-income individuals who might not otherwise have the benefit of legal representation in civil cases.

Since taking office, President Reagan has sought to abolish this important agency by requesting no funds for the Legal Services Corporation for fiscal years 1982, 1983, or 1984. The President's opposition to fair legal representation for the poor led to a 25-percent cut in LSC funding in fiscal year 1982. The fiscal year 1982 funding level was continued in fiscal year 1983, and as a result, the American Bar Association reports that local legal services programs have had to reduce client representation by 30 percent.

I am pleased that the Appropriations Committee has recognized the need for increased Legal Services Corporation activities, but even the $55 million increase proposed for this fiscal year will leave LSC funding $25 million below the fiscal year 1981 funding level.

Equal access to justice is fundamental to the American legal system; individuals should not be denied legal representation in civil cases because of their economic status. I commend the committee for its support of the Legal Services Corporation, and I urge my colleagues to vote for H.R. 3222.●

● Mr. WALGREN. Mr. Chairman, I would like to make a few observations on the provisions of this bill relating to the funds for the National Bureau of Standards and the Office of Productivity, Technology and Innovation in the Commerce Department. These activities are aimed at the important

function of advancing the use by American industry of the most advanced scientific and technological discoveries in the interest of achieving higher productivity and a strong effort in technological innovation.

In title I, on page 10, the bill would provide the sum of $125.5 million for the programs of the NBS. This amount is identical to the amount authorized by the House Science and Technology Committee in the bill H.R. 2513 which was reported on May 9 of this year. As part of this total sum, the bill would permit the important programs of fire research, building research, and computer standards research, which the administration had targeted for elimination or severe reduction, to continue.

The Center for Fire Research at the NBS performs a function which affects every community in the United States. The work of the Fire Research Center has the potential to reduce drastically the losses in lives and property from fire which each year takes much too large a toll. The Building Research Center conducts research which similarly affects each and every community in our Nation. The results of that research finds its way into the building codes used throughout the country. And the research at the NBS on computer standards will directly affect both the domestic use of computer equipment and the foreign sales of this important sector of American industry.

The funds for all of these activities, together with the significant core programs of the National Bureau of Standards, will permit the Bureau to maintain the strength which over the years has led to its worldwide recognition as a leader in its field while at the same time benefiting our citizens and our country.

H.R. 3222 would also provide a modest level of funds for the important activities of the Stevenson-Wydler Technology Innovation Act. The $5.7 million included in the bill for the Office of Productivity, Technology and Innovation would permit several of the significant initiatives aimed at strengthening U.S. technology and productivity to move forward in fiscal year 1984.

I commend the subcommittee and its distinguished chairman, the gentleman from Iowa, for including in this bill the funds that are required to keep American research and development strong in these several important areas, and urge my colleagues in the House to support the bill before us.●

● Mr. BONKER. Mr. Chairman, I urge my colleagues to support the appropriations measure for the Departments of Commerce, Justice, and State, and the judiciary. Of special concern are the provisions that overturn the administration's proposed cuts in Pacific Northwest fisheries programs.

Earlier in the year, the administration proposed to slash the National Marine Fisheries Service budget by 38 percent. Included in these cuts were a phase-out of support for the Columbia River fish hatcheries; termination of the vessel buy-back program; virtual elimination of fisheries promotion funds; transfer of Saltonstall-Kennedy to the General Fund; termination of industry grants; a dramatic reduction of support for the regional fishery management councils; termination of the industry loan guarantee program; and the end of commercial and anadromous fisheries research efforts.

In short, the administration's actions represented a wholesale assault on recreational and commercial fisherman nationwide. The timing could not have been worse. Our commercial fishermen are literally reeling from a disastrous year. Recreational fishermen are bewildered by the poor performance of some traditional runs.

In March, we considered the administration's proposed cuts in the Merchant Marine and Fisheries Committee. Congressman PRITCHARD and I are the only two Northwest Members on the committee. We succeeded in overturning many of the cuts in the committee report to the Budget Committee.

Thereafter, the congressional delegations of Washington and Oregon testified in support of funding before the Appropriations Subcommittee on Commerce, Justice, State, and the Judiciary. Today's bill is the product of those efforts and the receptiveness of Subcommittee Chairman NEAL SMITH, who has been very helpful and understanding throughout.

The measure before us today restores level funding of $10.4 million for the Columbia River hatcheries. These funds will be used to continue meeting the Federal Government's obligation to mitigate the loss of fish caused by Federal hydropower facilities on the Columbia River. Expenditures will be made not only for hatcheries, but also for fish passage, stream clearance, irrigation diversion screening, and research.

The bill also provides $5 million for anadromous fishery research grants. The funds will be used for ocean sampling, freshwater production evaluation, tagging studies, and related research.

The important vessel buy-back program is kept alive; $2.5 million is provided for reduction of the commercial fleet whose fishing opportunities were undermined by Federal court decisions construing Indian fishing rights.

The vital planning effort being pursued under the Salmon and Steelhead Conservation and Enhancement Act of 1980 will be carried through to conclusion. I remain optimistic that, through this process, the competing factions will be able to arrive at mutually agreed plans for enhancing the salmon and steelhead resources of the Pacific Northwest.

The bill restores funding for commercial fisheries research. In the Northwest, these funds will be used to assess ground fish stocks, to manage the dungeness crab harvest, to evaluate underutilized invertebrates, and much more.

The administration's intention to put the Saltonstall-Kennedy program into the General Fund, effectively terminating it, is also rejected in the bill. This important money will be used in Washington State to develop a squid and scallop fishery, and to develop new aggregation technologies to promote recreational fisheries.

There is more good news in the bill for fisheries. Funding for the regional managment councils is restored; the highly cost-effective sea grant program is slated to receive $35 million; and other salmon research activities are funded.

In short, the House bill is a thorough repudiation of the administration's antifisheries budget. It is an endorsement of quality fisheries programs around the country.

I congratulate the subcommittee and the full committee for their excellent work and hope that the clear signal of our House vote will convince the administration to halt its unnecessary, uneconomic, and dangerous assault on our Nation's fisheries.●

● Mr. SOLARZ. I rise, Mr. Chairman, to call attention to the fact that the legislation under consideration today fails to provide funds for protection of foreign officials in the United States who face extraordinary threats. The House Appropriations Committee is concerned about the potential magnitude of the funding requirements for such a program, particularly in view of the worldwide increase in terrorism in recent years. It is precisely because of this increase in terrorism that the Secretary of State must sometimes ask for extraordinary protection which some local jurisdictions are unable or unwilling to provide without Federal assistance. Many of us in the House are concerned about this problem, and we provided for funding for this extraordinary protection in the State Department authorization, which has not yet been acted upon by the Senate.

Local jurisdictions provide protection to diplomats and other foreign officials, as to all persons, under equal protection of the law. However, our responsibility as a nation goes further. The 1963 Vienna Convention on Consular Relations describes the special duty of the receiving state to protect consulates. The ability of the United States to meet these obligations also has a direct effect on our ability to re-

quest special protection from other nations when it is needed for U.S. diplomatic and consular personnel abroad.

Extraordinary threats require more effective cooperation among Federal, State, and local authorities. On January 28, 1982, the Turkish Consul General in Los Angeles was assassinated. On May 4, 1982, the Honorary Turkish Consul in Boston was assassinated. In just the first 4 months of this year, there were 140 terrorist incidents involving diplomats in 28 locations throughout the world. Over 50 were killed and nearly 150 wounded. There have been 377 such incidents in the United States since 1968. Let us not wait until others die in the United States before we act.

We need to craft guidelines which will insure that funding for this program will not be open-ended yet will enable us to meet our responsibilities. This program is intended not to reimburse local jurisdictions for routine protection, but to provide extraordinary protective services when there is an extraordinary threat. I understand that our colleagues in the Senate are working with the State Department on an amendment to the State authorization bill which will set guidelines to make clear that the funds provided may be used only in these circumstances. I hope that those guidelines will meet the concerns of our colleagues on the House Appropriations Committee, and that we will be able to proceed in conference to agree on authorization and appropriations for this necessary program.●

● Mr. FUQUA. Mr. Chairman, I would like to congratulate the gentleman from Mississippi and the gentleman from Iowa for their leadership in bringing this appropriations legislation to the floor. The funding levels contained in H.R. 3222 are below the budget allocations contained in the budget resolution. I also want to thank them for their careful attention to the recommendations of the Committee on Science and Technology.

I believe that as a result of the deliberations of the Appropriations Committee, we have before us a bill which is both responsive to national needs and to the tight budgetary situation.

I am pleased that the bill commits to the growth of our industries. I commend the committee for providing additional funds for implementation of the Stevenson-Wydler Act. These funds will stimulate the economy by bringing the expertise of universities to bear on the problems of industry in centers for industrial technology, and by supporting a Center for the Utilization of Federal Technology to transfer new technology from Federal laboratories into use.

The bill restores what the Committee on Science and Technology has viewed as essential funding for programs at the National Bureau of Standards, including the Center for Fire Research, Center for Building Technology, and the Institute for Computer Science and Technology.

The committee has acted with sound judgment and foresight in maintaining the two-polar orbiting satellite system for NOAA. This is vitally important to the Nation's weather forecasting capabilities.

I applaud the efforts of the Appropriations Committee in presenting this bill and I urge my colleagues to join me in voting for its passage.

Thank you, Mr. Chairman.●

● Mr. MATSUI. Mr. Chairman, I rise in strong support of H.R. 3222, the Commerce-Justice-State-Judiciary appropriations bill for fiscal year 1984. This measure contains funding which will assist such vital programs as public radio and television, Trade Adjustment Assistance, and the Legal Services Corporation. H.R. 3222 also will provide needed assistance to local communities, like Sacramento, Calif., which are grappling with the problem of finding adequate jail space to place both their Federal and non-Federal inmate populations.

H.R. 3222 provides $20 million for the U.S. Marshals Service's cooperative agreement program (CAP). This innovative program aids State and local governments to renovate, construct and equip facilities that detain Federal prisoners. This program enables cities like Sacramento, in which Federal courts are situated, to handle increasing Federal inmate populations. This assistance is most necessary as these communities' detention facilities often do not meet prescribed Federal standards.

While the Federal Government currently operates 42 detention facilities for unsentenced prisoners nationwide, it is still principally dependent upon the availability of State and local detention services to confine persons arrested for Federal offenses. According to the U.S. Marshals Service, the enormous problems of overcrowding and substandard jail conditions have terminated or restricted severely Federal access to 190 contract facilities. The CAP program was intended, in part, to reverse this trend by providing financial assistance, equipment and supplies, and staff training to major use facilities in exchange for a guaranteed level of space in which to house Federal prisoners.

In Sacramento, the CAP program will aid county officials to construct a work release center as well as make a sizable financial contribution to the proposed county jail. As it is anticipated that Sacramento's Federal inmate population will increase from 60 inmates a day to 150 inmates a day over the next 5 years, the CAP funding is absolutely critical to assure that adequate detention space is available for all inmates.

Many other cities and towns throughout the Nation face similar problems of inmate overcrowding, and the CAP program will provide needed relief to these areas. Indeed, I find it most encouraging that the Congress has recognized the problem of inadequate facilities for jail inmates is national in scope by heretofore funding the CAP program. In conclusion, let me say to my colleagues that we should continue to demonstrate our support for this important program by approving H.R. 3222 today.●

● Mr. STARK. Mr. Chairman, while appropriations to the great majority of agencies included in H.R. 3222—particularly the law enforcement agencies and the LSC—are worthwhile, a glaring $54 million mistake appears—and this mistake prevents me from supporting the bill as a whole.

Project Democracy and the National Endowment for Democracy are, shall we say, interesting. To promote our system of Government throughout the world is admirable. Unfortunately, here at home we are facing enormous deficits, high unemployment, imbalances in trade, lack of food and housing for the poor, deterioration of our infrastructure, and inequities in our tax system. I think many Members will agree that our most potent campaign for democracy can, and should, be waged at home. What better persuasion to our system of government than proof that it works? What better testimony to democracy than adequate food and housing for our citizens, equal employment opportunity, and intelligent budget priorities? These programs do not address the problems we face with our own citizens.

Therefore, in protest to the start of this new program in a bill which is already overbudget, I intend to vote no.●

● Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 3222, appropriations for the Departments of Commerce, Justice, State and the Judiciary, and related agencies, for fiscal year 1984.

The bill before us continues funding, and restores funds in some cases, for programs which have provided invaluable support for a variety of Federal assistance efforts throughout the Nation and in Puerto Rico.

I would like to commend the subcommittee chairman, NEAL SMITH of Iowa, and his colleagues on both sides of the aisle for reporting this legislation out expeditiously, and in providing a sensible and balanced approach in keeping some programs in place that have been instrumental in helping areas suffering high unemployment.

The committee recommends a total of slightly more than $345 million in new budget authority, and $150 million in loan guarantee authority for the programs and expenses of the Fed-

eral Economic Development Administration.

While there have been proposals to totally eliminate the EDA and its programs, I am pleased that the Appropriations Subcommittee has realized that the role of the Federal EDA in helping provide badly needed assistance for employment opportunities and at the same time to build public facilities.

Also, I am pleased to note that the Subcommittee on Economic Development chaired by our colleague Congressman JIM OBERSTAR, has reported H.R. 10, the National Development Investment Act, which will reauthorize the Federal Economic Development Administration for 3 years.

I have personally seen the impact and record of EDA in Puerto Rico. Its programs of public works grants planning assistance, emergency public works, and other programs such as business and loan guarantees comprise an effective, strategy for putting people to work, and for helping communities with high unemployment help themselves.

The fact that this appropriation measure also, on a parallel basis, recognizes the need to stimulate the economy, and to use EDA as one tool for that strategy, is extremely important, and I commend the members for realizing that EDA has a significant role to continue to play in economic recovery efforts.

H.R. 3222 also includes $53,881,000 in new budget authority for the Minority Business Development Agency. The committee wisely has reported language which will help the private sector give financial assistance to public and private organizations which, in turn, help provide management assistance to minority businessmen.

This provision is critical for new and struggling minority businesses, to fairly compete in the private sector, must have the necessary outside expertise to guide them into solvency.

Another important program funded in this bill is the coastal zone management program. This program has been vital to Puerto Rico, confronted as we are with an increased responsibility for management programs to preserve and protect our island's coastal zone.

I am pleased to note that the bill provides $29 million in funding for State assistance programs. This will help Puerto Rico in our efforts to manage our coastal resources.

For the Small Business Administration, the committee has provided funds for assistance programs. The legislation would earmark $22 million in funds for small business development centers, and restore funds for new direct loan obligations for the entire range of SBA loan programs under the jurisdiction of this agency.

There are, in addition, several activities of the U.S. Department of Justice which are continued at an essential level. I refer to the Drug Enforcement Administration and the committee recommendation to restore personnel measures to DEA programs to enable them to combat narcotic traffic and assist State and local police in various DEA efforts.

Finally, the Office of Justice Assistance, Research and Statistics (OJARS) of the Department of Justice is an invaluable agency which, along with the Law Enforcement Assistance Administration, has helped keep in place a variety of programs to update criminal statistics, and operate juvenile and delinquency prevention programs.

All of the programs mentioned, as continued by H.R. 3222, are reasonable and commonsense approaches in helping solve a variety of societal problems. I commend the subcommittee for reporting this bill and strongly support this effort.●

□ 1420

Mr. O'BRIEN. Mr. Chairman, I yield back the balance of my time.

Mr. SMITH of Iowa. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk proceeded to read the bill.

Mr. FRENZEL (during the reading). Mr. Chairman, I reserve a point of order on page 5, lines 22, 23, and 24.

The CHAIRMAN. The Chair will advise the gentleman from Minnesota that the gentleman's point of order is premature. The Clerk has not reached that point in the reading as yet.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. FRENZEL. Mr. Chairman, at what point would such a point of order be appropriate?

The CHAIRMAN. When the Clerk has read that paragraph.

Mr. FRENZEL. I thank the Chair.

The CHAIRMAN. The Clerk will continue to read.

The Clerk read as follows:

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses for the promotion of foreign commerce and for scientific and technological research and development, as authorized by law, $700,000, to remain available until expended: *Provided,* That this appropriation shall be available, in addition to other appropriations to the Department of Commerce, for payments in the foregoing currencies.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning on line 11, page 2, as a violation of clause 2, rule XXI, being an appropriation without proper authorization.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) wish to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, it is not authorized.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) concedes the point of order.

The Chair sustains the point of order against the paragraph.

The Clerk will read.

The Clerk read as follows:

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, of economic and statistical analysis programs, $41,134,000.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning on line 12 of page 3, as a violation of clause, 2 rule XXI.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) desire to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order, but I send an amendment to the desk.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) concedes the point of order.

The Chair sustains the point of order.

AMENDMENT OFFERED BY MR. SMITH OF IOWA

Mr. SMITH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Iowa: On Page 3, after line 10, insert the following:

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, of economic and statistical analysis programs, $37,207,000.

Mr. SMITH of Iowa. Mr. Chairman, this is the amount that is authorized. The new authorization legislation has not passed yet. We anticipated that they need the additional money, but this is the amount that is presently authorized under the existing law.

I ask for a favorable vote.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words, and I rise to ask the gentleman a question.

Did I understand correctly that this is the amount that is authorized by law?

Mr. SMITH of Iowa. That is right.

Mr. WALKER. So, therefore, this would bring the appropriation in line with the authorization?

Mr. SMITH of Iowa. That is right.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. SMITH).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ECONOMIC DEVELOPMENT ADMINISTRATION

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

For economic development assistance as provided by the Public Works and Economic Development Act of 1965, as amended, and Public Law 91-304, and such laws that were in effect immediately before September 30, 1982, $315,000,000 *Provided*, That during fiscal year 1984 total commitments to guarantee loans shall not exceed $150,000,000 of contingent liability for loan principal.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning at line 16 on page 3, as a violation of clause, 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) wish to be heard on the point of order?

Mr. SMITH of Iowa, Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) concedes the point of order.

The Chair sustains the point of order.

Mr. OBERSTAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am very disappointed that the gentleman from Pennsylvania made a point of order against the Economic Development Administration program. I cannot think of a worse time to strike funding for the Government's only and proven effective job development and job creation program.

EDA has had some difficulties, to be sure. Our Subcommittee on Economic Development of the House Public Works and Transportation Committee has held extensive hearings, and on a bipartisan basis, with total cooperation on the Republican side of our committee, fashioned a new economic development program, H.R. 10. This House passed that legislation by a vote of 306 to 113, an overwhelming vote, after a rather extensive discussion and debate, at an authorization level that is provided for within the budget resolution.

We hope that the other body will act on that legislation. Its outcome is certainly in doubt at the present time, but there is an opportunity to pass such legislation.

But with unemployment still well above 9 percent, double what in the 1960's was considered to be an unacceptable level of unemployment; with 10½ million Americans who do not have jobs, including my own congressional district where some counties have as high as 60 percent unemployment, with the devastation we are experiencing in the steel industry and in iron ore mining, the Economic Development Administration programs have offered the only hope, the only opportunity for those communities to leverage non-Federal public funds and private funds, to create jobs, open up employment opportunities, and this motion just simply wipes out that opportunity.

I hope that the chairman of the subcommittee, when the continuing resolution is considered, will take this matter under consideration and work to include funding for the Economic Development Administration in that continuing resolution and restore these funds which are desperately needed.

I would like to comment briefly on the hearings that we had on the operation and effectiveness of the EDA program. A witness from Reading, Pa., John Sheehan, chairman of Reading Industries, a former member of the Federal Reserve Board, appointed by President Richard Nixon, as he described himself, a conservative, a very strong, staunch conservative, his company was saved by an EDA loan guarantee, and he said:

> Our company has provided not only $45 million to the Reading community in direct wages but perhaps another $150 to $250 million in supporting wages. I conclude that the EDA funds were spent wisely and well. 700 men and women are at work in our plants. The government funds have been covered at least 10 times and perhaps 50 times if you consider the total value of not only our line employment but also the 5 times—or more—that many in the general vicinity of Reading who gain their support from those line manufacturing jobs.

Mr. Sheehan went on to point out that had his company not received the EDA loan guarantee—it was not direct loan money—if they had not received the loan guarantee, this business would have left Pennsylvania, it would have left the United States, it would have gone to West Germany and the product manufactured there and exported to the United States. Instead, that product is being manufactured in the United States, creating jobs, taxpaying jobs in this country, and exporting product to West Germany.

That is just one of many, many examples that we have and could cite supporting the effectiveness of the EDA program.

I deplore the point of order the gentleman made that strikes the EDA funding, and I hope the full amount can be restored, particularly during this time of continuing recession.

Mr. WALKER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think we have just understood the gentleman from Minnesota to say that we ought to go ahead and appropriate money, even though his authorization committee has not completed its work.

I think that that really calls the question before this Congress. This Congress does not operate as a one-body unicameral legislature. We do, in fact, have two bodies of this Congress, and the Congress has not yet cleared EDA legislation.

The gentleman in the well admitted that there are problems with the program the way it has been operated and that there were needed reforms. The bill that passed the House was a part of that reform program. We have none of those reforms in place, no changes in place, because of a lack of authorization and, therefore, what we would be doing under the funding, had this point of order not rested, would be funding a program that the gentleman admits is flawed. And that is really a major problem, I think. I think it demonstrates why we should have authoriztaions before we have appropriations.

□ 1430

We ought not in this body to go forward with the idea that we can simply appropriate money for programs even though there is no proper authorization on which the Houses of Congress have worked their will.

So I would hope that while the gentleman feels strongly about EDA, he also recognizes that part of his job as a Member of this institution and a part of all of our jobs as Members of this institution is to assure that we do things in an orderly way so that the mistakes of the past are not repeated with Federal tax money in the future. By allowing the point of order to rest, we do give ourselves, hopefully, an opportunity to move toward an authorization process which will produce a better program if, in fact, we end up with the funding.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be very glad to yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman very much for yielding.

There are, as I have said, and as our committee has pointed out, shortcomings in the current EDA program. Many of those have been corrected by the current administration of that program, which is working very hard to put EDA on a better track. That does not mean that the program is fatally flawed. By continuing those programs, we do provide a measure of relief to distressed Areas with high unemployment, and I think this is not money that is wasted.

I do want to point out to the gentleman that the current administration of the EDA program has taken the advice of the committee and corrected many of the problems administratively.

Mr. WALKER. If the gentleman will allow me to reclaim my time, I do not believe that I did say it was fatally flawed; I said the gentleman had admitted that it was flawed. That is a question when we are mounting $200 billion deficits, as to whether or not we ought to continue to pour tax money down drains when the money is not being spent wisely.

That is the point of this point of order. We have $200 billion worth of deficit that we have got to begin to deal with. If one place we can deal with it is in programs that even the authorizing committee admits have some problems with them, then I think this is the right time and the right place in which to deal with that particular problem.

The point of order rests only because there is not an authorization. Once the gentleman and his committee and the committees of the Congress on the other side have completed their process, it may well be that it can be subjected to an appropriation, but it should not be a course of funding which simply continues a stream of money to programs which are not now working as well as we know they should.

Mr. OBERSTAR. If the gentleman will yield further, I hope we can enlist the gentleman's support with the other body to move that authorization bill through over there, since it passed overwhelmingly in this body.

Mr. WALKER. I thank the gentleman, and I think the other body certainly will want to work its will one way or the other on the legislation.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SALARIES AND EXPENSES

For necessary expenses of administering the economic development assistance programs as provided for by law, $30,141,000: *Provided*, That not to exceed $300,000 may be advanced to the Small Business Administration for processing of loan applications: *Provided further*, That these funds may be used to monitor projects approved pursuant to title I of the Public Works Employment Act of 1976, as amended, title II of the Trade Act of 1974, as amended, and the Community Emergency Drought Relief Act of 1977. Notwithstanding any other provision of this Act or any other law, funds appropriated in this paragraph shall be used to fill and maintain forty-seven permanent positions designated as Economic Development Representatives out of the total number of permanent positions funded in the Salaries and Expenses account of the Economic Development Administration for fiscal year 1984, and such positions shall be maintained in the various States within the approved organizational structure in place on June 1, 1981, and where possible, with those employees who filled those positions on that date.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning with line 1 on page 4 as a violation of clause 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) desire to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

For necessary expenses for international trade activities of the Department of Commerce, including trade promotional activities abroad without regard to the provisions of law set forth in 44 U.S.C. 3702 and 3703; full medical coverage for dependent members of immediate families of employees stationed overseas; employment of Americans and aliens by contract for services abroad; rental of space abroad for periods not exceeding five years, and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; payment of tort claims, in the manner authorized in the first paragraph of 28 U.S.C. 2673 when such claims arise in foreign countries; not to exceed $165,200 for official representation expenses abroad; awards of compensation to informers under the Export Administration Act of 1979, and an authorized by 22 U.S.C. 401(b); purchase of passenger motor vehicles for official use abroad and motor vehicles for law enforcement use; $183,831,000, to remain available until expended: *Provided*, That the provisions of the first sentence of section 105(f) and all of section 108(c) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2455(f) and 2458(c)) shall apply in carrying out these activities. During fiscal year 1984 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $15,000,000. During fiscal year 1984, total commitments to guarantee loans shall not exceed $30,000,000 of contingent liability for loan principal.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I reserve a point of order against this section of the bill.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. WALKER) reserves a point of order against this section of the bill.

Mr. FRENZEL. Mr. Chairman, I take this time simply to indicate that this is an unauthorized section, as was noted in the general debate. But, after discussing this matter with the distinguished chairman and the distinguished ranking member, I think that it will not be necessary to make a point of order.

The House authorization bill, which was only passed last week, contained about $27½ million for this total range of programs. This authorization bill contains $40 million plus $30 million in loan guarantee authority. The chairman and ranking member have indicated that they would like to follow the House authorization as closely as possible when the bill moves into conference.

This is a section of the law which has not been terribly effective, but on the other hand, in light of our present difficulties in this trade area, it is considered important to many Members. I would hope that the Committee of the Whole would stand easy on this one and trust the Appropriations Committee to carry it through in conference.

The CHAIRMAN. Does the gentleman from Pennsylvania insist upon his point of order?

Mr. WALKER. Mr. Chairman, in light of the remarks of the distinguished ranking member of the committee that handles this legislation, I withdraw my reservation of a point of order.

The CHAIRMAN. The gentleman withdraws his reservation of a point of order.

The Clerk will read.

The Clerk read as follows:

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft; 399 commissioned officers on the active list; construction of facilities, including initial equipment; alteration, modernization, and relocation of facilities; and acquisition of land for facilities; $942,871,000, to remain available until expended, of which $27,000,000 shall be derived from the Airport and Airway Trust Fund; and in addition, $13,600,000 shall be transferred to this appropriation from the fund entitled "Promote and develop fishery products and research pertaining to American fisheries".

POINT OF ORDER

Mr. DANNEMEYER. Mr. Chairman, pursuant to clause 2 of rule XXI, I raise a point of order against the appropriation for this item contained on page 7 beginning at line 9 on the grounds that there is no authorization that has been passed and in law.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) desire to be heard on the point of order?

Mr. SMITH of Iowa. I concede that point of order, but I have an amendment at the desk.

The CHAIRMAN. The gentleman concedes the point of order.

The Chair sustains the point of order against the paragraph.

AMENDMENT OFFERED BY MR. SMITH OF IOWA

Mr. SMITH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Iowa: On page 7, after line 8, insert the following:

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH AND FACILITIES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft; construction of facilities, including initial equipment; alteration, modernization and relocation of facilities; $888,592,000, of

which $27,000,000 shall be derived from the Airport and Airways Trust Fund.

Mr. SMITH of Iowa. Mr. Chairman, this is the amount that is authorized. We thought the additional amounts were very important, and I think a good many Members, maybe most of the Members did, but in view of the point of order, this is the most that we can put in for this program, so I ask for a vote.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from California.

Mr. DANNEMEYER. I thank the gentleman for yielding.

Mr. Chairman, is there an existing authorization in the law for an amount for this function?

Mr. SMITH of Iowa. Yes.

Mr. DANNEMEYER. What is that amount?

Mr. SMITH of Iowa. It is the amount that is in the amendment.

Mr. DANNEMEYER. $888,592,000?

Mr. SMITH of Iowa. That is right, and the $27 million transfer was authorized just a few months ago.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

FISHERIES LOAN FUND

For expenses necessary to carry out the provisions of section 221 of the American Fisheries Promotion Act of December 22, 1980 (Public Law 96-561), there are appropriated to the Fisheries Loan Fund, $11,000,000 from receipts collected pursuant to that Act: *Provided*, That during fiscal year 1984 not to exceed $300,000 of the Fisheries Loan Fund shall be available for administrative expenses.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning at line 12, on page 9, as a violation of clause 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa (Mr. SMITH) desire to be heard on the point of order?

Mr. SMITH of Iowa. My understanding is that this is authorized. So I do resist the point of order under section 103 of Public Law 98-44.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. WALKER) desire to be heard further?

Mr. WALKER. It was my understanding, Mr. Chairman, that this was not authorized. I am told that it is, so therefore I withdraw my point of order.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. WALKER) withdraws his point of order.

□ 1440

The Clerk will read.

The Clerk read as follows:

NATIONAL BUREAU OF STANDARDS

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

For necessary expenses of the National Bureau of Standards, $125,485,000, to remain available until expended. Of the foregoing amount, not to exceed $52,031,000 is for Measurement, Research and Standards; not to exceed $22,881,000 is for Engineering Measurements and Standards; not to exceed $11,500,000 is for Computer Science and Technology; not to exceed $14,356,000 is for Core Research Program for Innovation and Productivity; not to exceed $6,386,000 is for the Fire Research Center; not to exceed $7,672,000 is for Technical Competence; not to exceed $10,659,000 if for Central Technical Support; and, not to exceed $5,661,000 may be transferred to the "Working Capital Fund".

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning on line 3, page 10, as a violation of clause 2 of rule XXI.

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

Mr. ALBOSTA. Mr. Chairman, I rise in strong support of the funding for the Economic Development Administration, more commonly known as EDA, contained in H.R. 3222, the Commerce-Justice-State appropriations bill the House is considering today.

This administration has systematically sought to destroy EDA by poor management and bad policies. With double-digit unemployment still existing in many parts of the country, including my own State of Michigan, there is no question EDA is needed to help create jobs. Instead of trying to improve the EDA program by targeting economic development assistance in a more effective way as Congress has proposed, this administration, through the Commerce Department, has tried to destroy the program.

This country needs a targeted economic development assistance program to encourage companies to locate in high-unemployment areas and to assist cities and towns with double-digit unemployment in attracting new businesses or helping existing ones expand. Cutting EDA funding, as the gentleman from Illinois is proposing today, would be pennywise and dollar foolish. For every percentage point that unemployment drops, the Federal deficit, now running at close to $200 billion per year, will drop $30 billion. Putting America back to work makes good economic sense and programs like EDA are an important tool in achieving this goal.

I strongly urge my colleagues to support the $315 million contained in H.R. 3222 for the Economic Development Administration so that all parts of the country can share in the economic recovery of America.

The CHAIRMAN. The Chair sustains the point of order against the section referred to, lines 3 through 17, on page 10.

The CHAIRMAN. The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through the bottom of page 11, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. The bill is considered read through the bottom of page 11.

Are there any points of order against provisions in that portion of the bill?

Are there any amendments to that portion?

If not, the Clerk will read.

The Clerk read as follows:

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORITY)

For the payment of obligations incurred for operating-differential subsidies as authorized by the Merchant Marine Act, 1936, as amended, $401,294,000, to remain available until expended.

RESEARCH AND DEVELOPMENT

For necessary expenses for research and development activities, as authorized by law, $11,500,000, to remain available until expended.

OPERATIONS AND TRAINING

For necessary expenses of operations and training activities authorized by law, $74,013,000, to remain available until exended: *Provided*, That reimbursements may be made to this appropriation from receipts to the "Federal ship financing fund" for administrative expenses in support of that program.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the material on page 12, beginning at line 2 and ending at line 20, as a violation of clause 2, rule XXI.

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. Without objection, the three paragraphs included theretofore will be considered as read.

There was no objection.

The CHAIRMAN. The point of order is sustained.

The Chair will inquire, does the gentleman from Iowa (Mr. SMITH) concede the point of order against all three paragraphs?

Mr. SMITH of Iowa. I do, Mr. Chairman.

Mr. CHAIRMAN. The point of order is sustained against all three paragraphs.

The Clerk will read, beginning at line 21, page 12.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read through the bottom of page 13, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. The bill is considered as read through the bottom of page 13.

Are there any points of order against the provisions in that section?

Are there any amendments to that section?

The Clerk will read.

The Clerk read as follows:

CHRYSLER CORPORATION LOAN GUARANTEE PROGRAM

ADMINISTRATIVE EXPENSES

For necessary administrative expenses, as authorized by the Chrysler Corporation Loan Guarantee Act of 1979 (Public Law 96-185), $1,005,000.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: On page 14, line 6, delete "$1,005,000" and insert in lieu thereof "$500,000".

The CHAIRMAN. The gentleman from Iowa (Mr. VOLKMER) is recognized for 5 minutes in support of his amendment.

Mr. VOLKMER. Mr. Chairman, this amendment will remove half a million dollars plus $5,000, from the Chrysler Corporation Loan Guarantee Act fund for the administration of that program since the fund has been successfully completed and utilized by Chrysler and has been paid back. The only administrative necessity now for the loan office is to make its final report to the Congress on it and close shop.

Mr. SMITH of Iowa. Mr. Chairman, since we marked up the bill, they have exercised their options, and I understand that the gentleman's amendment is in line with the needs of the agency.

Mr. VOLKMER. Mr. Chairman, we have contacted Mr. Seward at the Chrysler loan office, and he said this is satisfactory and this is the money that will be needed.

I think it has been a successful action by this Congress in the past in helping Chrysler ge through this period. They are now successful, and this amendment will reduce the appropriation to the amount the loan office actually needs to finish administering the program.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Illinois.

Mr. O'BRIEN. Mr. Chairman, we have no objection to the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

FEDERAL COMMUNICATIONS COMMISSION

SALARIES AND EXPENSES

For necessary expenses for the Federal Communications Commission, as authorized by law, including uniforms and allowances therefor, as authorized by law (5 U.S.C. 5901-02); not to exceed $600,000 for land and structures; not to exceed $385,000 for improvement and care of grounds and repair to buildings; not to exceed $3,000 for official reception and representation expenses; purchase (not to exceed ten for replacement only) and hire of motor vehicles; special counsel fees; and services as authorized by 5 U.S.C. 3109; $86,981,000. Not to exceed $300,000 of the foregoing amount shall remain available until September 30, 1985, for research and policy studies. In addition, an amount equivalent to funds deposited into the General Fund of the Treasury by the State of Florida as a result of the expense of construction and relocation of the Fort Lauderdale Monitoring Station shall remain available until expended for the completion of construction and relocation of such monitoring station.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning on line 8 of page 14 as a violation of clause 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. I have to concede the point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) concedes the point of order, and the Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

FEDERAL MARITIME COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Maritime Commission, including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and uniforms or allowances therefor, as authorized by 5 U.S.C. 5901-02; $10,756,000: *Provided*, That not to exceed $1,500 shall be available for official reception and representation expenses.

Mr. LEVITAS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I note that the language in the next section on the Federal Trade Commission provides that the funds would be made available only in the event of an authorization bill being passed. While I understand that the next section calling for funds for the FTC would be subject to a point of order because there is no authorization, I have no intention of offering that point of order and would hope that we might appropriate subject to authorization in this fashion so that there could be an authorization, because if there is not, and funds for the FTC are put in the conference, I think it would be incumbent on this body to resist that funding either in the conference on this bill or in a continuing resolution, until there is an authorization.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I certainly agree. I will resist in every way I can if money is put in without being authorized, because I wanted the paragraph for the FTC put in the bill, making the availability of the funds subject to authorization. I think it is about time we get an authorization for this agency.

Mr. LEVITAS. Mr. Chairman, I commend the chairman of the subcommittee. That is precisely the constructive type of attitude that should be expressed on this matter. We need to deal with this important FTC issue, and the way the chairman of the subcommittee and the subcommittee have brought this matter to the attention of the House is the proper way to deal with it. In the absence of dealing with it in this fashion—that is making the appropriation subject to an authorization—I, for one, would prefer to see no funding at all either in this bill or in the continuing resolution.

Mr. SMITH of Iowa. Mr. Chairman, lest I be misunderstood, I do not agree with everything the gentleman stands for on FTC, but nevertheless I think the House ought to work its will on the FTC instead of trying to decide these issues on the appropriation bill.

Mr. LEVITAS. Mr. Chairman, I will relieve the gentleman from Iowa of the onus of having to agree with everything the gentleman from Georgia advocates about the FTC. I do not want to impose that burden on him.

I would simply suggest that the gentleman is absolutely correct. In a matter that has the significance that the FTC authorization does in terms of the issues that are raised, the only way to deal with it is through authorization. That bill should be brought to the floor, and in the absence of an authorization, I for one would work to see that there be no funding for this Commission until the issues have been addressed by this House.

PARLIAMENTARY INQUIRY

Mr. FLORIO. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FLORIO. Mr. Chairman, am I correct in understanding we are still on the Federal Maritime Commission section? Is that correct?

The CHAIRMAN. The gentleman is correct.

Mr. FLORIO. I thank the Chair.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Trade Commission, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109; hire of passenger motor vehi-

cles; and not to exceed $2,000 for offical reception and representation expenses; there shall be available only upon enactment into law of authorizing legislation, the sum of $65,122,000.

POINT OF ORDER

Mr. FLORIO. Mr. Chairman, I raise a point of order on the ground that there is no authorization for the Federal Trade Commission, and, therefore, the provisions contained in line 9 through line 17 of page 15 of the bill should not be permitted to go forward.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order even though the language would not make the appropriation effective until there is an authorization. I concede the point of order.

The CHAIRMAN. The point of order is conceded, and the Chair sustains the point of order against the paragraph.

The Clerk will read.

The Clerk read as follows:

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the International Trade Commission, including hire of passenger motor vehicles and services as authorized by 5 U.S.C. 3109, $20,737,000.

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning with line 19 on page 15 as a violation of clause 2 of rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman from Iowa concedes the point of order, and the Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

SECURITIES AND EXCHANGE COMMISSION

SALARIES AND EXPENSES

For necessary expenses for the Securities and Exchange Commission, including services as authorized by 5 U.S.C. 3109, and not to exceed $2,000 for official reception and representation expenses, $95,782,000.

□ 1450

POINT OF ORDER

Mr. WALKER. Mr. Chairman, I make a point of order against the section beginning at line 15 on page 16 as a violation of clause 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. No, Mr. Chairman, I do not desire to be heard. I concede the point of order.

The CHAIRMAN. The gentleman from Iowa concedes the point of order. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

For expenses necessary for detection, investigation, and prosecution of crimes against the United States; including purchase for police-type use (not to exceed one thousand four hundred of which one thousand two hundred will be for replacement only) and hire of passenger motor vehicles; acquisition, lease maintenance and operation of aircraft; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; $1,050,381,000, of which not to exceed $52,000,000 for automated data processing and telecommunications and $1,000,000 for undercover operations and $10,000,000 for the relocation within the District of Columbia of the Washington field office shall remain available and the provisions of section 7(a) of Public Law 96-132 shall remain in effect until September 30, 1985: *Provided*, That notwithstanding the provisions of title 31 U.S.C. 3302, the Director of the Federal Bureau of Investigation may establish and collect fees to process fingerprint identification records for noncriminal employment and licensing purposes, and credit not more than $13,500,000 of such fees to this appropriation to be used for salaries and other expenses incurred in providing these services: *Provided further*, That passenger motor vehicles for police-type use may be purchased without regard to the general purchase price limitation for the current fiscal year.

POINT OF ORDER

Mr. EDWARDS of California. Mr. Chairman, I make a point of order against the phrase: "and the provisions of section 7(a) of Public Law 96-132 shall remain in effect."

This is on page 22, lines 16 to 18. That is in violation of clause 2, rule XXI, which prohibits legislation in an appropriations bill.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard?

Mr. SMITH of Iowa. No, Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman from Iowa concedes the point of order. The Chair sustains the point of order against that phrase.

The Clerk will read.

Mr. SMITH of Iowa. Mr. Chairman before the Chair moves on, I think the gentleman from California intended to include the words, "until September 30, 1985", or did he?

Mr. EDWARDS of California. No, I believe not. This language is in the authorization bill.

Mr. SMITH of Iowa. All right.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

OFFICE OF JUSTICE ASSISTANCE, RESEARCH, AND STATISTICS

LAW ENFORCEMENT ASSISTANCE

For grants, contracts, cooperative agreements, and other assistance authorized by the Justice System Improvement Act of 1979, as amended, including salaries and expenses in connection therewith, $18,466,000, to remain available until expended; and for grants, contracts, cooperative agreements, and other assistance authorized by title II of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, including salaries and expenses in connection therewith, $70,155,000, to remain available until expended.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 27, beginning on line 13 strike out "Justice System Improvement Act of 1979, as amended" and insert in lieu thereof "title I of the Omnibus Crime Control and Safe Streets Act of 1968".

Page 27, line 21, strike out the period and insert in lieu thereof the following:

"; and, contingent upon any enactment into law of H.R. 2175 or S. 53 as passed by the 98th Congress (and in addition to the other appropriations made in this paragraph), for grants, contracts, cooperative agreements, and other assistance authorized by title I of the Omnibus Crime Control and Safe Streets Act of 1968, including salaries and expenses in connection therewith, and for any other program which is established in H.R. 2175 or S. 53, as so enacted, and which authorized the Attorney General of the United States to provide Federal law enforcement assistance to States to address crime problems of serious and epidemic proprotions, $162,000,000, to remain available until expended.".

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SENSENBRENNER. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Wisconsin (Mr. SENSENBRENNER) reserves a point of order against the amendment.

Mr. HUGHES. Mr. Chairman, on May 10, 1983, the House of Representatives overwhelmingly passed by a margin of 399 to 16, H.R. 2175, the Justice Assistance Act of 1983. Also, I am informed that recently the full Judiciary Committee of the Senate favorably reported S. 53, their version of the Justice Assistance Act of 1983. This bill, in a nutshell, establishes a modest Federal financial aid program for State, local, and private initiatives against crime, targeted at the most critical crime problems and administered by an office of justice assistance in the Department of Justice. What we are proposing is a very limited program of Federal assistance to support activities that can help all crime fighting agencies at the State and local levels, but which realistically, few can afford to undertake. This includes developing good information and statistics to measure our crime problems. It includes research on matters of crime, testing promising ideas, and, when

they seem to work, demonstrating their effectiveness in criminal justice agencies throughout the country.

What this amendment does is merely increase the amount of money available to the Department of Justice by $162 million contingent upon the enactment of the Justice Assistance Act. The fact that the bill as reported does not contain such an appropriation is not because the Appropriations Committee rejected it on the merits. At the time the committee acted, the administration had not submitted a request for funding of these programs because, as I understand it, the bill authorizing these programs was not enacted or sufficiently close to enactment. Based on the passage of the authorization legislation by an overwhelming margin in the House, and considerable progress toward passage of similar legislation in the Senate, OMB has now made a request for funding of these programs. I am further informed by the distinguished chairman of the Subcommittee on Commerce, Justice, and Judiciary, Mr. SMITH, that he supports funding of these programs. He has no objection to this amendment and the $162 million amount can be accommodated within his budget allocation.

We propose that the amendment make the availability of this appropriation contingent upon enactment of the authorization legislation I just described. Authorization for appropriations for predecessor programs under the Justice Systems Improvement Act of 1979 expired in fiscal year 1983. We believe this contingency provision is needed for two reasons. The first is that we should not be expending funds for programs which have not been finally authorized. The second is that such a contingency is needed to insure that such an appropriation is available only for Justice assistance programs as recently overhauled by the Congress, not as authorized under the 1979 legislation which Congress has seen fit to scale down considerably, both in funding levels and program expanse. A simple extension of the authorization for the 1979 programs, as the appropriation bill reported in the Senate would do, would not reflect the major revisions we have made under the Justice Assistance Act of 1983.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I am happy to yield to my colleague.

Mr. O'BRIEN. Mr. Chairman, am I correct that the amendment of the gentleman simply adds $92 million to the $70 million referred to in line 20?

Mr. HUGHES. No. It adds $162 million.

Mr. O'BRIEN. But the figure of the gentleman of $162 million simply includes the $70 million and adds $92 million to it?

Mr. HUGHES. That is right, that is correct.

Mr. O'BRIEN. Mr. Chairman, I thank the gentleman.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I am happy to yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Chairman, I just wanted to join with the gentleman in the well. This is a very modest, but very worthwhile program. It has been very carefully considered in our subcommittee. We have discussed it with the White House counsel, Ed Meese, and have his agreement.

I would just hope that the amendment will be carried.

Mr. HUGHES. I thank the gentleman.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield further?

Mr. HUGHES. I am happy to yield to the gentleman.

Mr. O'BRIEN. Mr. Chairman, the minority side has no objection to the amendment.

Mr. HUGHES. Mr. Chairman, I thank the gentleman.

□ 1500

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Chairman, I insist upon my point of order against the amendment.

The CHAIRMAN. The gentleman will state the point of order.

Mr. SENSENBRENNER. Mr. Chairman, the amendment is in violation of clause 2, rule XXI of the Rules of the House of Representatives in that it proposes an appropriation for a program that has not been authorized by law.

The distinguished chairman of the subcommittee, Mr. HUGHES, has stated that there has been no final authorization legislation cleared through the Congress. I believe that the point of order should be sustained.

The CHAIRMAN. Does the gentleman from New Jersey desire to be heard on the point of order?

Mr. HUGHES. I concede the point of order.

The CHAIRMAN. The gentleman concedes the point of order.

The Chair therefore sustains the point of order.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 27, beginning on line 13, strike out "Justice System Improvement Act of 1979, as amended" and insert in lieu thereof "title I of the Omnibus Crime Control and Safe Streets Act of 1968".

Page 27, line 21, strike out the period and insert in lieu thereof the following:

"; and, contingent upon any enactment into law of H.R. 2175 or S. 53 as passed by the 98th Congress (and in addition to the other appropriations made in this paragraph), for grants, contracts, cooperative agreements, and other assistance authorized by title I of the Omnibus Crime Control and Safe Streets Act of 1968, including salaries and expenses in connection therewith, and for any other program which is established in H.R. 2175 or S. 53, as so enacted, and which authorizes the Attorney General of the United States to provide Federal law enforcement assistance to States to address crime problems of serious and epidemic proportions, $92,000,000, to remain available until expended.

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PARLIAMENTARY INQUIRY

Mr. SENSENBRENNER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SENSENBRENNER. Has the clerk completed reading the amendment?

Mr. HUGHES. I am going to explain the amendment.

Mr. SENSENBRENNER. Mr. Chairman, I reserve a point of order against this amendment, too.

The CHAIRMAN. The gentleman from New Jersey (Mr. HUGHES) is recognized for 5 minutes.

Mr. HUGHES. Mr. Chairman, essentially the amendment is the same. If the gentleman from Wisconsin (Mr. SENSENBRENNER) pursues the point of order it obviously will be sustained. I only implore the gentleman not to make a point of order. The $92 million that is contemplated is what the Office of Management and Budget has requested for this particular program. It is a major overhaul of the Justice System Improvement Act. It complies with what OMB has requested. It is in accord with what is moving ahead on the Senate side. I think that it is a modest program. It is contingent upon this authorization being enacted into law, signed by the President.

So, it is contingent on that. If that does not occur, there is no appropriation. I would ask the gentleman not to press his point of order.

I yield back the balance of my time.

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Chairman, I make a point of order against the amendment in that it is in violation of clause 2, rule XXI, of the House of Representatives, in that the program proposed by the amendment has not been authorized.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

RELATED AGENCIES

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

For expenses necessary for the Commission on Civil Rights, including hire of passenger motor vehicles, $11,887,000.

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Chairman, I make a point of order against that section of the bill which begins at line 19, page 28, in that the Commission on Civil Rights is not authorized and consequently the appropriation is in violation of clause 2, rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard?

Mr. SMITH of Iowa. I concede the point of order. I think it begins at line 20.

The CHAIRMAN. The Chair will so construe it.

The gentleman from Iowa concedes the point of order.

The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

For payment to the Legal Services Corporation to carry out the purposes of the Legal Services Corporation Act of 1974, as amended, $296,000,000: *Provided*, That none of the funds appropriated in this paragraph shall be expended for any purpose prohibited or limited by or contrary to any of the provisions of—

(1) H.R. 2909 as reported to the House of Representatives unless paragraph (2) or (3) applies;

(2) authorizing legislation for fiscal year 1984 for the Legal Services Corporation passed by the House of Representatives unless paragraph (3) applies; or

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in order to direct a couple of questions to the distinguished chairman. The action just taken as a result of the point of order interposed against that particular section having to do with the funding of the Civil Rights Commission, precisely where does that leave the Civil Rights Commission?

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. When we take up the continuing resolution in about a week or 10 days, I intend to ask the Appropriations Committee to include in the continuing resolution the funding for the Civil Rights Commission which would include exact language and amount that was knocked out here on a point of order. Then when the continuing resolution comes to the floor anybody can oppose it that wants to.

Mr. GONZALEZ. I thank the distinguished chairman.

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Chairman, I make a point of order against that section of the bill which begins on line 12, page 29, in that it violates clause 2 of rule XXI of the Rules of the House of Representatives in that the program is not authorized.

The CHAIRMAN. The gentleman from Iowa.

Mr. SMITH of Iowa. I concede it is not authorized.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

This title may be cited as the "Department of Justice and Related Agencies Appropriation Act, 1984".

PARLIAMENTARY INQUIRY

Mr. GILMAN. Mr. Chairman, reserving the right to raise a point of order, I have a parliamentary inquiry.

Mr. Chairman, is the entire title III now open for consideration?

The CHAIRMAN. We have not reached that point as yet. We have just started title III.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the last word.

I would like to yield to the gentleman from New York and make an inquiry.

What is it his intention to do?

Mr. GILMAN. If the gentleman will yield, it is my intention to raise a point of order against all those provisions from page 36, line 6, through page 41, line 8, inclusive.

Mr. SMITH of Iowa. First, Mr. Chairman, to accommodate the House time, I will ask unanimous consent that the bill be considered as read and open to amendment at any point from line 8, page 30, through line 5, page 36.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order?

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I have a point of order.

The portions of the bill to which the point of order relates is as follows:

TITLE III—DEPARTMENT OF STATE AND RELATED AGENCIES

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

SALARIES AND EXPENSES

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including obligations of the United States abroad pursuant to treaties, international agreements, and binational contracts (including obligations assumed in Germany on or after June 5, 1945); expenses authorized by section 9 of the Act of August 31, 1964, as amended (31 U.S.C. 3721), and section 2 of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 2669); telecommunications; expenses necessary to provide maximum physical security in Government-owned and leased properties and vehicles abroad; permanent representation to certain international organizations in which the United States participates pursuant to treaties, conventions, or specific Acts of Congress; acquisition by exchange or purchase of vehicles as authorized by law, except that special requirement vehicles may be purchased without regard to any price limitation otherwise established by law; $1,129,369,000, of which $17,500,000 shall remain available until September 30, 1985.

REOPENING CONSULATES

For necessary expenses of the Department of State and the Foreign Service for reopening and operating certain United States consulates as specified in section 103 of the Department of State Authorization Act, fiscal years 1982 and 1983, $2,500,000.

REPRESENTATION ALLOWANCES

For representation allowances as authorized by section 905 of the Foreign Service Act of 1980, as amended (22 U.S.C. 4085), and for representation by United States missions to the United Nations and the Organization of American States, $4,190,000.

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS ABROAD

For necessary expenses for carrying out the Foreign Service Buildings Act of 1926, as amended (22 U.S.C. 292-300), $162,889,000, to remain available until expended; and, in addition there shall be available subject to the approval of the Committees on Appropriations of the House and Senate under said Committees' policies concerning the reprogramming of funds, the sum of $40,000,000, to remain available until expended, for overseas housing requirements.

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS ABROAD (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States for the purposes authorized by section 4 of the Foreign Service Buildings Act of 1926, as amended (22 U.S.C. 295), $10,113,000, to remain available until expended.

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

For expenses necessary to enable the Secretary of State to meet unforeseen emergencies arising in the Diplomatic and Consular Service, to be expended pursuant to the requirement of 31 U.S.C. 352(e), $4,400,000.

BUYING POWER MAINTENANCE

For the purposes of section 24b of the State Department Basic Authorities Act of 1956, as amended (22 U.S.C. 2696(b)), $4,500,000, to be available without fiscal year limitation.

PAYMENT TO THE AMERICAN INSTITUTE IN TAIWAN

For necessary expenses to carry out the Taiwan Relations Act, Public Law 96-8 (93 Stat. 14), $9,457,000.

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

For payment to the Foreign Service Retirement and Disability Fund, as authorized by law, $103,791,000.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

For expenses, not otherwise provided for, necessary to meet annual obligations of

membership in international multilateral organizations, pursuant to treaties, conventions, or specific Acts of Congress, $525,773,000: *Provided*, That none of the funds appropriated in this paragraph shall be available for a United States contribution to an international organization for the United States' share of interest costs made known to the United States Government by such organization for loans incurred on or after October 1, 1983, through external borrowings.

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING ACTIVITIES

For payments, not otherwise provided for, by the United States for expenses of the United Nations peacekeeping forces, $66,948,000.

INTERNATIONAL CONFERENCES AND CONTINGENCIES

For necessary expenses authorized by section 5 of the State Department Basic Authorities Act of 1956, contributions for the United States share of general expenses of international organizations and representation to such organizations, and personal services without regard to civil service and classification laws, $9,500,000, to remain available until expended, of which not to exceed $225,000 may be expended for representation as authorized by law.

INTERNATIONAL COMMISSIONS

For necessary expenses, not otherwise provided for, to meet obligations of the United States arising under treaties, conventions, or specific Acts of Congress, as follows:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

For necessary expenses for the United States Section of the United States and Mexico International Boundary and Water Commission, and to comply with laws applicable to the United States Section; and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows:

SALARIES AND EXPENSES

For salaries and expenses, not otherwise provided for, including preliminary surveys, $9,849,000: *Provided*, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89): *Provided further*, That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the cost of said dam as shall have been allocated to such purposes by the Secretary of State.

CONSTRUCTION

For detailed plan preparation and construction of authorized projects, to remain available until expended, $679,000.

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For necessary expenses, not otherwise provided for, $3,461,000; for the International Joint Commission, including salaries and expenses of the Commissioners on the part of the United States who shall serve at the pleasure of the President; salaries of employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses; not to exceed $3,000 for representation; and the International Boundary Commission, for necessary expenses, not otherwise provided for, including expenses required by awards to the Alaskan Boundary Tribunal and existing treaties between the United States and Canada or Great Britain

INTERNATIONAL FISHERIES COMMISSIONS

For necessary expenses for international fisheries commissions, not otherwise provided for, $8,966,000: *Provided*, That the United States share of such expenses may be advanced to the respective commissions.

Mr. GILMAN. Mr. Chairman, I raise a point of order against the section of H.R. 3222 appropriating for the Department of State and U.S. Information Agency on the grounds that no authorization has been enacted, and that those sections are in violation of clause 2 of rule XXI. I specifically raise points of order against all those provisions contained in page 30, line 5 through page 36, line 5, at this time.

Mr. SMITH of Iowa. I concede the point of order as to those parts.

The CHAIRMAN. The gentleman from Iowa concedes the point of order.

The Chair sustains the point of order against the paragraphs from page 30, line 7, through page 36, line 5.

The Clerk will read.

The Clerk read as follows:

OTHER

UNITED STATES BILATERAL SCIENCE AND TECHNOLOGY AGREEMENTS

For expenses, not otherwise provided for, to enable the United States to participate in programs of scientific and technological cooperation with Yugoslavia; $1,700,000 to remain available until expended.

Mr. SMITH of Iowa. Mr. Chairman, some of the title is authorized.

The CHAIRMAN. The Chair will state that the Clerk has not read all of the remaining paragraphs in the title. The gentleman from Iowa has not yet asked that further reading be suspended.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order against those sections on page 36, line 8, through page 36, line 12, and note that no authorization has been enacted for that section that is in violation of clause 2, House rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on that?

Mr. SMITH of Iowa. No; I concede that point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

THE ASIA FOUNDATION

For a grant to the Asia Foundation, $10,000,000, to remain available until expended.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order against that section and all those provisions on page 36, line 13, through page 36, line 15, on the grounds that no authorization has been enacted, that the section is in violation of clause 2 of rule XXI.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard?

Mr. SMITH of Iowa. No.

The CHAIRMAN. The gentleman concedes the point of order. The Chair sustains the point of order.

The Clerk will read.

□ 1510

The Clerk read as follows:

UNITED STATES INFORMATION AGENCY

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary to enable the United States Information Agency, as authorized by Reorganization Plan No. 2 of 1977, the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2451 et seq.), and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international communication, educational and cultural activities, including employment, without regard to civil service and classification laws, of persons on a temporary basis (not to exceed $20,000); expenses authorized by the Foreign Service Act of 1980 (22 U.S.C. 3901 et seq.), living quarters as authorized by 5 U.S.C. 5912, and allowances as authorized by 5 U.S.C. 5921–5928; and entertainment, including official receptions, within the United States, not to exceed $50,000; $480,845,000, of which not to exceed $5,509,000 of the amounts allocated by the United States Information Agency to carry out section 102(a)(3) of the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2452(a)(3)), shall remain available until expended: *Provided*, That not to exceed $615,000 may be used for representation abroad: *Provided further*, That receipts not to exceed $500,000 may be credited to this appropriation from fees or other payments received from or in connection with English-teaching programs as authorized by section 810 of Public Law 80–402, as amended; and, for expenses of certain exchange programs of the United States Information Agency, $84,349,000, of which $72,211,000 shall be for the Fulbright and International Visitors Programs, $3,430,000 shall be for the Humphrey Fellowship Program, and $8,708,000 shall be for the Private Sector Programs; and in addition, there shall be available only upon enactment into law of authorizing legislation, the sum of $55,000,000, of which $31,300,000 shall be for the National Endowment for Democracy and $23,700,000 shall be for Project Democracy, including $6,166,000 which shall be for the Fulbright and International Visitors Programs and $4,343,000 which shall be for the Private Sector Programs.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order on this section on page 38 between line 21 through page 40, line 9, and note that it is in violation of clause 2 of House rule XXI in that no authorization has been enacted for that section.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman concedes the point of order.

The Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Department of the Treasury determines to be excess to the normal requirements of the United States, for necessary expenses of the United States Information Agency, as authorized by law, $10,556,000, to remain available until expended.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order on page 40, line 10, through page 40, line 16, in that that section is in violation of clause 2 of House rule XXI and ask that it be ruled out of order.

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman concedes the point of order, and the Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

CENTER FOR CULTURAL AND TECHINCAL INTERCHANGE BETWEEN EAST AND WEST

To enable the Director of the United States Information Agency to provide for carrying out the provisions of the Center for Cultural and Technical Interchange Between East and West Act of 1960, by grant to any appropriate recipient in the State of Hawaii, $18,547,000: *Provided*, That none of the funds appropriated herein shall be used to pay any salary, or to enter into any contract providing the payment thereof, in excess of the highest rate authorized in the General Schedule of the Classification Act of 1949, as amended.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order on page 40, line 17, through page 41, line 2, in that no authorization has been enacted and the section is in violation of clause 2 of House rule XXI.

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman from Iowa (Mr. SMITH) concedes the point of order, and the Chair sustains the point of order.

The Clerk will read.

The Clerk read as follows:

ACQUISITION AND CONSTRUCTION OF RADIO FACILITIES

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception and purchase and installation of necessary equipment for radio transmission and reception, $34,013,000, to remain available until expended.

POINT OF ORDER

Mr. GILMAN. Mr. Chairman, I raise a point of order with regard to page 41, line 3, through page 41, line 8, in that it is in violation of clause 2 of House rule XXI in that no authorization has been enacted.

Mr. SMITH of Iowa. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman concedes the point of order and the Chair sustains the point of order.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment through line 4 on page 45.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order against the paragraphs in question?

If not, are there any amendments to any of the paragraphs included?

If not, the Clerk will read.

The Clerk read as follows:

SPACE AND FACILITIES

For rental of space, alterations, and related services and facilities, including the procurement, transportation, and installation of furniture and furnishings for the United States Courts of Appeals, District Courts, Bankruptcy Courts, and Claims Court, $142,624,000.

Mr. WALKER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we are getting close to the end of the bill at this point and I rise simply to make the point again that if the chairman of the subcommittee does offer a motion to rise, we would be precluded from offering a number of amendments that Members on this side of the aisle, and I think on the other side of the aisle, would like to have considered as a part of this legislation.

I, for example, have an amendment on the issue of school prayer that has been adopted overwhelmingly by this House on three previous occasions. I would hope that we would have an opportunity to address that issue.

I think it is also important that some of the other fund limitation amendments that might be offered in the course of our deliberations here also be given their opportunity to come to the floor.

That, of course, would be precluded if we permit the gentleman's motion to rise to stand. So whether you favor my amendment on school prayer or some other amendment that might come up addressing a variety of other subjects, I would hope that the Members would vote against the motion to rise, thereby giving us an opportunity to offer those relevant amendments.

In each case, of course, the amendments have to be germane to the bill. In each case, they have to meet the tests of germaneness that the Parliamentarian would lay down. But they should be permitted to at least be debated and discussed. Otherwise, on many of these issues, we will never be given a chance to address those issues in the future.

As the gentleman from Iowa has already noted, most of the provisions of this bill are probably going to be folded into a continuing resolution. When that continuing resolution is out here, we will be under the same kind of strictures and will not be able to address the issue, so we will be left once again with matters that are of intense interest to the American people left undebated and left unsolved by the Congress.

I would hope that in this instance we will take this opportunity when Congress is passing funds for legislation to decide whether or not we want to limit those funds in some particular way, and so I would ask at the appropriate time for a vote against the gentleman's motion to rise.

I yield back the balance of my time.

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment through line 9, page 48.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. Are there any points of order against these sections of the bill?

If not, are there any amendments to these sections of the bill?

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the last word.

I would like to point out in response to the gentleman from Pennsylvania (Mr. WALKER) that he is quite accurate; it is my intention, as soon as the Clerk finishes reading these next three lines, to move the committee do now rise. And the gentleman is quite accurate in saying that the importance of this motion is that if it carries, it does prevent a number of amendments from being made to this bill.

Among those that I know of is one on school prayer the gentleman mentioned, although I think it may be subject to a point of order. It may not. I do not know. That would be up to the chairman to rule on.

There might be one on busing. We know that there is a raging controversy between the moviemakers and the networks, and that might come up. There is another one, I am told, about the United Nations and maybe one on satellites, and one on whether or not the INS can send Salvadorans back to San Salvador. At least we know of those.

It is my preference that we not have a whole lot of those limiting amendments on this bill.

I remember very well, as other Members do, that in the last 2 or 3 years, the bill had amendments like that attached to it and when it went to the other body, the bill died. So putting those amendments in the bill did not serve the purposes of those who favored such amendments or who were against such amendments either. So putting such amendments on really does not serve a good purpose, I do not think. It just helps to assure that the

bill will not go to conference and that there will not be a final bill enacted.

I recognize the gentleman's right to take the opposite position and he has done so, and expressed himself very well. But that is just how simple the issue is.

I am going to move to rise. If my motion is sustained, then it will be up to somebody, if they want to, to have a motion to recommit or for final passage.

If my motion is not approved, then the bill is going to be open for I do not know how many amendments and nobody else does, either.

AMENDMENT OFFERED BY MR. HUNTER

Mr. HUNTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUNTER: On page 48, after line 9, add the following new section:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

For necessary expenses for the United States Section of the United States and Mexico International Boundary and Water Commission, and to comply with laws applicable to the United States Section; and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows:

SALARIES AND EXPENSES

For salaries and expenses, not otherwise provided for, including preliminary surveys, $10,749,000: *Provided*, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89): *Provided further*, That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the cost of said dam as shall have been allocated to such purposes by the Secretary of State.

Of such amount, $800,000 shall be available for reimbursement of the city of San Diego, in the State of California, for expenses incurred in treating domestic sewage received from the city of Tijuana, in the State of Baja California, Mexico, and $100,000 shall be available for reimbursement of the city of Nogales, in the State of Arizona, for expenses incurred in treating domestic sewage received from the city of Nogales, in the State of Sonora, Mexico.

Mr. HUNTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HUNTER. Mr. Chairman, I am offering this amendment to the general provisions with my colleague from Arizona (Mr. UDALL). It is a very critical amendment, and it is due to the raw sewage which is flowing across our borders in our respective districts.

□ 1520

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman.

Mr. SMITH of Iowa. This is a matter which has come up since the committee reported the bill. It relates to the economic problems in Mexico. There is a serious problem. I do not want to say that we agree with everything that is in this amendment or that I will agree when we go to conference, but I think it is worthy of going to conference and being considered at that point.

Mr. HUNTER. I thank the gentleman.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I yield to the chairman.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Chairman, this is really an emergency situation. Raw sewage is flowing through the city of Nogales, Ariz., coming across the border. The topography is downhill. It is coming across the border into Arizona. It is not only a serious health hazard, it has caused great problems in those communities.

About 10 years ago, largely with Federal money and an international agreement with Mexico, with the Mexican Government, we built a large sewage plant in Nogales, Ariz. This whole arrangement is threatened. Mexico has not made payments on time. The gentleman from California has a similar situation with respect to the Tiajuana/San Diego area.

I would hope the House would go with us on trying to take care of this very difficult emergency health situation.

Mr. HUNTER. I thank the gentleman.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman.

Mr. O'BRIEN. I thank the gentleman for yielding.

This amendment includes the problems that confront San Diego as well as Nogales?

Mr. HUNTER. Yes. It includes San Diego and Nogales' problems, yes.

Mr. O'BRIEN. For the minority side of the committee, we have no objection.

Mr. HUNTER. I thank the gentleman.

The CHAIRMAN. If the gentleman's amendment is broad enough to include sewage at Calexico, I might be willing to support it.

Mr. HUNTER. There is not a reimbursement situation at Calexico, but if there were, we will place it in here.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. HUNTER).

The amendment was agreed to.

● Mr. FRENZEL. Mr. Chairman, since many provisions of this bill have been removed by points of order, there is little left on which to express approval or disapproval.

Nevertheless, the House conferees will no doubt follow past practice and reinstate the deleted provisions, or most of them. Since the bill came to us in a bloated condition, we can expect that it may come back in the same condition.

My negative note, then, is a warning to our committee, and our House managers, not to put all the spending back into the conference report, or back into a continuing resolution the end of this month.●

The CHAIRMAN. The Clerk will read.

The Clerk concluded the reading of the bill.

The CHAIRMAN. For what purpose does the gentleman from Iowa rise?

Mr. SMITH of Iowa. Mr. Chairman, I offer a motion. I move that the Committee do now rise.

PREFERENTIAL MOTION OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer a preferential motion.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. WALKER) has a preferential motion.

The Chair will ask the Clerk to finish reading the motion offered by the gentleman from Iowa before reading the motion offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Mr. SMITH of Iowa moves that the Committee do now rise and report the bill to the House with sundry amendments with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. WALKER. Mr. Chairman, I have a preferential motion at the desk.

The CHAIRMAN. The Clerk will report the preferential motion.

The Clerk read as follows:

Mr. WALKER moves that the Committee do now rise and report the bill to the House with the recommendation that the bill, as amended, be recommitted to the Committee on Appropriations with instructions that the committee report the bill, as amended, back to the House with the following amendment:

At the end of title II, add the following new section:

"None of the funds appropriated under this title shall be used to prevent or in any way prohibit the implementation of programs of voluntary school prayer and meditation in the public schools."

Mr. SMITH of Iowa. Mr. Chairman, I make a point of order against the amendment.

The amendment is a nonlegislative limitation to a general appropriations bill and under the revised clause 2 of

rule XXI, such amendments are not in order during the reading of the general appropriations bill.

Mr. Chairman, the revised rule states in part "except as provided in paragraph D, no amendment shall be in order during consideration of a general appropriations bill proposing limitation not specifically contained or authorized in existing law for the period of limitation."

Mr. Chairman, the gentleman's amendment is not specifically contained or authorized in existing law and therefore is in violation of rule XXI, clause 2(c).

The CHAIRMAN. Does the gentleman (Mr. WALKER) wish to be heard on the point of order against the preferential motion?

Mr. WALKER. Yes, I do, Mr. Chairman.

Mr. Chairman, what we have before us is not an amendment but, rather, a motion. It is a motion of recommittal. It is a motion to rise and report with instructions that we recommit, with instructions that the committee report back language as contained in the amendment.

It is, therefore, wholly within the rules of the House of Representatives as we adopted earlier in the year.

The precedent for this particular motion is in Cannon's Precedents, volume 8, paragraph 2329, which stated that a simple motion to recommit is not admissible in the Committee of the Whole. However, it is permissible to rise and report with the recommendation that the bill be recommitted and that takes precedence over the motion to rise and report with the recommendation that the bill do pass.

So, therefore, I offered this motion in order, under the rules, and it is somewhat different from this provision under Cannon's Precedents in that it has a motion to instruct.

However, there is nothing in the rule that prevents us from having a motion to instruct as part of a recommittal motion.

As a matter of fact, as a portion of rule XVI of the House of Representatives, the motion to recommit and the motion to recommit with instructions are definitely tied together. There is absolutely no doubt that those two things exist in concert within rule XVI of the House of Representatives.

The only way that you cannot have a motion to recommit with instructions is under a rule that is reported from the Rules Committee.

In fact, no specific rule does exist on this bill. So there is no rule governing the offering of such motions. So therefore because there is no rule against offering a motion to recommit with instructions, this certainly fits under the provisions of Cannon's Precedents which indicates that this preferential motion can be offered and indicates that this preferential motion with instructions is certainly within the rules as previously developed in the House of Representatives.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard further?

Mr. SMITH of Iowa. I do.

Mr. Chairman, section 835 of clause 2, rule XXI states, "A motion to recommit a general appropriations bill may not propose an amendment containing legislation."

Clearly this motion to recommit is legislative in nature and it would be in violation of that rule.

The CHAIRMAN. Does the gentleman from Pennsylvania desire to be heard further?

Mr. WALKER. I do, Mr. Chairman.

Mr. Chairman, I again state that the amendment is part of a motion to recommit. What the House has before it is a motion. What the Chair has to rule upon is the appropriateness of the motion, not the appropriateness of the language for instruction.

I would point out to the Chair, however, that the language within the amendment as proposed is language that this House has previously adopted, which is in order. It is a strict funding limitation which falls certainly within the germaneness of this bill. It has been previously adopted by the House.

But what the Chair has to rule on is the motion here, not the language of the amendment, and certainly we have a proper motion before us given Cannon's Precedents.

The CHAIRMAN. The Chair is ready to rule.

It is the opinion of the Chair that the precedents cited by the gentleman from Pennsylvania is not applicable to the situation that exists today under rule XXI, clause 2 as rewritten in the 98th Congresss and that the gentleman's motion in the form in which it was presented is not a preferential motion to that offered by the gentleman from Iowa.

Accordingly, the Chair upholds the point of order.

Mr. WALKER. Mr. Chairman, respectfully I appeal the ruling of the Chair.

The CHAIRMAN. The gentleman from Pennsylvania appeals the ruling of the Chair.

The question is, Shall the decisions of the Chair be sustained as the judgment of the Committee?

The decision of the Chair was sustained.

The CHAIRMAN. The question is on the motion of the gentleman from Iowa (Mr. SMITH) that the Committee do now rise.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 245, noes 120, not voting 68, as follows:

[Roll No. 342]

Messrs. MADIGAN, RINALDO, STENHOLM, RALPH M. HALL, and Mrs. LLOYD changed their votes from "aye" to "no."

Mrs. KENNELLY and Mrs. ENGLISH changed their votes from "no" to "aye."

So the motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. BROWN of California, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3222) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MILLER OF OHIO

Mr. MILLER of Ohio. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. MILLER of Ohio. I am, in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MILLER of Ohio moves to recommit the bill, H.R. 3222, to the Committee on Appropriations.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 228, noes 142, not voting 63, as follows:

□ 1600

The Clerk announced the following pairs:

On this vote:

Mr. Rahall for, with Mr. Frenzel against.

Mr. Rangel for, with Mr. Nichols against.

Mr. Howard for, with Mr. Duncan against.

Mr. Dingell for, with Mrs. Martin of Illinois against.

Mr. MacKay for, with Mr. Young of Alaska against.

Mr. Simon for, with Mr. Parris against.

Mr. Guarini for, with Mr. Marriott against.

Mr. Ford of Tennessee for, with Mr. Hansen of Utah against.

Mr. Green for, with Mr. Bartlett against.

Mr. Pursell for, with Mr. Corcoran against.

Mr. RALPH M. HALL and Mr. ANDREWS of Texas changed their votes from "aye" to "no."

Mr. MILLER of California changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 3222, DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. SMITH of Iowa. Mr. Chairman, I ask unanimous consent that in the engrossment of the bill (H.R. 3222) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes, the Clerk be authorized to correct section numbers and paragraph headings.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

CONFERENCE REPORT ON H.R. 2972, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1984

Mr. DELLUMS submitted the following conference report and statement on the bill (H.R. 2972) to authorize certain construction at military installations for fiscal year 1984, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 98-359)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2972) to authorize certain construction at military installations for fiscal year 1984, and for other purposes, having met, after full and free conference, has agreed to recommend and does recommend to the House and Senate as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Military Construction Authorization Act, 1984".

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION AND LAND ACQUISITION PROJECTS

SEC. 101. The Secretary of the Army may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations:

INSIDE THE UNITED STATES

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, $31,100,000.
Fort Campbell, Kentucky, $15,300,000.
Fort Carson, Colorado, $17,760,000.
Fort Devens, Massachusetts, $3,000,000.
Fort Douglas, Utah, $910,000.
Fort Drum, New York, $1,500,000.
Fort Hood, Texas, $76,050,000.
Fort Hunter, Liggett, California, $1,000,000.
Fort Irwin, California, $34,850,000.
Fort Lewis, Washington, $35,310,000.
Fort Meade, Maryland, $5,150,000.
Fort Ord, California, $6,150,000.
Fort Polk, Louisiana, $16,180,000.
Fort Richardson, Alaska, $940,000.
Fort Riley, Kansas, $76,600,000.
Fort Stewart, Georgia, $29,720,000.
Presidio of Monterey, California, $1,300,000.

UNITED STATES ARMY WESTERN COMMAND

Schofield Barracks, Hawaii, $31,900,000.

UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Carlisle Barracks, Pennsylvania, $1,500,000.
Fort Benjamin Harrison, Indiana, $5,900,000.
Fort Benning, Georgia, $21,750,000.
Fort Bliss, Texas, $40,580,000.
Fort Jackson, South Carolina, $39,190,000.
Fort Knox, Kentucky, $4,200,000.
Fort Leavenworth, Kansas, $13,550,000.
Fort Lee, Virginia, $5,930,000.
Fort Leonard Wood, Missouri, $12,600,000.
Fort McClellan, Alabama, $4,220,000.
Fort Rucker, Alabama, $11,600,000.
Fort Sill, Oklahoma, $25,150,000.
Fort Story, Virginia, $9,000,000.

MILITARY DISTRICT OF WASHINGTON

Fort Myer, Virginia, $2,750,000

UNITED STATES ARMY MATERIEL DEVELOPMENT AND READINESS COMMAND

Aberdeen Proving Ground, Maryland, $39,850,000.
Detroit Arsenal, Michigan, $270,000.
Fort Monmouth, New Jersey, $14,900,000.
Harry Diamond Laboratories, Maryland, $400,000.
Kansas Army Ammunition Plant, Kansas, $1,150,000.
Louisiana Army Ammunition Plant, Louisiana, $4,250,000.
Milan Army Ammunition Plant, Tennessee, $550,000.
Picatinny Arsenal, New Jersey, $460,000.
Pine Bluff Arsenal, Arkansas, $10,200,000.
Red River Army Depot, Texas, $1,250,000.
Redstone Arsenal, Alabama, $25,400,000.
Rock Island Arsenal, Illinois, $26,500,000.
Sierra Army Depot, California, $3,950,000.
Tobyhanna Army Depot, Pennsylvania, $9,200,000.
Watervliet Arsenal, New York, $2,150,000.
White Sands Missile Range, New Mexico, $310,000.

AMMUNITION FACILITIES

Iowa Army Ammunition Plant, Iowa, $2,000,000.
Lake City Army Ammunition Plant, Missouri, $600,000.
Lone Star Army Ammunition Plant, Texas, $1,300,000.
Longhorn Army Ammunition Plant, Texas, $270,000.
Milan Army Ammunition Plant, Tennessee, $340,000.
Radford Army Ammunition Plant, Virginia, $4,620,000.
Scranton Army Ammunition Plant, Pennsylvania, $1,000,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Fort Huachuca, Arizona, $2,750,000.

UNITED STATES MILITARY ACADEMY

United States Military Academy, New York, $12,840,000.

UNITED STATES ARMY HEALTH SERVICES COMMAND

Fort Detrick, Maryland, $1,650,000.
Walter Reed Army Medical Center, Washington, District of Columbia, $4,200,000.

CLASSIFIED PROJECT

Various Locations, $1,300,000.

OUTSIDE THE UNITED STATES

UNITED STATES ARMY, JAPAN

Okinawa, $1,400,000.

EIGHTH UNITED STATES ARMY

Korea, $59,580,000.

BALLISTIC MISSILE DEFENSE SYSTEMS COMMAND

Kwajalein, $5,620,000.

UNITED STATES ARMY FORCES COMMAND OVERSEAS

Fort Buchanan, Puerto Rico, $1,550,000.
Panama, $1,460,000.

UNITED STATES ARMY, EUROPE

Europe, $19,000,000.
Germany, $286,010,000.
Greece, $4,880,000.
Italy, $2,710,000.
Turkey, $5,250,000.

UNITED STATES ARMY INTELLIGENCE AND SECURITY COMMAND OVERSEAS

Korea, $260,000.

FAMILY HOUSING

SEC. 102. (a) The Secretary of the Army may construct family housing units (including land acquisition) and may acquire man-

ufactured facilities at the following installations in the number shown, and in the amount shown, for each installation:

Aberdeen Proving Ground, Maryland, one hundred and six units, $6,816,000.

Various Locations, Alaska, six units, $1,158,000.

Aliamanu, Hawaii, community center, $9,900,000.

Various Locations, North Atlantic Treaty Organization nations in Europe, five hundred units, $40,000,000.

Fort Greely, Alaska, thirty-eight units, $5,203.000.

Fort Polk, Louisiana, two hundred units, $15,342,000.

Fort Stewart, Georgia, two hundred and forty-four units, $14,626,000.

Wildflecken, Federal Republic of Germany, one hundred and fifty-three units, $12,157,000.

Bayreuth, Federal Republic of Germany, thirteen units, $1,132,000.

Kitzingen, Federal Republic of Germany, one hundred and three units, $11,140,000.

Vicenza, Italy, two units, $354,000.

(b) The Secretary of the Army may rehabilitate existing family housing units at Aberdeen Proving Ground, Maryland, or may construct new family housing units at such installation, whichever the Secretary determines is most cost effective, and may use for such purpose (1) any funds not in excess of $6,080,000 that were appropriated for fiscal year 1983 for the improvement of existing family housing at such installation and which remain unobligated on the date of the enactment of this Act, and (2) any funds appropriated pursuant to subsection (a) for the construction or acquisition of family housing at such installation.

CONTRACTING FOR CERTAIN PROJECTS

SEC. 103. (a) The following projects authorized in sections 101 and 102 may be carried out only as provided in subsection (b):

Operations Building in the amount of $2,000,000 at Fort Carson, Colorado.

Child Care Center in the amount of $3,000,000 at Fort Devens, Massachusetts.

Bulk Fuel Storage Facility in the amount of $4,200,000 at Fort Hood, Texas.

Multipurpose Training Range in the amount of $3,350,000 at Fort Hood, Texas.

Physical Fitness Training Center in the amount of $1,000,000 at Fort Hunter Liggett, California.

Barracks Modernization in the amount of $7,700,000 at Fort Irwin, California.

Hangar Addition in the amount of $2,800,000 at Fort Lewis, Washington.

Instrument Landing System in the amount of $870,000 at Fort Lewis, Washington.

Electrical Substation in the amount of $1,400,000 at Fort Riley, Kansas.

Sewage Treatment and Water Upgrade in the amount of $6,500,000 at Fort Riley, Kansas.

Physical Fitnes Training Center with Pool in the amount of $1,500,000 at Carlisle Barracks, Pennsylvania.

Barracks in the amount of $5,900,000 at Fort Benjamin Harrison, Indiana.

Infantry Remote Target Systems Ranges in the amount of $3,000,000 at Fort Bliss, Texas.

Physical Fitness Training Center in the amount of $2,850,000 at Fort Bliss, Texas.

Chapel/Child Care Center in the amount of $6,400,000 at Fort Jackson, South Carolina.

Education Center in the amount of $5,200,000 at Fort Jackson, South Carolina.

Trainee Barracks in the amount of $26,800,000 at Fort Jackson, South Carolina.

Classrooms in the amount of $1,950,000 at Fort Rucker, Alabama.

Trainee Barracks with Dining Facility in the amount of $23,000,000 at Fort Sill, Oklahoma.

Trainee Barracks in the amount of $9,800,000 at Aberdeen Proving Ground, Maryland.

Medical Research Laboratory Alterations in the amount of $3,650,000 at Aberdeen Proving Ground, Maryland.

Electrical Distribution System in the amount of $2,500,000 at Fort Monmouth, New Jersey.

Pulse Power Center in the amount of $12,400,000 at Fort Monmouth, New Jersey.

Bridge Repair in the amount of $4,500,000 at Rock Island Arsenal, Illinois.

Shelter Handling Facility in the amount of $9,200,000 at Tobyhanna Army Depot, Pennsylvania.

Laboratory in the amount of $2,150,000 at Watervliet Arsenal, New York.

Brigade Headquarters in the amount of $1,500,000 at Fort Huachuca, Arizona.

Construction of Family Housing in the amount of $40,000,000 at various locations, North Atlantic Treaty Organization nations in Europe.

(b) A contract for a project listed in subsection (a) may be entered into only if the funds to be obligated for the contract are derived from the total amount of funds (if any) available from (1) the net savings from the execution of the projects authorized by sections 101 and 102 other than those listed in subsection (a), (2) total savings from cancellations of such projects, and (3) other sources, including savings from projects authorized for the Army in previous Military Construction Authorization Acts.

(c) Before the Secretary of the Army may advertise for bids, or may negotiate, for a contract described in subsection (b), the Secretary shall submit a written report to the appropriate committees of Congress certifying that funds for the contract are available in accordance with subsection (b) and identifying the source of the funds. Such a report may not be submitted before January 1, 1984.

IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

SEC. 104. Subject to section 2825 of title 10, United States Code, the Secretary of the Army may make expenditures to improve existing military family housing units in an amount not to exceed $103,553,000, of which $26,623,000 is available only for energy conservation projects.

ARCHITECTURAL AND ENGINEERING SERVICES AND CONSTRUCTION DESIGN FOR FAMILY HOUSING PROJECTS

SEC. 105. Subject to section 2807 of title 10, United States Code, the Secretary of the Army may carry out architectural and engineering services and construction design in connection with military family housing projects (including improvements) in the amount of $6,750,000.

PROJECTS USING UNOBLIGATED PRIOR YEAR AUTHORITY

SEC. 106. (a) The Secretary of the Army may carry out the following projects (for which funds are not authorized under section 601) as provided in subsection (b):

Unspecified minor construction projects in the amount of $4,600,000 at various locations.

Construction projects of $1,000,000 or less in the amount of $6,800,000 at various locations.

(b) A contract for a project described in subsection (a) may be entered into using authorization amounts available from approved projects authorized under title I of any previous Military Construction Authorization Act.

AUTHORIZED NAVY CONSTRUCTION AND LAND ACQUISITION PROJECTS

SEC. 201. The Secretary of the Navy may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations:

INSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Air Station, Beaufort, South Carolina, $3,530,000.

Marine Corps Base, Camp Lejeune, North Carolina, $31,760,000.

Marine Corps Base, Camp Pendleton, California, $39,070,000.

Marine Corps Air Station, Cherry Point, North Carolina, $1,805,000.

Marine Corps Air Station, El Toro, California, $14,030,000.

Marine Corps Air Station, Kaneohe Bay, Hawaii, $7,900,000.

Marine Corps Air Station, New River, North Carolina, $2,730,000.

Marine Corps Camp Detachment, Camp Elmore, Norfolk, Virginia, $1,160,000.

Camp H. M. Smith, Oahu, Hawaii, $2,700,000.

Marine Corps Development and Education Command, Quantico, Virginia, $2,570,000.

Marine Corps Recruit Depot, San Diego, California, $10,690,000.

Marine Corps Air Station, Tustin, California, $455,000.

Marine Corps Air-Ground Combat Center, Twentynine Palms, California, $25,120,000.

Marine Corps Air Station, Yuma, Arizona, $8,920,000.

CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, $9,720,000.

Naval Station, Annapolis, Maryland, $405,000.

Naval Space Surveillance Field Station, Hollandale, Mississippi, $495,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Air Station, Brunswick, Maine, $7,800,000.

Naval Air Station, Cecil Field, Florida, $17,670,000.

Naval Station, Charleston, South Carolina, $43,150,000.

Naval Air Station, Jacksonville, Florida, $10,000,000.

Naval Air Station, Key West, Florida, $15,635,000.

Naval Amphibious Base, Little Creek, Virginia, $9,170,000.

Naval Station, Mayport, Florida, $25,520,000.

Naval Submarine Base, New London, Connecticut, $8,200,000.

Naval Station, Norfolk, Virginia, $2,560,000.

Naval Air Station, Oceana, Virginia, $415,000.

Tactical Training Group, Atlantic, Virginia Beach, Virginia, $3,750,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Station, Adak, Alaska, $2,970,000.

Naval Submarine Base, Bangor, Washington, $8,040,000.

Naval Air Station, Barbers Point, Hawaii, $890,000.

Naval Amphibious Base, Coronado, California, $21,222,000.
Naval Air Station, Fallon, Nevada, $11,900,000.
Naval Air Station, Lemoore, California, $20,920,000.
Naval Air Station, Miramar, California, $2,020,000.
Naval Air Station, Moffett Field, California, $1,870,000.
Naval Air Station, North Island, California, $20,650,000.
Fleet Intelligence Center, Pacific, Pearl Harbor, Hawaii, $990,000.
Naval Station, Pearl Harbor, Hawaii, $3,350,000.
Naval Submarine Base, Pearl Harbor, Hawaii, $2,590,000.
Tactical Training Group, Pacific, San Diego, California, $3,260,000.
Naval Station, San Diego, California, $980,000.
Naval Submarine Base, San Diego, California $6,660,000.
Naval Station, Mare Island, Vallejo, California, $2,010,000
Naval Air Station, Whidbey Island, Washington, $3,160,000.

NAVAL EDUCATION AND TRAINING COMMAND

Naval Air Station, Chase Field, Texas, $2,625,000.
Naval Air Station, Corpus Christi, Texas, $495,000.
Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, $12,190,000.
Fleet Intelligence Training Center, Dam Neck, Virginia, $12,200,000.
Naval Guided Missiles School, Dam Neck, Virginia, $1,860,000.
Naval Air Station, Kingsville, Texas $4,830,000.
Naval Air Station, Memphis, Tennessee, $11,800,000.
Naval Air Station, Meridian, Mississippi, $610,000.
Naval Education and Training Center, Newport, Rhode Island, $1,110,000.
Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, Virginia, $4,130,000.
Fleet Training Center, Norfolk, Virginia, $1,120,000.
Naval Training Center, Orlando, Florida, $19,690,000.
Naval Air Station, Pensacola, Florida, $2,200,000.
Naval Technical Training Center, Pensacola, Florida, $2,410,000.
Fleet Anti-Submarine Warfare Training Center, Pacific, San Diego, California, $14,200,000.
Fleet Training Center, San Diego, California, $10,000,000.
Naval Air Station, Whiting Field, Florida, $4,260,000.

BUREAU OF MEDICINE AND SURGERY

National Naval Medical Center, Bethesda, Maryland, $37,170,000.
Naval Regional Medical Center, Long Beach, California, $8,370,000.
Naval Regional Medical Clinic, Pearl Harbor, Hawaii, $8,490,000.

NAVAL MATERIAL COMMAND

Naval Air Rework Facility, Alameda, California, $21,560,000.
David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland, $5,030,000.
Naval Supply Center, Puget Sound, Bremerton, Washington, $200,000.
Naval Ordnance Test Unit, Cape Canaveral, Florida, $57,000,000.
Charleston Naval Shipyard, Charleston, South Carolina, $15,000,000.
Naval Weapons Station, Charleston, South Carolina, $1,570,000.
Naval Air Rework Facility, Cherry Point, North Carolina, $20,040,000.
Naval Weapons Center, China Lake, California, $31,100,000.
Naval Weapons Station, Concord, California, $2,720,000.
Naval Surface Weapons Center, Dahlgren, Virginia, $5,355,000.
Fleet Combat Direction Systems Support Activity, Dam Neck, Virginia, $4,000,000.
Naval Weapons Station, Earle, New Jersey, $465,000.
Naval Construction Battalion Center, Gulfport, Mississippi, $2,960,000.
Naval Ordnance Station, Indian Head, Maryland, $1,950,000.
Naval Air Rework Facility, Jacksonville, Florida, $2,875,000.
Naval Underwater Engineering Station, Keyport, Washington, $1,400,000.
Naval Submarine Base, Kings Bay, Georgia, $118,129,000, of which $6,019,000 may be used to provide community impact and planning assistance to the communities located near the submarine base.
Naval Air Engineering Center, Lakehurst, New Jersey, $4,195,000.
Mare Island Naval Shipyard, Vallejo, California, $14,800,000.
Naval Air Rework Facility, Norfolk, Virginia, $3,020,000.
Naval Supply Center, Norfolk, Virginia, $6,400,000.
Naval Coastal Systems Center, Panama City, Florida, $6,070,000.
Naval Air Test Center, Patuxent River, Maryland, $10,150,000.
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, $26,040,000.
Navy Public Works Center, Pearl Harbor, Hawaii, $13,100,000.
Pacific Missile Test Center, Point Mugu, California, $840,000.
Portsmouth Naval Shipyard, Kittery, Maine, $7,100,000.
Norfolk Naval Shipyard, Portsmouth, Virginia, $19,350,000.
Puget Sound Naval Shipyard, Bremerton, Washington, $7,300,000.
Naval Transmitter Facility, Republic, Michigan, $13,000,000.
Naval Ocean Systems Center, San Diego, California, $8,000,000.
Naval Supply Center, San Diego, California, $1,110,000.
Navy Public Works Center, San Francisco, California, $220,000.
Naval Shipyard, Philadelphia, Pennsylvania, $2,600,000.
Naval Ships Systems Engineering Station, Philadelphia, Pennsylvania, $14,500,000.

NAVAL OCEANOGRAPHY COMMAND

Naval Oceanographic Office, Bay St. Louis, Mississippi, $6,320,000.
Fleet Numerical Oceanography Center, Monterey, California, $6,980,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Atlantic, Norfork, Virginia, $1,690,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Detachment, Sugar Grove, West Virginia, $7,400,000.

OUTSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Air Station, Iwakuni, Japan, $750,000.

COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Air Station, Bermuda, $810,000.
Naval Facility, Bermuda, $1,110,000.
Naval Station, Guantanamo Bay, Cuba, $730,000.
Naval Station, Keflavik, Iceland, $6,850,000.
Naval Station, Roosevelt Roads, Puerto Rico, $1,300,000.
Atlantic Fleet Weapons Training Facility, Roosevelt Roads, Puerto Rico, $1,945,000.

COMMANDER IN CHIEF, PACIFIC FLEET

Commander, U.S. Naval Forces Korea Detachment, Chinhae, Korea, $460,000.
Navy Support Facility, Diego Garcia, $31,800,000.
Naval Station, Subic Bay, Republic of the Philippines, $6,140,000.

COMMANDER IN CHIEF, NAVAL FORCES, EUROPE

Naval Support Activity, Holy Loch, Scotland, $8,840,000.
Navy Personnel Support Activity, Naples, Italy, $640,000.
Naval Support Activity, Naples, Italy, $4,700,000.
Naval Station, Rota, Spain, $9,250,000.
Naval Air Station, Sigonella, Italy, $20,810,000.

NAVAL OCEANOGRAPHY COMMAND

Naval Oceanography Command Center, Rota, Spain, $980,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Station, Harold E. Holt, Exmouth, Australia, $3,020,000.
Naval Communication Area Master Station Western Pacific, Guam, Mariana Islands, $980,000.
Classified Location, $1,280,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Detachment, Guantanamo Bay, Cuba, $1,700,000.

HOST NATION INFRASTRUCTURE SUPPORT

Various Locations, $2,970,000.

CONTRACTING FOR CERTAIN PROJECTS

SEC. 202. (a) The following projects authorized in section 201 may be carried out only as provided in subsection (b):
Unaccompanied Enlisted Personnnel Housing in the amount of $10,000,000 at Naval Air Station, Jacksonville, Florida.
Unaccompanied Enlisted Personnel Housing Modernization in the amount of $1,800,000 at Naval Station, Mare Island, Vallejo, California.
Applied Instruction Building in the amount of $10,000,000 at the Fleet Training Center, San Diego, California.
Unaccompanied Enlisted Personnel Housing in the amount of $7,300,000 at the Naval Shipyard, Puget Sound, Bremerton, Washington.
Station Access Facilities in the amount of $1,400,000 at the Naval Underwater Engineering Station Keyport, Washington.
TRIDENT Training Facility in the amount of $17,000,000 at the Naval Submarine Base, Kings Bay, Georgia.
Training Facility in the amount of $4,600,000 at the Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii.
Service Shops in the amount of $4,000,000 at the Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii.
Electrical Distribution Lines in the amount of $7,200,000 at the Naval Shipyard, Mare Island, California.
Facility Energy Improvements in the amount of $1,600,000 at the Naval Shipyard, Mare Island, California.
Horizontal Paint and Blast Facility in the amount of $6,000,000 at the Naval Shipyard, Mare Island, California.
Medical/Dental Clinic in the amount of $2,550,000 at the Naval Support Activity, Holy Loch, Scotland.

General Warehouse in the amount of $2,800,000 at the Naval Support Activity, Holy Loch, Scotland.

Supply Pier in the amount of $2,950,000 at the Naval Support Activity, Holy Loch, Scotland.

Family Services Center in the amount of $540,000 at the Naval Support Activity, Holy Loch, Scotland.

Armed Forces Radio and Television Station in the amount of $1,200,000 at the Naval Air Station, Sigonella, Italy.

(b) A contract for a project listed in subsection (a) may be entered into only if the funds to be obligated for the contract are derived from the total amount of funds (if any) available from (1) the net savings from the execution of the projects authorized by section 201 other than those listed in subsection (a), (2) total savings from cancellations of such projects, and (3) other sources, including savings from projects authorized for the Navy in previous Military Construction Authorization Acts.

(c)(1) During fiscal year 1984, the Secretary of the Navy may enter into a contract for the total amount authorized under section 201 for the construction of the Trident Training Facility at the Naval Submarine Base, Kings Bay, Georgia, but may not obligate more than $17,000,000 of any funds described in subsection (b). Any amount for the construction of such facility in excess of $17,000,000 may be obligated only after fiscal year 1984 from funds realized from savings on other projects or to the extent provided for in appropriation Acts.

(2) During fiscal year 1984, the Secretary of the Navy may enter into a contract for the total amount authorized under section 201 for the construction of the Service Shops at Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, but may not obligate more than $4,000,000 of any funds described in subsection (b). Any amount for the construction of such facility in excess of $4,000,000 may be obligated only after fiscal year 1984 from funds realized from savings on other projects or to the extent provided for in appropriation Acts.

(d) Before the Secretary of the Navy may advertise for bids, or may negotiate, for a contract described in subsection (b), the Secretary shall submit a written report to the appropriate committees of Congress certifying that funds for the contract are available in accordance with subsection (b) and identifying the source of the funds. Such a report may not be submitted before January 1, 1984.

FAMILY HOUSING

SEC. 203. The Secretary of the Navy may construct family housing units (including land acquisition) and may acquire manufactured home facilities at the following installations in the number of units shown, and in the amount shown, for each installation:

Marine Corps Air Station, El Toro, California, one hundred and thirty units, $11,666,000.

Marine Corps Base, Camp Pendleton, California, three hundred units, $23,160,000.

Navy Public Works Center, Subic Bay, Republic of the Philippines, three hundred units, $29,300,000.

IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

SEC. 204. Subject to section 2825 of title 10, United States Code, the Secretary of the Navy may make expenditures to improve existing military family housing units in an amount not to exceed $13,240,000, of which $3,953,000 is available only for energy conservation projects.

ARCHITECTURAL AND ENGINEERING SERVICES AND CONSTRUCTION DESIGN FOR FAMILY HOUSING PROJECTS

SEC. 205. Subject to section 2807 of title 10, United States Code, the Secretary of the Navy may carry out architectural and engineering services and construction design in connection with military family housing projects (including improvements) in the amount of $7,395,000.

MODIFICATION OF LEASING LIMITATION FOR NAVAL AIR STATION, LEMOORE, CALIFORNIA

SEC. 206. Section 2 of Public Law 92-378 (86 Stat. 530), relating to leases of lands for agricultural and grazing purposes at the Naval Air Station, Lemoore, California, is amended by striking out "160 irrigable acres" and inserting in lieu thereof "960 irrigable acres".

MODIFICATION OF AUTHORITY FOR PROCUREMENT OF STEAM SUPPLY FOR THE CHARLESTON NAVAL STATION

SEC. 207. Clause (1) of section 205(a) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1366), is amended to read as follows:

"(1) construct steam lines and any other needed facility, or pay a connection fee, to make use of energy generated by a waste heat recovery facility or a process-related, coal-fired cogeneration facility to be furnished by the Macalloy Corporation (a corporation organized under the laws of the State of Delaware) or a successor in interest to that corporation; and".

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION AND LAND ACQUISITION PROJECTS

SEC. 301. The Secretary of the Air Force may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations:

INSIDE THE UNITED STATES

AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, $16,155,000.
Kelly Air Force Base, Texas, $22,590,000.
McClellan Air Force Base, California, $10,200,000.
Newark Air Force Base, Ohio, $800,000.
Robins Air Force Base, Georgia, $18,780,000.
Tinker Air Force Base, Oklahoma, $12,560,000.
Wright-Patterson Air Force Base, Ohio, $5,923,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, $12,552,000.
Brooks Air Force Base, Texas, $10,110,000.
Cape Canaveral Air Force Base, Florida, $9,400,000.
Eastern Launch Site, Florida, $6,000,000.
Edwards Air Force Base, California, $12,400,000.
Eglin Air Force Base, Florida, $11,990,000.
Laurence G. Hanscom Air Force Base, Massachusetts, $3,670,000.
Johnson Space Center, Texas, $700,000.
Los Angeles Air Force Base, California, $2,670,000.
Patrick Air Force Base, Florida, $2,392,000.

AIR NATIONAL GUARD

Buckley Air National Guard Base, Colorado, $2,000,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, $89,210,000.
Columbus Air Force Base, Mississippi, $2,180,000.
Goodfellow Air Force Base, Texas, $10,040,000.
Gunter Air Force Station, Alabama, $6,750,000.
Keesler Air Force Base, Mississippi, $24,620,000.
Lackland Air Force Base, Texas, $10,700,000.
Lowry Air Force Base, Colorado, $6,100,000.
Mather Air Force Base, California, $4,460,000.
Reese Air Force Base, Texas, $1,550,000.
San Antonio Area, Texas, $12,000,000.
Sheppard Air Force Base, Texas, $16,080,000.
Vance Air Force Base, Oklahoma, $1,250,000.
Williams Air Force Base, Arizona, $2,700,000.

ALASKAN AIR COMMAND

Eielson Air Force Base, Alaska, $58,390,000.
Elmendorf Air Force Base, Alaska, $10,770,000.
Galena Airport, Alaska, $13,350,000.
Shemya Air Force Base, Alaska, $45,600,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, $21,600,000.
Andrews Air Force Base, Maryland, $1,786,000.
Bolling Air Force Base, Washington, D.C., $2,300,000.
Charleston Air Force Base, South Carolina, $3,200,000.
Dover Air Force Base, Delaware, $1,300,000.
Kirtland Air Force Base, New Mexico, $2,240,000.
Little Rock Air Force Base, Arkansas, $3,120,000.
McChord Air Force Base, Washington, $12,160,000.
McGuire Air Force Base, New Jersey, $620,000.
Pope Air Force Base, North Carolina, $6,500,000.
Scott Air Force Base, Illinois, $790,000.
Travis Air Force Base, California, $6,200,000.

PACIFIC AIR FORCES

Hickam Air Force Base, Hawaii, $3,150,000.

PEACEKEEPER CONSTRUCTION

Various Locations, $46,700,000.

SPACE COMMAND

NORAD Cheyenne Mountain Complex, Colorado, $5,660,000.
Peterson Air Force Base, Colorado, $78,700,000.

SPECIAL PROJECT

Various Locations, $24,000,000.

STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, $34,970,000.
Beale Air Force Base, California, $5,550,000.
Blytheville Air Force Base, Arkansas, $6,950,000.
Carswell Air Force Base, Texas, $4,110,000.
Castle Air Force Base, California, $6,500,000.
Dyess Air Force Base, Texas, $14,300,000.
Ellsworth Air Force Base, South Dakota, $6,700,000.

Fairchild Air Force Base, Washington, $28,450,000.
Forsyth Air Force Station, Montana, $4,225,000.
Grand Forks Air Force Base, North Dakota, $8,525,000.
Griffiss Air Force Base, New York, $12,400,000.
Grissom Air Force Base, Indiana, $9,830,000.
Havre Air Force Station, Montana, $4,936,000.
K. I. Sawyer Air Force Base, Michigan, $40,460,000.
Loring Air Force Base, Maine, $36,400,000.
Malmstrom Air Force Base, Montana, $630,000.
March Air Force Base, California, $3,550,000.
McConnell Air Force Base, Kansas, $9,570,000.
Minot Air Force Base, North Dakota, $13,800,000.
Offutt Air Force Base, Nebraska, $38,520,000.
Pease Air Force Base, New Hampshire, $7,200,000.
Plattsburgh Air Force Base, New York, $5,955,000.
Vandenberg Air Force Base, California, $46,002,000.
Whiteman Air Force Base, Missouri, $24,500,000.
Wurtsmith Air Force Base, Michigan, $5,000,000.

TACTICAL AIR COMMAND

Bangor International Airport, Maine, $10,100,000.
Bergstrom Air Force Base, Texas, $20,310,000.
Cannon Air Force Base, New Mexico, $6,800,000.
Davis-Monthan Air Force Base, Arizona, $5,850,000.
England Air Force Base, Louisiana, $3,357,000.
George Air Force Base, California, $220,000.
Holloman Air Force Base, New Mexico, $20,500,000.
Homestead Air Force Base, Florida, $4,060,000.
Langley Air Force Base, Virginia, $8,300,000.
Luke Air Force Base, Arizona, $9,663,000.
MacDill Air Force Base, Florida, $6,360,000.
Moody Air Force Base, Georgia, $1,300,000.
Mountain Home Air Force Base, Idaho, $6,590,000.
Myrtle Beach Air Force Base, South Carolina, $1,550,000.
Nellis Air Force Base, Nevada, $4,490,000.
Seymour-Johnson Air Force Base, North Carolina, $5,240,000.
Shaw Air Force Base, South Carolina, $9,990,000.
Tyndall Air Force Base, Florida, $29,040,000.
Unspecified Location, $500,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, $10,085,000.

OUTSIDE THE UNITED STATES

MILITARY AIRLIFT COMMAND

Lajes Field, Portugal, $1,400,000.
Rhein-Main Air Base, Germany, $1,870,000.

PACIFIC AIR FORCES

Clark Air Base, Republic of the Philippines, $8,850,000.
Diego Garcia Air Base, Indian Ocean, $58,200,000.
Kadena Air Base, Japan, $11,260,000.
Korea, Various Locations, $5,900,000.
Kunsan Air Base, Korea, $31,013,000.
Kwang-Ju Air Base, Korea, $210,000.
Misawa Air Base, Japan, $18,700,000.
Osan Air Base, Korea, $42,150,000.
Saechon Air Base, Korea, $210,000.
Suwon Air Base, Korea, $400,000.
Taegu Air Base, Korea, $2,750,000.
Kokota Air Base, Japan, $1,250,000.

STRATEGIC AIR COMMAND

Andersen Air Force Base, Guam, $4,710,000.

TACTICAL AIR COMMAND

Howard Air Force Base, Canal Zone, $613,000.

UNITED STATES AIR FORCES IN EUROPE

Camp New Amsterdam, The Netherlands $2,050,000.
Germany, Various Locations, $46,464,000.
Italy, Various Locations, $30,430,000.
Morocco, Various Locations, $28,000,000.
Oman, Various Locations, $28,600,000.
Spain, Various Locations, $6,832,000.
Turkey, Various Locations, $73,220,000.
United Kingdom, Various Locations, $44,768,000.
Various Locations, $67,550,000.

CONTRACTING FOR CERTAIN PROJECTS

SEC. 302. (a) The following projects authorized in section 301 may be carried out only as provided in subsection (c):

Non-Destruct Inspection Facility in the amount of $5,900,000 and Depot Production Support Facility in the amount of $3,500,000 at McClellan Air Force Base, California.

Alteration of Unaccompanied Enlisted Personnel Housing in the amount of $1,450,000 at Robins Air Force Base, Georgia.

Alteration of F-107 Engine Facility in the amount of $420,000, Combat Communications Headquarters in the amount of $2,150,000, and Communications Electronic Installation Facility in the amount of $960,000 at Tinker Air Force Base, Oklahoma.

Fire Protection-Bulk Fuel Farm in the amount of $382,000 at Arnold Engineering Development Center, Tennessee.

RAPCON/CCF Facility in the amount of $490,000 at Edwards Air Force Base, California.

Addition to Recreation Gymnasium in the amount of $2,150,000 at Eglin Air Force Base, Florida.

Commercial Power Connection in the amount of $2,000,000 at Buckley Air National Guard Base, Colorado.

Central Heat Plant in the amount of $11,700,000 at Chanute Air Force Base, Illinois.

PMEL Laboratory in the amount of $530,000 at Columbus Air Force Base, Mississippi.

Alteration of Electrical Distribution System in the amount of $1,500,000 and Voice Processing Training Facility in the amount of $7,800,000 at Goodfellow Air Force Base, Texas.

Unaccompanied Enlisted Personnel Housing/Senior NCO Academy in the amount of $5,000,000 at Gunter Air Force Station, Alabama.

Computer Training Facility in the amount of $11,900,000 and Unaccompanied Enlisted Personnel Housing with Dining Hall in the amount of $6,400,000 at Keesler Air Force Base, Mississippi.

Chapel in the amount of $2,900,000 at Lackland Air Force Base, Texas.

Academic Classroom (Weapons) in the amount of $6,100,000 at Lowry Air Force Base, Colorado.

Gymnasium in the amount of $3,180,000 at Sheppard Air Force Base, Texas.

Composite Operations in the amount of $3,700,000 and Composite Support Facility in the amount of $5,700,000 at Galena Airport, Alaska.

Consolidated Operations/Maintenance Facility in the amount of $3,400,000 at Altus Air Force Base, Oklahoma.

Gymnasium in the amount of $2,300,000 at Bolling Air Force Base, District of Columbia.

Composite Wing Headquarters Facility in the amount of $3,200,000 at Charleston Air Force Base, South Carolina.

Base Transportation Complex/Land Acquisition in the amount of $3,700,000 at Pope Air Force Base, North Carolina.

Composite Medical Facility (David Grant Medical Center) Phase I in the amount of $5,000,000 at Travis Air Force Base, California.

Upgrade Power Plants ADWS in the amount of $710,000 at Carswell Air Force Base, Texas.

Unaccompanied Enlisted Personnel Housing in the amount of $8,500,000, Dining Hall in the amount of $3,730,000, alteration of Consolidated Base Personnel Office in the amount of $1,100,000, Hydrant Fueling System in the amount of $4,400,000, and alteration of Unaccompanied Enlisted Personnel Housing in the amount of $5,000,000 at Fairchild Air Force Base, Washington.

Unaccompanied Enlisted Personnel Housing in the amount of $6,700,000 at Griffiss Air Force Base, New York.

Addition to and alteration of Vehicle Maintenance Shop in the amount of $1,030,000, Dining Hall in the amount of $3,200,000, and Military Personnel Support Center in the amount of $5,600,000 at Grisson Air Force Base, Indiana.

Air Field Apron Lighting in the amount of $1,230,000 and Unaccompanied Enlisted Personnel Housing in the amount of $5,500,000 at McConnell Air Force Base, Kansas.

Unaccompanied Officer Personnel Housing in the amount of $4,000,000 at Offutt Air Force Base, Nebraska.

Base Civil Engineer Maintenance Complex in the amount of $7,200,000 at Pease Air Force Base, New Hampshire.

STS External Tank Area Icing Protection in the amount of $6,600,000 at Vandenberg Air Force Base, California.

Physical Fitness Facility in the amount of $4,190,000 at Plattsburgh Air Force Base, New York.

Alteration of Heat Plant in the amount of $1,800,000, Unaccompanied Enlisted Personnel Housing in the amount of $8,600,000, Dining Hall in the amount of $3,300,000, Missile Maintenance Facility in the amount of $7,900,000, and Vehicle Maintenance Shop in the amount of $2,900,000 at Whiteman Air Force Base, Missouri.

Base Support Center in the amount of $6,500,000, Composite Wing Facility in the amount of $1,280,000, Education Center in the amount of $2,750,000, and alteration of Base Entrance/Land Acquisition in the amount of $3,000,000 at Bergstrom Air Force Base, Texas.

Consolidated Support Center in the amount of $6,800,000 at Cannon Air Force Base, New Mexico.

Aircraft Maintenance Hangar in the amount of $7,700,000, Munitions Storage in the amount of $3,700,000, addition to Air-

craft Maintenance Unit in the amount of $600,000, addition to Engine Inspection and Repair in the amount of $1,000,000, Aircraft Corrosion Control in the amount of $1,400,000, alteration of Unaccompanied Enlisted Personnel Housing in the amount of $3,100,000, and Airmen Dining Hall in the amount of $3,000,000 at Holloman Air Force Base, New Mexico.

Unaccompanied Officer Personnel Housing in the amount of $4,600,000, Unaccompanied Enlisted Personnel Housing in the amount of $4,500,000, Civil Engineer Science Lab in the amount of $4,650,000, Education Center in the amount of $2,000,000, and Base Support Center in the amount of $6,500,000 at Tyndall Air Force Base, Florida.

Addition to Satellite Communication Receiver Facility in the amount of $4,250,000, Consolidated Support Facility in the amount of $2,250,000, alteration of Unaccompanied Officer Personnel Housing in the amount of $1,450,000, and alteration of Electrical/Mechanical Facilities (energy) in the amount of $900,000 at Clark Air Base, Republic of the Philippines.

Air Base upgrade in the amount of $48,700,000 in Turkey.

Various projects each costing $1,000,000 or less in the amount of $7,000,000 at various locations.

(b) An advance payment to the Secretary of Transportation for a defense access road project under section 210 of title 23, United States Code, to widen Tippacanoe Avenue Bridge at Norton Air Force Base, California, in the amount of $6,400,000 may be made only as provided in subsection (c).

(c) A contract for a project listed in subsection (a) may be entered into and the advance payment described in subsection (b) may be made only if the funds to be obligated for the contract or advance payment are derived from the total amount of funds (if any) available from (1) the net savings from the execution of the projects authorized by section 301 other than those listed in subsection (a), (2) total savings from cancellations of such projects, and (3) other sources, including savings from projects authorized for the Air Force in previous Military Construction Authorization Acts.

(d) During fiscal year 1984, the Secretary of the Air Force may enter into a contract for the total amount authorized under section 301 for the construction of the Central Heating Plant at Chanute Air Force Base, Illinois, but may not obligate more than $11,700,000 of any funds described in subsection (c). Any amount for the construction of such facility in excess of $11,700,000 may be obligated only after fiscal year 1984 from funds realized from savings on other projects or to the extent provided for in appropriation Acts.

(e) Before the Secretary of the Air Force may advertise for bids, or may negotiate, for a contract described in subsection (a) or make the advance payment under subsection (b), the Secretary shall submit a written report to the appropriate committees of Congress certifying that funds for the contract or advance payment are available in accordance with subsection (c) and identifying the source of the funds. Such a report may not be submitted before January 1, 1984.

FAMILY HOUSING

SEC. 303. The Secretary of the Air Force may construct family housing units (excluding land acquisition) and may acquire manufactured home facilities at the following installations in the number of units shown, and in the amount shown, for each installation:

Lajes Field, Portugal, one hundred and fifty units, $11,812,000.

Havre Air Force Station, Montana, five units, $496,000.

Forsyth Air Force Station, Montana, fifty units, $4,000,000.

Camp New Amsterdam, The Netherlands, fifty units, $4,898,000.

RAF Upper Heyford, United Kingdom, three hundred units, $33,982,000.

IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

SEC. 304. (a) Subject to section 2825 of title 10, United States Code, the Secretary of the Air Force may make expenditures to improve existing military family housing units in an amount not to exceed $64,715,000, of which $10,559,000 is available only for energy conservation projects.

(b) Within the amount specified in subsection (a), the Secretary of the Air Force may, notwithstanding the maximum amount per unit prescribed in section 2825(b) of title 10, United States Code, carry out projects to improve existing military family housing units at the following installations in the number of units shown, and in the amount shown, for each installation:

Carswell Air Force Base, Texas, two hundred and three units, $7,477,500.

Kadena Air Base, Japan, three hundred and forty-two units, $20,586,200.

ARCHITECTURAL AND ENGINEERING SERVICES AND CONSTRUCTION DESIGN FOR FAMILY HOUSING PROJECTS

SEC. 305. Subject to section 2807 of title 10, United States Code, the Secretary of the Air Force may carry out architectural and engineering services and construction design in connection with military family housing projects (including improvements) in the amount of $5,000,000.

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS AND LAND ACQUISITION FOR THE DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations:

INSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Fuel Support Point, Adak, Alaska, $14,200,000.

Defense Property Disposal Office, Anchorage, Alaska, $2,500,000.

Defense Fuel Support Point, Ozol, California, $1,100,000.

Defense Fuel Support Point, Long Beach, California, $42,100,000.

Defense Depot, Tracy, California, $480,000.

Defense Property Disposal Office, Vandenbery, California, $880,000.

Defense Property Disposal Office, Colorado Springs, Colorado, $810,000.

Defense Fuel Support Point, Escanaba, Michigan, $1,000,000.

Defense Depot, Memphis, Tennessee, $750,000.

Defense Property Disposal Office, San Antonio, Texas, $500,000.

Defense Property Disposal Office, Tooele, Utah, $420,000.

Defense Property Disposal Office, Norfolk, Virginia, $940,000.

Defense Property Disposal Office, Fort Lewis, Washington, $650,000.

DEFENSE MAPPING AGENCY

Hydrographic/Topographic Center, Brookmont, Maryland, $1,830,000.

NATIONAL SECURITY AGENCY

Fort Meade, Maryland, $31,000,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Fort Belvoir, Virginia, $3,000,000.

Defense Systems Management College, Fort Belvoir, Virginia $4,700,000.

Presidio of Monterey, California, $29,100,000.

DEFENSE INVESTIGATIVE SERVICE

Fort Holabird, Maryland, $210,000.

DEFENSE NUCLEAR AGENCY

Armed Forces Radiobiology Institute, Bethesda, Maryland, $10,900,000.

DEFENSE COMMUNICATIONS AGENCY

Pentagon Building, Virginia, $1,000,000.

OUTSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Hanau, Germany, $1,300,000.

DEFENSE NUCLEAR AGENCY

Johnston Island, $600,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Location, $10,000,000.

NATIONAL SECURITY AGENCY

Classified Location, $21,550,000.

Classified Location, $25,200,000.

DEPARTMENT OF DEFENSE DEPENDENTS SCHOOLS

Ansbach, Germany, $4,800,000.

Baumholder, Germany, $1,200,000.

Darmstadt, Germany, $6,000,000.

Giessen, Germany, $6,040,000.

Spangdahlem Air Base, Germany, $6,350,000.

Wildflecken, Germany, $5,200,000.

Vicenza, Italy, $2,310,000.

Lajes Field, Portugal, $4,590,000.

Zaragoza Air Force Base, Spain, $680,000.

Incirlik Air Base, Turkey, $5,800,000.

RAF Lakenheath, United Kingdom, $1,120,000.

RAF Wethersfield, United Kingdom, $2,832,000.

FAMILY HOUSING

SEC. 402. The Secretary of Defense may construct family housing units (including land acquisition) and acquire manufactured home facilities at classified locations overseas in the total amount of $1,210,000 for not in excess of eleven units.

IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

SEC. 403. Subject to section 2825 of title 10, United States Code, the Secretary of Defense may make expenditures to improve existing military family housing units in an amount not to exceed $35,000.

AUTHORITY TO USE UNOBLIGATED PRIOR YEAR AUTHORITY FOR CONTINGENCY CONSTRUCTION

SEC. 404. During fiscal year 1984, the Secretary of Defense may carry out contingency construction projects under section 2804 of title 10, United States Code, in an amount not to exceed $16,000,000.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

AUTHORITY OF THE SECRETARY OF DEFENSE TO MAKE CONTRIBUTIONS

SEC. 501. The Secretary of Defense may make contributions for the North Atlantic Treaty Organization Infrastructure program as provided in section 2806 of title 10, United States Code, in an amount not to

exceed the amount authorized to be appropriated in section 605.

RECOUPMENT OF PREFINANCING PAYMENTS

SEC. 502. None of the funds appropriated pursuant to authorizations of appropriations in this Act may be obligated for payments for prefinancing of projects eligible, or expected to be come eligible, to be paid for (in whole or in part) by the North Atlantic Treaty Organization infrastructure program until the Secretary of Defense provides to the appropriate committees of Congress a written report which shall (1) include a complete accounting for funds authorized by this and previous Military Construction Authorization Acts for the prefinancing of projects otherwise eligible for funding under such program, and (2) describe in detail how the Secretary plans to recoup such funds that have been or are to be obligated for such prefinancing of projects.

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND RECURRING ADMINISTRATIVE PROVISIONS

AUTHORIZATION OF APPROPRIATIONS, ARMY

SEC. 601. (a) Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, for military construction, land acquisition, and military family housing functions of the Department of the Army in the total amount of $2,450,959,000 as follows:

(1) For projects authorized by section 101 that are to be carried out inside the United States, $575,180,000.

(2) For projects authorized by section 101 that are to be carried out outside the United States, $366,920,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $27,400,000.

(4) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $188,000,000.

(5) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities as authorized by title I, $173,131,000; and

(B) for support of military family housing, $1,120,328,000, of which not more than $86,258,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 101 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a).

AUTHORIZATION OF APPROPRIATIONS, NAVY

SEC. 602. (a) Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, for military construction, land acquisition, and military family housing functions of the Departments of the Navy in the total amount of $1,763,520,000 as follows:

(1) For projects authorized by section 201 that are to be carried out inside the United States, $875,811,000.

(2) For projects authorized by section 201 that are to be carried out outside the United States, $94,285,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $22,000,000.

(4) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $115,600,000.

(5) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $1,387,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities as authorized by title II, $74,961,000; and

(B) for support of military family housing, $579,476,000, of which not more than $149,000 may be obligated or expended for the leasing of military family housing units in the United States, the Commonwealth of Puerto Rico, and Guam and not more than $18,063,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost to all projects carried out under section 201 may not exceed the total amount authorized be appropriated under paragraphs (1) and (2) of subsection (a).

AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

SEC. 603. (a) Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, for military construction, land acquisition, and military family housing functions of the Department of the Air Force in the total amount of $2,375,071,000 as follows;

(1) For projects authorized by section 301 that are to be carried out inside the United States, $857,984,000;

(2) For projects authorized by section 301 that are to be carried out outside the United States, $464,944,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $19,000,000.

(4) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $147,000,000.

(5) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $3,250,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities as authorized by title III, $112,649,000; and

(B) for support of military family housing, $770,244,000, of which not more than $492,000 may be obligated or expended for the leasing of military family housing units in the United States, the Commonwealth of Puerto Rico, and Guam and not more than $53,046,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 301 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a).

AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

SEC. 604. (a) Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, for military construction, land acquisition, and military family housing functions of the Department of Defense (other than the military departments) in the total amount of $306,386,000 as follows:

(1) For projects authorized by section 401 that are to be carried out inside the United States, $143,070,000.

(2) For projects authorized by section 401 that are to be carried out outside the United States, $90,572,000

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $4,000,000.

(4) For construction projects under the contingency construction authority of the Secretary of Defense under section 2804 of title 10, United States Code, $16,000,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $33,000,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities as authorized by title IV, $1,245,000; and

(B) for support of military family housing, $18,499,000, of which not more than $15,231,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 401 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a).

AUTHORIZATION OF APPROPRIATIONS, NORTH ATLANTIC TREATY ORGANIZATION

SEC. 605. There is hereby authorized to be appropriated for fiscal years beginning after September 30, 1983, for contributions by the Secretary of Defense under section 2806 of title 10, United States Code, for the share of the United States of the cost of construction projects for the North Atlantic Treaty Organization infrastructure program, as authorized by section 501, the sum of $150,000,000.

ACTIVITIES INCLUDED WITHIN AUTHORIZATIONS FOR MILITARY FAMILY HOUSING

SEC. 606. (a) Amounts authorized under sections 601 through 604 for construction and acquisition of military family housing and facilities include amounts for minor construction, improvements to existing military family housing units and facilities, relocation of military family housing units under section 2827 of title 10, United States Code, and architectural and engineering services and construction design.

(b) Amounts authorized under sections 601 through 604 for support of military family housing include amounts for operating expenses, leasing expenses, maintenance of real property expenses, payments of principal and interest on mortgage debts incurred, and payments of mortgage insurance premiums authorized under section 222 of the National Housing Act (12 U.S.C. 1715m).

EXPIRATION OF AUTHORIZATIONS: EXTENSION OF CERTAIN PREVIOUS AUTHORIZATIONS

SEC. 607. (a)(1) Except as provided in paragraph (2), all authorizations contained in titles I, II, III, and IV for military construction projects, land acquisition, and family housing projects and in title V for contributions to the North Atlantic Treaty Organization infrastructure program (and all authorizations of appropriations therefor contained in sections 601 through 605) expire on October 1, 1985, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1986, whichever is later.

(2) The provisions of paragraph (1) do not apply to authorizations for which appropriated funds have been obligated before October 1, 1985, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1986, whichever is later, for construction contracts, land acquisition, or contributions to such program.

(b)(1) Notwithstanding the provisions of section 606(b) of the Military Construction Authorization Act, 1983 (Public Law 97-321; 96 Stat. 1567), authorizations for the following projects authorized in sections 101, 201, and 301 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(A) Solid Waste Incinerator construction in the amount of $4,100,000 at Fort Dix, New Jersey.

(B) Crane and Equipment Maintenance Shop in the amount of $13,600,000 at the Charleston Naval Shipyard, Charleston, South Carolina.

(C) Steam Plant in the amount of $150,000,000 at the Puget Sound Naval Shipyard, Bremerton, Washington.

(D) Aircraft Parking Apron in the amount of $3,200,000 at the Naval Air Station, Oceana, Virginia.

(2) Notwithstanding the provisions of section 606(b) of the Military Construction Authorization Act, 1983 (Public Law 97-321; 96 Stat. 1567), authorization for the following project authorized in section 201 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), and extended in section 606(d) of the Military Construction Authorization Act, 1983 (Public Law 97-321; 96 Stat. 1549), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

Nautilus Memorial in the amount of $1,930,000 at the Naval Submarine Base, New London, Connecticut.

(3) Notwithstanding the provisions of section 606(b) of the Military Construction Authorization Act, 1983 (Public Law 97-321; 96 Stat. 1567), authorization for the following projects authorized in section 201 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 928), and extended in section 705(d) of the Military Construction Authorization Act 1982 (Public Law 97-99; 95 Stat. 1359), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(A) Industrial Waste Collection and Treatment construction in the amount of $6,500,000 at the Long Beach Naval Shipyard, Long Beach, California.

(B) Aircraft Maintenance Hangar Addition in the amount of $1,500,000 at the Naval Air Facility, Sigonella, Italy.

ESTABLISHMENT OF CERTAIN AMOUNTS REQUIRED TO BE SPECIFIED BY LAW

SEC. 608. For projects or contracts initiated during the period beginning on the date of enactment of this Act or October 1, 1983, whichever is later, and ending on the date of the enactment of the Military Construction Authorization Act for fiscal year 1985 or October 1, 1984, whichever is later, the following amounts apply:

(1) The maximum amount for an unspecified minor military construction project under section 2805 of title 10, United States Code, is $1,000,000.

(2) The amount of a contract for architectural and engineering services or construction design that makes such a contract subject to the reporting requirement under section 2807 of title 10, United States Code, is $300,000.

(3) The maximum amount per unit for an improvement project for family housing units under section 2825 of title 10, United States Code, is $30,000.

(4) The maximum annual rental for a family housing unit leased in the United States, Puerto Rico, or Guam under section 2828(b) of title 10, United States Code, is $6,000.

(5)(A) The maximum annual rental for a family housing unit leased in a foreign country under section 2828(c) of title 10, United States Code, is $16,800.

(B) The maximum number of family housing units that may be leased at any one time in foreign countries under section 2828(C) of title 10, is 30,000.

(6) The maximum rental per year for family housing facilities, or for real property related to family housing facilities, leased in a foreign country under section 2828(f) of title 10, United States Code, is $250,000.

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

SEC. 609. Titles I, II, III, IV, and V of this Act shall take effect on October 1, 1983.

TITLE VII—GUARD AND RESERVE FORCES FACILITIES

AUTHORIZATION FOR FACILITIES

SEC. 701. There are authorized to be appropriated for fiscal years beginning after September 30, 1983, for the costs of acquisition, architectural and engineering services, and construction of facilities for the Guard and Reserve Forces, and for contributions therefor, under chapter 133 of title 10, United States Code (including the cost of acquisition of land for those facilities) the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, $66,826,000; and

(B) for the Army Reserve, $54,700,000.

(2) For the Department of the Navy, for the Naval and Marine Corps Reserves, $28,245,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, $108,620,000; and

(B) for the Air Force Reserve, $41,200,000.

MODIFICATION OF GUARD AND RESERVE MINOR CONSTRUCTION AUTHORITY

SEC. 702. Effective on October 1, 1983, section 2233a(a)(1) of title 10, United States Code, is amended by striking out "$200,000" and inserting in lieu thereof "$400,000".

TITLE VIII—GENERAL PROVISIONS

MILITARY FAMILY HOUSING LEASING PROGRAM

SEC. 801. Section 2828 of title 10, United States Code, is amended by adding at the end thereof the following subsection:

"(g)(1) Notwithstanding any other provision of law, the Secretary of a military department may enter into a contract for the lease of family housing units to be constructed on or near a military installation within the United States under the Secretary's jurisdiction at which there is a validated deficit in family housing. Housing units leased under this subsection shall be assigned, without rental charge, as family housing to members of the armed forces who are eligible for assignment to military family housing. A contract under this section shall include a provision that the obligation of the United States to make payments under the contract in any fiscal year is subject to the availability of appropriations for that purpose.

"(2) Each contract under paragraph (1) shall be awarded through the use of publicly advertised, competitively bid or competitively negotiated contracting procedures. Such a contract may provide for the contractor of the housing facilities to operate and maintain such housing facilities during the term of the lease.

"(3) Each contract under this subsection shall require that housing units constructed pursuant to the contract shall be constructed to Department of Defense specifications.

"(4) A contract under this subsection may be for any period not in excess of 20 years (excluding the period required for construction of the housing facilities).

"(5) A contract under this subsection shall provide that, upon the termination of the lease period, the United States shall have the right of first refusal to acquire all right, title, and interest to the housing facilities constructed and leased under the contract.

"(6) A contract may not be entered into for the lease of housing facilities under this subsection until—

"(A) the Secretary of Defense submits to the appropriate committees of Congress, in writing, an economic analysis (based upon accepted life cycle costing procedures) which demonstrates that the proposed contract is cost effective when compared with alternative means of furnishing the same housing facilities, and

"(B) a period of 21 calendar days has expired following the date on which the economic analysis is received by those committees.

"(7) This subsection may be implemented only by a pilot program. In carrying out such pilot program—

"(A) the Secretary of each military department may not enter into more than two contracts under this subsection; and

"(B) any contract may not be for more than 300 family housing units.

"(8) A contract may not be entered into under this subsection after October 1, 1985.".

MILITARY HOUSING RENTAL GUARANTEE PROGRAM

SEC. 802. (a) The Secretary of a military department, under uniform regulations prescribed by the Secretary of Defense, may enter into an agreement to assure the occupancy of rental housing to be constructed by a private developer or by a State or local housing authority on private land, on land owned by a State or local government, or on land owned by the United States, if the housing is to be located on or near a new military installation or an existing military installation that has a shortage of housing to meet the requirements of eligible members of the Armed Forces (with or without accompanying dependents). An agreement under this section shall include a provision that the obligation of the United States to make payments under the agreement in any fiscal year is subject to the availability of appropriations for that purpose.

(b) An agreement under subsection (a)—

(1) may not assure the occupancy of more than 97 percent of the units constructed under the agreement;

(2) shall establish initial rental rates that are not more than rates for comparable rental dwelling units in the same general market area and may include an escalation clause for operation and maintenance costs which shall (if included) be effective for the term of agreement;

(3) may not apply to existing housing;

(4) shall require that the housing units be constructed to Department of Defense specifications;

(5) may not be for a term in excess of 15 years;

(6) may not be renewed;

(7) may not assure more than an amount equivalent to the shelter rent of the housing units, determined on the basis of amortizing initial construction costs;

(8) may only be entered into to the extent that there is a validated deficit in military family housing;

(9) may only be entered into if existing military-controlled housing at all installations in the commuting area (except for a new installation of an installation for which there is projected a significant increase in the number of families due to an increase in the number of authorized personnel) has exceeded 97 percent use for a period of not less than 18 consecutive months immediately preceding the date on which the agreement is entered into, excluding units temporarily inactivated for major repair or improvements;

(10) shall provided for priority of occupancy for military families; and

(11) shall include a clause rendering the agreement null and void if, in the opinion of the Secretary of the military department concerned, the owner of the housing fails to maintain a satisfactory level of operation and maintenance.

(c) An agreement under subsection (a) shall be made through the use of publicly advertised, competitively bid or competitively negotiated procedures.

(d) An agreement may not be entered into under subsection (a) until—

(1) the Secretary of Defense submits to the appropriate committees of Congress, in writing, an economic analysis (based upon accepted life cycle costing procedures) which demonstrates that the proposed agreement is cost effective when compared with alternative means of furnishing the same housing facilities, and

(2) a period of 21 calendar days has expired following the date on which the economic analysis is received by those committees.

(e) The Secretary concerned may require that disputes arising under an agreement entered into under subsection (a) be decided in accordance with the procedures provided for by the Contract Disputes Act of 1978 (41 U.S.C. 601 et seq.).

(f) This section may be implemented only by a pilot program. In carrying out such pilot program—

(1) the Secretary of each military department may not enter into more than two agreements under this section; and

(2) the Secretary of a military department may not enter into such an agreement for more than 300 family housing units at one location.

(g) An agreement may not be entered into under this section after September 30, 1985.

FAMILY HOUSING CONSTRUCTED OVERSEAS

SEC. 803. (a) The Secretary of Defense shall ensure that any contract entered into for the construction of military family housing for the Department of Defense in a foreign country shall require the use of manufactured or factory-built housing which is fabricated in the United States by a United States contractor.

(b) The Secretary of Defense may waive subsection (a) with respect to not more than 10 percent of the total number of military family housing units authorized to be constructed in foreign countries in any year if—

(1) the Secretary determines that with respect to such units compliance with the requirement in such subsection is infeasible, and

(2) the Secretary—

(A) notifies the appropriate committees of the Congress in writing of his intention to waive such requirements and includes in the notification the justification for the waiver, and

(B) a period of 21 days has elapsed after the receipt by such committees of the notice.

(c) This section shall apply to any contract entered into after the date of the enactment of this Act.

ARCHITECTURAL AND ENGINEERING SERVICES AND CONSTRUCTION DESIGN

SEC. 804. The first sentence of section 2807 (a) of title 10, United States Code, is amended—

(1) by striking out "such purposes" and inserting in lieu thereof "military construction and military family housing"; and

(2) by inserting ", family housing projects, and projects undertaken in connection with the authority provided under section 2854 of this title that are" after "projects".

IMPACT ASSISTANCE FOR AREAS AFFECTED BY DEPLOYMENT OF THE MX MISSILE

SEC. 805. Subsection (a) of section 802 of the Military Construction Authorization Act, 1981 (10 U.S.C. 139 note), is amended—

(1) by inserting "communities located near MX Missile System sites and" after "may assist"; and

(2) by striking out "East Coast Trident Base" the second place it appears and inserting in lieu thereof "MX Missile System or the East Coast Trident Base, as the case may be,".

(b) Subsection (b) of such section is amended—

(1) by striking out "East Coast Trident Base" in paragraph (1)(C) and inserting in lieu thereof "MX Missile System site or the East Coast Trident Base, as the case may be"; and

(2) by striking out "East Coast Trident Base" in paragraph (3) and inserting in lieu thereof "MX Missile System sites or the East Coast Trident Base, as the case may be".

(c) Subsection (d) of such section is amended by inserting "the MX Missile System deployment program and" before "the East Coast Trident Base".

(d) The heading of such section is amended by inserting "BY DEPLOYMENT OF THE MX MISSILE AND" after "AREAS AFFECTED".

SMALL BUSINESS SET-ASIDE FOR ARCHITECTURAL AND ENGINEERING SERVICES AND CONSTRUCTION DESIGN

SEC. 806. (a) The Secretary of Defense shall conduct a comprehensive review of current policies and practices of the Department of Defense with regard to the award of contracts for architectural and engineering services and construction design for military construction projects. The Secretary shall conduct such review with a view to determining whether current policies and practices of the Department of Defense result in a reasonable distribution of such contracts to firms of all sizes throughout the architect-engineer community.

(b) Upon the completion of such review, the Secretary shall modify current policies and practices of the Department to the extent necessary to ensure—

(1) that shall business concerns (as defined in section 3 of the Small Business Act) are assured of a reasonable share of such contracts; and

(2) that large architect-engineer firms are not precluded from competing for such contracts when the estimated amount of such contracts is greater than a reasonable threshold amount prescribed by the Secretary.

(c) Not later than March 1, 1984, the Secretary shall submit to the appropriate committees of Congress a written report on the results of the review required by subsection (a) and on any changes made to current policies and practices as required by subsection (b).

(d) For the purposes of this section:

(1) The term "reasonable share" means an appropriate percentage share of all contracts referred to in subsection (a) as determined by the Secretary of Defense after consultation with the Admininstrator of the Small Business Administration and representatives of the architect-engineer community.

(2) The term "reasonable threshold amount" means an appropriate estimated contract dollar amount determined by the Secretary of Defense after consultation with the Administrator of the Small Business Administration and representatives of the architect-engineer community.

SALE AND REPLACEMENT OF NONEXCESS REAL PROPERTY

SEC. 807. (a)(1) Chapter 159 of title 10, United States Code, is amended by inserting after section 2667 the following new section:

"§ 2667a. Sale and replacement of nonexcess real property

"(a)(1) Subject to paragraph (2), the Secretary of Defense may carry out real property transactions in accordance with this section. Any such transaction shall consist of—

"(A) the sale of any real property under the control of the Department of Defense other than property described in paragraph (3); and

"(B) such acquisition of land, construction and acquisition of facilities to replace facilities included in the property to be sold, and relocation of Department of Defense activities to such replacement facilities as may be required to ensure efficient and effective continuity of defense functions being carried out at the property to be sold.

"(2) A transaction under this section may not be carried out unless the transaction is specifically authorized by law.

"(3) A transaction under this section may not include the sale of any of the following:

"(A) Public domain lands.

"(B) Property which can be considered excess under the provisions of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.).

"(C) Property that the Secretary of the Interior has determined under subsection (b)(2) to be suitable for use as a public park or recreation area and with respect to which the Secretary of the Interior has sent a notification to the Secretary of Defense under such subsection.

"(b)(1) A proposal to Congress for authorization of a transaction under this section shall include—

"(A) a description of the property to be sold (including the specific location of the property);

"(B) an estimate of the fair market value of the property to be sold;

"(C) an explanation of the need for any property or facilities to replace property or facilities to be sold under the transaction;

"(D) an estimate of the costs of such replacement facilities and of relocation from the property to be sold to the replacement facilities; and

"(E) a net financial statement for the transaction, including a schedule of estimated expenditures under the transaction and a schedule of the estimated proceeds to be realized from the sale of property under the transaction.

"(2) Before proposing a transaction to Congress under this section, the Secretary of Defense shall notify the Secretary of the Interior in writing of the proposed transaction. The transaction may not be proposed to Congress if the Secretary of the Interior notifies the Secretary of Defense in writing not later than 60 days after receipt of the notification that he has determined that the property proposed to be sold under the transaction is suitable for use as a public park or recreation area. Any such determination by the Secretary of the Interior shall be made in accordance with procedures and standards used by the Secretary under section 203(k)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484(k)(2)).

"(c) A transaction authorized pursuant to this section—

"(1) shall be accomplished, to the extent feasible, using competitive bid procedures or qualified contract realty brokers;

"(2) may not be carried out unless the property to be conveyed under the transaction will be sold for at least the equivalent of its fair market value;

"(3) may not be carried out unless the amount of the estimated proceeds from the sale of property under the transaction exceeds the amount of the costs of such transaction described in subsection (e); and

"(4) may not be carried out unless the activities intended to be performed at the replacement facilities are substantially similar in character or nature to those performed at the property to be sold.

"(d)(1) The sale of any real property pursuant to a transaction authorized under this section shall be conducted by the Administrator of General Services. The Administrator may sell such property upon such credit terms and financial conditions as he and the Secretary of Defense may agree upon. The Administrator shall execute such documents for the transfer of title and take such other actions as necessary to dispose of such property under the provisions of this section.

"(2) Proceeds from any such sale shall be covered into the Treasury.

(3) The Secretary of Defense shall reimburse the Administrator for expenses incurred in making such sales as authorized by subsection (e)(3).

"(e) To the extent provided for in appropriation Acts, the Secretary of Defense—

"(1) may carry out the acquisition of land and the construction and acquisition of facilities included as part of an authorized transaction under this section;

"(2) may pay the reasonable relocation expenses made necessary by the transaction; and

"(3) may pay all expenses incident to the sale of property under the transaction, including reimbursement of expenses under subsection (d)(3).

"(f) Upon completion of a transaction under this section—

"(1) ninety-five percent of the proceeds remaining from the sale of property under the transaction (after subtracting the amount of applicable costs described in subsection (e)) shall remain in the Treasury; and

"(2) an amount equal to five percent of the proceeds remaining from the sale of property under the transaction (after subtracting the amount of applicable costs described in subsection (e)) shall be credited to the account established under subsection (g).

"(g)(1) There is hereby established on the books of the Treasury an account to be known as the Department of Defense Facilities Replacement Management Account (hereinafter in this section referred to as the 'account'). The account shall be administered by the Secretary of Defense and shall be administered as a single account.

"(2) The account may be used for—

"(A) advanced planning, design, and other expenses related to potential future transactions; and

"(B) advances where necessary to meet expenses of an authorized transaction before appropriations are made available for the transaction.

"(3) An expenditure from the account in an amount greater than $300,000 may not be made until the Secretary of Defense has notified the appropriate committees of Congress in writing of the proposed expenditure and a period of 21 days has elapsed after the date of the receipt of that notification by those committees.

"(4) Any unobligated moneys in the account at the end of a fiscal year in excess of $50,000,000 (or in excess of any lesser amount determined by the Secretary of Defense of be sufficient for the purpose of this section) shall be covered into the Treasury.".

(2) The table of sections at the beginning of chapter 159 of title 10, United States Code, is amended by inserting after the item relating to section 2667 the following new item:

"2667a. Sale and replacement of nonexcess real property.".

(b) There is authorized to be appropriated to the Department of Defense Facilities Management Account established by section 2809 of title 10, United States Code (as added by subsection (a)), for purposes of initial capitalization, the sum of $50,000,000. Any amount appropriated pursuant to this subsection shall remain available until expended.

(c) Effective on October 1, 1985—

(1) Section 2667a of title 10, United States Code (as added by subsection (a)), is repealed;

(2) the table of sections at the beginning of chapter 159 of such is amended by striking out the item relating to section 2667a;

(3) the Department of Defense Facilities Replacement Management Account established by such section is abolished and any balance in such account is transferred into the Treasury.

(d) Notwithstanding any other provision of law, the Secretary of Defense may not take any action to initiate the sale, lease, rental, excessing, or disposal of any portion of the land identified on the date of the enactment of this Act as a part of Fort DeRussy, Hawaii.

THRESHOLD FOR COMMUNITY PLANNING ASSISTANCE

SEC. 808. Effective on October 1, 1983, section 2391 (b) (2) of title 10, United States Code, is amended by striking out "2,500" and inserting in lieu thereof "2,000".

FEDERAL CONTRIBUTION FOR MOVING LANDFILL NEAR LANGLEY AIR FORCE BASE.

SEC. 809. (a) The Secretary of the Air Force may contribute, as the share of the United States for the moving of the existing landfill adjacent to Langley Air Force Base, Virginia, a sum equal to not more than 50 percent of the cost of moving such landfill to a new location, but not more than $3,750,000. The Secretary may not make any contribution under this section unless the new location of the landfill meets the minimum standards for the location of landfills on or near airport facilities prescribed by the Administrator of the Federal Aviation Administration in Order Number 5200.5 (Guidance Concerning Sanitary Landsfills on or near airports).

(b) The Secretary shall obtain such assurances as he determines necessary (including the execution of covenants and easements) to ensure that the present landfill location adjacent to Langley Air Force Base will be used in the future only in a manner compatible with the Air Installation Compatible Use Zone (AICUZ) for Langley Air Force Base.

LAND ACQUISITION FOR FUTURE FAMILY HOUSING REQUIREMENTS, SAN DIEGO, CALIFORNIA

SEC. 810. The Secretary of the Navy may acquire up to 125 acres of real property in San Diego, California (or the surrounding area), that the Secretary determines to be suitable as a site or sites for future construction of military family housing for the Department of the Navy. Such property may be acquired by exchange or by purchase using funds derived from savings in carrying out previously authorized projects. The Secretary may acquire options on such property as provided in section 2677 (a) of title 10, United States Code, and (notwithstanding section 2677 (b) of such title) may pay, from funds available for projects under section 2805 of title 10, United States Code, not more than $1,000,000 for such options.

AUTHORITY FOR THE SECRETARY OF THE NAVY TO ACQUIRE LAND FROM THE CITY OF LOS ANGELES, CALIFORNIA

SEC. 811. The Secretary of the Navy may acquire approximately 55 acres of land from the City of Los Angeles, California, at a cost not to exceed $750,000.

LAND CONVEYANCE, VENTURA COUNTY, CALIFORNIA

SEC. 812. (a) Subject to subsection (b), the Secretary of the Navy (hereinafter in this section referred to as the "Secretary") shall convey to the Oxnard Harbor District, a special district of the State of California, all right, title, and interest of the United States in and to a tract of land, together with the improvements on such land, located in the City of Port Hueneme in the County of Ventura, California, consisting of the United States Navy Wharf Number 2 and approximately 18.546 acres and more particularly described in the official records on file in the Office of the County Recorder of the County of Ventura, California, in book 665, page 349.

(b) In consideration for the conveyance under subsection (a), the Oxnard Harbor District shall pay to the United States an amount equal to the appraised fair market value of the property to be conveyed (as determined by the Secretary).

(c) The exact acreage and legal description of the lands to be conveyed under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the Oxnard Harbor District.

(d) The Secretary may require such additional terms and conditions with respect to the conveyance under this section as the Secretary considers appropriate to protect the interests of the United States.

(e) In the event of a war or a national emergency declared by the Congress or a national emergency declared by the President

after the date of the enactment of this Act, and upon a determination by the Secretary of Defense that the property conveyed under subsection (a) is necessary or would be useful for military or other national defense purposes, the United States shall have the right, upon payment to the Oxnard Harbor District of just compensation, to reenter upon the property and use the property or any part of it, including any and all improvements made thereon, for the duration of the war or emergency plus six months.

LAND CONVEYANCE, ALABAMA SPACE SCIENCE EXHIBIT COMMISSION

SEC. 813. (a) Subject to subsection (b), the Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey, without consideration, to the Alabama Space Science Exhibit Commission (hereinafter in this section referred to as the "Commission"), an agency of the State of Alabama, all right, title, and interest of the United States in and to two tracts of land, consisting of 61 acres (more or less), located on the northwestern boundary of Redstone Arsenal, Alabama.

(b)(1) The conveyance authorized under subsection (a) shall be subject to the condition that the real property conveyed shall be used by the Commission (A) to display suitable public exhibits of United States weaponry and allied subjects, public exhibits of the activities of the National Aeronautics and Space Administration, and space-oriented public exhibits of other departments, agencies, and instrumentalities of the United States Government, (B) to carry out educational and recreational activities related to the purposes described in clause (A), or (C) for purposes described in both clauses (A) and (B). The use of a portion of such real property for construction of a proposed interstate highway, and such access roads as necessary, and any use of such real property in accordance with existing easements and rights-of-way shall not be considered a use which is inconsistent with the purposes described in clause (A) or (B).

(2) If the property conveyed pursuant to subsection (a) is not used for one or more of the purposes described in paragraph (1), all right, title, and interest in and to such property shall revert to the United States which shall have the right of immediate entry thereon.

(3) The Secretary shall reserve to the United States a drainage and utility easement for use in connection with Redstone Arsenal.

(c) The exact acreage and legal description of the property to be conveyed under subsection (a) and of the easement to be reserved under subsection (b)(3) shall be determined by surveys approved by the Secretary of the Army. The cost of any such survey shall be borne by the Commission.

(d) The Secretary may require such additional terms and conditions in connection with the conveyance authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, FORT LAUDERDALE, FLORIDA

SEC. 814. (a) Subject to subsection (b), the Secretary of the Navy (hereinafter in this section referred to as the "Secretary") is authorized to convey to Broward County, Florida (hereinafter in this section referred to as the "County"), all right, title, and interest of the United States in and to approximately 6.3 acres of unimproved land comprising portions of the Naval Surface Weapons Center Detachment, Fort Lauderdale, Florida.

(b)(1) In consideration for the conveyance authorized by subsection (a), the County shall convey to the United States all right, title, and interest in and to approximately 4.805 acres of unimproved land adjacent to the Naval Surface Weapons Center Detachment.

(2) The County shall pay to the United States an amount equal to the amount, if any, by which the fair market value (as determined by the Secretary) of the lands to be conveyed by the United States to the County under subsection (a) exceeds the fair market value (as determined by the Secretary) of the lands to be conveyed by the County under subsection (b).

(c)(1) The exact acreages and legal descriptions of all lands to be acquired or conveyed under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the County.

(2) The Secretary may require such additional terms and conditions in connection with the acquisition and conveyance authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, ORANGE COUNTY, CALIFORNIA

SEC. 815. (a) Subject to subsection (b), the Secretary of the Navy (hereinafter in this section referred to as the "Secretary") is authorized to convey to Orange County, a political subdivision of the State of California, all right, title, and interest of the United States in and to a parcel of land consisting of approximately 137 acres located in the center of Mile Square Regional Park, Orange County, California, together with the improvements on such land.

(b) In consideration for the conveyance by the Secretary under subsection (a), Orange County shall convey to the United States a parcel of land consisting of approximately 57 acres located at the northwest corner of Mile Square Regional Park, Orange County, California. Such parcel shall not be acceptable unless zoned for commercial use and otherwise acceptable to the Secretary. If the fair market value of the land and improvements conveyed by the Secretary under subsection (a) exceeds the fair market value of the land conveyed by Orange County under this subsection, the County shall pay the difference to the United States. Any such payment shall be covered into the Treasury as miscellaneous receipts.

(c) The exact acreages and legal descriptions of the lands to be conveyed under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such survey shall be borne by Orange County.

(d) The Secretary is authorized to accept and land conveyed under subsection (b) and to use such land to exchange for other lands as authorized to be acquired for military purposes.

(e) The Secretary may require such additional terms and conditions in connection with the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, COLUMBUS, OHIO

SEC. 816. (a) Subject to subsection (b), the Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to acquire by exchange all right, title, and interest of the city of Columbus, Ohio (hereinafter in this section referred to as the "City"), in all or in part of certain parcels of land in the county of Franklin, Ohio, comprising approximately 122.84 acres and now leased from the City for the use of Air Force Plant Numbered 85.

(b)(1) In consideration for the acquisition under subsection (a), the Secretary shall convey to the City all right, title, and interest of the United States in all or any part of certain parcels of land (and any improvements thereon) in the county of Franklin, Ohio, comprising approximately 231.96 acres. The Secretary may adjust the size of the parcels to be conveyed and acquired.

(2) If the fair market value (as determined by the Secretary) of the land and improvements conveyed by the Secretary exceeds the fair market value (as determined by the Secretary) of the land conveyed by the City, the City shall pay the difference to the United States. Any such payment shall be covered into the Treasury as miscellaneous receipts.

(c) The exact acreages and legal descriptions of the properties to be acquired or conveyed under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such survey shall be borne by the city.

(d) The Secretary may require such additional terms and conditions in connection with the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, ORLANDO, FLORIDA

SEC. 817. (a) Subject to subsection (b), the Secretary of the Navy (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Greater Orlando Aviation Authority (hereinafter in this section referred to as the "Authority") all right, title, and interest of the United States in and to approximately 37 acres of unimproved land comprising a portion of the Naval Training Center, Orlando, Florida. Such conveyance may be subject to a reservation restricting development of the land conveyed to commercial and light industrial uses.

(b) In consideration for the conveyance authorized by subsection (a), the Authority—

(1) shall convey to the United States all right, title, and interest of the Authority in and to a tract of land consisting of approximately 12 acres of land, together with improvements thereon; and

(2) shall convey or make available to the United States such additional interests in lands and improvements, pay such capital costs, perform such road construction, and make such additional monetary payment to the United States as specified in a memorandum of understanding between the Secretary and the Authority.

Any monetary payment to the United States shall be deposited into the Treasury as miscellaneous receipts.

(c) The total value of the consideration to the United States under subsection (b) shall be at least equal to the fair market value of the land conveyed to the Authority under subsection (a) (as determined by the Secretary).

(d) The exact acreages and legal descriptions of the property to be conveyed under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of such surveys shall be borne by the Authority.

(e) The Secretary may require such additional terms and conditions in connection with the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, SANTA CLARA COUNTY TRANSIT DISTRICT, CALIFORNIA

SEC. 818. (a) Subject to subsection (b), the Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Santa Clara County Transit District of Santa Clara County, California (hereinafter in this section referred to as the "District"), all right, title, and interest of the United States in and to a parcel of land of Santa Clara County, California, consisting of approximately 2.5 acres, together with improvements thereon, comprising a portion of the United States Army Reserve Center, San Jose, California.

(b)(1) In consideration for the conveyance authorized by subsection (a), the District shall convey to the United States all right, title, and interest in and to a parcel of land consisting of approximately 2.5 acres, together with improvements thereon, located adjacent to the United States Army Reserve Center, San Jose.

(2) If the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the District under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the District to the United States under subsection (b), the District shall pay to the United States the amount of the difference.

(c) The exact acreages and legal descriptions of the parcels to be conveyed under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such survey shall be borne by the District.

(d) The Secretary may require such additional terms and conditions in connection with the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2972) to authorize certain construction at military installations for fiscal year 1984, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting clarifying changes.

COMPARISON OF HOUSE AND SENATE BILLS

As passed by the House, H.R. 2972 provided $7,970,085,000 in new authorization.

The bill as amended by the Senate provided $7,349,310,000 in new authorization.

SUMMARY OF RESOLUTION OF DIFFERENCES

As a result of the conference between the House and Senate on the differences in H.R. 2972, the conferees agree to a new adjusted authorization for appropriations for military construction and family housing for fiscal year 1984 in the amount of $7,345,527,000. The Department of Defense and the respective military departments submitted a request in the amount of $8,547,586,000.

Authorization for appropriations granted, fiscal year 1984

Section 601 (Army):	
Inside the United States	$575,180,000
Outside the United States	366,920,000
Unspecified minor construction	27,400,000
Planning and design	188,000,000
Defense access roads	0
Family housing construction	173,131,000
Family housing support	1,120,328,000
Subtotal	2,450,959,000
Section 602 (Navy):	
Inside the United States	875,811,000
Outside the United States	94,285,000
Unspecified minor construction	22,000,000
Planning and design	115,600,000
Defense access roads	1,387,000
Family housing construction	74,961,000
Family housing support	579,476,000
Subtotal	1,763,520,000
Section 603 (Air Force):	
Inside the United States	857,984,000
Outside the United States	464,944,000
Unspecified minor construction	19,000,000
Planning and design	147,000,000
Defense access roads	3,250,000
Family housing construction	112,649,000
Family housing support	770,244,000
Subtotal	2,375,071,000
Section 604 (Defense Agencies):	
Inside the United States	143,070,000
Outside the United States	90,572,000
Unspecified minor construction	4,000,000
Contingency construction	16,000,000
Planning and design	33,000,000
Defense access roads	0
Family housing construction	1,245,000
Family housing support	18,499,000
Subtotal	306,386,000
Section 605 (NATO Infrastructure)	150,000,000
Section 701 (Guard and Reserve Force):	
Army National Guard	66,826,000
Army Reserve	54,700,000
Naval Marine Corps Reserve	28,245,000
Air National Guard	108,620,000
Air Force Reserve	41,200,000
Subtotal	299,591,000
Total authorization of appropriations	$7,345,527,000

GENERAL TOPICS

BUDGET CONSIDERATIONS

SETTING CONFERENCE GUIDELINES

The limitations imposed by the First Concurrent Resolution on the Budget with respect to defense spending complicated the task of the conferees in resolving the substantial differences between the House and Senate military construction authorization bills.

There were several hundred projects or language items in dispute between the two bills and in order to facilitate the resolution of these differences the conferees established several "ground rules":

1. A spending target of $7.3 billion in budget authority was determined to represent the amount that the conferees could authorize for appropriations with reasonable confidence that the ceiling for the defense function, established by the First Concurrent Resolution on the Budget, would not be breached.

2. Within this target, first priority was given to the restoration of adequately justified projects that had been included in the budget request but were cut by either the House or by the Senate for budgetary reasons.

3. Prior year savings were used to the maximum extent possible. In general, unbudgeted projects added to the bill by either the House or the Senate, if justified, were included in the conference bill, but authorized for construction only with savings that are expected to be generated as budgeted and authorized projects are put under contract.

PROJECTS CONSTRUCTED WITH SAVINGS

Based upon the information provided by the military departments, the conferees expect about $600 million in prior year appropriations, referred to throughout this report as savings, to become available as fiscal year 1984 and prior year programs are executed. Experience to date in fiscal year 1983 has shown that savings from the amounts authorized for projects, based upon bids received from the construction industry, have ranged from 15 to 20 percent of the amount authorized.

The conferees, therefore, have elected to authorize certain projects to be accomplished with savings that the services are forecasting will accrue as a result of the extremely competitive bidding climate in the construction industry. The conferees believe this approach is sound because it provides an incentive for the services to seek savings, since additional projects can be built only if these savings can be realized.

In applying these savings the conferees direct that priority should be assigned to savings projects as follows:

Priority 1—Projects originally in the budget request;

Priority 2—Projects of an operational nature (fuel facilities, hangers, ranges, etc.);

Priority 3—Projects for housing medical and administrative facilities; and

Priority 4—Projects for morale and welfare facilities.

MILITARY FAMILY HOUSING

The conferees approved several actions that are designed to strengthen the military family housing program.

Overseas military family housing

The conferees approved the requested construction of more than 1,100 units of family housing at various overseas locations. In addition, the conferees agreed with the Senate initiative to authorize an additional 500 units to be built with savings at overseas locations in support of the Army.

In authorizing the additional housing, the conferees have approved a Senate provision (Section 803) that requires the use of manufactured or factory-built housing for all overseas military family housing. Under this provision the services have options, ranging from the shipment of completed housing modules, to the erection of an on-site assembly plant that would be used to produce housing components made from U.S. materials; in any event, U.S. contractors will be directly involved, U.S. materials will be used, and more U.S. dollars will remain in the U.S. economy. Recognizing that certain construction requirements, existing treaty obligations or environmental constraints may dictate the use of other types of housing, the conferees agreed to a House amendment that would permit waiver of the requirement for up to ten percent of the total number of overseas family housing units authorized for construction. For fiscal year 1984, some 1,600 units of housing are authorized to be built overseas; therefore, 160 units, if necessary, could be built by conventional means.

This waiver should be used only in those cases where it is absolutely necessary. Given the fact that the United States is spending well over $1 billion annually in construction funds in the NATO countries alone and American construction firms have little opportunity to compete there because of constraints included in Status of Forces Agreements, the conferees believe that U.S. business should be afforded more opportunity to participate in the overseas military family housing program. Section 803 should provide this opportunity.

Domestic military family housing

To further encourage the involvement of the private sector in meeting the family housing needs of the military services, two provisions have been approved that establish, on a two year test basis, a leased housing program and a guaranteed rental housing program.

SECTION 801—MILITARY FAMILY HOUSING LEASING PROGRAM

The House bill contained a provision (Section 801) which authorized the military departments to enter into long term leasing contracts for the provision of military family housing at U.S. intallations. The Senate amendment contained no similar provision.

After some deliberations, the conferees agreed to a carefully crafted compromise provision (Section 801) that would authorize a pilot program to determine if the domestic leasing option is a cost effective option when compared to the traditional method of building military family housing with appropriated funds. The conferees have included the following, somewhat detailed discussion of this provision so that the legislative intent is clear.

The provision is written as an amendment to 10 USC 2828 with the conferees' expectation that, if the proposal proves to be cost effective, the pilot program paragraph and the "sunset" paragraph (paragraphs (g), (8) and (9) respectively) can simply be repealed. However, if the military departments fail to execute any contracts or if the appropriate committees of the Congress are not satisfied with the quality of the contracts proposed by the military departments, then the subsection simply expires in two years.

The conferees intend that this provision be for new family housing built on or near a domestic military installation. Leasing of existing housing is not envisioned and is provided for elsewhere in 10 USC 2828.

Housing units made available through contracts executed under this provision would be made available to eligible military families. These families would forfeit their entire Basic Allowance for Quarters (BAQ) and Variable Housing Allowance (VHA). The military housing authority could make assignment of this housing mandatory; i.e., the service member must accept the housing and forfeit his BAQ and VHA just as is now the case with respect to on-base military-owned housing. The conferees emphasize that housing is provided only for eligible military (E-4 over two years service) except when all eligible personnel are otherwise adequately housed. The conferees do not intend for this program to be applied against requirements for ineligible military families; the issue of eligibility is a separate issue. The conferees continue to believe that priority for military family housing must be given to eligible military, who in all likelihood are committed to a career in the military.

The conferees intend that contracts entered into under this provision shall be entered into competitively bringing to play the full force of the open marketplace. The military departments are expected to announce publicly, through the Commerce Business Daily and through other established forums, their intention to enter into such a contract and what the criteria will be for selecting a contractor. Bids or proposals will be received in accordance with established practice and Defense Department procurement regulations.

The conferees would hope that the military departments would opt for having the contractor provide for the operation and maintenance of the housing units; however, flexibility has been retained to permit the government to operate and maintain the units if that option is more cost effective.

The units may be built either on military-owned land or near a military installation or on privately-owned land near a military installation.

Since these will all be new units, the conferees have specified that they must be built to Defense Department specifications. The conferees do not intend that this requirement needlessly restrict the options of the contractor. The conferees intend for the military departments to specify general performance standards (building size, number of bedrooms, fire rating, wind loading, etc.) and that the selection of design, materials, and equipment be left to the contractor.

A period of 20 years has been specified as the maximum period for any contract entered into under this provision. It may be possible to execute a contract of shorter duration that is cost effective. The conferees have not placed a ceiling on the maximum annual lease cost, but the conferees do not expect any short term, high annual lease cost contracts to be executed.

The conferees have included a requirement that the government should have first option (or right of first refusal) to acquire the units at the expiration of the lease term. The terms and conditions that a contractor is willing to enter into pursuant to this requirement are expected to be important factors in evaluating the bids or proposals prior to contract award. In doing the life cycle cost analyses required to justify these contracts, the residual unit value at the expiration of the lease term will be a significant factor.

Any contract entered into under this provision will represent a significant obligation on the part of the government. For that reason the conferees have included a requirement for the Secretary of Defense to submit any such proposed contract to the appropriate Congressional committees before any such contract is entered into. The intent is to have the office of the Secretary of Defense and the Office of Management and Budget review each of these contracts proposed to be executed by the military departments before they are executed. The conferees will expect that any notification to the Congress by the Secretary of Defense will reflect that the proposed contract has been reviewed and approved by OMB. The 21-day waiting period will provide the Congress sufficient time to review the proposed contract and to object if the contract does not appear to be justified.

There are many unanswered questions with regard to the implementation of this provision. The conferees have for that reason elected to authorize each service to enter into just two contracts pursuant to the provision. This pilot program should enable both the Department of Defense and the Congress to evaluate the feasibility of this approach and to decide if changes are appropriate or if the concept should be repealed altogether.

SECTION 802—MILITARY HOUSING RENTAL GUARANTEE PROGRAM

In an effort that somewhat parallels the previous discussion of Section 801, the Military Family Housing Leasing Program, the conferees have included Section 802 to encourage the use of rental units where such options might prove to be cost effective.

There are many similarities between the two provisions, and where the provisions are similar, the discussion of Section 801 pertains also to Section 802:

Both are pilot programs, both have two year "sunset" provisions;

Both are for new housing, built specifically to implement the concept;

Both are on or near a domestic military installation;

Both are to be implemented through publicly-advertised, competitively-bid or competitively negotiated procedures;

Both require that housing be built to Department of Defense specifications; and

Both have similar Congressional oversight requirements.

There are, however, important differences between Sections 801 and 802:

Section 801 is only for eligible military families; Section 802 is for eligible military families and bachelor military personnel;

Section 801 envisions occupants forfeiting their BAQ and VHA: under Section 802, occupants would receive their BAQ and VHA and would pay their own rent to include utilities.

The conferees intend that the military departments may enter into rental agreements only to the extent that there is a validated shortfall of housing for eligible military personnel. During the life of the agreement, housing of ineligibles is not precluded (and would be only prudent to keep the units occupied); however, the housing of eligibles should have priority. Just as the case with Section 801, assignment of rental guarantee quarters must be accepted by military personnel, if offered, or forfeiture of BAQ and VHA would result.

BURDEN SHARING: U.S. PREFINANCING OF NATO ELIGIBLE MILITARY CONSTRUCTION

Closely related to the concerns expressed in the discussion on the overseas military family housing program is the issue of United States prefinancing of NATO eligible military construction projects. For fiscal year 1984, the Department of Defense requested nearly $130 million in authorization for military construction projects that are eligible for NATO funding.

Prefinancing results in essentially an interest free loan to NATO and also reflects the establishment of different construction priorities from those requirements agreed to by NATO. This approach serves to undermine the collective decision making approach of the alliance.

Because of the Department of Defense's inability to recoup funds from NATO for prefinanced projects, the House bill included a provision that prohibited the obligation of any funds for a project to be prefinanced until the Secretary of Defense provided the appropriate committees with a schedule as to when recoupment would be accomplished. At present, according to the General Accounting Office, only about 38 percent ($270 million) of the $832.6 million that has been prefinanced since 1959 has been recouped. Another 30 percent of the prefinanced work totaling some $250 million is considered unlikely to be recouped.

In view of this situation, the conferees have included Section 502 in the conference agreement. The provision prohibits the obligation of any funds for prefinancing of any NATO eligible project until the Secretary of Defense submits a detailed report to the appropriate committees explaining how recoupment is to be accomplished.

The conferees cannot emphasize too strongly their frustration and concern with the department's inability or unwillingness to come to grips with this issue of U.S. unilateral prefinancing of NATO eligible projects. The department should be advised that unless there is some resolution of this issue, the Armed Services Committees may seek to mandate in law that some fixed amount of the prefinanced backlog shall be recouped each year and that interest shall be charged on the outstanding balance.

MISCELLANEOUS REPORT REQUIREMENTS

In the respective reports on the bill, both the Senate and the House Armed Services Committees included items of "Special Emphasis". The conferees hereby endorse the language on items of "Special Emphasis" found in both reports and, unless some modification to that language is contained in this joint statement of the committee of conference, the positions and requirements contained under items of "Special Emphasis" in both Senate and House reports on the fiscal year 1984 military construction authorization bills are concurred in by the conferees.

TITLE I—ARMY

The House bill approved $2,645,029,000 in authorization for the Department of the Army military construction and family housing programs. The Senate amendment approved authorization in the amount of $2,426,173,000 for such purposes. The conferees agree to authorize appropriations for projects in Title I in the amount of $2,450,959,000 which is $194,070,000 below the House figure and $24,786,000 above the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

ABERDEEN PROVING GROUNDS

The conferees consider the need for adequate family housing at Aberdeen Proving Grounds an urgent concern and expect the Department of the Army to act on the housing authorized in this bill for that base in a timely manner.

The House bill approved the budget request of $6.8 million to continue the upgrade of a housing complex known as Chesapeake Gardens. The Senate amendment disapproved of this project because the cost per family unit exceeded $40,000.

Because of the deteriorated condition of the Chesapeake Gardens family housing complex at Aberdeen Proving Grounds, the conferees believe that it might be more prudent to replace the 647-unit complex than to rehabilitate the existing housing. Therefore, the Army may use the $6.1 million authorized last year for rehabilitation of existing housing for the construction of new housing. These fiscal year 1983 funds, which are still unobligated, may be combined with the $6.8 million authorized in this bill to produce a $12.9 million project to provide about 200 new units of housing.

The conferees expect the Army to report back to the appropriate committees of the Congress within 90 days after the enactment of this bill and before any funds are obligated on their comprehensive plans for satisfying the entire housing requirements at Aberdeen Proving Grounds and their specific proposal for spending fiscal year 1983 and 1984 funds.

FORT HAMILTON, NEW YORK

The Army requested $5,280,000 for the second phase of a three-phase program to upgrade and modernize a family housing complex at Fort Hamilton, New York. The House bill approved the request. The Senate amendment denied the funds because it considered the projected cost per unit to be excessive. In conference, it was learned that the Army recently awarded the initial phase of the project for $32,519 per unit, well below the $35,000 per unit threshold preferred by the Senate. Therefore, the conferees agree to authorize $3,800,000 of the request and direct the Army to advertise the project at full scope.

AMMUNITION STORAGE IN GERMANY

The Army requested $7,860,000 for projects to store ammunition for newly deployed weapons systems assigned to Army units in Germany. The House bill approved the request but the Senate amendments denied the funds stating that the cost should be borne by NATO.

Over the years, the United States had developed a cost sharing arrangement with NATO for ammunition storage facilities. The result of this agreement is that only about half of the ammunition storage facilities are eligible for NATO funding. Under current arrangements, the United States is responsible, as are the other NATO nations, for building their own basic load ammunition storage facilities and those ammunition facilities for an increment of war reserve stocks agreed to by all the allies under the long term defense plan. NATO is responsible for construction funding of the forward storage sites and the storage required for reinforcements, primarily from the United States, until wartime resupply is established.

Recognizing that adequate basic load storage for newly fielded weapons is important to maintaining U.S. Army readiness in Germany, the conferees believe, however, that the present cost-sharing arrangement should be reassessed within NATO and amended so that more ammunition storage facilities are eligible for NATO funding.

TITLE II—NAVY

The House bill approved $1,930,060,000 in authorization for the Department of the Navy military construction and family housing programs. The Senate amendment approved authorization in the amount of $1,741,483,000 for such purposes. The conferees agree to a new total in Title II of $1,763,520,000 which is $166,540,000 below the House figure and $22,037,000 above the Senate figure.

Among the items considered in conference and acted upon by the conferees were two projects that were authorized in full with funding phased over more than one year. In taking this action, the conferees are following a practice that has been used in recent years on other large projects that are constructed over a period of more than one year.

TRIDENT TRAINING FACILITY, KINGS BAY, GEORGIA

The Senate amendment authorized $81.7 million for a Trident Training Facility to be constructed at Kings Bay, Georgia from available savings. The House bill contained no authorization for this purpose.

The conferees are unanimous in their support of the requirement for the Trident Training Facility to provide essential training in support of the strategic Trident weapon system. Accordingly, full authorization of $81.7 million for the facility is provided.

However, because of budget constraints, the conferees agree to limit the obligation of funds in fiscal year 1984 to $17 million from available savings. This amount approximates the expected outlay rate for the project. The Secretary of the Navy is expected to fund the balance of the project, $64.7 million, after fiscal year 1984 either from savings, if available, or from future appropriations.

SERVICE SHOPS, PEARL HARBOR NAVAL SHIPYARD

The House bill authorized $20 million for construction of service shops at Pearl Harbor Naval Shipyard. No authorization was provided in the Senate amendment.

The conferees agree to provide the total project authorization of $20 million but limit the obligation of funds in fiscal year 1984 to $4 million from available savings which is the expected outlay rate for this project.

The conferees expect the balance of $16 million to be funded after fiscal year 1984

either from savings or future appropriations.

TITLE III—AIR FORCE

The House bill approved $2,594,269,000 for military construction and military family housing for the Department of the Air Force. The Senate amendment approved $2,428,908,000. The conferees agreed to a new total in the amount of $2,375,071,000, which is $219,198,000 below the House figure and $53,837,000 below the Senate figure.

Major issues resolved in the conference include:

Ground launched cruise missile basing

The Department of Defense requested $207.6 million for the ground launched cruise missile (GLCM) construction program in fiscal year 1984. These funds were requested to build supporting facilities for U.S. military personnel who would be stationed at five locations, including Greenham Common Air Base, United Kingdom, Comiso, Italy and three classified sites. The NATO Infrastructure program is being used to finance the operational facilities for GLCM.

The House bill provided some $106 million in authorization for the GLCM system. The reduction in the Administration's request reflected the decision to defer for one year approximately $67.2 million in authorization for accompanied tour facilities, such as family housing, schools and other family-oriented facilities. Also, $34 million was not authorized for facilities for the 5th country location for which final negotiations between the United States and the host nation have not been concluded.

The Senate amendment authorized $145.9 million for GLCM facilities. Funds were not authorized for facilities supported by non-appropriated fund activities, NATO conjunctively funded facilities and 5th country facilities.

The conferees agreed to authorize $79.2 million for the GLCM program in fiscal year 1984. This authorization level eliminates funding for the accompanied tour facilities, including $35.5 million for three overseas dependents schools that would have been included in Title IV, Defense Agencies, if authorized. Also, the conferees accepted the Senate reduction for facilities supported by non-appropriated fund activities and NATO conjunctively funded facilities. The committees have repeatedly expressed their disapproval of "conjunctive funding" wherein the services seek U.S. funding for certain amenities that exceed the criteria established for facilities being built by NATO with NATO funding. As a member of the alliance, the U.S. should make do with facilities built to the standards agreed to by the alliance. On the other hand, there are U.S. peculiar requirements (e.g., space required for the handling and release of nuclear weapons) that are a unilateral U.S. responsibility; such requirements are not considered "conjunctive funding" requirements in the traditional definition of the term.

In taking this action, the conferees wish to emphasize that they are not opposed to accompanied tours for the GLCM sites. Rather, the conferees are concerned with the pace and timing of the current intermediate range nuclear force (INF) negotiations at Geneva between the United States and the Soviet Union. The conferees are reluctant to proceed at this time with the construction of GLCM bases with support facilities that would accommodate U.S. dependents. If the negotiations should produce an arms reduction agreement between the United States and the Soviet Union, the conferees want to avoid undertaking costly and potentially unnecessary construction.

The one year deferral should provide sufficient time to adequately assess the likely outcome of the negotiations, since GLCM deployment is scheduled to begin in late 1983. Therefore, the conferees fully expect the Department of Defense to resubmit the request for the accompanied tour facilities in fiscal year 1985, if the status of the negotiations indicate that full deployment of the GLCM system is necessary.

AIR BASE UPGRADE—TURKEY

For fiscal year 1984, the Department of Defense requested $66.7 million to begin the upgrade of two Turkish air bases that would serve as collocated bases for U.S. augmentation aircraft that would be assigned to them under NATO auspices.

The House bill did not provide the requested authorization because the projects are eligible for NATO funding. The House had taken the position that U.S. prefinancing of the projects was not the appropriate course of action to take. The House bill provided an additional $18 million in authorization for the NATO Infrastructure program to cover the 27.5 percent U.S. share of the project cost under the NATO cost sharing formula and stipulated that the U.S. share would not be available until the other NATO countries provided their allocated shares.

The Senate amendment provided the full $66.7 million authorization on the basis that the program is of vital importance to the United States' national security interests.

In reaching agreement, the conferees decided to provide $66.7 million in new authorization for the program with the understanding that $48.7 million of that amount would be made available from prior year savings. The concern expressed previously by the conferees over U.S. prefinancing of NATO eligible projects remains and this project may not be started until the requirements of Section 502 have been met. The conference agreement is based solely on the strategic importance attached to the program.

MISAWA AIR FORCE BASE, JAPAN—F-16 BEDDOWN

The House bill included $29.9 million in authorization, as requested by the Administration, for the U.S. share of Phase I of the buildup of the Misawa Air Base in Japan. The base would provide support for F-16 aircraft to be assigned at some future date.

The Senate amendment did not provide for authorization of the construction of facilities at Misawa. The Senate position was based on the judgment that the Govenment of Japan should underwrite the total cost of the program.

After receiving assurances that the new Japanese defense budget would provide adequate funds to cover Japan's share for Phase I of the construction at Misawa in timely manner, the conferees agree to authorize $17 million for the program. In approving this authorization, the conferees direct that the United States should not obligate any funds for the Misawa construction program until the Japanese share is available. Furthermore, the Japanese government is expected to maintain the funding levels for its host nation facility improvement program that supports U.S. military personnel assigned elsewhere in Japan. The work at Misawa should not result in any reduction in the level of effort in the Japanese facility improvement program.

OVER-THE-HORIZON BACKSCATTER (OTH-B) RADAR FACILITIES

For fiscal year 1984, the Department of the Air Force requested $10.1 million for OTH-B radar support facilities at Bangor Air Force Base, Maine, and $1.5 million for land acquisition for the West Coast OTH-B radar site.

The House bill did not provide authorization for either request because procurement of the supporting radar equipment had been deleted in the House version of the fiscal year 1984 defense authorization bill.

The Senate amendment included $10.1 million for the Bangor work and $500 thousand for the West Coast land acquisition request.

As a result of conference action on the defense authorization bill which provided for procurement of one increment of the OTH-B radar, $10.1 million for Bangor and $500 thousand for the West Coast site has been authorized. However, before any funds are obligated at either site, the Air Force is directed to review the scope of the construction program and advise the appropriate committees of Congress as to the potential for a construction effort of reduced scope.

STRATEGIC AIR COMMAND MILITARY CONSTRUCTION BUDGET

The fiscal year 1984 military construction request of the Department of the Air Force included $26.9 million for aircraft maintenance facilities at Offutt Air Force Base, Nebraska, the headquarters of the Strategic Air Command (SAC).

The House bill did not include the requested authorization. Based upon field trips and review of the overall structure of the SAC military construction program it was determined that a potentially serious imbalance could exist in the allocation of resources to the various SAC bases. The House deferred the project at Offutt Air Force Base in order to make room for badly needed projects at other SAC bases.

The Senate amendment provided for authorization of the aircraft maintenance facility project at Offutt. Additional projects were authorized to be built with savings at other SAC bases.

The conferees agreed to authorize the Offutt project and build the other projects with savings. In taking this action, the conferees serve notice that future SAC military construction budgets will be closely examined in order to make certain that an equitable allocation of resources is made available for all SAC bases. If necessary, the authorizing committees will restructure the SAC military construction budget in order to assure that a fair share distribution occurs in the future.

THIRD PARTY FINANCING OF MILITARY CONSTRUCTION

The fiscal year 1984 Department of the Air Force request included $35 million for addition/alteration work on the central heat plant at K.I. Sawyer Air Force Base, Michigan. In addition, congressional requests were submitted to both the House and Senate Armed Services Committees for a $79 million central heat plant project at Chanute Air Force Base, Illinois.

The conferees agreed to provide $35 million in authorization for the project at K.I. Sawyer. At Chanute, the $79 million project is authorized and $11.7 million in prior year savings is authorized to be expended in

fiscal year 1984 for the project. The Air Force is expected to fund the balance of the project after fiscal year 1984 either from savings, if available, or from future appropriations.

Before funds are obligated for either project, however, the Air Force is directed to make a reasonable effort to obtain third party contracts for the construction and operation of these facilities at the two bases.

In fact, as a matter of overall policy, the conferees on behalf of their respective committees, serve notice that in the future all requests for large scale heating and power plants will be closely examined and the military services are expected to aggressively explore and pursue third party financing before any project is authorized.

Consideration of the third party option shall, as a minimum, include a comprehensive analysis of the potential advantages and disadvantages of contracting for the required energy services by a third party venture. If the analysis results in a determination that a third party contract is not advisable, such analysis shall accompany the justification for the military construction project when it is submitted to Congress. If the analysis supports further consideration of a third party contract, then proposals will be solicited, prior to any budget request for authorization. If a third party contract cannot be successfully awarded, the committee will be advised of the reasons when the project is submitted for authorization.

MEDICAL FACILITIES, UNITED STATES AIR FORCE ACADEMY

During the course of the conference, it was brought to the attention of the conferees by congressional members of the Academy Board of Visitors that the Air Force has identified a requirement for additional medical facilities at the Air Force Academy. According to the information provided, the medical facility may have slipped in overall Air Force military construction programming.

The conferees, therefore, direct the Department of the Air Force to proceed with the necessary design of the facility in order to have it ready for inclusion in the earliest possible military construction program.

TITLE IV—DEFENSE AGENCIES

The House bill authorized $332,586,000 in new construction for Defense Agencies while the Senate amendment approved $344,836,000. The conferees agree to a new total of $306,386,000 which is $26,200,000 below the House figure and $35,450,000 below the Senate figure.

DEFENSE DEPOT, MECHANICSBURG, PA.

The Defense Logistics Agency (DLA) requested $18 million to construct an integrated materials storage and retrieval complex at the Defense Depot at Mechanicsburg, Pa., which is DLA's primary depot for shipment of bulk supplies to U.S. forces in Europe. The House approved the request while the Senate deferred the project because of budget constraints.

The House conferees reluctantly receded to the Senate position after it was agreed in conference that the project should be resubmitted for congressional consideration in the fiscal year 1985 defense budget. The conferees noted that the project, when built, would generate sufficient savings to pay for the project within five years.

TITLE V—NATO INFRASTRUCTURE

The House bill authorized $168 million for the NATO Infrastructure program. The House bill included an additional $18 million for the Turkish air base upgrade program that was discussed earlier in the report.

The Senate amendment provided authorization identical to the requested amount of $150 million for the NATO fund.

The conferees agreed to $150 million authorization for the program and included Section 502 discussed previously in the general topics section of the report.

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

NAVY DEFENSE ACCESS ROADS, PRINCESS ANNE ROAD, VIRGINIA BEACH, VA.

Under Sec. 602 the House bill authorized $1,387,000 for Navy defense access roads, including $487,000 for completion of the Princess Anne Road which serves the Navy family housing area in Virginia Beach, Va. The Senate amendment authorized the requested $900,000 for Navy defense access roads. The conferees agree with the House position and authorize $1,387,000 for this purpose.

The conferees recognize the urgent need to reduce the impact on the local community that would be caused by further delay in project execution. The Secretary of the Navy is directed to advance $487,000 to the Secretary of Transportation under section 210 of Title 23 U.S.C. for the completion of the Princess Anne Road project using appropriated funds or through reprogramming of funds available to the program from savings.

OVERSEAS HOUSING LEASES

In Section 608, the House bill approved the Department of Defense's request for authority to lease up to 33,000 units of family housing at any one time in foreign countries. The Senate amendment, however, reduced the requested number to 29,000 units, the same as the level authorized for fiscal year 1983.

The conferees settled on a compromise figure of 30,000 units. Because the services are embarking on a program to build family housing overseas, the requirement for leased housing in foreign countries should be reduced. Also, it was noted that the conferees added to the conference bill 500 units of new family housing to be built for U.S. Army forces in Europe.

TITLE VII—GUARD AND RESERVE

The House bill provided a lump sum authorization of $300,141,000 for the Guard and Reserve construction program. The Senate amendment contained authorization in the amount of $260,910,000. The conferees agree to authorize $299,591,000.

NAS DALLAS, GRAND PRAIRIE, TEXAS AICUZ PROPERTY PURCHASE

The House bill contained authorization of $295,000 for the replacement of a fire station located in an air installation compatible use zone (AICUZ) at Dallas Naval Air Station, Grand Prairie, Texas. The Senate amendment contained no authorization for this purpose.

The Senate conferees agree to the House provision with the understanding that the authorization of this project completes the third and final phase of the clear zone acquisition program at NAS Dallas, Grand Prairie, Texas.

NAVY/MARINE CORPS CENTER, WHEELING, W. VA.

The report accompanying the Senate amendment contained language supporting the construction of a Naval/Marine Corps Reserve center at Wheeling, West Virginia, in the amount of $2,900,000. No reference to this project was included in the House bill.

Since authorization of $3.4 million was provided for the construction of this project in the fiscal year 1982 Military Construction Authorization Act, the conferees direct the Naval Reserve to use the prior year authority and to move expeditiously to accomplish this project at the earliest possible date.

ARMORY RESTORATION, BUFFALO, N.Y.

The House bill included $976,000 in authorization for restoration of the fire damaged Connecticut Street armory in Buffalo, New York, and $424,000 for construction of a maintenance facility at the same location. The Senate amendment included no reference to these projects.

The conferees agree to authorize the $424,000 for the maintenance facility, but direct the Army National Guard to construct the armory using available unobligated lump-sum authorization.

HIGH-PRIORITY PROJECTS

In addition to the projects approved in the budget request, authorization is included to construct the following high priority items from the available lump-sum authorization:

[In thousands]

Army National Guard:	
St. Paul, Minn.—Rehab. armory and aviation facility	$2,280
Camp Shelby, Miss.—Land acquisition	2,914
Buffalo, N.Y.—Maintenance shop	424
Latham, N.Y.—	
Add to armory project	1,850
Maintenance facility	494
Gloster, Miss.—Armory	575
Indianola, Miss.—Armory	572
Lebanon, Tenn.—Armory	900
Camp Dawson, W. Va.—Parachute Shop/Special forces training facility	695
Army Reserve: Laurel, Miss.—Reserve center/maintenance facility	3,000
Naval and Marine Corps Reserve:	
NAS South Weymouth, Mass.—Main gate relocation	1,400
NAS Dallas, Tex.—	
AICUZ property purchase	295
Air traffic control	250
Chapel	1,500
Air National Guard:	
Stewart Field, N.Y.—Joint ANG/MCR training complex	29,200
Dannelly Field, Ala.—Base civil engineering facility	520

TITLE VIII—GENERAL PROVISIONS

In addition to the housing initiatives discussed earlier in this report, the following major actions were taken by the conferees with respect to the general provisions.

Sale and replacement of nonexcess real property

The Senate amendment included a provision, requested by the Administration, that would permit the Secretary of Defense to sell certain nonexcess real property. The House bill did not contain a comparable provision. The conferees agreed to a compromise provision (Section 807) that adopted the essence of the Senate provision, but provided for a two-year sunset provision.

Under the conference provision, the Secretary of Defense may sell certain Defense Department owned real property (including land and structures on that land) and part of the sale proceeds may be used to build or acquire replacement facilities. Real property to be sold will *not* be excess property; the

disposition of excess property will continue to be handled under the provisions of the Federal Property and Administrative Services Act of 1949 (40 USC 471 et seq.). The property to be sold will be property not being put to its optimum use; for example, an old, inefficient Reserve armory in a high value urban area might be sold and part of the proceeds from the sale used to build a new armory on an existing military installation in the suburbs. The thrust of the provision is to give the Secretary of Defense the authority and an added incentive to manage his real property assets efficiently.

Although the provision gives certain authority to the Secretary of Defense, the conferees are aware that most Defense real property is owned by one of the Military Departments, and in view of the Department's policy of management decentralization, the conferees expect this authority to be delegated to the Military Departments. However, since this is a new program, the conferees have included stringent oversight provisions. Every transaction under this Section must be authorized in law and the conferees expect to handle these transactions as part of the normal legislative process utilized for all other military construction programs.

As mentioned previously, excess real property may *not* be sold under this provision; likewise public domain lands under the jurisdiction of the Secretary of Defense may *not* be sold. In addition, the Secretary of the Interior will screen every transaction and no transaction may be proposed where the property to be sold might be suitable for a public park or recreation area. In those instances where the Secretary of Interior has made such a determination, the real property will remain with the Defense Department until the necessary replacement facilities can be programmed, constructed and the incumbent actively relocated. Once this occurs (and this process may take many years depending on when the Department can program the necessary resources), the property would become excess and would be handled under the established procedures for disposing of excess Federal property.

Several criteria have been established which must be met before a transaction may be proposed under this section. First, any transaction must be accomplished using competitive bid procedures or qualified contract realty brokers. The conferees would expect most transactions to be accomplished competitively, bringing to play the full force of the marketplace to maximize the return to the Government. Second, no Defense Department land can be sold for less than its fair market value. The conferees will expect that the fair market value of any piece of real property to be sold will be determined by established real estate appraisal means *in advance* of advertising the property for sale. Third, every transaction must show a "profit" (i.e., the sale proceeds must be greater than all associated costs.) Finally, every transaction must involve the relocation of essentially the same mission and function.

The Administrator of General Services is designated to handle all sales of Defense real property under this provision. The GSA has the expertise and the structure to handle these sales and is expected to be able to perform this function without additional personnel.

In order to provide an added incentive for the Secretary of Defense to pursue this type of transaction, a special account is established in the Treasury. This account will receive five percent of the "profits" from each transaction. Funds in the account will be used primarily to pay the "up front" costs to examine future potential transactions. Any expenditure from the account above $300,000 is subject to a "notice and wait" provision wherein the Armed Services and Appropriations Committees will be advised of proposed transactions. There is a ceiling of $50 million (or any lesser amount that the Secretary of Defense determines is sufficient) on the account. In essence, the Secretary of Defense will be able to pursue this program without having to take the costs "out of hide".

While this effort is not expected to generate large sums that will be deposited in the Treasury to be applied against the national debt, the important first step of establishing a Defense real property management program has been taken and incentives have been provided to encourage the Department to manage its lands more efficiently. The fact that some excess funds will go to the Treasury to reduce the national debt, and thereby begin to relieve hard-working Americans from this burden, is an added bonus.

Land conveyances, exchanges and acquisitions

The conferees agreed to authorize five fair market and equal value land exchanges, two land conveyances, two family housing program land acquisitions and a landfill relocation at Langley Air Force Base, Virginia.

APPENDIX

PROJECT LISTING: FISCAL YEAR 1984 MILITARY CONSTRUCTION AUTHORIZATION BILL

PROJECTS AUTHORIZED FOR CONSTRUCTION INSIDE THE UNITED STATES

[In thousands of dollars]

State/component/installation	Project cost	Total
Alabama:		
Army:		
Fort McClellan:		
Infantry remote target system ranges	3,500	
Boiler plant shutdown	280	
Machinegun training range	440	
Fort McClellan		4,220
Redstone Arsenal:		
Laboratory addition	2,600	
Missile system software center	16,000	
Weapons maintenance training facility	5,700	
Weapons maintenance training facility	1,100	
Redstone Arsenal		25,400
Fort Rucker:		
Flight simulator building	3,050	
Classrooms with staging field	6,600	
Classrooms	[1] 1,950

TRIBUTE TO MRS. LEONA CARRICO

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to an outstanding teacher and a longtime friend of mine, Mrs. Leona Carrico, who died on August 12 at the age of 53 in Russellville, Ky.

Mrs. Carrico, a native of Marshall County, Ky., was a teacher in the Russellville Independent School System for many years. Leona Mangrum Carrico was an inspiration to her students and to the ministry of her husband, Rev. Joe Carrico, pastor of Russellville's Post Oak Baptist Church. Leona was the epitome of loving kindness and her passing has caused much sorrow, not only to her family, but to every person that she ever came in contact with in her life.

Brother Joe referred to her as "my buddy, my best friend." Leona was a friend to a great many people.

I am personally grieved at her death. It seems that we too often lose at an early age those who have given the most in this world where we have a vast majority of takers. It is not for us to question. For those of us who knew Leona Carrico, we can be thankful to God that our lives were enriched by her steadfastness and her unfailing Christ-like spirit of kindness and helpfulness.

Survivors in addition to her husband are one daughter, Miss Renee Carrico; her mother, Mrs. Elizabeth Mangrum Hendrick of Mayfield, Ky.; one sister, Mrs. Glenda Mathis of Mayfield; four brothers—Dr. Franklin Mangrum of Morehead, Ky.; Louis V. Mangrum, an attorney friend of mine from Mayfield; James Mangrum of Des Plaines, Ill., and Curtis Mangrum of Lombard, Ill. I extend my sympathy to the survivors and friends of this fine Kentuckian who was truly an inspiration to those who knew and loved her.

COAL PIPELINE ACT OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 309 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 1010.

□ 1610

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 1010) to amend the Mineral Leasing Act of 1920 with respect to the movement of coal, including the movement of coal over public lands, and for other purposes, with Mr. KILDEE (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Thursday, September 15, 1983, the gentleman from Arizona (Mr. UDALL) had 26 minutes of debate remaining; the gentleman from New Mexico (Mr. LUJAN) had 26 minutes of debate remaining; the gentleman from California (Mr. ANDERSON) had 30 minutes of debate remaining; and the gentleman from Pennsylvania (Mr. SHUSTER) had 30 minutes of debate remaining.

The Chair recognizes the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, one of the most troublesome problems with this coal slurry legislation has been the problem of water rights. Over the last few weeks before we finally disposed of the bill at the committee level, the gentleman from Wyoming and I collaborated on an attempt to draft water rights language that would assure the primacy of State and local water rights.

I would take this time to yield to the gentleman from Wyoming to ask a few questions to clear up this issue once and for all.

Mr. CHENEY. Mr. Chairman, I thank the gentleman for yielding and would like to take the opportunity to enter into a colloquy to discuss the issues.

Mr. Chairman, I wonder if I might inquire, what is the heart of the water issue?

Mr. UDALL. The heart of the issue is that the States are concerned about their ability to control whether or not water leaves the State via a coal pipeline.

When this issue was debated 10 years ago, the States were concerned that, due to the interstate nature of the pipelines, State laws that said no to coal slurry might be invalid. Last year, those fears were realized, when the U.S. Supreme Court, in the Sporhase case, said that water is an article of commerce. The Supreme Court decision means that State statutes that flatly prohibit the export of water are unconstitutional.

Mr. CHENEY. Does that mean, for example, that if a coal pipeline wanted to use water from South Dakota, or from Wyoming, or Michigan, that the State could not say no?

Mr. UDALL. Under existing law as declared by the Supreme Court in Sporhase, the State probably could not prohibit the use of water by a coal pipeline.

Mr. CHENEY. What does H.R. 1010 do to alleviate this problem?

Mr. UDALL. The language in H.R. 1010 gives the States the power to say no to a coal pipeline. It gives the States the power to say, "You can take water but only on these terms." It gives the States the power to impose terms and conditions that would otherwise be considered invalid as a burden on interstate commerce. In effect, this bill makes constitutional State laws that want to limit the right of coal pipelines to use water. The decisions about how State water is to be used are placed squarely on the States by this bill.

Mr. CHENEY. What about States that share interstate sources of water? How are they affected by one State's decision to sell water for a coal slurry pipeline?

Mr. UDALL. Let me say that a State, like South Dakota, that wants to issue a permit for water use by a coal pipeline, can only authorize the use of its share of an interstate body of water. South Dakota cannot sell Missouri's share of the river, nor can it sell the rightful shares of any other State. South Dakota can only sell what it owns. If another State thinks South Dakota has issued a permit for water it does not control, that State can bring legal action to stop South Dakota.

In fact, that is exactly what has happened: Nebraska and Missouri and others have sued South Dakota to enjoin the sale to ETSI. I want to emphasize that disputes over allocations of water have traditionally been resolved in just this manner by the courts. The major part of the body of

law on water rights is case law, especially in the area of interstate water rights disputes.

Mr. CHENEY. What are the people in the downstream States concerned about?

Mr. UDALL. Some downstream States fear—mistakenly, in my judgment—that an upstream State will be able to sell water that belongs to the downstream State. This is flatly wrong. No State can sell what it does not own. Since 1907, the Supreme Court has maintained that all States that share an interstate body of water are entitled to an equitable share of that water.

Mr. CHENEY. Does this bill give those downstream States more cause for concern?

Mr. UDALL. No; to the contrary, the power that this bill gives the States is the power to say no to water for coal slurry. The impact of the delegation in the bill to the States can only be to reduce the amount of water that will be dedicated to coal slurry. That is because States that want to say no, can say no—which they cannot do, I emphasize, right now. The States will be unable to say no without this bill. This applies to all 50 States. And the bill specifically says, on this point, in section 3, page 5:

> Nothing in this Act or any amendment made by this Act shall alter the rights of any State to its apportioned share of the waters of any body of surface or ground water, whether determined by past or future interstate compacts, or by past or future legislative or judicial allocation.

We do not change the shares the States have. We give them the power to say no as to slurry use of what they are each entitled to.

Let me ask the gentleman from Wyoming a couple questions, so we can nail this down as closely as we can.

My first question would be, are water compacts not a good idea?

Mr. CHENEY. Interstate water compacts are one means of resolving interstate water disputes. The other traditional means of resolving such disputes are Supreme Court decrees and congressional allocation.

Supreme Court decrees enforce the long-established doctrine of equitable allocation. Under that doctrine, the Supreme Court guarantees States which share an interstate stream an equitable share of the water of that stream.

In congressional allocation, under certain circumstances Congress can divide the waters of an interstate stream among States legislatively.

The CHAIRMAN pro tempore. The time of the gentleman from Arizona has expired.

Mr. CHENEY. Mr. Chairman, I would ask the gentleman from New Mexico for 2 minutes.

Mr. LUJAN. Mr. Chairman, I yield the gentleman 2 minutes.

Mr. CHENEY. So there are three different ways of resolving interstate water disputes. All three have been used in different circumstances. The key point is that Congress has always let the States decide what means they wanted to use to resolve their disputes.

Mr. UDALL. Let me ask the gentleman from Wyoming then, why are not proposals for mandatory compacts a good idea?

Mr. CHENEY. First, you have already pointed out that the fear that some States will misappropriate the water of other States is essentially groundless. Under existing law, all States have protected rights in interstate streams—and the legislation reaffirms this.

Second, such a mandate would represent a radical, unprecedented Federal intrusion into State water decisions. Traditionally, compacts are voluntary agreements among compacting States. Congress should not require the States to enter into compacts to resolve allocations if the States desire to resolve the issue by other means.

Third, mandatory compacts, or sister State vetoes, come to the same thing in the end. They mean that one State can veto interstate water transfers of someone else's water for an indefinite period of time. By refusing to participate in compact negotiations, a single State will be able to paralyze the water resources planning and development of every State in the basin or watershed. Such a notion flies in the face of the great body of water law and is abhorrent to the interests of State control of water law.

Mr. UDALL. Would the gentleman enlarge upon his statement that mandatory compacts stop sound planning and development of water.

Mr. CHENEY. Yes; in essence, such proposals all have the same basic flaw. They make it impossible for any State to know what its resources are, thus making sound planning for, and use of, scarce resources impossible.

There is no sound reason to force such a requirement on the States.

There is no reason New York should be able to tell Michigan what to do with its industrial water. Nor should South Dakota be able to tell Missouri what to do with its agricultural water.

Yet these are exactly the types of controls which can logically be asked for next if mandatory compact proposals are successful here. I want to emphasize to the gentlemen the fact that such proposals are completely inconsistent with the entire traditional structure of American water law in both the Eastern and Western United States.

PARLIAMENTARY INQUIRY

Mr. SHUSTER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. SHUSTER. Mr. Chairman, my parliamentary inquiry has to do with procedure. I would direct it to the Chair and to the distinguished gentleman from Arizona.

It was our understanding that the gentleman from Arizona would allocate 22 of his minutes to those in opposition to this legislation, and it is my understanding there are several Members on the gentleman's side of the aisle who have attempted to get time.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. Yes; I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I said to the gentleman in the Rules Committee in a solemn pledge that 22 minutes of our 45 will go to Members who are in opposition to the legislation. That promise will be kept. We only have 21 minutes remaining now. I control 21, but the gentleman must bear in mind that several Members against the bill were yielded time by me in our last session.

Mr. SHUSTER. I understand there was one Member who was yielded 3 minutes, the gentleman from Minnesota (Mr. VENTO).

□ 1620

Mr. UDALL. He will get more if he wants to.

Mr. SHUSTER. Does that mean there are 19 minutes left on your side to yield to those in opposition to the bill?

Mr. UDALL. Let me look at my account and I will get back to you in a minute.

Mr. SHUSTER. I understand there are several Members on your side who tried to get time and have not been able to do so.

Mr. UDALL. We will see they get the time.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, we heard some interesting arguments by opponents of H.R. 3857, the coal slurry pipeline bill, during the opening debate on the legislation last Thursday afternoon.

As I listened to opponents of the bill, and then pondered over this past weekend what was really taking place, I became concerned about where this great country of ours is heading.

I am concerned that too many of us are determined to restrain competition in this country.

In my opening statement on this bill last week, I read the letter written by then Governor of New York, Martin Van Buren, to then President Andrew Jackson, in January 1829.

As those of you who have seen the letter recall—and the letter has been documented by the Library of Con-

gress as being accurate—the New York Governor was concerned about what the new mode of transportation, "railroads" was going to do to the canal system of this country.

The same arguments that Martin Van Buren was using against the railroads are being used today by the opponents of coal slurry pipelines.

Here are some of the similarities:

Serious unemployment would result if the railroads were allowed to compete with the canal boats.

The canal system was vital to the security of our country, so they should be protected against the "evils" of railroads.

There was also environmental and safety concerns about railroads in 1829, because, according to Van Buren, and I quote:

> Railroad carriages are pulled at the enormous speed of 15 miles per hour by "engines" which, in addition to endangering life and limb of passengers, roar and snort their way through the countryside, setting fire to crops, scaring the livestock and frightening women and children.

Thank goodness, the leaders of our country had the vision and foresight in the early 1800's not to listen to the naysayers and the doomsayers, who were opposed to the technological advantages provided by the railroads.

Fortunately, commonsense prevailed in that day and our Government not only encouraged the railroads, but gave them vast acreages of land in the West, and if you will, the right of eminent domain to cross Federal and private lands.

I think it would be not only tragic, but a terrible injustice, if now—150 years later—we let the might and political power of the railroads stand in the way of another technological advancement.

It would be especially tragic, because coal slurry pipelines do not provide the threat to the rail industry, like that industry did to the canal system in the 1800's. If all the coal slurry pipelines now being proposed were built, they could handle only a very small percentage of our estimated increased coal production that is anticipated over the next 20 years.

We all know that America became great—and has remained great—because of our free enterprise system and because of technological innovations.

In the case of coal slurry pipelines, this not only an American technology—which, by the way is being utilized by both the Russians and Chinese, but not by us—but it is a new mode of transportation that has earned it the right to compete in our private enterprise system.

Like everyone in this body, I have responded to political pressures and realities. I come from a city that got its start as a railroad town—Albuquerque, N. Mex.—and the railroad still contributes greatly to the New Mexico economy.

But, we cannot stand in the way of progress, and we cannot block a vital new technology, solely because it may impact on another industry.

It is time for us to be looking to the 21st century—not looking back to the 19th century. We must have the foresight to give new technologies a chance.

In the case of coal slurry pipelines, this represents a new technology whose time has come. We must pass H.R. 3857 the Coal Pipeline Act of 1983.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, I would like to commend the gentleman for his excellent statement bringing this before Congress. It is time to look to the future.

Mr. Chairman, on August 2, 1983, I placed a statement in the CONGRESSIONAL RECORD dealing with the issue of coal slurry pipelines and their competitive impact on the railroads. My remarks were in answer to claims made by Mr. FLORIO of New Jersey in a July 29, 1983, RECORD statement that, in underbidding the ETSI pipeline project and signing a long-term coal transportation agreement with the Arkansas Power & Light Co. (AP&L), the railroads had proven that coal slurry pipelines cannot compete in the marketplace. The basis of Mr. FLORIO's statement was a July 23, 1983 article from the Washington Post headlined "Two Railroads Outbid Pipeline Consortium for Coal Shipment." My response to Mr. FLORIO's contention was to insert in the RECORD the text of a July 25, 1983, press release from Mr. Floyd Lewis, chairman and president of Mid-South Utilities, Inc.—the holding company for AP&L—in which Mr. Lewis indeed cited the proposed ETSI pipeline as a significant factor in making the railroads more willing to negotiate in good faith and enter into a favorable long-term coal transportation agreement, thereby benefiting AP&L's consumers.

Mr. SHUSTER of Pennsylvania has now dredged up the same newspaper article and on September 13, 1983, included it in the RECORD. Mirroring Mr. FLORIO, Mr. SHUSTER claims again that the AP&L contract with the railroads is proof positive that coal pipelines cannot provide cheaper coal transportation or help reduce costs to consumers. I wish my friends who support the railroads in their desperate efforts to defeat H.R. 1010 would come up with a new script. They continue to grasp at straws such as the Washington Post article while the vast majority of newspapers in the country editorialize in support of coal pipeline legislation.

In response to Mr. SHUSTER's September 13, 1983, RECORD statement, I would like to make my colleagues aware of a recent exchange of letters between Senator BENNETT JOHNSTON of Louisiana and Mid-South's Floyd Lewis, in which the AP&L contract with the Chicago & Northwestern Railroad (C&NW) is discussed. In the Lewis letter, I ask you to note the references to competition. What is more, particular attention should be paid to the unwillingness of the railroads to let Mid-South/AP&L disclose any particulars of their contract because these matters are deemed by the railroads to be commercially sensitive. In the September 15, 1983, floor debate on H.R. 1010, Mr. SHUSTER stated that the ETSI pipeline bid for the AP&L coal transportation contract was third in the bidding behind those submitted by the competing railroads. I do not know if this is in fact the case; it might very well be. Mr. Lewis, however, could not disclose any such information to Senator JOHNSTON because of the stringent confidentiality provisions imposed on AP&L by the terms of their contract with C&NW. Mr. SHUSTER, on the other hand, apparently has a direct pipeline to the railroads and is free to discuss the contract openly and as it serves his purpose. In any case, Mr. Lewis clearly states in the letter below that the railroads competed with one another to bring AP&L's coal from Wyoming to Kansas City. From Kansas City to Arkansas, however, Lewis notes—and underlined it to emphasize the point—"the pipeline alternative provided the only competition to the delivering carrier from that point to the powerplants."

Without doubt, the most telling point in Mr. Lewis' letter is made when he states—

> It must be recognized that the terms and conditions of the AP&L contracts are not representative of what any given shipper can expect to negotiate, especially if he has no alternative; rather they represent what competition, particularly intermodal competition, may produce. Without pipeline competition the railroads have no incentive to negotiate a competitive contract and the utilities are stuck with the Interstate Commerce Commission tariffs.

As my colleagues read these letters I wish they would also keep in mind that under the provisions of H.R. 1010, all tariffs for coal pipelines will be openly filed with the ICC. Railroads do not have to withstand such public scrutiny.

The exchange of letters between Senator JOHNSTON and Mr. Lewis follows:

U.S. SENATE,
Washington, D.C., August 3, 1983.

Mr. FLOYD W. LEWIS,
Chairman/President, Middle South Utilities, Inc., New Orleans, La.

DEAR FLOYD: Thank you for your letter of the 25th in which you discussed Arkansas Power & Light's coal haulage contract with

the Chicago and Northwestern Railroad. I understand your need to secure the cheapest form of transportation for your customers, and I am pleased that the prospective competition from the ETSI pipeline played a role in reducing the transportation rates of the Chicago and Northwestern.

As you know, I continue to support the development of coal pipelines, and expect that my legislation to facilitate such development will be considered by the full Senate this fall. In order to fend off arguments which opponents of this legislation might make I would appreciate it if you could answer the following questions with regard to the AP&L contract:

(1) Do these contracts provide for the transportation of minimum volumes of coal annually?

(2) Do these contracts provide that, if less than the minimum volume of coal is transported, the rate paid for the remaining coal transportation shall increase? Is there some similar provision that assures the railroad a certain minimum level of revenues?

(3) Do the contracts provide the utilities the right to renegotiate the contract if a cheaper form of transportation becomes available during the life-time of the contract?

(4) Are these contracts subject to prorationing? That is, can the contracted volumes of coal to be transported be reduced if later coal haulage demands of the railroad cannot be accommodated without such reductions?

(5) If the Chicago and Northwestern Railroad line is not developed from the Powder River Basin, must the utility still make payments to the railroad?

(6) If the Chicago and Northwestern Railroad line into the Powder River Basin cannot be built at the cost anticipated by the railroad, must the utility cover these increased costs either through a direct payment to the railroad or through increased rates under the terms of the contract?

(7) Does the law require that the ICC review and approve these contracts? Does the law require that the terms of the contracts are to be made public?

I believe this information will prove most useful during consideration of S. 267, and I look forward to hearing from you.

With kindest personal regards, I am

Sincerely,

J. BENNETT JOHNSTON,
U.S. Senator.

MIDDLE SOUTH UTILITIES, INC.
New Orleans, La., August 25, 1983.

Hon. J. BENNETT JOHNSTON,
U.S. Senate, Hart Senate Office Building, Washington, D.C. 20510

DEAR BENNETT: This is in response to your letter of August 3, 1983, regarding the recently contracted transportation arrangements for Arkansas Power & Light Company's coal movement to its generating plants in Arkansas.

I believe you assessed the situation accurately when you noted that the presence of a proposal from a credible slurry pipeline alternative enhanced the competitive bidding environment for this transportation. While there was additional competition between two originating rail carriers for the movement as far as Kansas City, the pipeline alternative provided the only competition to the delivering carrier form that point to the power plants.

As I have previously indicated, the Middle South System still supports the slurry pipeline concept. I want to thank you again for your continuing support for the development of coal pipelines and ask that you continue your support for the pending legislation which, hopefully, the Senate can favorably consider this fall. In my opinion, successful enactment of this legislation into law is necessary for consumers of electricity throughout the country to have the benefits of competitive pricing for transportation of coal.

In addition, your letter asked several specific questions regarding our recently signed transportation contracts. As you probably can appreciate, the railroads have insisted on stringent contract confidentiality provisions which would prevent the release of any "commercially sensitive" matters without the prior written consent of all parties to the contract. The railroads have indicated that they deem a response to your first two questions having to do with whether or not the contracts provide for minimum volume and asking if there exists some provision similar to "take-or-pay" that would assure a minimum level of revenues, to be "commercially sensitive" matters and, accordingly, the railroads refused permission for us to be responsive. Responses to the remaining five questions are detailed on the attachment hereto.

Bennett, I would point out that even if we were free to answer the first two questions, we do not believe the responses as to these specific contracts would be useful in furthering the cause of slurry pipeline eminent domain.

Perhaps, in the particular area of "take-or-pay", a somewhat different approach may be more appropriate and productive. It must be recognized that the terms and conditions of the AP&L contracts are not representative of what any given shipper can expect to negotiate, especially if he has no alternative; rather they represent what competition, particularly intermodal competition, may produce. Without pipeline competition the railroads have no incentive to negotiate a competitive contract and the utilities are stuck with the Interstate Commerce Commission tariffs. In evaluating any "take-or-pay" provisions that slurry pipelines might require, we must compare them to the published tariffs which can, particularly if present ICC philosophies prevail, only be expected to grow more onerous—both in terms of obligations on the shippers and cost to the electric consumers.

The captive utility coal shipper, absent real alternatives, cannot force the railroads to negotiate a favorable contract. Indeed, in all the prior years we have dealt with the Burlington Northern and Missouri Pacific, we could not bring them to the negotiating table with any meaningful proposals as long as they felt we had no alternatives. As a matter of fact, they have in the course of "negotiations" exhibited little reluctance to assess what we felt to be arbitrary increases whenever they considered they had the freedom to do so with impunity. For instance, the distance to the second AP&L plant which started up four years after the first one is some 7.5 percent shorter than to the first, yet when the railroads filed the tariff for this plant, they placed it at the same price as the tariff for the first plant, which we were already protesting before the ICC as being too high. Thus, the expected economies of scale of a shorter route and a doubling of the tariff tonnage moving over most of the route were denied to AP&L.

The published railroad tariffs under which the great majority of captive coal moves do have strict minimum volumes, and in a number of these, there are several tariffs in which the lower volumes have higher prices. Virtually, in all of them there is a provision for what is called a "fall-back" rate. This rate is usually on the order of 150 percent of the base rate and the shipper, if he ships reduced amounts, would pay the lesser of the cost of shipping the entire tariff specified volume at the tariff rates (even though he did not ship that much) or pay the "fall-back" rate for the tons he did ship. In any event, the results are the same; the railroads have established a minimum level of revenues under the existing tariffs which, as I stated before, are usually the only choice captive shippers have.

A typical tariff imposes performance obligations in the form of "take-or-pay" requirements on the shipper, but carries no reciprocal obligations of performance by the railroad.

Possibly, Bennett, there are other areas where we might be of assistance in helping you to continue your pursuit of the slurry pipeline eminent domain legislation in order that this mode of transportation can present itself as a credible competitor. If you wish, Mr. George E. White, Jr. can arrange for some of our personnel, who have been intimately involved in the railroad and pipeline situation over the years, to meet with you or your staff at your convenience. If you feel this would be desirable, just let us know.

Again, I wish to thank you for your support on this important legislation.

Very truly yours,

FLOYD.

---

3. The contracts do not provide the utilities the right to renegotiate the contract if a cheaper form of transportation becomes available during the base period of the contract, nor is the railroad afforded any renegotiation rights.

4. These contracts are not subject to prorationing.

5. If the Chicago and North Western Railroad line is not developed from the Powder River Basin, the utility has no obligation to make any payments to the railroad.

6. If the Chicago and North Western Railroad line into the Powder River Basin cannot be built at the cost anticipated by the railroad, the utility has no obligation to cover any increased cost through either a direct payment to the railroad or increased rates under the terms of the contract.

7. The law does require that the ICC review and approve these contracts. It is our understanding from the railroad that these contracts were filed with ICC on July 22, 1983. It is, further, our understanding of the law that ICC is required to retain the terms of the contracts confidentially.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong support of H.R. 1010, the Coal Pipeline Act of 1983.

The energy crises of the past should have taught us that the increased use of coal as a source of energy is crucial toward developing a stable and rational energy policy for our Nation. Coal is our most abundant fossil fuel and currently generates over 50 percent of the electricity produced in the United States. However, if we are to increase

our utilization of this important energy source in order to decrease our reliance on unstable foreign oil sources and continue to meet the growing energy demands of our Nation, coal transportation must become more economically feasible. The development of coal pipelines would certainly stimulate production and use of coal and allow the United States an expanding role in the international coal market.

Furthermore, as we are well aware, our country was founded on, and continues to operate under a free enterprise system with competition as the key element in that system. H.R. 1010 will provide much needed competition for the transportation of coal by means of slurry pipelines which, due to market forces, will ultimately result in lower electric rates for consumers. Since a practical alternative to the railroad transportation of coal has never been developed, the railroads have long dominated the coal transportation market which has stifled incentives to lower coal transportation rates, and in fact, served to escalate rail freight rates for coal by 58 percent between November 1978 and November 1982.

Mr. Chairman, for quite some time we have heard cries of outrage from our colleagues, as well as our constituents, over perpetual raises in utility rates. H.R. 1010 will effectively assist in our efforts to curb these devastating increases by insuring reasonable electric rates for U.S. consumers.

In addition to the benefits I have already mentioned, H.R. 1010 would provide thousands of jobs for construction workers who would be employed to build the pipelines. During this time of high unemployment we should promote responsible privately financed projects which will put many of the unemployed back to work.

Congress has debated the coal slurry issue for many years, and finally, I believe, the major areas of concern, primarily water usage, water rights, and eminent domain, have been satisfactorily addressed after thorough examination by the committees. Coal slurry technology demonstrates that the pipelines will use comparatively little water and will not waste nor pollute the water. In addition, technology is currently being developed which will pipe coal as a slurry in liquid CO_2, virtually eliminating the use of water. Liquid CO_2 slurry pipelines will further reduce the cost of transporting coal and lessen the adverse environmental impacts of coal transportation. State water rights are protected in the bill which specifically delegates authority to the States to regulate the use of water by coal pipelines. The authority to exercise the power of eminent domain in obtaining rights of way would be limited by the bill.

For several years, the Black Mesa slurry pipeline, which generates electricity to meet the needs of over 1 million people in Nevada, Arizona, and my home State of California, has served as an example of the economical feasibility of coal pipelines. For over 13 years, the Black Mesa pipeline has proven to be an economically more attractive option than railroad transportation. According to the Southern California Edison Co., which manages the generating station for coal supplied by the Black Mesa pipeline, coal slurry pipelines are 25 to 30 percent variable cost intensive, compared to 75 to 85 percent for railroads.

Mr. Chairman, I believe this is an idea whose time has come. We must not stifle new, innovative technology which will benefit our Nation as a whole. The time has come for the development of a more economical method of transporting American coal. It is definitely in the national interest and in the interest of consumers that this legislation to facilitate and stimulate the development of interstate coal pipelines be enacted at this time. It is time that our Nation, its consumers and the coal industry be allowed to reap the numerous benefits of coal slurry pipelines. Thus, I urge all of my colleagues to support and vote for this vital energy bill.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I would simply ask the gentleman what happened to the canal system.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank my colleague, the gentleman from Mexico, for yielding.

Mr. Chairman, I would like to join with him in his remarks.

Mr. ANDERSON. Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. Mr. Chairman, there was a great ad on television not too many years ago. It said something like this: "Railroads, who needs them, you do."

I agreed with that ad at that time and I agree with it today. It is even more true if you happen to be in the business of trying to ship coal because basically today in most areas you need the railroads because you do not have anybody else to ship the coal at a reasonable price.

Twenty years ago President Jack Kennedy said that Congress ought to try and consider establishing or let be established another system, a competitive system, for shipping coal in this country. That was over 20 years ago. We find ourselves here in 1983 still trying to address legislation which is designed to allow another means of competition to come into being which will allow for the cheaper shipment of coal in this country.

We have made decisions in this Congress which say very clearly that we are going to be moving toward a coal using society. It has been said that we are the Saudi Arabia of coal and have over a 200-year adequate supply of coal. But what we do not have is a real competitive system in this country for delivering that coal.

So, while coal is cheaper in most areas, we find that utility companies are having to pay outrageously high prices and charging those prices to their consumers because of the fact that they are having to pay such a high price to ship it. I say that they do that because there is not real competition within the system.

Now, there have been a number of arguments over the years that have been raised as to why we should not have those coal slurry pipelines constructed. One argument in the past has been, well, it is going to take the water from the States. We have very clearly said that there is no eminent domain authority to take water in this legislation. In fact, it does just the contrary. It says that States cannot have their water taken for the use of eminent domain. It allows States to enter into interstate compacts with other States and to say, "We are not going to sell our water for coal slurry pipelines or for any other reason." We are required to recognize now those interstate compacts. And in fact that adds to the rights of the States to control their own water rights.

There was raised, I think the last time we debated this bill, the question of "Suppose I am in an adjacent State to another State who wants to sell water to this line and that they are going to take my water without my State's permission."

We in no way in this legislation affect the doctrine of the Supreme Court that has been around since 1907 which deals with the equitable allocation of water rights. Whatever rights an adjacent State has now they would have after this legislation has been adopted.

I think that adjacent States rights are protected. I think it is certainly true that they do not have any danger of having their water taken by the doctrine of eminent domain authority. I think that is absolutely very, very clear. Some have said, well, these coal slurry lines are going to be able to enter into take-or-pay contracts, they are going to have to pay for their coal even though it is not being shipped. That is really interesting. We looked at a number of railroad contracts. About three-fourths of the railroad contracts that we looked at that provide for the shipping of coal all have a

form of take-or-pay contracts that require the coal shippers to pay for the coal even though maybe it is not being shipped.

I think that this particular legislation provides very adequate protection because coal slurry pipelines are going to have to have their contracts looked at by State public utility commissions, they are going to have it looked at by the U.S. Attorney General. And at any one of those stages, if they find what is being done is noncompetitive or out of line, then the contract can be modified.

It is interesting along that line that the National Association of Regulatory Utility Commissioners has testified before our committees in strong support of this provision and feel that they are more than adequately protected in this area.

So, I think that what this legislation does, and we have done this so many times, but only to be stopped at the last minute by those who would not like to see competition in the area of shipping coal, we insure them that what the legislation does is provide a balanced approach, it takes into consideration the legitimate concerns of the States with regard to water rights.

There are more than ample environmental protections. We have seen clearly that the National Environmental Protection Act covers the way water is handled, both at the beginning of the line and when the water is being discharged. All of the provisions of environmental protection continue to apply. And I think that there is more than adequate protection in that area.

I would just conclude with the statement that what we are trying to do is not to run the railroads out of business. Studies have clearly indicated there is going to be more business for everybody involved.

It is interesting to note also that one of the only operating coal slurry lines in the world is in fact owned by a railroad. I think that tells us where we are.

Mr. ANDERSON. Mr. Chairman, I yield 5 minutes to the gentleman from Arizona (Mr. McNULTY).

Mr. McNULTY. Mr. Chairman, much has been made of the issue of taking or paying. That phrase captured public attention when the Nation found itself in a position of a serious oil shortage in 1973-74. That panic induced the signing of contracts that would in the absence of that panic never otherwise have been signed. Ever since then there has been a popular political theory that if we identify take or pay, we have identified the devil in our midst and have slain the otherwise adverse results we might expect from that devil.

The truth of course is that most of the people who get coal of any quantity or any description from railroads do so under contracts.

I thought perhaps some of you would be interested in this official tariff of the Atchison, Topeka & Santa Fe Railroad, ICC Form 4027A, which says among other things:

Volume requirement. One million tons received during the 12-month period commencing with the date of written notification to the Santa Fe and Southern Pacific and thereafter successive 12-month periods. Before the beginning of the service an indemnity bond shall be furnished and it must be in an amount sufficient to cover the difference between the amount of the freight charges that would have been collected in accordance with paragraph C and the amount that would accrue in the event the consignee failed to meet the volume requirements.

□ 1630

What is the difference between that and take or pay language?

I submit to you there is none at all.

If you are a captive shipper, as is the Arizona Electric Power Cooperative in Cochise, Ariz., you will find when you do a comparison of western unit train coal movements that of the 10 on this sheet in my hand, 7 of them pay 16 to 19 mills per ton per mile, and that is the only valid yardstick: how much per ton per mile does it cost to ship coal.

Out of these 10, 7, as I say, pay between 16 and 19 mills per ton per mile. But there is one here called Arizona Electric Power Co-op. I cannot get the coal from Gallup, N. Mex., any way but by train. And what does it pay in mills per ton per mile? The answer is 27.95, almost 3 cents per ton, double nearly some of the other figures.

What else have you had an experience with? My answer is if you were the Arizona Elecric Power Cooperative you would have had 24 rate increases between January 1, 1978, and January 1, 1983. This document is available for inspection by anyone who is interested.

So the point of these remarks today is that notwithstanding the clear ignorance of Mr. Taylor from the Interstate Commerce Commission, there has been a large number of contracts with provisions that are, in the carrier business, the equivalent of take or pay, and that is one of the very powerful reasons that this bill should be approved and that the railroads should suffer competition like any other American enterprise.

I yield back the balance of my time to my chairman.

Mr. LUJAN. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I represent a district which includes all of the interests at stake here—including the only operating coal slurry pipeline. I rise in oppositon to the measure before us, H.R. 1010, the coal pipeline act.

The single most important resource to my arid State and of the Nation is water: without this resource, Arizona, indeed, much of the western region, cannot sustain its growth; nor can it survive, in addition to human consumption, we need water for municipal requirements; we need water for irrigation of a farm-livestock sector that would not exist without the billions of dollars of dams, and reservoirs, and canals that have been built and continue to be built; we need it for power.

We also have rail transportation in Arizona, particularly in the rural areas. The only currently operating coal slurry pipeline—Black Mesa—also is located in the Fourth Congressional District, in northeastern Arizona. But the key issue is water.

Much of the discussion of this legislation, which would grant the special privilege of eminent domain—guaranteed access to our public and private lands—to private pipeline operators, has revolved around the issue of State's water rights and allocations under existing law. I cannot agree to this.

Unfortunately, water is not a plentiful resource and many States are not yet equipped to deal with the extraordinary grant of water regulation to be delegated under this proposal. The latter is true because water is not always under the exclusive control of one particular State: It is often a shared right that is not altogether determined by existing agreements. This bill purports to preserve a particular State's water rights, but what protection is there for the export of water also of interest to downstream users? Legitimate questions have been raised as to whether this bill will defend State water laws only to foster a new round of court disputes between neighboring States competing for the same water supply.

The primacy of State water law becomes a secondary problem to our Nation, however, if one views this debate with the serious and unresolved water issues at hand. This legislation proposes to facilitate the transfer of massive quantities of water, which does not heed State borders as the bill presumes. Coal pipelines require about 1 ton of water for every 1 ton of coal that is transported. A ton of water is about 240 gallons.

The argument has been repeated that this is not an unreasonable quantity of water. An estimate of the total water consumed by all of the nine planned pipelines would amount to about 136,000 acre-feet annually. This is more than Phoenix, ninth largest city in the United States allocation from the cap. It has been said that this quantity of water is a small price to pay for a new mode of coal trans-

portation. I do not agree. Water is the West's, indeed, the Nation's most valuable resource and must be preserved for the people.

If our Nation's water future was as bright as our projected coal output, then this exchange would be to our benefit. But many of our Nation's largest farm groups do not see it that way. To them, the prospect for water is already dim, and long-term water management should not be set aside for what may be perceived as a short-term gain for pipeline interests. Ranchers and farmers have no alternative to water. Without it, they cannot survive. This year's drought, for instance, has not yet been fully felt by consumers, but no one doubts its inevitable impact upon food prices and market conditions.

Coal slurry proponents maintain that water used in this process will be suitable for other purposes. Except for recycling this water for a return pipe, which would involve great expense, or use in an electric-generating station's cooling system, this water is lost.

It makes no sense to me to divert an already scarce natural resource to slurry coal when other means of transporting coal are available. It makes little sense to explain to farmers or manufacturers why their most precious resources is to be diverted to a less arid part of the Nation for this purpose.

The loss of valuable water, already in great demand and without replacement, will certainly lead to higher costs to users. They have no alternative source unlike coal producers. Moreover, grain transportation costs will increase as railroads lose revenues to pipelines.

The expansion of coal as a primary energy source for our Nation is without question a critical objective as we seek energy independence. Delivery of this valuable resource by rail undoubtedly will continue, whatever the outcome of this legislation. But let us not lose sight of the critical water issues at stake with this pending bill. The granting of eminent domain to coal slurry opens the floodgates for an equally precious resource. Just as Congress needs to exercise foresight when it comes to extracting our energy needs, it is equally imperative that we place weight on our water needs. For too long water management has been without a coherent State-Federal policy.

This legislation promises further discontinuity among the States and regions which are entangled by natural water supplies. It empowers an awesome Federal right of eminent domain to a comparatively narrow interest, while alternative transportation by rail is available and expandable, when needed.

Congress has been understandably reluctant to grant this privilege in past sessions. I urge my colleagues to examine the evidence, which I believe to be insufficient, and then vote against adoption of H.R. 1010.

Mr. SHUSTER. Mr. Chairman, I yield myself 10 minutes.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, I must rise in strong opposition to H.R. 1010, the coal supply pipeline legislation.

I believe there are a number of sound reasons for opposing this legislation.

First, I am greatly concerned with the problem of take-or-pay contracts and how coal slurry pipeline construction could adversely affect utility rates.

Coal slurry pipelines are enormously expensive to build. For example, it is estimated that the ETSI pipeline would cost at least $3.5 billion. I am particularly concerned about how a slurry pipeline company would finance that huge cost.

It is generally recognized that a slurry pipeline company would need to enter into long-term coal delivery contracts with utilities in advance of construction. These contracts would need to provide a slurry pipeline an adequate volume of business and adequate revenues—to guarantee the pipeline's viability. These contracts would then be used as a form of collateral to receive financing.

To insure the pipeline of adequate revenues, the contract would need to be a take-or-pay contract. That is, the pipeline company would need to be guaranteed revenue from its utility customers regardless of whether the utility actually received coal from the pipeline. Thus, if the pipeline and utility entered into a 30-year take-or-pay contract, and 10 years into the contract the utility found a cheaper source of coal or some other form of energy, the utility would either have to take the pipeline's coal or, in any event, pay for it. Of course, it would not be the utility that pays—it will be the utility's hard-pressed ratepayers.

These will be the same types of contracts that have been subject to abuse in the natural gas area. And if this legislation is passed and coal slurry pipelines are built, electricity consumers will be subject to the same sort of exorbitant rate increases that gas consumers have been subject to.

I am also concerned with the wisdom of using scarce capital for constructing what is basically a duplicative transportation system. Revitalizing our industrial base will require much capital investment. We cannot afford to squander our limited capital in this manner.

As chairman of the Subcommittee on Commerce, Transportation, and Tourism, I am also worried about the effect of this legislation on the railroad industry. Railroads have a common carrier obligation for all commodities while coal slurry pipelines will carry only one commodity.

Furthermore, railroads are an energy efficient form of transportation. The Congressional Budget Office has determined that railroad unit trains are more energy efficient than coal slurry pipelines.

As a result of this legislation, many railroad jobs could be lost. As it is, because of the recession, railroad employment has already gone down 25 percent in the last year and a half. We should not make a bad situation worse.

In addition, because of this further decline in employment, the railroad retirement system could be adversely affected. One million retirees depend on this system for their livelihood. I do not think we should jeopardize their lievelihood by passing this legislation, particularly after all the effort we have just gone through to save the system from drastic benefit cuts.

This legislation also raises serious environmental concerns. For example, it is unclear what the effect of slurry effluent will be on ground water supplies.

In addition, I know there are serious concerns regarding the effects of this legislation on agriculture and State water rights.

For all these reasons, I urge a "no" vote on this legislation.

Mr. SHUSTER. Mr. Chairman, I certainly do not question the sincerity of those who are attempting to have this legislation pass, but I would suggest it is my considered judgment that in my decade in the Congress, this is the worst special-interest legislation that has ever come before this body. It is anticompetitive. It is antienvironmental. It is anti-States rights. It is anti-agriculture. It is antitransportation and it is antilabor.

There are 16 different reasons any one of which by itself is justification for voting down this legislation.

But before I turn to some or all of those reasons I would like to deal briefly with the debate which has taken place on this floor last Thursday and today.

First of all we were told by the distinguished gentleman from Arizona (Mr. UDALL) that in this country today and particularly in Florida we are faced with a situation where we are buying Polish coal. I believe he suggested that somehow this was caused as a result of the exorbitant transportation rates of the railroads on coal into Florida.

I think the record should be set straight, Mr. Chairman. The only purchase of coal by Tampa Electric in Florida from Poland was a single purchase about 3 years ago, and the main reason that Poland was able to deliver

the coal so cheaply was, first of all, because of the near slave labor in Poland; second, because in Poland the Government subsidizes their exports; and, third, and very significantly, with regard to the particular coal we are talking about, it was because Poland already had ships on their way over to Tampa to pick up valuable cargoes of phosphate which could only be purchased out of the Tampa Bay area.

So the reason for Polish coal was unique and indeed, I would go on to say that the gentleman from Arizona suggested in the RECORD that this was "a long-term contract" with Poland.

The information I have is that is not the case at all. It was only a 1980 purchase. Zero tons were purchased in 1981. Zero tons were purchased in 1982. Zero tons have been purchased in 1983.

So I simply do not concede the point the gentleman was making.

Beyond that, the gentleman suggested in the RECORD that the Japanese have signed a contract in Texas with one of the major utilities there to deliver coal and "what is going wrong?"

Mr. Chairman, Japan is a net importer of coal. Last year the Japanese only produced 19 million tons of coal. They imported 76 million tons. They exported zero tons.

So I do not know where the distinguished gentleman, for whom I have the greatest regard, is getting his statistics. But it seems to me that they do not fit with the facts that have been spread upon the RECORD.

Now, turning further, Mr. Chairman, we were told in the debate last Thursday by my good friend from New Mexico (Mr. LUJAN) that coal slurry pipelines are being built in the Soviet Union and in Red China. We checked on this. There are no coal slurry pipelines being built in the Soviet Union or Red China. There are no coal slurry pipelines in the process of being constructed or in operation.

There was a Journal of Commerce blurb that said they were thinking about maybe building a coal slurry pipeline in the Soviet Union. But I suggest that it is far from standing here and waving the flag of patriotism and saying we cannot let the Soviets and the Red Chinese get ahead of us. They simply are not in this business today.

Further, we have been told time and time again: Let there be competition. Many of the speakers last Thursday and my good friend from Louisiana (Mr. BREAUX), for whom I have the greatest regard, took this floor and talked about those terrible coal rates by those terrible railroads, those big, bad railroads, and the exorbitant rates they charge on coal.

What are the facts? In 1982 the railroads earned a return on equity of 5.6 percent which placed them ninth from the bottom of 43 major industries in America.

By the way, the giant electric and gas utilities who are trying to destroy competition in this industry and support their own slurry pipelines—in large measure they will own the coal and the pipeline—and so have vertical integration, and move in the direction of monopolies, those wonderful, civic-minded electric and gas utilities realized a return on equity of 14 percent, almost three times what these big, bad railroads received.

□ 1640

Beyond that we should not have the short memory to forget that the railroad industry in America has been on the ropes. In fact, many of the railroad lines have been near bankrupt. Particularly those of us in the East and the Midwest know all too well of the eight bankrupt railroads and the fact that they were not realizing an adequate return on their investment; they were not getting an adequate price.

If you look at the various railroads even today, even in a recession climate, nevertheless, a situation has developed where they have improved their return on investment. A 5.6-percent return on investment is woefully inadequate.

I think it is also important to recognize when we talk about these big, bad railroads and their supposed gouging of coal rates, that the average coal rate in America has never been half as much as the average rate on all other commodities.

In 1982, just last year, it was 44 percent, the average rate on all other commodities hauled by the railroads.

Further, coal rates have not increased as rapidly as the price of coal itself. If you look at the history of the increases in coal rates, going way back to the 1930's and 1940's, coal prices increased 42 percent, the rail rates zero; up through the 1950's coal prices increased 125 percent, the rail rates 42 percent; and up to 1961 coal prices decreased by 7 percent and the rail rates increased by 8 percent, the only exception to the trend; from 1961 to 1971 coal prices increased 54 percent, rail rates increased only 9 percent; from 1971 to 1981 coal prices increased 272 percent, rail rates 200 percent; and in the past 6 months virtually zero.

Now, I grant you there may be isolated cases where railroads have exercised monopolistic power to gouge. That is what the Interstate Commerce Commission exists for to prevent. This is the job of the Interstate Commerce Commission and, indeed, if it is not doing its job then we should get the Interstate Commerce Commission to do its job.

We should not try to prepetuate these arbitrary and capricious low returns of investment on a rail industry which has been on the ropes and which is vital to this country.

Turning in the few minutes I have left to at least some of the 16 reasons why this special interest legislation should be rejected, first of all it is antitransportation.

I have the privilege to serve as the ranking member of the Subcommittee on Surface Transportation and have had the privilege to serve as chairman of the National Transportation Policy Commission, a bipartisan congressional group created by this Congress.

One of the things which seemed so very important and very clear as we look at transportation policy in America is that transportation modes have or should have a common carrier obligation.

Certainly virtually every other mode does have a common carrier obligation.

One of the reasons for voting against this legislation is that it fails in this test. Under common law, common carriers of a particular kind of goods have the duty to receive a transport all such goods tendered to the limit of their capacity. And if they cannot carry them all, then they have a duty to prorate that which they can carry among all those coming to them.

Coal slurry pipelines do not fit this requirement. Coal slurry pipelines are not common carriers under this legislation. Therefore they should not be given this extraordinary special benefit, the powerful Federal right of eminent domain.

But beyond that reason, Mr. Chairman, this legislation should not be passed because if it is passed there will be a lack of effective rate regulation on coal slurry pipelines.

This is anticompetitive legislation because it destroys the ability to effectively regulate rates.

I thank the Chairman and in our amendments I shall deal with the other reasons why this legislation should be defeated.

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Chairman, I request unanimous consent to revise and extend my remarks. I rise in opposition to the Coal Pipeline Act. As many of you in this Chamber know, West Virginia continues to lead the Nation in percentage of workers without jobs. Tens of thousands of coal miners head up the State's unemployment roll. Many of them out of work for months, others of them count their time waiting for the callback to the mines in years. But these harvesters of our Nation's most abundant energy resource are not out of work due to the absence of coal slurry pipelines linking the coalfields of Fayette and Monongalia Counties to eastern ports. Coal miners, in my district, are

not off the job because a pipeline is nonexistent between Randolph County and Florida utilities. These coal miners are unemployed solely due to current market conditions. The demand for coal to fuel our Nation's electric plants is deeply depressed. West Virginia's rich metallurgical coal remains in the ground because steel mills have no use for it. And our coal export trade that flourished a few years back flounders in the face of inadequate demand.

Coal slurry pipelines will not change these economic realities; nor will the passage of this measure before us insure employment in the coalfields of West Virginia or other coal-producing States across America. A vote for the Coal Pipeline Act is a vote to take away some 71,000 permanent jobs—an estimated 41,000 in our Nation's rail industry alone. A vote for the Coal Pipeline Act will negatively impact on the railroad retirement system, telling thousands of railroad retirees they do not matter.

In voting against this Coal Pipeline Act we will say that employment for Americans is our primary concern. As 93,000 permanent jobs will open up in our Nation's railroad and manufacturing industries as rail coal traffic increases.

A vote against this measure, before us, acknowledges the contribution made by our railroad retirees and our dedication to insuring their well-being; while at the same time we will protect the legacy left by them—a national transportation system second to none.

For 20 years, Congress has been debating the benefits of coal slurry pipeline legislation. As was true in 1963 is as true today, there exist no concrete evidence that the granting of Federal eminent domain rights to a handful of pipeline investors will significantly benefit our Nation's coal industry. Moreover, it will definitely undermine our existing transportation system; placing in jeopardy this vital national security network.

We will be in serious error if we ignore the broad coalition led by consumers, farmers, labor and environmentalist in opposition to this measure. Their concerns are legitimate concerns and they should be our concerns as well.

Mr. LUJAN. Mr. Chairman, I yield 3 minutes to the gentleman from Idaho (Mr. CRAIG).

Mr. CRAIG. Mr. Chairman, when H.R. 1010, the Coal Transportation Act of 1983, was before us in the Committee on Interior and Insular Affairs, we argued about water.

It then moved over for consideration by my colleagues who serve on the Committee on Public Works and Transportation.

They argued about water.

Today, it is on the floor of the House of Representatives, and we are going to talk about water some more, because no one has solved the fundamental problem in this bill.

Congress can write a million words about the protection of States rights, but that does not take away from the fact that H.R. 1010 is the biggest public works authorization in the history of the world.

Moses did not try to move this much water around.

And I would be willing to bet that he had more water to play with and for fewer people competing for the benefits of its use.

We spend billions of dollars in this country to impound enough water to call it a lake. From that impoundment, technology assists us in harnessing the benefits of that water in increasingly sophisticated, but benign, ways. We have utilized rivers and reservoirs to turn water wheels and turbines. We have used water's heat-sink properties to cool nuclear facilities. We have used its expansion properties to harness the strength of steam. These impoundments provide water for irrigation, water for recreation, water for communities' industry and safe drinking supplies, and water for wildlife and fisheries habitat. And as these benefits are extracted in one community, we have returned the water to the cycle to be used again and again as it moves downstream.

The use of water in a coal slurry pipeline system is a radical departure from the cycling of water as a renewable resource. The technology of this energy transportation system requires that we withdraw massive amounts of water from a river basin or underground aquifer and transport that water to the source of the coal—in many cases, a distance of many hundreds of miles.

It is then slurried with ground coal. Chemists warn us that this process increases the acidity of the water and introduces heavy metals, chlorinated hydrocarbons, and other hazardous materials.

In this condition, slurried with the coal, the water then moves several to many hundreds of miles to the terminal customers of the coal slurry system.

So what we have is a lot of dirty water transported miles away from its river basin, and in most cases the coal slurry customers receiving this water are in the Southern and Eastern States where fairly abundant water supplies already exist. The newly arrived water supply from the semiarid coalfields of the United States is not needed, nor does it arrive in any condition to be safely used.

Congress tries in its collective wisdom to determine priorities for best and highest uses of scarce resources. In the case of H.R. 1010, Congress is endorsing a last and final use of a scarce resource which violates the high priority we have established for agricultural production, community drinking water, hydropower, wildlife, and all the other productive reuses of water as it flows along a multistate basin.

I am not suggesting that Congress bar the use of water for coal slurry pipelines. I am simply suggesting that in the minds of many, this is a wasteful and dangerous priority to establish as a Federal goal for the use of water. It should be a decision guided solely by State and local authorities who share in the benefits of a water source and are prepared to determine the extent to which the community can afford to have any portion diverted outside their basin or aquifer.

I would suggest to the sponsors of this bill that you trust no heavenly signs that your language protects the Nation's water resources. It has not rained in the Midwest for a long time.

□ 1650

Mr. ANDERSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have been listening as some of our colleagues have been discussing the current financial well-being of our railroads, and their prospects for the future, given enactment of the legislation that is before us today. And let me say that I am convinced that we must have a railroad system that is economically viable. But somewhere along the line, it seems to me that all of the facts are not getting out.

Let us talk about coal production. According to the Department of Energy, there were 829 million tons of coal produced in this country in 1980. Estimates for 1995 have had this level going up to 1.5 billion tons. A more recent national energy transportation study conducted by the Department shows that between 1.184 billion and 1.345 billion tons will be produced each year by 1990. Why, even the Republican Study Committee has concluded that production would hit 1.2 billion tons annually by 1995.

The most conservative estimates for coal production indicate that we will see a 370 million ton annual increase over 1982 production. Even under the unlikely prospect that all proposed U.S. coal pipelines could be built and operating at 100 percent of their capacity by 1995, they would be carrying only 176 million tons by that date, less than one-half the additional amounts of coal that conservative estimates indicate will be produced at that time.

The 1980 national energy transportation study found that only three or four pipelines were likely to be built, and would carry only 9 percent of the amount of coal that will be produced in 1990 over and above the levels being conducted currently.

This means that, contrary to the notion that they might be hauling less coal given this legislation, railroads will be getting 91 percent of all additional coal produced in this country, plus those amounts they are carrying now. How can anyone think this will be anything but a profitable era for the railroads.

And, of course, the gentleman from Pennsylvania commented on the railroad's reported current return on investment of 5.6 percent. I would suggest to the gentleman that, though I cannot confirm that figure, I can point out that since the Staggers Rail Act of 1980, the three leading coal originating railroads, despite their revenue inadequacy and their continued employee layoffs, have found the money to make major corporate acquisitions. On June 7, the CSX Corp. announced an agreement to purchase Texas Gas Resources Corp., a major interstate natural gas company, for $1 billion. In early 1982, after Norfolk & Western and the Southern Railroad combined, the new entity, Norfolk Western purchased 20.2 percent of the stock in Piedmont Airlines for $57 million. And in January 1983, Burlington Northern, Inc., purchased the El Paso Co., a major interstate natural gas company, for $700 million.

Mr. Chairman, a small handful of railroads have a virtual monopoly position regarding coal haulage. The true issue before the Congress on the coal slurry question is whether these railroads will be allowed to maintain that position free of competition. The acquisitions indicate that these railroads are very profitable and that they are using their new profits to buy other companies rather than to rebuild their lines. This indicates they can withstand competition from coal pipelines and survive.

The railroads must be profitable today if they are going out and buying these companies, and with projections for massive increases in coal production in the future, up to levels far beyond that which slurry pipelines can carry, it is certain that they will continue to be profitable.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

If these railroads the gentleman cites are disinvesting and putting their money in other industries, and if they have such a low return on their investment of 5.6 percent, is this not an indication that the railroad industry is sick rather than well and needs to make more profits, not less profits?

Mr. ANDERSON. I did not say they were disinvesting. I said they were acquiring additional companies in addition to what they have. And I pointed out that two are interstate natural gas companies and that one is an airline. I pointed out that even by the Republican Study Committee estimates, down the road all the coal that is being hauled by the railroads—is going to be hauled plus an additional 370 million tons by 1995.

Mr. SHUSTER. If I might ask the gentleman just one more question.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

If I might answer the gentleman from Pennsylvania, it just occurred to me that if they really want to make money they can go into the coal slurry pipeline business.

Mr. SHUSTER. I say to the gentleman that may well happen and it would not be good for America. It might be good for the railroads, but not for America.

If the gentleman will yield for just one more question.

If, indeed, the gentleman's point that there is not going to be any diversion away from railroad traffic and railroad employment and railroad tonnage, then why has the gentleman's side refused to support a labor protection amendment? Why has the gentleman opposed it as a killed amendment if indeed there is not going to be any adverse impact upon labor?

Mr. ANDERSON. I would assume that with the tremendous growth of railroad carriage of coal, as I have indicated, there is going to be a large number of people hired.

Mr. SHUSTER. Then would the gentleman reconsider his position and support labor protection, since it is not going to hurt anyway?

Mr. ANDERSON. It would surely look as though there is not going to be any problem, since as I indicated, there is going to be such tremendous increases in the amounts of coal hauled by the railroads.

Mr. SHUSTER. Would the gentleman support a labor protection amendment then?

Mr. ANDERSON. It may come up later this week.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

It depends on the kind of railway labor protection the gentleman is talking about. In our committee and let me be specific, we labeled it a killer amendment. In this country we believe in competition and the efficient guy makes a profit and the inefficient guy goes broke.

What this amendment said was we were going to have a contest on hauling coal between trains and between coal slurry pipelines and if it turns out that the coal slurry pipeline is the way to go and can make a profit and the railroad suffers, then the winner in this competition has got to pay into the railroad retirement fund enough money to take care of retirement for people who would be affected by this.

We never had anything like this in this country.

Mr. SHUSTER. I thank the gentleman for clarifying his antilabor position.

Mr. Chairman, I yield 3 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Chairman, I speak in opposition to the bill, H.R. 3857, granting Federal eminent-domain authority to coal slurry pipelines. This bill benefits one private industry group while inflicting great harm to individual landowners' and States' rights, to scarce water resources in the arid Midwestern States, and to the continued viability of our railroads.

This bill preempts States eminent-domain laws that are tailored to reflect that State's judgment on property rights and land use. It runs roughshod over any State's decision that coal slurry pipelines are not of sufficient benefit to its citizens or its economy to warrant being granted the extraordinary authority of eminent domain. The Nebraska State Legislature has repeatedly voted down bills granting State eminent-domain authority to coal slurry pipelines.

The bill purports to maintain State control over property rights by providing that State law shall govern the matter of compensation and siting of the pipeline. In fact, the bill gives States very little leeway on where the pipeline will be built, allowing only minor deviations from the proposed route. To quote from the committee report:

> It is not the intention of the Committee to permit pipelines to be rerouted merely because they might cause normally expected disruption in local hydrology or remove certain agricultural land from production or limit its productivity.

The use of scarce water resources to transport coal through a pipeline is the most serious threat posed by this bill. In Nebraska, adequate water supplies are critical to the productivity and viability of farms and ranches. Nebraska is in the process of developing a water policy to better manage and conserve our scarce water resources in the face of declining ground water tables. At a time when we are trying to conserve our water for agricultural and hydroelectric uses, it makes no sense to export this water from our area to transport coal to the States.

We must also recognize that surface and ground water resources are shared by several States. The State of Nebraska, along with Missouri and Iowa,

have brought suit against the South Dakota sale of water from its Oahe Reservoir, to the ETSI coal slurry pipeline. The Oahe unit is a reservoir on the main stem of the Missouri River. The sale of water from the Oahe unit has serious consequences for Nebraska communities who depend upon the river. The complaint sets forth the the many uses of the Missouri River, and I quote:

That water is used to irrigate farmer's fields, and thus increase agricultural production. Ground water levels and associated wells are recharged by the Missouri's flows. The river provides barge transportation to move heavy commodities. It generates electricity in hydroelectric dams. It supports fish and wildlife habitats, provides for maintenance of the natural riverine system, and provides extensive recreation.

These disputes are best left to the States to resolve, under existing judicial doctrines of shared water use among equal and sovereign States. This bill, H.R. 3857, has the potential to do serious damage to that process. I say the damage is potential because it is unclear how an express delegation to the States of Congress power to regulate interstate commerce, over the use and acquisition of the water within their boundaries, will affect interstate compacts or judicial doctrines on shared water use or sale. Both the interstate compacts and judicial doctrines presume equal and sovereign States. Is the equal status of the States upset by the congressional delegation of power provided in this bill?

The proponents of granting Federal eminent-domain authority to coal-slurry pipelines have not shown that these pipelines will be operating in the public interest. They will not be operating as common carriers, as railroads do. Are all businesses in the private sector to be granted eminent-domain authority? Or just those having problems acquiring the property they want?

And finally, we cannot overlook or brush aside the harm this may do to the railroad industry. Coal-slurry pipelines will skim off the profitable coal traffic, while railroads as common carriers, transport the less profitable commodities. In Nebraska where our economy is mostly agricultural, railroads are an important industry. Railroads pay considerable taxes and provide employment for many people. Coal hauling is a major revenue source for railroads. Even if you hate railroads, any legislation that would threaten their economic serviceability by depriving them of their livelihood is at least questionable national policy and, at most, might well be inimical to the national interest.

Mr. Chairman, I urge that this well-intentioned but unwise legislation be rejected by the House and by the Congress.

□ 1700

Mr. SHUSTER. Mr. Chairman, I yield 7 minutes to the distinguished gentleman from New York (Mr. MOLINARI).

Mr. MOLINARI. Mr. Chairman, I rise in strong opposition to this (coal slurry pipeline) legislation. My opposition is based on two major problems in this bill. First, the unprecedented nature of the Federal eminent domain power this legislation permits and, second, the serious environmental problems that this legislation fails to address and, in fact, encourages.

In the early part of this debate, this bill was described as enormously complex. It is more than that—it is also a dangerous precedent. Other Members have gotten up on the floor and said there is nothing unique about this legislation. It has been granted to railroads, to oil companies, and for natural gas pipelines. But let us not pass these statements by too quickly. The fact is, never before in the history of this country have we granted such vast and far-reaching powers of eminent domain and condemnation. We would be gravely wrong to do so now.

In the case of railroads, the Federal right of eminent domain was granted since there were no States established at the time, and the railroads could not appeal to States for the right in question. Railroads no longer have the Federal right of eminent domain and must proceed on a State-by-State basis.

Natural gas pipelines have the right of Federal eminent domain for one simple reason: It is the only adequate mode of transportation for natural gas. We know this is not true for coal.

With respect to oil pipelines, the grant of Federal eminent domain was an emergency measure during World War II and was limited to several years in scope. The law specifically set an expiration date for the use of this power.

I ask my colleagues to consider the effect this legislation will have on our constitutents. For it is the average homeowner, farmer, and landowner who will be paying the real price of this granting of eminent domain—and they will be paying dearly. Think of it—with a stroke of a pen, the title to your home or your farm is taken away from you. The battle then begins to try and secure just compensation, and that usually takes a number of years.

Condemnation is the greatest power we can give, and it must be granted under the most cautious and limited circumstances. The right to own and enjoy property is something that we prize very dearly in our country.

As a real estate lawyer practicing for approximately 30 years, I have witnessed some of the most shocking and sickening examples of abuses that are brought about by condemnation. Yes, it can be said that the fifth amendment to the Constitution says, "Nor shall private property be taken for public use, without just compensation." But there have been many cases in my own limited experience where the compensation has been far from just.

Passage of this legislation would create an open season. The powers that would be granted are so broad that there is an invitation to abuse. A false impression has been created that the coal slurry pipelines would only traverse railroad rights-of-way. There is no limitation in this bill on the installation of these pipelines except for some protections for some Federal lands, recreational, historic and wilderness areas. Where is the protection for the many thousands of homeowners, landowners, and farmers whose lives and livelihood will be disrupted from one end of this country to the other? Have you ever witnessed the trauma of somebody who receives a notice that their home or farm is being taken from them in a condemnation proceeding? Well, I have—too many times.

The fifth amendment to the Constitution states that private property can only be taken when a public use is involved. This bill states that the construction of coal slurry pipelines is a public use, in our national interest, and therefore, the granting of Federal eminent domain powers is warranted. But is this what our Founding Fathers meant when they used the term, public use? Did they envision the unlimited and broad implications and ambiguities that are contained in this legislation? I think not. In my judgment, they intended it to be used very sparingly and only in cases of emergency or where there is no other alternative.

If this bill were to become a precedent, we could justify virtually any form or condemnation by reading into legislation some public benefit or national interest that would flow from prospective condemnation. We are stretching the term public use much too far in this legislation. A coal slurry company could run a pipeline to an export facility in a coastal city without any of the coal being used in this country at all. In fact, three of the presently proposed pipelines will be used solely for coal exporting.

I would just like to spend a brief minute on the environmental risks that would be created by this legislation. There are two major hazards of slurry pipelines from an operational standpoint: plugging and breakage. Pipeline failures are not unique events. They occur now all too frequently. Friction and abrasion are inherent in pipeline movement. Coal slurry pipelines are not like oil pipelines which are segmented and can be shut off. The slurry must be flushed

out through the breakage and dumped into a holding pond. We know that some of these pipelines will be traversing very environmentally sensitive areas. We do not know where the breaks or spillage will occur, but we do know that they will occur. Obviously, every area adjacent to a coal slurry pipeline will be subject to risk, and some environmentally sensitive areas could be irreversibly damaged by such an event.

My colleagues from urban areas should not think that these pipelines will not go near their districts. I had a coal slurry pipeline proposed for my own district in New York City. The potential for public safety and environmental catastrophies from a pipeline in such a densely populated area was enormous.

This bill is carefully and deliberately worded so that environmental concerns carry very little weight in the certification process. Specific time limits are put on each phase of the certification process so that those making the decisions will be forced to act in many cases without adequate information on the specific pipeline in question. This is a very deliberate move on the part of the coal slurry companies since they know that the more time anyone has to look at the real implications of these pipelines, the less the chance they have of being certified.

This bill provides that there will be no Federal standards regarding design, installation, construction, initial inspection, and initial testing for a pipeline which has had a final environmental impact statement prepared. I am sure if this bill passes, we will see a flurry of environmental impact statements being prepared so that the statements are in place before any regulations are issued.

In short, my colleagues, by voting for this bill, you are giving the coal slurry companies the power to take land from your constituents and putting in a coal slurry pipeline. And you, even as a Member of Congress, will have little power to insure that the public health and safety of your constituents is even considered when the pipeline is constructed and in operation.

I urge you to vote against this dangerous, precedent-setting legislation. While it benefits a few companies, it does so at the expense of your constituents.

Mr. LUJAN. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. McCAIN).

□ 1710

Mr. McCAIN. I thank the gentleman for yielding this time to me.

Mr. Chairman, in reply to the gentleman from New York, I was certainly happy to hear that we might have the capability of exporting coal, since our balance of trade is such that it would make the export of one of our greatest resources attractive to many of us.

I just want to mention eminent domain. The railroads could not have been built without granting eminent domain and I think it is only fair that these coal slurry pipelines be given the same privilege.

As far as competition and rates are concerned, the gentleman from Pennsylvania said, I believe, overall rates were raised 5 percent. Testimony before the Interior Committee is that coal freight rates increased 58 percent between November 1978 and November 1982, and I would hope we could clear that up.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield, since he used my name?

Mr. McCAIN. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Chairman, I said that the return on investment was 5.6 percent. I did not say that the increase was in rates.

Mr. McCAIN. I see.

Mr. SHUSTER. I said that the increase in rates was less than the increase in actual coal costs.

Mr. McCAIN. I thank the gentleman from Pennsylvania. Then it is accurate that coal and freight rates increased 58 percent between November of 1978 and November of 1982.

As far as competition is concerned, I believe that ample evidence is provided by the gentleman from Texas, from San Antonio, who told about a $25 million investment that was required to be made by the city of San Antonio in order to get coal from Wyoming, and another $5 million investment in maintenance.

Finally, I would like to mention what is most crucial to the State of Arizona and, of course, that is water. I do not believe that the gentleman from Arizona (Mr. UDALL) would support legislation which would in any way jeopardize the water of the State of Arizona, since it is our most precious asset.

I believe this measure will improve our country's energy picture, international trade position, and employment scene. At the same time, it has been carefully designed to protect our State's precious water rights.

Our Nation depends heavily on coal for its electrical supply. With the demand for electricity steadily on the rise, we must use increasing amounts of coal if we are to reduce our dangerous dependence on imported oil. However, far too many of the major coal users have become captive customers of the railroads.

Nearly two-thirds of the coal shipped in the United States goes by rail. Of this, 85 percent has no alternative means of transportation; in other words, it is captive. Rail freight rates for coal increased 58 percent between November 1978 and November 1982. Testimony before the Interior Committee revealed that transportation costs for utilities can be as high as 50 percent of the cost of coal.

Without effective competition, the high cost of moving coal by rail will surely inhibit increased usage of coal. I see coal slurry pipelines as a necessary and economical alternative which will provide competition and supplement the transportation of coal by rail. With the ability to bargain for lower transportation costs, a coal-fired utility will be able to lower its costs, thereby providing cheaper electricity to its customers.

Lower transportation costs will also allow our country to remain a major coal exporter. Although we have massive coal reserves, idle capacity, and a reliable supplier reputation, coal importing nations are increasingly turning to other countries because excessive transportation costs are pricing our coal out of the market.

U.S. coal exports have fallen around 33 percent in the last 3 years. We cannot afford further losses in the exporting area. Indeed, our potential customers overseas have urged us to deal with our high transportation costs, and our competitors in the world coal market are considering coal pipelines to facilitate the movement of their coal to market. If we have any desire to remain in the coal exporting business, approval of this legislation is a must.

Let me also briefly discuss the impact this legislation will have on jobs. A central argument against this bill is the potential loss of railroad jobs. This argument, which has its basis in protecting the status quo against technological innovation could have been advanced by Pony Express riders and stage coach hands against the railroads. The acceptance of this argument is one reason our country is experiencing economic problems today. However, I do not believe we will lose the number of jobs claimed by the opponents of this legislation. There is evidence that by 1990 the amount of coal on the market will have increased to the point where the slurry pipelines effect on railroad traffic will not be noticeable. In addition, it is estimated that nearly 150,000 direct and indirect jobs will be created in the construction, manufacturing, and mining fields. This bill will create jobs through the private sector without Federal subsidies or loan gurantees.

This brings us back to what I believe is the only genuine issue, water rights.

In my home State of Arizona, nothing is more important than water. If I believed this measure would jeopardize Arizona's water supply, I would

oppose it. However, I do not believe this to be true.

In writing this legislation, those of us who supported it consulted extensively with our Nation's preeminent water law experts. Language was developed to protect State water rights and to delegate expressly to each State the right to control interstate water transfers for coal slurry, a right they do not presently have. Specifically, this bill provides:

The right to use water for coal pipelines must be acquired pursuant to the substantive and procedural law of the State.

Forbids the invalidation of any State water law or any interstate compact on water use.

Pipeline certificate applications may be submitted only after the applicant has obtained the appropriate water permit from the State.

Requires the Secretary of the Interior to consider the effect of a pipeline on the surface and ground water at both ends of a pipeline.

The bill does not allow a State to grant rights to water it does not control or authorize a State to allow use of more than its rightful share of interstate water. And finally, this legislation preserves the rights of States to seek judicial relief in water disputes under the well-established judicial doctrine of equitable allocation.

I urge all of my colleagues to support this carefully crafted piece of legislation.

Mr. UDALL. Mr. Chairman, I yield 3½ minutes to the distinguished gentleman from Virginia (Mr. OLIN).

Mr. OLIN. I thank the chairman for yielding this time to me.

Mr. Chairman, I rise in opposition to the coal slurry bill. I do so because of really three reasons, and all of these relate to the fact that in my judgment really there is not overriding benefit to the Nation in granting eminent domain for this purpose.

We have heard a lot of the reasons. The first one, of course, related to the scarcity of water and the control of water, and I will not get into that.

The second relates to the question of the validity of the cost estimates that are really at the heart of the matter. I am not going to get into that in detail except to say this: I am an engineer, and I spent 35 years of my life in major project work of an electro-mechanical nature. I know that this is going to be an experiment, if it ever goes through, of a higher order of magnitude than presently experienced. It is going to involve the shipping of billions of tons of water to places that do not have it. It is going to involve unknown risks that normally engineers underestimate by factors of between 2 and 5.

I would like to mention the question of the hazards of the remaining waste. I would like to call to the attention of my colleagues a report by the Los Alamos National Laboratory a year ago dealing with the question of the toxicity of the waste.

Over a year ago, a panel of scientists there analyzed the residual chemical content of coal slurry effluents. Their examination covered surface water, ground waters, and effluents from a large number of disposal sites from coal preparation and cleaning plants. Their studies revealed that draining from coal slurry ponds associated with plants processing high-sulfur coal may pose a significant environmental problem because of the high acidity and concentrations of iron, manganese, nickel and aluminum; that harmful and toxic elements remain in the water after the coal particles are removed. I will say this simply in layman's terms.

This means that coal slurry water can be distilled, filtered, the coal removed, all visible matter removed, and it looks like a glass of drinking water, but still this does not remove elements that are invisible and are still dissolved in the water. These constitute an unacceptable danger of toxicity.

The Los Alamos report makes it abundantly clear that this effluent must not be permitted to be mixed with the drinking water supplies either above ground or below ground that supply humans and animals; that coal slurry water has elements of slow poison in it.

It is very clear that postprocessing plants of some nature are going to be required, particularly at the termini involved with exports, where there is no other way to use up the water. We are going to have this water which cannot be disposed of in clear ponds. It is very clear that the question of toxic water in postslurry waste is real, it cannot be ignored, and until a satisfactory solution is found, the answer to the coal slurry legislation, in my view, is a solid "no."

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. NOWAK).

Mr. NOWAK. I thank the gentleman for yielding this time to me.

Mr. Chairman, in 1979 the General Accounting Office delivered shocking news to the consumers of oil:

Decades of regulatory abuse and neglect, according to GAO, had permitted oil pipelines, owned by major oil companies, to collect hundreds of millions of dollars in excess profits.

GAO said that in 1976 alone—had recent decisions affecting other regulated industries been applied to oil pipelines consumer costs could have been reduced by as much as $300 million.

While consumers today continue to tremble over the size and profits of the oil companies, the GAO report did much to bring legitimate regulatory functions back into play to control the oil industry and the pipeline delivery system which it owns.

And so, Mr. Chairman, I find it difficult to believe that the House of Representatives will be asked this week to approve a similar pipeline delivery system for coal which contains no consumer protection features of substantial consequence.

There are no provisions to guard against the pricing practices available to a utility which owns its own coal and the pipeline which brings it to the plant.

There are no restictions on take-or-pay contract provisions.

The very last paragraph of the bill says nothing in H.R. 1010 shall be construed to diminish, preempt, or modify the ratemaking authority of any State utility regulatory agency.

Very frankly, that ratemaking authority has been virtually of no help when applied against the problems of the take or pay contract.

I urge my colleagues to vote "no" this week when they are asked to visit upon coal consumers the same problems faced by the consumers of natural gas.

Mr. UDALL. Mr. Chairman, I yield 3 minutes to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. I thank my chairman for his generosity in yielding this time to me to speak on this issue, an issue that we do not agree on.

Mr. Chairman, I rise in strong opposition to H.R. 1010. I cannot help but feel that 50 or 100 years from now the Congresses that are sitting here are going to look back, should we pass this legislation, and ask themselves;

What were those people thinking about when they were taking something as valuable as water and using it to transport coal from one part of the country to another?

It seems to me that one of the main reasons that those of us who are opposed to coal slurry pipelines are opposed to them for a couple of reasons: What it does to environment of several Western States, and what it does to the agricultural economy or what it has the potential of doing to the agricultural economy of several of the Western States.

Speaking parochially, Colorado is a unique State, the only State in the United States that has no water flowing into it. All the water flows out of the State of Colorado. It flows into Arizona, into the central Arizona project. It flows into several of the water projects in California, and even within the State we already have pipelines that tend, not only tend but in fact do transfer clean Rocky Mountain water from the western slope to the growing cities of Denver and Colorado Springs and all of the other large metropolises.

I say that for a couple of reasons. When those kinds of transmountain deversions take place with the limited

amount of water that we already have in the West, we tend to dry up some of the wilderness areas.

□ 1720

That water is very important to the streams and the rivers to maintain a healthy ecology.

Second of all, there is an old saying in the West—and I mentioned this in the Rules Committee the other day—that water flows up hill to money. It does that time and time again in the West. The farmers in the West are having a very difficult time as far as agriculture is concerned right now.

Why is that? They cannot get a good price for their product. A lot of young people in agriculture are saying that they are going to get out of the business because they do not want to be bumping their heads against the brick wall that their parents and grandparents have been bumping up against for many years.

What do they own? Two valuable things, land and water. When we have the coal industry and a lot of other industries coming to the farmers and saying, "We are going to buy that water from you, and we are going to bail you out," we cannot blame a lot of young farmers for taking this attitude.

So what is going to happen? We are going to find that the coal industry and other industries are going to be owning all the water in the West. We are going to find that we are going to be sending that water that we should be using to maintain the ecology and to maintain agriculture down into Texas. And I would remind those Members who have not seen a map of the proposed coal slurry pipeline that all of the pipelines go from the northern part of the West right into Texas.

Mr. Chairman, I ask the Members to be very, very careful before they pass this kind of legislation that uses water to transport coal.

Mr. SHUSTER. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Georgia (Mr. ROWLAND).

Mr. ROWLAND. Mr. Chairman, I thank the gentleman from Pennsylvania for yielding this time to me.

As I understand it, this legislation is proposed so that we can produce cheaper energy by providing cheaper coal. I submit that there are too many unknowns in this equation right now to make this kind of sweeping assumption.

How do we know that we will be able to reduce the cost of coal with a consequent reduction in the cost of energy? If there are any savings to be had, would they even be passed on to consumers? What do we know about the cost of construction of these coal slurry lines?

Almost invariably there is an overrun when these lines of similar types are constructed, and how do we know that this will not take place now?

Have we looked into the possibility of using other ways to transport coal? What about rail and water, both more efficient modes of transportation than slurry pipelines?

Have we explored this combination to any great degree? If another mode of transporting coal were really necessary, would we have the many barges and railcars standing idly by today?

While there are some areas in our country in which our river systems are not available, most of the country does have a river system available to it. Our barge and towing industry already serves 87 percent of the major American cities.

Why do we not look into the possibility of what it will cost per ton on the basis of mileage when we talk about rail and water, if our true concern is the cost of moving coal?

They say that this will create more jobs. It will create more jobs probably during a short period of time when this construction is taking place, but I submit that if they are successful in producing a system that will transport coal cheaper, it can only have a tremendous deleterious effect on the railroads in our country. Coal carried in unit trains is the largest and least costly commodity carried by rail. To lose any share of this market would only result in an increase in the cost of carrying other commodities and possibly the abandonment of no longer profitable rail lines.

We also talk about getting this coal into the areas where the utilities are able to convert coal use. How are we going to coordinate this production of coal or this transportation of coal to the areas where these utilities are converting? Many of these expected customers cannot or will not convert because of expensive adaptations for preparing the slurry for use of because of existing contracts for coal. How will this be coordinated? Will there be a lag period where there will be a great deal of difficulty?

They talk about this being inflation proof. Is it inflation proof? Will the sponsors of this legislation be willing to accept a provision in this legislation that will not allow them to pass through any of the cost of doing business that is brought about by inflation? Will they do that? If so, where is the incentive for doing business?

This is not just an issue of the railroads versus coal slurry. Let me tell the Members what another very important issue is. That is the issue of the farmers in this country. That is a group of people that is the backbone of this country, and they are the most put-upon group of people in this country. And now we are going to hassle them? We are going to put an additional anxiety on them? Give the go-ahead to attack the very livelihood of the American farmer?

These are people who are having difficulties with inflation and high interest rates and who produce at a cost that is much more than what they get for their commodities.

I had the chairman of the Agriculture Committee of the Georgia House of Representatives visit me recently, and he gave me a list of questions that the farmers had presented. Now, while some of these questions may be answered, not all of the questions are answered in this legislation. There are 11 national groups of farmers representing 41 States that oppose this legislation. Surely their ranks should be considered when evaluating the public interest. I submit to the Members that we must be very, very careful in passing this legislation. There are too many people that will be hurt by it.

If we are to give carte blanche to a private industry to take away a right guaranteed to the American people in the Bill of Rights, then the very least we can do is to require that the burden of proof be on this entity.

Not only do I want answers to those questions posed by the farmers, but I want proof that eminent domain is required.

Proof that coal slurry pipelines are necessary.

Proof that consumers stand to save money.

Proof that the pipelines will not put our common carriers out of business, but most importantly, before I relinquish my stewardship of the public welfare, I want proof that tranferring Federal authority, not to the States, not even to a city or county, but to a private corporation, is any way serving the interest of the American public.

Mr. Chairman, here are some questions American farmers have asked about the coal slurry pipeline legislation pending in Congress. Can you answer these questions? Or find anyone who can? Until they are answered, there is only one responsible position on the issue: opposed to the pipelines and to S. 267 and H.R. 1010.

How much water will pipelines consume and contaminate? Can it be recycled? Will it be recycled? Or will it be dumped in an ocean or river or waste pond to seep into the ground water? Can the water be decontaminated?

If the Ogalalla and other aquifers—national resources more valuable than our coal fields—are depleted or contaminated by the pipelines, what means are available to stop the damage? How responsive can the courts or Congress be? How quickly can damage be stopped?

Once interbasin transfer of water is permitted on a massive scale by 12 or 13 coal slurry pipelines, will the precedent be set to raid any water basin anywhere in the United States? What

becomes of State's rights? Of what value are existing water compacts and agreements?

In times of drought, how will scarce water be allocated? Who will play God? Will water needed by coal slurry pipelines be deemed more important than water for irrigation or water needed for human consumption?

Will land needed for coal slurry waste ponds also be taken by eminent domain?

Are there any safeguards against spills and leaks? Will owners of pipelines be required to carry insurance to compensate landowners for damages resulting from spills and leaks?

Can trees and other vegetation be planted and cultivated on land taken by the pipelines?

If Congress gives builders of coal slurry pipelines the precious right of eminent domain, what recourse will farmers have if the compensation offered for their land is not adequate?

Is the power not of Federal eminent domain supposed to be granted only in the interest of national defense or in times of overwhelming public need? Do coal slurry pipelines not fail these tests?

If Federal eminent domain authority is granted to private, for-profit enterprises for this purpose, what questionable purpose will be offered the next time Congress is asked to turn over to a private entity the right, backed by Federal law, to take even more fertile acreage out of agricultural production?

The National Agricultural Lands study, issued in 1981, identified about 90 programs that reduce the availability of land for agricultural production. Coal slurry pipelines would be another such program and an unnecessary one at that. Why cram it down our throats?

Congress, in the 1981 farm bill, admonished Federal agencies to minimize the extent to which their policies and activities contribute to the unnecessary conversion of farmland to other purposes. Should Congress not heed this admonition as it considers the coal slurry pipeline legislation?

How much agricultural acreage will be taken out of production by the pipelines?

Has anyone begun to assess the adverse consequences of forfeiting forests, grasslands, and other croplands to build these pipelines?

What will happen, 10 or 15 years down the road, if coal supplies for a pipeline are depleted? Or if there is no longer any demand for that coal? Or if water needed to move the coal is no longer available? Or if inflation, interest rates or other economic factors force pipelines into backruptcy?

Will landowners be paid in a lump sum or receive annual lease payments?

How many interstates and farm-to-market roads will the pipelines cross? How long will highway traffic be disrupted for pipeline construction? For maintenance?

What will be the impact on capital markets when billions of dollars are spent to build a redundant transportation system? Will there be further delays in allocating capital to repair and maintain the roads and bridges farmers need to get crops to market?

How much more will railroads charge to haul farm products once they begin to lose coal revenues to the pipelines? What effect will these higher rates have on consumer food prices?

Is it not likely the pipelines will cause more coal-hauling railroads serving rural areas to go bankrupt, as Milwaukee Road and the Rock Island did? Is not another likely result the abandonment of branch rail lines which primarily serve farmers?

Mr. SHUSTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I wish to insert in the RECORD at this point a letter from the Pennsylvania Coal Mining Association opposing this coal slurry pipeline legislation. The letter is as follows:

PENNSYLVANIA COAL MINING ASSOCIATION,
Harrisburg, Pa., September 13, 1983.

Hon. E. G. SHUSTER,
Congressman of the United States,
Washington, D.C.

DEAR CONGRESSMAN SHUSTER: Congress will be considering slurry pipeline legislation within the next few days. The Pennsylvania Coal Mining Association is opposed to this legislation. Our opposition is aimed at three general aspects of the federal legislation: eminent domain, economic damage to most coal producers, and water demands for pipeline transportation.

Coal slurry pipeline proponents are asking for powers to force homeowners, farmers, and ranchers to surrender their land-ownership rights by federal court-ordered condemnation at court-established prices. Yet, the pipelines which have been constructed in Ohio and Arizona were constructed without such powers.

We agree that a precedent was established in granting eminent domain to natural gas pipelines. A pipeline, however, is the only practical way to transport and distribute natural gas. Such a need does not exist for coal transportation. The present infrastructure of rails and waterways can transport all of the coal produced. The pipeline companies claim they will handle only "new" coal. There is no new coal. Production projections for domestic and export markets are significantly downward. The National Coal Association, a proponent for pipelines, has revised its 3-5 percent growth projection for 1983 to less than 1 percent; and there is little likelihood of a significant growth in this decade to the extent that new transportation modes will be needed.

Pipeline proponents have not shown that pipelines are essential for coal transportation. Nor have they shown any benefits to the public or to the national transportation policy. In fact, the economic impact on railroads will be such that increased rail rates on all goods will adversely effect the public. Furthermore, since two pipelines have been built without federal eminent domain powers, pipeline proponents have not shown that such power is needed.

* * * Federal laws do not prohibit the construction of slurry pipelines. State government and laws, therefore, should determine if the benefits accrued are sufficient to warrant condemnation of right-of-ways. Coal slurry pipelines have not shown any need which merits the abrogation of State sovereignty.

If such powers are granted for construction of pipelines, can the need for eminent domain powers to address water rights be far behind? After the lines are constructed, they would be of little utility without sufficient water to move the coal.

The projected needs are one ton of water per ton of coal transported. Moving 25 million tons of coal would require 6 billion gallons of water. The Coldstream Pipeline is designed to move 54 million tons of coal per year. It will require 13 billion gallons of water per year or an average of 36 million gallons per day. Since this is a one-way trip, it only poses one-half of the problem. Where will the silt-laden water be treated, cleansed and disposed?

The only real hindrance to pipeline construction is the need for "take-or-pay" contracts prior to beginning construction. On the basis of take or pay contracts, the pipeline capacity must be committed before it is built. As a result, pipeline promoters do not want to interrupt services for the purpose of prorating capacity to other shippers although claiming a willingness to accept common carrier status. Small producers and small users cannot make take-or-pay long-term commitments. Pipelines can only benefit a few large producers and a few large users.

Consequently, pipelines will not hold down railroad rates for all coal producers as proclaimed. Those coal producers not served by the pipelines will remain to the railroads. The pipelines, if successful, will take high volumes of coal from regular routes which are the base of the railroads' coal traffic. The pipelines must compete for existing markets, not "new" coal markets.

In Pennsylvania, as in West Virginia and Alabama, the independent coal operators have recognized the economic damage to be done by slurry pipelines. The Pennsylvania Coal Mining Association vehemently opposes any legislation granting federal eminent domain to slurry pipelines. Enclosed for your convenience is a listing of many organizations opposing such legislation.

Pipelines have not been successful, thankfully, in competing with railroads. The Ohio pipeline has been mothballed. The Arizona pipeline rate is equal to or higher than comparable rail rates. The ETSI pipeline was recently underbid by railroads for a 20 year, 10 million ton/year contract with Arkansas Power and Light.

The small and medium-sized coal producers will lose in two ways: the loss of markets and higher rail rates. The railroads will recoup profits lost to pipelines by raising rates on their remaining coal traffic. Any producer remaining captive to the railraod will be damaged and could be squeezed out-of-business. When the small and medium-sized coal producers are eliminated or put into a no-growth situation, competition among coal producers will cease to exist. Pipeline competition with railroads, the banner-cry of proponents, will never be a reality for most coal producers. Again, only a very few producers and users can benefit.

We thank you very much for your consideration of the Pennsylvania Coal Mining Association's position and for your support.

Sincerely,

J. ANTHONY ERCOLE,
Executive Vice President

Mr. SNYDER. Mr. Chairman, the debate on coal slurry legislation on the floor of the House is winding up just about the way it started back in committee earlier in this session—with massive misunderstanding.

In the time remaining, it is scarcely possible to enumerate the issues being bent out of shape, much less offer even the briefest clarification. I therefore am inserting in the RECORD a compilation of some of the claims and assertions made in support of this legislation to which I particularly object, along with commentary putting them in perspective. I would urge my colleagues to examine this material in advance of the vote on amendments and final passage, possibly to come later this week.

My principal objection is to the fundamental assumption that coal slurry pipelines will be truly competitive alternatives to railroads—and barges; let us not forget them—in the transportation of coal. Indeed, my RECORD statement goes to some length to indicate the questionable nature of the competitive assumptions being put forth and the lack of real consumer protection in this bill.

Indeed, it goes into a number of provisions contained in previous legislation in earlier Congresses to protect the consumer. I find it disappointing that these provisions have not been incorporated into the legislation before us, particularly since that legislation is touted as being flamingly proconsumer.

These missing provisions include requirements that pipelines operate as common carriers in fact, subject to rate and charge regulation of the Interstate Commerce Commission, rather than contract carriers utilizing long-term take-or-pay contracts, as this legislation permits. Such earlier provisions also provided protections against abuses of monopoly power through prohibitions against common ownership or control of pipelines, utilities and coal producers, and so-called commodities clause protection prohibiting pipelines from transporting coal they own, control, or mine.

The same can be said of the water provisions of this bill, which have in at least one major respect gotten worse. I think any fair reading of the bill and my RECORD statement will leave one inescapable conclusion; States which share water with other States which want to sell shared, multistate ground or surface water for coal pipelines are going to be placed at an extraordinarily grave legal disadvantage. This is another instance in which the bill has gotten worse over the many years of its evolution.

Moreover, Mr. Chairman, I think the facts similarly rebut contentions of slurry proponents that what we are doing in the way of granting the Federal power of eminent domain to private slurry operators is not all that extraordinary.

Finally, Mr. Chairman, it is my contention—and I think the materials which we have generated make this case beyond dispute—this bill goes much too far in the interest of coal slurry operators. It goes far beyond the narrow issue of eminent domain for acquisition of right-of-way.

That tilt, that bias, what should be an embarrassing giveaway to the slurry industry, is something that also began with the initial consideration. Like the misunderstanding about the bill, it continued throughout consideration in two committees of the House, even to the final compromise between the two committees which is before us now. I can say with no question, that from the standpoint of the public interest, this substitute is far worse than the versions reported out by the two committees. This is a point which my RECORD statement explores, and I urge Members to examine it and at the proper time vote against this bill. I think it will be totally apparent that it is beyond redemption, regardless of how it might be amended.

Mr. Chairman, during general debate on H.R. 1010, a number of claims were made concerning the merits of coal slurry pipelines and the legislation which cannot withstand scrutiny. Following are several of the principal claims, followed by the appropriate responses:

COMPETITION

GENERAL

Claim: Proponents claim that the principal rationale for this legislation is that slurry pipelines will inject needed competition into the transportation of coal, resulting in lower utility rates. This assertion has been far and away the most frequently and heavily relied upon by slurry supporters.

Response: Pipelines will depend on long-term take-or-pay contracts of 30 to 35 years in duration, which would be permitted under special and totally unnecessary contracting provisions of this bill. Aside from the other anti-consumer implications of such contracts, their duration is anti-competitive in that they can lock out competition for decades. If a potential competitor becomes ready, willing and able to offer pipeline customers a better deal, that competition nonetheless will remain shut out by long-term, uninterruptable contracts.

In the 1960's, introduction of unit trains undercut a slurry pipeline operating between Cadiz, Ohio, and the Cleveland area. Had it been operating under a long-term, take-or-pay contract, the benefits of the railroads' competitive innovation represented by unit trains would have been frozen out.

PIPELINES' COST EDGE?

Claim: The proponents claim that pipelines will be cheaper than rail transportation.

Response: Pipelines will not necessarily provide lower-cost transportation of coal than their competitors. However, even higher costs would not prevent them from obtaining a share of the coal-haul business, particularly if they were under common control or ownership with their utility customers; such arrangements are permitted by this bill, thanks to proponents' success in preventing incorporation of protective provisions contained in earlier legislation in past Congresses. This accounts for the Consumer Federation of America's advocacy of such amendments to this legislation. (This is similar to the position taken by the Justice Department during the Carter Administration, despite that Administration's support for slurry pipelines.)

Cost overruns covered by escalator contract provisions could victimize the consumer. Utilities could pass through unnecessarily high—and unregulated—pipeline costs to the consumer by building them into their regulated rate bases. It is not unheard of for a utility to pay higher costs for coal from a mine under common ownership rather than buy cheaper coal elsewhere.

As discussion below indicates, EYSI pipeline demonstrated no competitive cost edge when it lost out to two railroad bidders in head-to-head competition for a key contract to deliver Powder River Basin coal to Arkansas.

PIPELINES' EFFECT ON RAIL RATES

Claim: Proponents claim that even if not built, or if unsuccessful in bidding against railroads, pipelines will moderate rail coal-haul rates merely by their participation in contract negotiations or by the threat that they will be constructed. In particular, they seek to invoke the recent experience of Arkansas Power and Light, which signed a long-term contract with a joint venture of Chicago & Northwestern and Union Pacific.

Response: Details of the Arkansas Power and Light contract remain largely confidential according to the terms of the contract itself. However, the bidders included not only C&NW and UP, but Burlington Northern as well as a slurry pipeline, ETSI. It is our informal understanding that ETSI came in third behind the two railroad bidders, disputing the claim that the pipeline had an effect on their contract offers. This understanding with respect to the bid offers is shared by at least some coal slurry proponents.

POLISH COAL

Claim: Proponents claim that rail monopoly power has boosted coal transportation rates to the point where a Florida utility finds it cheaper to import coal all the way from Poland.

Response: Polish coal rates are determined by (a) lower wages paid Polish miners, (b) the fact that Polish mines, inland transportation and ocean shipping are owned by the Polish government, and (c) that government is prepared to sell its coal for whatever it can get out of desperation to acquire foreign exchange. A Polish miner receives a monthly wage of $167.67, in comparison with $2,047 for the average United States miner.

The Polish government is obviously willing to subsidize its coal industry, and is evidently prepared to meet any price to get western currency. For a directly comparable

situation to arise here, you would have to support government ownership of railroads, barges and deep draft vessels, a policy to sell below cost to secure exports, and a reduction in U.S. coal miners' wages.

THE SAN ANTONIO CASE

Claim: Proponents claim that substantial increase in rail rate charged to San Antonio, Texas also supports the monopoly pricing argument.

Response: San Antonio rates initially were artificially and unjustifiably low because of the rail carrier's lack of experience in hauling coal, a comparatively new commodity in that particular rail market. As real costs of providing service were encountered, the rail rates increased.

I have a copy of a letter sent by Burlington Northern to the Gentleman from Wyoming on this very point which states in part:

"Our initial rates were based on incomplete knowledge of the long term costs of hauling heavy tonnages over extraordinarily long distances. Until that time we had mostly handled comparatively short hauls of coal from Illinois—less than one fourth the tonnage we now haul. Because of that, we did not foresee the need for a multi-billion dollar investment to upgrade our system to handle Wyoming coal. Those investment needs were not reflected in the original rate quotation. We have learned from this most difficult experience and we have tried hard—and successfully—to present our customers and potential customers with a low cost coal service.

"FAIR" COMPETITION?

Claim: Proponents claim that competition afforded by pipelines will be fair competition, engaged in an equal basis by all participating modes.

Response: Such competition as occurs will be unfair. Rails must serve all shippers regardless of type, size and length of shipment. Now permitted under the Staggers Act to enter into long-term contracts, rails nonetheless are prohibited from committing their total capacity to contract carriage. Pipelines would merely skim off the most profitable high-volume, long-haul segment of the coal transporting market, leaving to the railroads smaller, less-accessible coal or coal that is "incompatible" with pipeline operations.

WHO WOULD BENEFIT?

Claim: Proponents invariably imply that consumers would inevitably share in any savings should they occur as a result of a coal diversion from rail to pipeline or otherwise.

Response: The Office of Technology Assessment, in its highly respected study of pipelines issued in 1978, concluded that the consumer is most likely to bear the risks of uncertain pipeline economics, while any benefits would more likely accrue to utility stockholders, pipeline companies and coal operators. So much for the uncritical assumption that any savings would be passed on to consumers.

WRONG SOLUTION

Claim: It is the proponents' position that if rail rates are a problem, the appropriate solution is the creation of a totally new industry with a costly and capital-intensive infrastructure duplicating existing coal-haul capability.

Response: If there is legitimate concern that a railroad has abused, is abusing or will abuse its power in the coal transportation market, the appropriate response is for the Interstate Commerce Commission to crack down on the railroad. If the ICC fails to meet its responsibility, it is the duty of the Congress to crack down on the ICC.

WATER

STATE WHERE DIVERSION ORIGINATES

Claim: Proponents assert that the water language in the bill provides total protection for a State, in which a coal slurry pipeline company attempts to obtain water for its operation—or in fact succeeds in doing so—to deny permission for such use or to require termination of such use.

Response: These claims are similar to those made in previous Congresses by the same slurry proponents but applied to totally different language. Those assurances have proven worthless, as new language is deemed necessary in each successive Congress in which such legislation has been taken up. Most of the earlier claims, in fact, have been shot down by nothing short of a landmark decision of the Supreme Court in 1982.

SHARED WATER

Claim: Proponents seek to make the claim that the bill does not affect the rights of States whose ground or surface waters are shared by States which wish to divert those waters for coal slurry pipelines. They insist that the bill affects in no way the allocation of water which is traditionally accomplished by judicial determination, legislative enactment or interstate compact.

Response: Such arguments ignore the indisputable fact that this legislation affirmatively fosters the creation of a new, high-volume commercial use of water which depends on the interbasin transfer of such water. The Federal legislation creates the market for the water, hence competition for its use among States and various users.

It also ignores that fact that not all surface waters are covered by any form of allocation—much less interstate compacts—an observation which is even more applicable to scarce and increasingly depleted groundwater.

This legislation *attempts* to protect the rights of States which seek to prohibit the export of their waters for pipelines by diversion occurring within their borders. It *attempts* to achieve this by delegating all of the Congress' plenary powers under the Commerce Clause of the Constitution to States in which such a diversion might originate. By so doing, by going to such extraordinary lengths, it would give extraordinary power—both negative and affirmative with respect to water for slurry pipelines—to States of origin *at the expense of States which might seek to assert their rights against a diversion of shared water in any dispute.*

Even a principal supporter of coal slurry legislation concedes the failure of this legislation to deal with the groundwater problem. And the Interior Committee, in its report accompanying this legislation, concedes that the shared-water concerns of States other than those selling the water for slurry pipelines are valid, *and that the Congress might have to address them at some point.*

CONSUMER INTERESTS

Claim: Proponents claim that this bill is superior to earlier versions in a number of respects, including protection provided the consumer.

Response: Aside from the discussion of competition above, it should be noted that this bill utterly fails to incorporate protection contained, for example, in H.R. 1609, the last slurry bill to go to the Floor, in 1978:

Common carrier obligations for pipelines, requiring them to be subject to full rate and charge regulation by the Interstate Commerce Commission. (Not only is this requirement not included, the bill explicitly permits pipelines to lock up their customers by long-term, uninterruptable take-or-pay contracts.)

Commodities clause protection, prohibiting pipelines from transporting coal which they own, mine, or control.

A prohibition against common ownership and/or control of coal slurry pipelines, utilities, and/or coal companies.

Claim: Proponents claim that restriction or prohibition of take-or-pay contracts is unnecessary because the coal pipeline industry will somehow be immune from the same sorts of abuses which victimized the consumer in the natural gas industry. They base this argument on the fact that in the natural gas industry, a pipeline acquires the gas and thus provides both the transportation and the commodity being shipped. In the case of slurry pipelines, they would be strictly transportation companies.

Response: As noted above, this bill fails to provide any assurance against such anti-competitive arrangements as common ownership and control, and indeed encourages them by means of its contracting provisions. And again, slurry proponents now resist any sort of amendments of this nature, even though they were contained in earlier legislation *introduced by slurry proponents.*

Claim: Proponents contend that many railroads use take-or-pay contracts covering the transportation of coal.

Response: The Interstate Commerce Commission chairman has testified that such is not the case. Moreover, it is our understanding that no take-or-pay restriction was contained in the recent contract negotiated by Arkansas Power and Light and a rail bidder.

I understand that there is some dispute regarding the ICC testimony. The confusion raised by assertions of slurry interests and some Members who support the legislation may arise as a result of a misunderstanding. Take-or-pay contracts may be getting confused with those which provide for volume discounts or "service" contracts, which oblige a purchaser to take 100 percent of his requirements from a particular seller, but without any requirement that he pay for anything not actually received.

EMINENT DOMAIN

Claim: Slurry proponents claim that there is nothing out of the ordinary in the grant of the Federal power of eminent domain to private slurry pipeline operators, citing the use of eminent domain in other industries, including some railroads (at one time) and pipelines for oil and natural gas.

Response: True, railroads did have the power of eminent domain in the West, but in the case of Western territories where there were no States to grant eminent domain. Oil pipelines were exercised Federal eminent domain powers during World War II as an emergency measure. Natural gas pipelines were later granted Federal eminent domain, which is altogether reasonable in view of the fact that there is no realistic alternative to pipelines for the movement of this commodity.

Pipelines, which will not be serving as Federally regulated common carriers, fail to meet the same high standard of justification. Competing with multi-commodity rail-

roads, they would skim off only the most profitable segment.

One proposed pipeline in Virginia consists of a 50-50 joint venture of a major energy company and a single utility. This hardly serves the broad public interest. What's more, under this legislation coal users other than utilities, for example, a major energy user such as General Motors, could own a pipeline. Is this in the public interest warranting the Federal power of eminent domain?

By-passing of State eminent domain statutes, which are often conditioned by certain environmental and economic regulatory requirements, makes it possible for slurry operators to circumvent legitimate State interests. And a claim that lowering of utility rates is sufficient basis for granting Federal eminent domain erroneously assumes that such will in fact occur.

HEALTH, SAFETY AND THE ENVIRONMENT

Claim: Proponents claim that this legislation contains strong health, safety and environmental provisions, and has been strengthened by the addition of a requirement that an environmental impact statement be issued for each project.

Response: This legislation explicitly excludes from certain initial safety requirements any pipeline for which an environmental impact statement has been approved for actual construction by the time such requirements are issued. This is despite the fact that at this stage, no detailed design work need necessarily have begun.

A provision in existing Federal law, whereby State requirements must apply to pipelines crossing Federal land if they are more stringent than Federal requirements, has been omitted from this bill.

Environmental assessment of coal slurry pipelines has been totally inadequate, for lack of knowledge as to what substances other than water—such as oil or methanol—may be moving through the pipelines. The fact that the legislation explicitly requires preparation of an EIS in connection with each project represents no strengthening, since there is no doubt that an EIS would be necessary in the absence of a specific statutory requirement.

ADEQUACY OF CERTIFICATION REQUIREMENTS

Claim: Proponents claim that this legislation contains tough, stringent and laborious certification requirements, and that certification requires findings of national interest *and* public convenience and necessity.

Response: In fact, this legislation is weaker than either the Interior or Public Works versions of H.R. 1010. Both versions required extensive fundings on a wide range of issues to be made: by the Secretary of Interior, in the case of the Interior Committee bill and the Interstate Commerce Commission, in the case of the Public Works Committee bill. However, the substitute before the House splits up the certification process, giving a handful of general findings to the Secretary of Interior alone, and others such as critical transportation evaluations to the ICC alone. The bill also provides that if either the Secretary or the Commission makes an affirmative finding on the basis of his narrowed review process, then the President can find in favor of the pipeline and require the issuance of a certificate. A certificate can be issued on the basis of national interest *or* public convenience and necessity.

We are concerned that this substitute therefore makes it far easier to approve a certificate for a pipeline, notwithstanding disastrous transportation implications. The factors considered by the Interior Secretary are narrow, relatively routine, and apparently easy to satisfy. And, in case of a dispute over energy and transportation economics, a President would be likely to side with his own Interior Secretary rather than an independent regulatory commission.

Mr. ANDERSON. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, I spoke on this matter last Thursday when my distinguished friend, the gentleman from Kentucky, took the well and talked about freight rates, railroads, the water problem and others. He talked about who is going to suffer and who is not. I then took the floor and spoke about the plight of my consumers.

The greatest advantage to come from a coal slurry pipeline will be to the consumers, and they are the ones we have not talked about too much.

Let me tell my friend, the gentleman from Pennsylvania, that those of us who speak for this bill are concerned about the consumers of utilities. If he considers them a special interest group, so let it be.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. Mr. Chairman, I only have 3 minutes, and I am answering the remarks of the gentleman in part. I would appreciate it if he would let me answer him and yield after I finish my remarks.

Let us look and see what captive shippers are doing to my consumers in Texas. One ton of coal from Prince Rupert, Canada, on the west coast of Canada, right under Alaska, transported by boat through the Panama Canal to the Texas coast is $25.86 a ton. One ton of Colorado coal transported by rail is $28.58. The difference is in the mode of transportation. My consumers have to pay for that.

I cited the case of San Antonio in my district. The rates have gone up many times in the last 5 years. When they started out in 1976, it was $7.90 a ton; they are now paying $26.40 a ton while the cost of the coal is only approximately $8 a ton.

That is the way that consumer who runs his air-conditioning in the summertime in the South and Southwest is treated. And believe, air-conditioning is not a luxury, it is a necessity.

One of my utilities has just very recently bought 15,000 tons of West Virginia coal. I wish that my colleague, the gentleman from West Virginia, who spoke a while ago were to hear this.

The CHAIRMAN pro tempore. The time of the gentleman from Texas (Mr. KAZEN) has expired.

Mr. ANDERSON. Mr. Chairman, I yield 1 additional minute to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, that coal went through the Kanawha River in West Virginia to the Ohio River, to the Mississippi River, to the Intercoastal Canal to Texas, up the Victoria Barge Canal and then it was trucked 22 miles to the plant at $2.30 per million Btu's, as against $2.59 a ton coming by rail from Colorado.

Do not tell me that railroads cannot afford this type of competition, that the railroads are not forcing higher utility bills upon the consumers of this country, those who were forced to switch from natural gas to coal in order to save our energy and help solve our problem of an energy shortage after the Government said, in effect, "You have to convert from natural gas to coal."

□ 1730

This was forced upon us even though we have all the natural gas that we could ever use in Texas.

And then to have my consumers pay these high transportation costs is not right. I urge you to support this bill.

Mr. ANDERSON. Mr. Chairman, I yield 3 minutes to the gentleman from Arizona (Mr. MCNULTY).

Mr. MCNULTY. Mr. Chairman, what happens to the water in the coal slurry pipeline when it arrives at its terminus. Let me relate a conversation Mr. J. Cox, manager of operations at Mohave generating station on the Colorado River in California, the only recipient now of coal by a slurry pipeline. The answer is this. The material is delivered to great tanks, kept in agitation until pumps take it from these tanks and put in centrifuges, great hollow cylinders with tiny holes in the sides, which are then spun at great speed. All the water, three-fourths of it, and that includes the imbedded moisture in the coal, comes out the sides of these centrifuges, gathers in canals and goes to an enormous bowl, bigger than this Chamber, into which it is pumped at the center and that is gradually filled up with this material, with the hidden material at the low middle.

Finally, the bowl is filled and over the edges comes some liquid. What you see in this glass in my left hand is identical, at least in appearance, to what goes over the edge of that bowl. It is, in fact, not potable, but it is then taken and used in cooling towers, generating stations that are going to be the principal beneficiaries of this science, and the steam which has been used to spin the turbine must be condensed back to water in the cooling towers of the way that it is done.

I advise you that Mr. Cox advised me that 100 percent of the water in the coal slurry pipeline is used and reused to a factor of four in the business of cooling the pipelines. The same material that has to be removed from that water has to be removed from any water that is used in a generating plant. That is why solid sludge ponds

are built at all generating stations, whether they have coal slurry pipelines or not.

Only four one-hundredths of 1 percent of the annual consumption of water in the United States would be used if every pipeline ever envisioned by the mind of man or human beings were constructed.

To give you an idea of the quantity of water that we are talking about, 1,070 times as much water is used in the ETSI pipeline flows past the city of Sioux City in the Missouri River every year.

So the business of water being the great problem is simply not true. The consumption is far less. The consumption of a generating station to pump that water would run five to eight times as much as the water that is delivered in a coal slurry pipeline. So the environmental concerns are, to put it mildly, exaggerated and the consumption of water is efficient, intelligent, and environmentally sound.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, I rise in strong support of H.R. 1010. I do it for basically three reasons.

First of all, I am eminently opposed to the right of Federal eminent domain. I am going to elaborate on that under the 5 minute rule, but let me say that Federal eminent domain should never be exercised except in those cases of extreme emergency or crisis. Really, in this case, we have no extreme emergency or crisis.

First of all, the rails can handle the coal movement.

No. 2, coal slurry pipelines today can utilize the right of State eminent domain. They really do not need Federal eminent domain. I am experienced with eminent domain in my district, and as I say, I will elaborate on that in the future.

I would like to address briefly the remarks of my good friend, the gentleman from Texas (Mr. KAZEN) on his concern for the consumers in the talk about competition.

Let me say that in this case competition is a very narrow window. In fact, you might even just call it a peephole. Competition enters the day coal slurry pipelines come to a user and says, "Hey, have I got a deal for you," and he sells the user on his coal slurry pipeline; but then that user will sign a 20-year contract and that is the day that competition ends; because that contract is going to be take or pay for 20 years and the user is locked in. Those contracts are going to be adjustable, so that if the cost to the coal slurry pipeline goes up, as costs may well go up, those costs to that user are going to go up, and they are going to be just a tad below what it will cost for rails to deliver.

On the question of water, let me say this. There is going to be competition for water and today we are talking about surface water basically, but when that coal slurry pipeline is in place, the competition will be great.

The CHAIRMAN pro tempore. The time of the gentleman from Minnesota has expired.

Mr. ANDERSON. Mr. Chairman, I yield 2 additional minutes to the gentleman.

Mr. STANGELAND. The competition for that water is going to be great.

Let me say that my good friend, the gentleman from Colorado (Mr. KOGOVSEK) discussed water to agriculture, so I will not elaborate on that any more; but let me say also that to take the coal hauls away from the railroads, and those of us who are fighting coal slurry are all supposed to be tools of the rail lobby, but let me say that my first two instances are for agriculture and the consumer; but let us take a look at the railroads for a minute.

We are served in my district by the Burlington Northern. Take away the coal hauls and you are going to increase the cost to every agricultural producer in this country to ship his product.

You know, the farmer is the only one who pays the freight both ways. He pays the freight of his product going to market and he pays when he goes to buy the needed inputs he has in his farming operation.

I think we ought to be concerned about what we are going to do to the rail interests. You know, if this bill passes, we could well have a Midwest Conrail; heaven help us, I do not think we want that.

I think we ought to take a good hard look. This bill deserves to be defeated. I think it is a strong special interest bill and I would urge my colleagues to vote no on the legislation.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. BEREUTER).

Mr. LUJAN. Mr. Chairman, I further yield 3 minutes to the gentleman from Nebraska (Mr. BEREUTER).

The CHAIRMAN pro tempore. The gentleman from Nebraska is recognized for a total of 5 minutes.

Mr. BEREUTER. Mr. Chairman, I rise in opposition to this bill. While there are many extremely serious problems with the grant of Federal eminent domain for the acquisition of the rights-of-way for these pipelines, this Member will address his comments only to the impact which passage of the measure would have upon those States which share water resources with other States which are willing to sell that shared water. I would like to take this opportunity to review this serious issue for my colleagues.

As we began debate last week, the proponents of the bill spoke at great length of the protection which has been provided for the individual States. I noted with interest the imaginative and one-sided colloquy today between the gentlemen from Arizona and Wyoming. There may certainly be some confusion as to the effects which passage of this measure would have upon those States downstream of the State which chooses to sell the large amounts of surface water which these coal slurry pipeline systems will require. Proponents will say that the water provisions in the bill do not in any way affect the existing water rights of the States relative to one another. They say that these are hold-harmless provisions, and that States are in the exact same position relative to one another as they were without the bill. Only in the strictest and most limited sense is that true. What the proponents of the bill do not say, however, is that passage of this bill will result in encouraging States to sell water which they share with other States for use in coal slurry pipelines, without consulting those other States which may be adversely affected. Passage of this bill will, in effect, place a Federal imprimatur upon interstate and interbasin transfers for coal slurry pipeline purposes, regardless of the effect which that usage will have upon other States which share that water source.

It is essential to point out that this bill, supposedly amended in an effort to protect the water rights of the States, delegates back to the State of origin the Constitution's commerce clause powers to govern the export of water. The practical effect of this action, however, will be to give a State which wishes to sell, for use outside that State water which it shares with other States, the awesome advantage of commerce clause power over other States which may be adversely affected. Does this Congress really want to bestow upon any one State such an unfair advantage over others with which it shares these resources? That is unfair and bad public policy.

When we begin consideration of amendments to this bill later this week, amendments will be offered which will require the existence of a compact among affected States before interstate water can be transferred outside any State for use in these pipelines. Proponents will say that this approach does violence to the traditional water laws of this country, and that the requirement for agreement among States which share scarce water resources is an unprecedented Federal action and without justification. Do they seriously believe that these issues are best resolved in lawsuits among the States in Federal court, rather than be requiring agreement among the affected States? An impartial observer would surely say that this bill,

as it stands, does a great deal more damage, in the long run, to the water rights of the individual States, and to interstate relations in general, than any amendment addressing the shared-water question.

Proponents of the bill will also argue that adoption of a shared-water amendment will give any State which shares that resource an absolute veto power over another State's decision to transfer water for that purpose. I would state clearly that it is not the intention of this Member, nor I believe that of any other Member, to subject each sale to the approval of the other compact States. Rather, it is intended that the compact process would make allocations of interstate water to each State, and that each State would then be entitled to dispose of all or part of that allocation in any manner which it desired, in accordance with the laws of that State and the wishes of its citizens. I repeat, each and every transaction would not be subjected to the approval of the compact States. Transfers would be made from each individual State's allocation, freely arrived at by agreement among the States which share that resource.

Proponents of the bill will talk in terms of a State's right to dispose of the water which it controls. That statement does not answer the question of the rights of other States to that water. A more basic question must be addressed. Should we give each State an unqualified right to dispose of unlimited quantities of water to which it has access, regardless of the legitimate rights and needs of other States with which it shares that resource? It seems clear to me that rationality and sound public policy would require an agreement among all those States.

Finally, proponents would have Members believe that adoption of a shared-water amendment would give other States a veto power over intrastate water uses for whatever purpose. A recently circulated dear colleague questions whether Congress would establish a major precedent which would in time allow States which "neighbor" a State "to exercise a veto over your State's use of water for industrial, municipal, agricultural, or recreational purposes?" That is clearly not the issue embodied in the present debate. I would stress that the shared-water amendment which is expected to be offered only governs interstate transfers, and only for coal pipeline purposes. The decisions of individual States as to the best use of water, for whatever purpose, within that State, will remain unfettered.

I know that some of my colleagues will ask why some of the major proponents of this bill, coming from the arid States of the West, would support this bill unless all the water issues were resolved. I would just point out that many of the States have coal, as well as water, and that a great deal more revenue can be generated from the sale of that coal, in the short term, than from any use of the water in question. I urge my colleagues to consider the impacts of this use of water upon those States which are downstream of the Mountain States, those States which have no coal and which depend upon adequate water.

Let us preserve the water rights of all of the States, as they stand, but let us not, my colleagues, give any one State the right to exercise the awesome commerce clause power delegated to it by the Congress in this bill, to the serious long-term disadvantage of other States with which it shares water. Make no mistake about it, that will be the effect of this bill, unless we adopt and appropriate shared-water amendment.

In conclusion, I urge my colleagues to support appropriate amendments to protect the water rights of all States, with respect to the coal slurry pipeline legislation, or to defeat the resolution.

□ 1740

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. Mr. Chairman, I rise in opposition to this measure.

Mr. Chairman, proponents of H.R. 1010, the Coal Transportation Act of 1983, have tried to convince my colleagues that this is a jobs bill.

I want the record set straight on that argument, because for Pennsylvania and many other parts of the country, this is not a jobs bill.

It is true that the construction of these coal transportation system will create temporary construction jobs. But let's look at what happens when construction's over and the itinerant labor moves on. For every permanent job created for the operation of that pipeline, six railroad jobs will be lost.

In my part of the country, that's six families without income—six heads of household who move from the taxpayer column into the unemployment statistics. Given today's economy, the move from the unemployment line to out and out welfare is swift.

Dealing in bigger numbers, this means that if all of the currently proposed pipelines are built, America will have gained 7,000 new pipeline operations jobs. In the process, it will lose 41,000 railroad jobs.

Congress has spent the past year agonizing over the condition of the railroad retirement account. In the end, we committed enormous amounts of money from labor, from management, and from the Federal Treasury to insure the retirement years of millions of rail employees.

It makes no sense to undo what we have accomplished for rail labor by passing legislation like H.R. 1010.

Mr. UDALL. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Chairman, I too was a witness to the rather interesting ad hoc discussion on water between our chairman and the gentleman from Wyoming (Mr. CHENEY). I want to at the start thank my chairman for giving me the additional time today to respond to that.

This legislation, whatever its intention is with regard to water rights, has at its core the desire to facilitate the utilization of water in coal slurry pipelines. That is the intent of it. You might do it by suggesting you are enshrining States rights. But it is indeed an enshrinement and a one-way street with regard to those particular rights.

This legislation in and of itself does a great deal in terms of preserving States rights, but only in a one-way fashion for the coal slurry use of that particular water. The use of the water for coal slurry pipelines even when such a State's action would otherwise constitute an impermissible burden on interstate commerce is provided in this particular legislation. States contesting the loss of their shared-waters diversion occurring in another State would be forced to rely on existing mechanisms which permit the State to seek legislative, judicial or compact allocations according to the Interior Committee report.

By contrast the States choosing to sell shared water would be armed with the extraordinary grant of congressional plenary power over water for coal slurry. Not only is that power granted in this bill on page 4 pursuant to the commerce clause article I, but it expressly delegated to States the power to establish and exercise in State law whether now in existence or hereafter enacted. It is about the broadest interpretation that one could write into law for the reservation, appropriation, use by that State. But nevertheless to abrogate any contracts that it has. And do such contracts exist within States? Yes, indeed they do. Much to my dismay, after having received answers in this, for example the Yellowstone River compact points out in article X, the agreement of course between the States of Wyoming, Montana, and North Dakota, no water shall be diverted from the Yellowstone River without the unanimous consent of all signatory States. The first line of article X. The rest does not compromise it. A full examination of that should be looked at, and the type of language that is included in this bill and the modification that it makes to the same language.

The legally operative effect of all of the bill's water language, especially

that purporting not to affect other States, is to streamline, literally to pave the way for the use of this water in coal slurry pipelines. And I might add in looking at this language, it is just filled with the same types of loopholes.

If you look at the top of the page that purports to affect or preserve States rights, "nothing in this act," the bottom of page 5, "or amendment made to this act shall preempt or otherwise affect States rights."

But only with regards to quality and disposal, not quantity. Interesting.

Mr. LUJAN. Mr. Chairman, I yield 1½ minutes to the gentleman from Missouri (Mr. COLEMAN).

Mr. SHUSTER. I would yield 1 minute to the gentleman also.

Mr. COLEMAN of Missouri. Mr. Chairman, I would like to thank you for this opportunity to share my views on the water resource issues associated with H.R. 1010, the Coal Slurry Pipeline Act of 1983.

Recent proposals indicate that coal slurry pipelines may result in the transfer of river waters for use outside their basin; I would like to focus my remarks on the concerns that have developed in the Missouri River basin in relation to these proposals.

As you know, the State of South Dakota has contracted to sell water from the Oahe Reservoir—which is connected to the Missouri River—to Energy Transportation Systems, Inc. (ETSI) for a coal slurry pipeline project. As I understand the agreement, ETSI will pay South Dakota $1.4 billion over the 50-year lifetime of the contract in return for as much as 16 billion gallons of water per year. This water will be transferred from the Oahe Reservoir to the Powder River basin coal mining region in Wyoming, where it will be mixed with coal; a coal slurry pipeline will then carry the 50-50 mixture from Wyoming to utility companies in Louisiana, Oklahoma, and Texas where they are expected to purchase the coal.

The drought and killer heat waves we have experienced in the Midwest in the last several years, especially this year, have made us realize that water, or the lack thereof, is the most serious long-range problem now confronting the region, and the Nation—potentially more serious than the energy crisis.

Just as Americans have discovered the hidden costs of energy in a multitude of products, they are also about to discover the hidden costs of water. According to water experts, you can begin with the water that irrigated the corn that was fed to the steer, and find that a single Kansas City steak may have accounted for 3,500 gallons. The water that goes into producing a 1,000-pound steer would float a naval destroyer. It takes 14,395 gallons of water to grow a bushel of wheat, 60,000 gallons to produce a ton of steel, and 120 gallons to put a single egg on the breakfast table.

We can hardly ignore the impact of diversion on the cities and towns that utilize the Missouri River for drinking water. For example, in Missouri, nearly 60 percent of the population received their drinking water from the Missouri River, including those who reside in our two biggest metropolitan areas, Kansas City and St. Louis.

The South Dakota/ETSI coal slurry pipeline sale raises a significant concern for those of us in downstream States. The sale will result in the large-scale transfer of water from a State in one basin to a State in another basin. It is the precedent set by this interbasin transfer that most concerns me. Sponsors of this bill say they resolved water rights problem by delegating to the States the powers to decide whether any water would be sold to coal slurry companies. I feel their solution only compounds the problem. This gives upper basin States a blank check to sell water. We in the downstream States do not have any safeguards. Perhaps there would not even be any water left by the time the river gets to us. This will certainly cause conflict between the upper and lower basin States.

When water is used for irrigation, municipal consumption, or industrial applications within a water basin, about 60 percent of the water returns to the basin. If coal slurry pipelines begin operating, we will see water from the Missouri River eventually ending up outside the basin, and not one drop of the pipeline water will ever be returned to the Missouri River basin.

We are all aware that the Colorado River is virtually exhausted by the time it reaches Mexico. The distribution of its water by the U.S. Supreme Court to the seven States through which it flows has not worked. Because of a tangle of unreasonable demands and court decisions, these States and Mexico have legal rights to more water than the Colorado River contains. Before a similar point of no return is reached in reference to the diversion of Missouri River water, a solution to the controversies surrounding the diversion of Missouri River water must be achieved. Of course, the best solutions to the problems surrounding the diversion of Missouri River water would be the voluntary implementation of an interstate compact on water use by the 10 basin States. However, as of this time, the States have not come together to work out a plan for future utilization of the river.

I am also concerned about the fate landowners would face if the privilge of eminent domain is given to private industry without any restrictions. Landowners in South Dakota testified before the Agriculture Subcommttee on Conservation, Credit and Rural Development that officials from ETSI tried to use one neighbor against the other in acquiring contracts. One landowner stated, "They (ETSI officials) planned to use that old routine of muscle your way through and threaten and bluff."

Permitting coal pipelines to use eminent domain without any restrictions is dangerous to landowners. It says that big corporations are more important than small landowners * * * no matter that they bought the land with their blood, sweat, and tears. As many of you know, ETSI pipeline recently lost a bid for a contract with Arkansas Power & Light. Because of increased construction cost of the pipeline, ETSI was not able to compete with railroad transportation. There is talk that ETSI will reroute its pipeline to Texas. How many more landowners will be harassed by this corporate giant because of the new route.

Finally, I am concerned with the liability aspect. Who is responsible for cleaning up coal slurry spills? How many times is this liability extended? The amendment I plan on offering would require the agency issuing a construciton permit to determine the liability of the coal slurry company and the landowner before the permit is issued. This will provide adequate safeguards to the landowner and the pipeline company.

Once again, I urge my colleagues to join with me in opposing the Coal Slurry Pipeline Act of 1983.

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

□ 1750

Mr. EDGAR. Mr. Chairman, I rise in strong opposition to this coal slurry pipeline bill and I do so for a number of reasons, the most important of which for me is the issue of water.

As you know, I have taken the well of the House on several occasions to talk about the quantity and quality of our water, the water development in this Nation, and I think the previous speaker focused on the issue very well in talking about the water being pumped into these pipelines that in fact can be pumped out of a watershed, water that could be used by downstream States but in this instance is piped to another watershed and used for another purpose.

We had a previous speaker who talked about the quality of this water when it comes out of the pipeline and what it is used for and how it is going to cool down powerplants and power facilities.

That may be true in some cases but I think it is a mistake for us to give national eminent domain, to not have in place a water policy that aids all of the States in the region in knowing

where the water is going to come from and where it is going to go; and, third, answers the real questions of what is the impact going to be in terms of both the entry water and the exit water.

I belive that if the people who proposed to develop coal slurry pipelines were really serious they would have come to us a few years ago and said we would like to build a pipeline from point A to point B and from point C to point D. Here are the areas that it is going to cross and here is the water we are going to use. Here is the water we are going to dispose of and here is how we are going to do it in these two instances. Give us that opportunity to demonstrate that it works and then perhaps we will come back and add different pipelines on in the future in an interstate water system.

But that is not what they want. They want national eminent domain, carte blanche, to put pipelines where they want with no justification of where the water use to going to be or to come from.

I urge opposition to coal slurry pipelines.

Mr. Chairman, I rise in opposition to H.R. 1010, the Coal Pipeline Act. Although I have a specific concern on the water issue which will be dealt with when amendments to this bill are considered, I also have a number of other concerns which go to the very heart of the legislation before us.

On the water issue, I was the original author of an amendment in the House Public Works and Transportation Committee which would guarantee protection of all States affected by a transfer or sale of water for use in a coal pipeline. This amendment, which I will work for on the floor, would require States to have an interstate compact in effect before water diversions for pipeline use may take place.

There is also a serious water quality issue to be considered. At this point, we have only the assurances of pipeline developers that wastewater at the receiving end of proposed coal slurry pipelines can be treated and returned to our rivers and streams without harm to public health. The EPA has not yet completed all its studies on the water quality issue. The only existing pipeline in use cannot discharge its wastewater, but rather disposes of water in huge evaporation ponds in the Arizona desert.

Pipelines safety issues present a problem. Our experience with existing oil pipelines proves beyond any doubt that pipelines can and do break and leak. The coal, dirty water, and solvents will eventually find its way into the soil and ground water in many of the areas now slated as pipeline routes. Such leaks will be disastrous for the environment, public health, and agriculture.

No provision has been made in this bill for the serious problem of dislocation of rail workers, thousands of whom stand to lose their jobs as a result of coal slurry legislation. Labor protection language has been repeatedly rejected by coal slurry supporters, many of whom have supported strong labor protection provisions on other transportation legislation or on legislation dealing with foreign trade.

The cost of this legislation to the economy as a whole will be enormous for an investment which is dubious and speculative at best. Although supporters of the bill argue that no Federal money will be provided, the fact is that this investment will be a direct result of action by the Federal Government. According to an August 22 article in the Wall Street Journal the current cost estimate for the 1,200 miles ETSI pipeline is $3.8 billion. Multiply this figure by the proposed 10,000 miles of coal pipelines which are currently proposed across the Nation, and it is clear that we are talking about an investment of over $30 billion in coal pipeline technology. The impact of this tremendous diversion of capital on interest rates to housing, for small business, for revenue bonds, and for public infrastructure improvements will be horrendous.

All of these issues, water supply and quality, labor protection, safety and public health, and enormous cost are critical reasons why the coal slurry bill as a whole is unacceptable and must be defeated by the House. We have an example of this kind of dubious investment in the half-built and shut down nuclear powerplants today strewn across the Nation, a waste of billions of dollars for taxpayers and consumers. In our haste to develop nuclear power, ignoring the problems associated with that techology, we got the accident and Three-Mile Island and the the other disasters which are so familiar today. I am convinced that we would make an equally disastrous commitment by passing the bill before us today.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Chairman, I rise today in opposition to the Coal Pipeline Act.

I represent a coal-producing region. As a matter of fact, it is one of the biggest coal-producing districts in the country. And although this bill is intended to benefit coal, I would like to tell you why I have decided to vote against it and why I would urge my colleagues to vote against it.

First and foremost, the coal slurry bill is not in the best interest of the American coal industry. It might help a few, very large coal companies. But the vast majority of our companies are small, and not only would not they be helped by coal slurry, they would probably be badly hurt by it. Most of these companies would not ever have access to the pipelines—and even if they did, the loss would be prohibitive. And coal companies left shipping by rail would be forced into paying higher rates.

Let me explain how this would happen.

The bill addresses the access question through a system designed to guarantee fair access to the pipeline. Any coal company could apply for certification as an original supporter of the pipeline, which would guarantee them a certain volume of coal movement and access to the pipeline. Unfortunately, however, very few small companies have the long-term contracts with buyers which would allow them to become original supporters.

This means that very few small companies would have convenient access points. The rest would be forced to transport their coal across the hills and hollows—places where the railroads now run but where the pipeline never would be laid—all the way to these few access points. And they would probably have to haul their coal by truck, adding precious dollars onto their costs.

And even if they could get access, many smaller companies would face serious rate problems when they tried to use the pipeline. The bill allows for contracts between the coal companies and the pipelines. But since the smaller companies rarely have long-term sales commitments, they would not be able to enter into these long-term transportation contracts. Instead, they would pay on a tariff basis—and we would find a repetition of the current rail situation where we have a two-tiered rate system, with large companies paying one rate and the smaller operators paying a much higher rate.

And of course, without the big companies defraying the railroads' overhead costs and line maintenance costs, the smaller companies would be left to pick up the tab—and this spells out to even higher rail rates than they face today. As Department of Transportation officials have confirmed in congressional hearings, if the pipeline skims off the lucrative coal traffic, other users, and that includes smaller coal operators, would be forced into paying higher rates.

So what this bill gives us is a transportation alternative for the big companies, but higher transportation costs for the small companies. In my mind, Mr. Chairman, this bill is no answer to our coal transportation problems. Every year, more and more small coal companies are forced to shut down. I am deeply concerned that this bill, by raising smaller companies' shipping costs, would force even more of them to fold up.

Let me point out some additional problems with this legislation.

This bill would mean lost jobs. While the slurry pipelines' supporters argue that the pipeline would give us construction jobs, the fact is that it would lead to a loss of about 41,000 railroad jobs. Of course, we need construction jobs during these days of high unemployment. But the fact remains that the railroad jobs are permanent jobs and the construction jobs would only be temporary. And Mr. Speaker, it makes no sense at all to give up these permanent rail jobs in exchange for some temporary jobs.

I am also concerned that this bill could hurt our railroad retirees. The Congress has just finished legislation to shore up the railroad retirement system. But if we lose another 41,000 workers, which the slurry bill would force us to do, there would be fewer workers paying into the railroad retirement system. That would force the system into further chaos and could lead to another shortfall, putting our retirees' benefits into jeopardy once again. Mr. Speaker, I would urge my colleagues to be extremely cautious in any legislation that might endanger these hundreds of thousands of retirees' benefits.

Finally, Mr. Speaker, I would like to point out that the coal slurry pipeline is bad for agriculture. They would suffer with higher rail rates once the big coal companies were no longer paying their share of the overhead costs on the railroads.

And of course, there would be the huge loss of water. It seems especially ironic that at the same time we are in the middle of the worst drought we have had in years, we are considering a program to give away 13 billion gallons of water every year. This can only mean higher irrigation costs for our farmers in years to come.

Of course, I understand the goal of the authors of this bill. I do believe that in some cases our rail rates have climbed too high and that we do need to find a way to keep them at a reasonable level. But I am convinced that the way to do that is to address the problems in the Staggers Act and to work with the ICC to maintain a reasonable system of regulation to protect our captive shippers.

But, Mr. Chairman, the answer to our rail problems is not to raise the small coal operators shipping costs, is not to throw away 41,000 railroad jobs, is not to jeopardize our railroad retirement benefits, and is not to raise our agricultural shipping costs. In short, this coal slurry bill, designed to benefit a handful of companies, is not the answer we need.

I urge my colleagues to work with me in addressing the problems of our rail rates—but to defeat the bill before us today.

Mr. LUJAN. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. Mr. Chairman, we are approaching the end of the debate period on this very important bill and we have heard a lot of discussion about water rights, and unemployment issues, take or pay contracts, environmental concerns, and all of these are going to be debated at length, I am sure, under the 5-minute rule.

But for me, the issue really comes down to this, and the reason that I support the coal slurry legislation is because I think on the issue of fairness it is abundantly clear that this is legislation that has been delayed too long and really deserves to see the light of day.

I think it is intrinsically unfair, Mr. Chairman, for one mode of transportation, the railroads, which have a near monopoly on the transportation of coal in this country, to arbitrarily block, and let us make no mistake about it, it is solely the railroads that have blocked the development of coal slurry pipelines in this country.

It is intrinsically unfair for them to exercise the club which they have to prevent the development of a competitive mode of transportation.

Competition, after all, in the marketplace in this country has been the driving force behind the development of this country in so many other fields. It allows the entrepreneurs of our society to flourish by developing and marketing new products and services.

But in the coal transportation market there is not much competition because, quite frankly, most of our Nation's coal production is transported by railroads. Trucks, sure, for the short hauls, while barges are useful in some areas where convenient water systems are available.

But for the last 20 years the Congress has debated the merits of the fourth alternative, coal slurry pipelines, and has reached no resolution solely because of the opposition of railroads in this body.

Since the 19th century railroads have enjoyed this near monopoly and they had the right of eminent domain when they were developed and they have used that ownership to thwart the construction of coal slurry pipelines.

The railroad industry argues that coal slurry pipelines will result in massive unemployment as their historic markets are captured by a cheaper mode of transportation.

It is interesting to me that the only time we have really come into competition, that is where railroads have been in direct competition with coal slurry pipelines, it was the coal slurry pipeline that was shut down. So I do not really feel that it is a valid argument to suggest that in every event railroads are going to suffer as a result of the competition of coal slurry pipelines.

No, Mr. Chairman, it seems to me that in every other area of endeavor in this country we permit, we encourage competition. There is no reason for any difference in the method of transportation of coal and, therefore, Mr. Chairman, I would most strongly urge a favorable vote on coal slurry pipeline by the House.

Mr. Chairman, competition in the marketplace has been the driving force behind our Nation's No. 1 position in the world economy. It allows the entrepreneurs of our society to flourish by developing and marketing new products and services. In the coal transportation market, there is not much competition because most of our Nation's coal production is transported by railroads. Trucks are used for short hauls while barges are advantageous where a convenient water system is available. For the last 20 years, Congress has debated the merits of a fourth alternative, coal slurry pipelines.

Since the 19th century, railroads have enjoyed the right of eminent domain and they have used their ownership of rights-of-way to thwart the construction of coal slurry pipelines. The railroad industry argues that coal slurry pipelines will result in massive unemployment as their historic markets are captured by a cheaper mode of transportation.

Yet, several studies predict greater domestic and international coal consumption. The increased demand for coal cannot be met by our railroads alone. We must provide for modern means of transporting coal in order to meet future demand. This capacity cannot be built overnight without overcoming the legal monopoly that only railroads enjoy by restoring fair play in the marketplace.

Furthermore, the Interstate Commerce Commission must, under this bill, make a determination during the certification process "on the extent to which the proposed pipeline or extension would have an economic impact on any other common carrier or would affect the type or level of transportation services of any other common carrier." In other words, this provision is an important requirement in determining whether or not the proposed pipeline or extension is or will be required by the present or future public convenience and necessity before the right of eminent domain is granted to coal slurry pipelines at the expense of railroad interests.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, I rise in opposition to H.R. 1010, the Coal Pipeline Act of 1983.

Although H.R. 1010 was not referred to the Committee on Energy and Commerce, on which I serve, I have some strong concerns that the legislation will have a negative impact on an area within our jurisdiction—the rail industry.

The construction of coal slurry pipelines could have a devastating impact on rail employment. In testimony given before the Energy and Commerce Committee, representatives of the rail industry estimated that it would lose roughly 41,000 permanent jobs as a result of these pipelines.

In August of this year, rail unemployment was 51,900, according to the Railroad Retirement Board. In the past 1½ years, rail employment levels have dropped off approximately 25 percent. The railroad unemployment compensation program which pays unemployment benefits to furloughed rail workers is currently in debt over half a billion dollars. This amount is owed to the railroad retirement system which itself until the recent passage of legislation has been on the brink of insolvency. This system is dependent in large part on the contributions of active workers and rail carriers.

Clearly, the rail industry can ill afford the loss in employment the operation of these pipelines will cause.

If the transport of coal is diverted from rail to coal slurry pipelines, the overall financial health of the rail industry, which only recently has begun to get back on its feet would be severely jeopardized. The better economic outlook for the railroads, achieved in large part through deregulation under the Staggers Rail Act of 1980, could well be reversed by this legislation. Coal is the railroads single most important commodity, representing 40 percent of its traffic. According to the slurry pipeline data, 250 million tons of coal annually will be moved in pipelines. This translates into lost rail revenues of $3.5 billion.

Slurry proponents attempt to allay our fears with the assertion that coal production in the United States will increase in the future, with the result that the rail industry will not realize any harm from the construction of pipelines.

Yet, according to the American Association of Railroads, the railroads are ready, willing, and able to handle any increase in coal production if one should occur, with 60,000 excess coal hoppers and 5,000 excess locomotives. This available equipment would enable the railroads to haul 30 percent more coal than they currently do.

This legislation also raises other serious concerns including:

First, the proper handling and disposal of slurry effluent, a potentially hazardous waste;

Second, the use of take-or-pay contracts, under which utilities would be required to purchase large quantities of coal over long periods of time, which will have the effect of "locking in" consumers and freezing out competition by railroads; and

Third, the use of massive quantities of water, aggravating the already scarce water supplies in the West.

I know my colleagues on the Public Works and Transportation Committee and the Interior and Insular Affairs Committee will speak to these concerns in greater detail during the course of this debate.

Given the unresolved problems and uncertainties that this legislation poses, I simply cannot support H.R. 1010 and would ask my colleagues to do likewise.

Mr. LUJAN. Mr. Chairman, could we have an indication of the time remaining by each each one, please?

The CHAIRMAN pro tempore. The gentleman from Arizona (Mr. UDALL) has 5½ minutes; the gentleman from New Mexico (Mr. LUJAN) has 4½ minutes; the gentleman from Pennsylvania (Mr. SHUSTER) has 1 minute; and the gentleman from California (Mr. ANDERSON) has 5 minutes.

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, for some long time, I have had a bill in which would say that no State will be permitted to sell water outside its own boundaries if that water would normally come from outside its boundaries and would normally flow through the State to other States unless there was a compact among the States in the drainage basin which authorized such sale.

It is my understanding that such an amendment will be offered on this bill and I certainly urge support.

But the main reason I wanted to speak was that, as I appeared before the Committee on Interior and Insular Affairs, I advised the committee that I did not have a particular stand on coal slurry pipelines and I want you to know that was a truthful statement.

I think I approached it with an open mind.

But I would hope that before people vote on this bill, they would read the testimony of three South Dakota ranchers as they came before our Agriculture Committee, to state what had happened to them when South Dakota had given eminent domain to the ETSI Pipeline Co. to transfer, move across their land.

In effect, what they said was that the pipeline company had told them we do not care if it makes more sense to run the pipeline in this part of your farm; we do not care if that is where it would be best for everybody involved; this is where we are going to run it. If you do not like it, you can go to court.

I asked people: Is that really what you want to do at this time all across the country for everybody, for all farmers?

I think there is some sense to what the gentleman said, that we should require the railroads, to permit them to go across their territory, but that is not what we are doing in this bill.

We are saying that every farmer in the country will have to do whatever the pipeline tells them they have to do unless they want to go to court.

I ask you: How many farmers are going to want to do that?

I urge the defeat of this bill.

□ 1800

Mr. LUJAN. Mr. Chairman, I yield 2½ minutes to the gentleman from Wyoming (Mr. CHENEY).

Mr. CHENEY. Mr. Chairman, I rise in support of the pending legislation to allow coal slurry pipeline companies to acquire rights-of-way so that they might compete for the business of transporting America's coal to market.

In past years, when coal slurry legislation came up for consideration, I voted against it because I felt the previous bills did not offer adequate protection for the rights of the individual States with regard to any water that might be needed for coal slurry pipelines, and for landowners whose land might be crossed by pipelines.

However, this year's bill contains important new provisions which I offered as amendments in the Interior Committee that will safeguard State water laws and enhance protection for landowners who might find themselves involved in eminent domain proceedings with coal slurry pipeline companies. Because these provisions were included, I voted for the coal slurry bill when it was adopted by the Interior Committee, and assuming the bill is not changed by the House in a way that would damage the protections it currently contains, I intend to support its approval by the House.

This bill will benefit the Nation by removing a major barrier to the development of a new method of transporting coal. More transportation alternatives will mean more efficient, and likely increased, coal development, thereby reducing our dependence on foreign oil, creating jobs, stimulating the economy, and providing fuel for industry and consumers.

And by putting the Congress forthrightly on record as endorsing State authority and control over water with respect to coal pipelines, the bill sets an important new precedent for protecting the rights of States to allocate and manage their own water resources, free of Federal and judicial interference.

THE WATER ISSUE

Much of the coal to be moved by any slurry pipelines that may be built is located in the West where water is a scarce and precious commodity. Consequently, a major element in previous debates on this issue has been how to safeguard the ability of the individual States to decide whether water should be committed at all to slurry pipelines, and if so, how much and under what conditions. But concern over this aspect of the issue changed to alarm for those of us representing water-short States in the wake of two recent court decisions which have the effect of leaving the States all but powerless to limit the export of their water, whether for slurry pipelines or other purposes.

The U.S. Supreme Court, in Sporhase against Nebraska, and a Federal District Court in El Paso against New Mexico, have declared groundwater (and, by implication, surface water) to be an article of commerce under the Constitution's commerce clause and have said the States may not restrict the flow of water outside their boundaries except in the most narrow of circumstances. In effect, these court decisions have stripped the States of their ability to manage and control their own water resources.

Earlier versions of coal slurry legislation considered by previous Congresses included water-related provisions designed to make it clear that the individual States would have full authority to decide whether water would be committed to slurry pipelines. But the subsequent Sporhase and El Paso decisions have underlined the importance of such water provisions and have made it essential that the Congress act to restore State authority and control over water.

These court cases clearly have struck down State laws prohibiting the export of water except in the most restricted of circumstances. Wyoming Governor Ed Herschler, in a recent letter, had this to say about the El Paso decision:

What is surprising and most disconcerting in the El Paso decision, is the very narrow interpretation that the judge gave to the public health and safety standards set forth in Sporhase. Judge Bratton's interpretation of Sporhase that "a state may discriminate in favor of its citizens only to the extent that water is essential to human survival" is an exceedingly narrow and unwarranted interpretation of the Sporhase decision.

Governor Herschler goes on to say that—

There are probably no statutes in the Western States governing the export of water that can pass constitutional scrutiny. If El Paso is affirmed on appeal, it is probable that the State statutes governing the export of water can only be upheld if Congress expressly immunizes them from Commerce Clause challenge.

Accordingly, in consultation with several lawyers and water experts, I developed language for this year's coal slurry bill that will guarantee State authority over water allocation decisions where coal slurry pipeline decisions are concerned and insulate that authority from judicial challenge on the basis of the Constitution's commerce clause.

The provision I developed, which was approved by both the Interior and Public Works Committees, specifies that Congress expressly delegates to the individual States the power to decide whether any water will be allocated to any coal slurry pipeline. It also provides that all State laws, practices, and procedures relating to water allocation would have to be followed. States would have the right to interrupt or terminate the use of water if they deemed it necessary.

In my view, this water language accomplishes the following: First, it makes it crystal clear that not a drop of water will ever flow into an interstate coal slurry pipeline unless the State concerned allows it to happen. Second, it places the Congress squarely on record as having recognized the legality of State control over water. It delegates to the States full and complete control over water with respect to slurry pipelines and insulates State decisions from legal challenges such as those in Sporhase and El Paso. In the language of the provision, itself:

. . . Congress declares that the development of coal pipelines may occur only if now or hereafter permitted by state water law and interstate allocations, and hereby delegates to and ratifies the exercise of such authority by the states . . .

EMINENT DOMAIN AUTHORITY

The whole purpose of Federal coal slurry pipeline legislation has been to help pipeline companies obtain rights-of-way for pipelines by allowing the limited use of Federal eminent domain authority. One of my objections to earlier bills was that the eminent domain provisions ignored State laws on eminent domain and were not sufficiently protective of property rights. Each State has its own unique eminent domain laws which have been developed over the years according to local conditions and circumstances. It bothered me that earlier bills did not take into account these State statutes.

Consequently, I revised the eminent domain provisions of this year's bill so that they would more closely parallel State eminent domain laws. Specifically, under my provision which was accepted by the Interior and Public Works Committees, a pipeline exercising Federal eminent domain authority would have to conform to the laws, practices, and procedures of the State in which the property was located with regard to compensation, trial by jury, and siting alternatives. These changes significantly benefit individual States and insure that citizens will be afforded the same protections and benefits in any coal slurry eminent domain proceeding as they would receive under State law with regard to compensation, trial procedure, and location of the pipeline. Other amendments adopted by the committees have provided further protections for property owners, such as requiring proceedings to occur in State court unless a landowner chooses otherwise and providing attorney's fees to landowners if bad faith negotiations occur before an eminent domain action begins.

COAL AND OUR FUTURE

Last year, Wyoming was the No. 3 coal-producing State in the Nation, and we possess vast reserves of low-sulfur, surface-mineable coal—enough to help meet America's energy needs for many years into the future. Coal is an important component of my State's economy, and Wyoming citizens benefit from its development and exportation, as do millions of consumers in other States who receive their electricity from Wyoming coal.

Wyoming is also a large, sparsely populated State with vast undeveloped areas, magnificent national parks and forests, and clean air—all of which must be protected. The demand for Wyoming's coal comes not from the people who live in Wyoming, but from those who live in cities far away in Texas, Illinois, and elsewhere. In order to meet that demand, there must be reasonably priced methods for moving the coal from where it is mined to where it will be burned.

If we don't move the coal to those who use it, the only other alternative is to build the powerplants in Wyoming at the mine sites, and then move the power to the consumers by means of high-voltage powerlines—an option I do not favor.

Right now, western coal moves by rail, and millions of tons of Wyoming coal wend their way daily over many miles of track from Wyoming to points in all directions. It may well be that, at some point, it will make sense for there to be other methods of transportation in addition to railroads, such as slurry pipelines.

The problem with slurry pipelines for a State like Wyoming is that they may require the use of water. There is the possibility that, in time, other substances may be perfected for mixing with the coal, such as liquid carbon dioxide, so that water will not be needed. But most of the discussion about coal slurry pipelines at this point in their evolution has involved water—a word guaranteed to perk up the years of any Westerner.

My own view of the coal slurry/water issue is best expressed by a sentence included in my amendment to the bill we are discussing: "The need for coal pipelines is subservient to the national interest in the primacy of

State water law and interstate allocations of water." Because in this bill, the Congress agrees to give Wyoming and other States absolute, unquestioned, legally-defensible authority to determine whether any water will ever be allocated to a slurry pipeline and to specify how that water will be obtained and used, I am willing to support legislation to facilitate rights-of-way for coal slurry pipelines.

COAL SLURRY AND RAILROADS

The main opposition to coal slurry legislation has come from railroads. In the West where enormous reserves of coal are located, the railroads are currently the only means of transporting coal. The railroads have lobbied hard against the pending legislation to give slurry companies the right to obtain rights-of-way by means of eminent domain.

But competition is the lifeblood of the American economic system—a fact which the railroads, themselves, emphasized in the 1800's when they, too, successfully sought and received from Congress the right to use eminent domain authority to acquire their rights-of-way for rail lines. More recently, the railroads trumpeted the benefits of competition and free enterprise to convince the Congress to free them of unnecessary Federal regulation, and Congress responded by passing railroad deregulation legislation.

Proof of how competition for the right to haul coal is beneficial can be found in the recent contract between the Union Pacific Railroad and Arkansas Power and Light to transport coal from Wyoming's Powder River Basin to Arkansas. Arkansas Power and Light invited bids for hauling the coal, and received proposals from the ETSI coal slurry pipeline company and two railroads. One railroad submitted a bid for hauling the coal all the way from Wyoming to its destination, while the other offered to serve only part of the route. The low bidder was the railroad, but Arkansas Power and Light has indicated that if there had not been competition from the slurry pipeline company, the cost of hauling the coal by rail would have been significantly higher. As it is, the prospect of being underbid by a coal slurry pipeline company forced the railroad to carefully examine its charges, with the result that Arkansas Power and Light will save some $16 billion in transportation costs over the life of the contract as a direct result of the effects of competition. This is good for the consumers, good for Wyoming because of the jobs and tax revenue that will be generated by the mining and railroad activity, and good for the railroads because they will be forced to run a more efficient, effective system with competition than without.

Wyoming is fortunate to have vast coal resources—enough to aid our economy for many, many years to come. But because we are a long way from our markets, we can compete only if there are economical ways to move our coal. Over the past several years, the price of coal has increased by less than 10 percent, but the cost of shipping it from Wyoming to Texas, for example, has increased by nearly 260 percent. Coal slurry pipelines may provide the competition that will force more reasonable rates for hauling coal, which will benefit Wyoming.

One of the methods the railroads have used to try to stop the pending coal slurry legislation has been to urge their current and former employees to lobby the Congress. In their letters to their employees, they have made certain statements which I believe deserve a response, and I would like to discuss these statements:

First, the railroads are telling their employees that legislation to grant coal slurry pipelines the right to use eminent domain authority to acquire rights-of-way is "unprecedented," constitutes the granting of "extraordinary Federal powers," and is "special interest" legislation.

What they have neglected to tell their workers is that in the 1800's when the railroad industry was attempting to establish itself, it received from Congress the same eminent domain authority. Furthermore, the Congress gave almost 10 percent of the land mass of the continental United States to the fledgling railroad industry for rights-of-way—some 145 million acres of land representing an area bigger than the combined States of Florida, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Maryland, and Delaware. Much of this land is still owned today by the railroads, and is valued in the billions of dollars.

The coal slurry pipelines, on the other hand, would receive under the pending bill neither free land nor free rights-of-way from the Federal Government. What they would get is the same power of eminent domain which the railroads used to build our rail system, except that landowners would have greater protection than before. And wherever that power may be used, the pipelines would have to provide just compensation to the owners of any land that may be used for a right-of-way.

Second, the railroads are telling their employees that the pending bill would "give coal slurry promoters the right to take land from ranchers, farmers and other property owners for pipeline rights-of-way."

What they have failed to point out, as I previously mentioned, is that just compensation would have to be provided any time the eminent domain authority might be exercised. Moreover, the pending bill contains provisions far more protective of landowners than ever before in any previous eminent domain legislation, so that any landowner who may be affected by a slurry pipeline's use of eminent domain procedures will have many more advantages than did landowners who were affected in the past by the railroads' use of earlier eminent domain powers granted by Congress.

Third, the railroads are telling their employees that the competition from coal slurry pipelines will cause the loss of thousands of jobs in the railroad industry, and that pipelines will siphon off coal hauling business, leaving the railroads in financial difficulty.

What they are not saying is that coal production is expected to rise to 1½ billion tons by the mid-1990's, and there is no way the railroads could be carrying less coal in the future. Their share of the hauling market will increase, even if every proposed pipeline were to be built. If all of the proposed pipelines were to be in operation by 1995, which is unlikely, they could carry about 180 million tons of coal per year. This leaves 1.3 billion tons annually to be carried by existing methods of transportation, and that mainly means railroads. Any way you look at it, the railroads are expected to be carrying more than 800 million tons of coal annually, more than is produced today.

According to a recent analysis of coal by the Joint Economic Committee of the Congress, more than 13,000 rail jobs are created for every 100 million tons of annual coal production carried by rail. Simple arithmetic shows that rather than suffer job losses, the railroads can expect to hire some 40,000 new workers by the mid-1990's.

The railroads have also contacted their retired workers to say that coal slurry pipelines would jeopardize the railroad retirement system. In my view, this tactic is the most unfortunate of all the weapons the railroads have used to fend off competition from slurry pipelines. As I have just pointed out, even if all of the pipelines that have been proposed to date were to be built, which is unlikely, the railroads will still be hauling the vast majority of this Nation's coal, and their volume can only increase in future years. Therefore, they will be hiring more workers, who will be paying into the retirement system to help keep it solvent. Congress has just this year enacted legislation to shore up the railroad retirement system, and there is nothing in the pending coal slurry legislation that would in any way jeopardize railroad retirement. If anything, the bill could benefit retired citizens by injecting needed competition into the coal-hauling business, thereby assuring more reasonable utility rates, which frequently are a burden on retirees living on fixed incomes.

Fifth, the railroads are saying that pipelines would "rob our agricultural shippers of scarce water." As the Representative from a State where water is a scarce and precious commodity, I spend a great deal of my time in Washington on water-related issues, and no one is more conscious of the importance of adequate water supplies to the future of a State like Wyoming. I have commented at length earlier in this statement about the water provisions of this bill, which grant solely to the individual States the right to decide whether any water will be committed to a slurry pipeline.

Without such authority for the States, I could not support coal slurry legislation. This language affords the States the authority and protection they need to manage their own water resources.

I would also like to comment briefly on the volume of water we are talking about for coal slurry pipelines. A pipeline uses only one-fifth to one-seventh the amount of water that would be required for an electrical powerplant at the mine site. Because Wyoming is so far away from most of the markets for its coal, there are only three ways our coal can be moved to market: by rail, as it is now, by building the plants in Wyoming at the mines and exporting the power by means of high-voltage transmission lines, or by a combination of rail and coal slurry, should the State of Wyoming decide it wishes to allow the export of coal by slurry line. I personally would not want to see Wyoming become the location for more powerplants which would provide power to people living elsewhere. I would prefer to see our coal exported to those who ultimately will use it. And that brings us to yet another statement the railroads have made, which is that slurry pipelines would "harm the environment."

As a Wyoming citizen, I would much rather see my State's coal shipped to the place where it will be used for burning than to see it burned at powerplants in Wyoming and the power exported via transmission lines. Moreover slurry lines would be buried underground in most cases where they would be silent and invisible. Wyoming is a State of vast, open areas and clean air. I would like to keep it that way.

And finally, Mr. Chairman, I would like to conclude these remarks with a comment about the importance of competition. It is essential if we are to grow and prosper as a Nation, and it accounts for our progress to date.

I would like to bring to the attention of the House of Representatives a rather remarkable letter written in 1829 which says something about the position the railroads are taking now on the possibility that slurry pipelines might haul some coal.

The letter was written by Martin Van Buren, then-Governor of New York, to then-President Andrew Jackson, on January 31, 1829. I would like to read it:

TO PRESIDENT ANDREW JACKSON: The canal system of this country is being threatened by the spread of a new form of transportation known as "railroads." The federal government must preserve the canals for the following reasons:

One. If canal boats are supplanted by "railroads" serious unemployment will result. Captains, cooks, drivers, hostlers, repairmen and lock tenders will be without means of livelihood, not to mention the numerous farmers now employed in growing hay for horses.

Two. Boat builders would suffer and towline, whip and harness makers would be left destitute.

Three. Canal boats are absolutely essential to the defence of the United States. In the event of the expected trouble with England, the Erie Canal would be the only means by which we could ever move the supplies so vital to waging modern war.

For the above-mentioned reasons the government should create an Interstate Commerce Commission to protect the American people from the evils of "railroad," and to preserve the canals for posterity.

As you may well know, Mr. President, "railroad" carriages are pulled at the enormous speed of 15 miles per hour by "engiles" which, in addition to endangering life and limb of passengers, roar and snort their way through the countryside, setting fire to crops, scaring the livestock and frightening women and children. The Almighty certainly never intended that people should travel at such breakneck speed.

It is in the national interest to develop our coal reserves. To do so will create jobs, lessen our dependence on foreign oil, and help meet our energy needs. In order to use our coal, we must have efficient, reasonably-priced ways to transport the coal from where it is mined, to where it will be used. The railroads have always done a remarkable job of providing this transportation, and they will continue to do so in the future. They will be hauling more coal than ever before.

But there is always room in our system for competition, I see no reason why coal slurry pipelines should not be allowed to compete if they can with railroads.

● Mr. MATSUI. Mr. Chairman, coal slurry proponents contend that H.R. 1010 is necessary to foster meaningful competition for the transportation of coal. The Udall-Howard substitute does nothing to prevent the creation of anticompetitive situations and has even taken steps away from earlier versions that provided some safeguards. In particular, the substitute provides no review of contracts by the Attorney General in order to identify contract provisions that may be inconsistent with the antitrust laws.

Distrubing trends in the ownership of captive coal production by electric utilities and acquisition of coal reserves by major oil companies highlight the particular anticompetitive potential for H.R. 1010. According to a February 1982 report by the Federal Energy Regulatory Commission—

Captive Coal is rapidly increasing in importance as a source of fuel for the electric utilities. In 1965, 13 million tons or about 6 percent of all coal used by electric utilities came from captive mines. In 1978, captive coal deliveries totaled 67 million tons or 14 percent of total coal deliveries to the electric utilities. Captive coal production is projected to reach 143 million tons by 1985, when it will account for 20 percent of the projected 1985 total utility coal consumption.

Of the nine possible coal slurry pipelines, three are owned or controlled by major electric utilities which also have purchased or reportedly have plans to purchase substantial captive coal production or coal reserves. One source indicated that the Nevada Power Co.—sole owner of the Allen-Warner coal slurry pipeline—would increase its captive coal production from 800,000 tons in 1975 to 3.5 million tons in 1985 or over a 400-percent increase. Therefore, it is likely that electric utilities will own the pipeline, the coal and the generating source. In previous versions of this legislation, slurry proponents included Federal rate regulation to prevent pipelines from being "able to charge monopoly prices for use of the pipeline." In the substitute to H.R. 1010, Federal rate regulation is abolished. In previous versions of this legislation, slurry proponents hailed a control provision, similar to ours, as a way to "prevent serious anticompetitive situations from developing rather than trying to deal with such situations after the fact when corrective action poses much greater obstacles." This legislation has been stripped of any meaningful antitrust protections for the American energy consumer and could foster gigantic energy monopolies.

The other disturbing trend is the substantial increase of major oil companies acquisition of coal production and their deep involvement in coal slurry pipelines. Today 6 of the top 15 coal producers are now owned by major oil companies and they have increased their ownership of coal production in 1977 of 13 percent of U.S. production to 25 percent of U.S. production or a 92-percent increase.

Of the nine possible coal slurry pipelines, three are owned or controlled by energy companies that own substantial coal reserves and five are owned or controlled by major oil companies or small oil companies that would be susceptible to acquisition. An investigation of the energy interests that control the proposed coal slurry pipelines reveals that collectively they own 14 billion tons of coal reserves or nearly 10 percent of all U.S. coal reserves.

Big oil's interest in this legislation becomes very clear when of the five mines scheduled to feed the ETSI pipeline, three are owned by Atlantic

Richfield Oil Co., Shell Oil and Exxon, with a fourth operated by Peabody Coal which is owned by Bechtel Corp., a 21-percent owner of ETSI.

It is clear to see that ownership of a coal slurry pipeline and ownership of the coal could have significant anticompetitive consequences with—particularly after the initial certification process—no protections for other competitors who may wish to sell their coal. Therefore, with this evidence and the desire for competition to remain alive and well in the coal transportation business, I hope my colleagues will join me in opposing this bill.●

● Mr. TALLON. Mr. Chairman, today I rise to offer my opposition to H.R. 1010, the coal slurry pipeline legislation.

Specifically, I would like to address the delicate situation between our railroad industry and agriculture. My district is a heavily agricultural area with predominantly small family farmers. The grains, soybeans and corn raised are shipped out by rail. While practically every factor in determining a farmer's profit or loss is uncontrollable, they depend on steady and reasonable freight rates.

Transporting coal is a major and stable revenue generator for the railroads. These pipelines would take the high volume, more profitable traffic from railroads. Without those revenues, we would see railroads restricting their service and increasing their rates for transporting other products, particularly agricultural products. And, of course, ultimately, consumers will share the increased costs.

This pipeline is guaranteed to have a detrimental effect of our Nation's fragile railroad system. We have invested in this industry, which has aided our national economy. The railroad industry has been hard hit by the recession, yet this legislation will put rail jobs in jeopardy. During unsteady economic times we need to preserve stable and secure jobs, such as in the rail industry. The projected loss of 40,000 jobs would not be offset by the increase in short-term construction of the pipeline or the relatively small number of permanent pipeline jobs.

I believe this is a very risky venture. The pipeline, while being basically a duplicative coal transportation system, is known to be less efficient that railroad transportation and involves a difficult technology with which we have very little experience.

For these reasons, I urge my colleagues to oppose H.R. 1010.●

● Mr. DENNY SMITH. Mr. Chairman I rise in strong support of the Coal Pipeline Act. Unlike many of the bills that we have been considering in recent months, this legislation does not drain the Federal Treasury and add to the deficit. Instead, this legislation will unleash the competitive power of the marketplace to directly benefit the entire Nation.

Competition from coal slurry pipelines will help restrain rapid increases in coal transportation costs. This, in turn, will help stabilize utility bills for American consumers, stimulate coal production, and encourage coal exports to other countries.

Competition in coal transportation is desperately needed; 97 percent of the coal produced from western coal mines must travel by rail, and rail rates have skyrocketed in recent years. One of the basic lessons of economics is that a captive market is a dying market, and coal is no exception. This bill will help revitalize that market.

In addition, the Coal Pipeline Act will offer badly needed protection for State water rights. Recent court decisions in Nebraska and New Mexico have eliminated the traditional right of the States to control their own water resources. This bill reaffirms that right, and insures that no coal slurry pipeline can use a State's water without its explicit permission.

The effects of this bill are clear. It will not add to the deficit, and it will not subsidize an industry that cannot compete without assistance. It will help break the virtual monopoly on coal transportation that threatens to strangle the American coal industry and at the same time, provide lower energy costs to consumers. Perhaps most importantly, will help guarantee the authority of States over their own water. For these reasons, I urge adoption of the Coal Pipeline Act—it is legislation that is long overdue.●

● Mr. FRENZEL. Mr. Chairman, the coal slurry legislation which we are debating today is one attempt to resolve a question involving huge sums of money. It involves jobs, States' rights to their water supplies, and access to, and costs of, energy.

The Public Works and the Interior Committee members are to be commended for producing a bill which has been considerably improved over past years' versions. Nevertheless, as in past Congresses, I shall oppose the coal slurry legislation.

The argument that the coal slurry pipelines could provide competition for coal carrying railroads, and thereby bring the cost of coal transport significantly down, is a strong argument. But on the other hand, as a Representative of Minnesota, I am concerned about the impact this bill would have on transportation services to my part of the country.

My concerns may be regional, but they are very real. In my judgment, it would be unwise to support the development of coal slurry pipelines which would direct traffic from rail carriers which have spent billions of dollars on railroad revitalization.

My intention is to oppose this bill.●

● Mr. MARKEY. Mr. Chairman, the Coal Transportation Act of 1983, H.R. 1010, is seriously deficient in its failure to prohibit monopolistic control of the energy transportation system which the bill is designed to facilitate.

Nearly every coal slurry pipeline bill considered by Congress between 1974 and 1981 has contained language requiring coal slurry pipelines to act as legitimate common carriers. Such language precluded coal slurry pipelines from participating in anticompetitive vertical monopolies by prohibiting coal producers and purchasers from holding interests in such pipelines.

It was precisely this kind of vertical monopoly which led the Government Accounting Office to investigate the oil industry and its pricing practices in 1979. The figures available showed that in 1976 alone, pricing practices of the oil pipelines' vertically integrated systems had cost consumers nearly $300 million in excess charges.

Yet, we are faced with a 1983 version of the coal slurry legislation which contains no language crafted to prevent monopoly controls in the operation of coal slurry pipelines.

This is not an academic problem in the world of coal consumers.

In Virginia, it is the utility itself which is proposing a coal slurry pipeline to transport utility-owned coal to its plant.

Throughout the country, companies designing these projects are themselves developing major coal holdings.

I urge my colleagues to examine this deficiency in H.R. 1010 in light of the recent experiences consumers have faced in the transportation of oil and natural gas. Can anyone honestly say that those experiences demonstrate that vertically integrated energy providers are the least bit desirable or that such arrangements should be extended to yet another aspect of our Nation's energy mix.

I fear that the congressional committees which approved current version of the coal slurry legislation have turned their backs on the very serious and costly consumer problems which could develop for users of coal as a result of more vertical integration in the energy industry.●

● Mr. MURPHY. Mr. Chairman, I rise today to strongly oppose H.R. 1010, the Coal Transportation Act of 1983. For more than 20 years the Congress has debated whether it is in the public interest to grant the right of Federal eminent domain to the coal slurry pipeline companies. Through the years of debate one thing remains clear; there are definite harmful effects of coal slurry pipelines toward our ultimate goal of energy independence and the development of a coal-based economy.

The history of coal development demonstrates that coal slurry pipe-

lines do not need Federal eminent domain authority. The two coal pipelines built in the country were completed without Federal eminent domain power. The ETSI pipeline has already obtained nearly 90 percent of its 1,400 miles of right-of-way without such authority.

Proponents of the slurry pipelines contend that railroads will not be able to keep pace with increased volumes of coal traffic as demand for coal grows. The validity of this argument is disputed by the Department of Transportation study in 1978 which stated that the demand for rail transportation of coal will require an investment of over $10 billion, DOT concluded that the investment could by made by the railroads and that in some instances the rail coal hauling capacity already exists. The Office of Technology Assessment reaffirmed those conclusions when it stated that the capacity of the rail system can be expanded faster than can coal mining or electric power generation using coal, provided the necessary investments in local rail facilities are made. It is clear from these studies that railroads can meet the Nation's coal transportation needs.

Our capital investment in the railroad industry has allowed the railroads to keep pace with increased demand for coal hauling. The construction of coal slurry pipelines would undermine our basic commitment to the railroad industry. While it is true that the construction of these coal transportation systems will create temporary construction jobs. But we must analyze what happens when construction's over and the itinerant labor moves on. For every permanent job created for the operation of that pipeline, six railroad jobs will be lost. In my part of the country, that's six families without income—six heads of the households who face the uncertain prospect of looking for new employment. Dealing in bigger numbers, this means that if all of the currently-proposed pipelines are built, America will have gained 7,000 new pipeline operation jobs. In the process, it will lose 41,000 railroad jobs. This would exasperate an already severe problem. Railroad employment declined from 514,000 in July 1981 to 355,000 in May 1983. The railroad retirement system already is threatened by this loss of employment; as this Congress was forced recently to pass legislation to shore up the retirement plan. The passage of the coal slurry pipeline legislation, with the inevitable job losses that will occur, will only subvert efforts to make the railroad industry financially stable.

It is clear that it makes no sense to undo what we have accomplished for rail labor by passing legislation like H.R. 1010. We cannot afford to gamble on a coal slurry pipeline that will threaten the financial foundation of one of America's finest forms of transportation, our railroads.●

Mr. UDALL. Mr. Chairman, I understand I have 3½ minutes remaining but to keep my pact with the opponents, I agreed to make that time available; that is, a total of 21 of 22 minutes.

Mr. Chairman, is there anybody on the "anti" side of the bill who would like to have a little time?

If not, Mr. Chairman, I reserve the balance of my time. The gentleman from California, Mr. ANDERSON, had promised to give me some of his time in order to close the debate.

But we have no further speakers on this side.

Mr. LUJAN. Mr. Chairman, I yield myself the remaining 2 minutes that I have.

Comment was made a few minutes ago that this was one of the greatest public works projects in the history of the United States.

Let me point out, because it has not been pointed out, that this is not a Federal project, this is an authorization for eminent domain. If a private company wants to build a coal slurry pipeline, then that company must pay for it. It is not an expenditure of Federal funds to build a pipeline.

I must also say that we have also had lots of difficulties as we went along with this legislation. At the beginning the administration was not supportive of this legislation as were so many people not supportive also.

But there were a couple of things that were done that changed the bill drastically that convinced the administration, and should have convinced others that they should support the bill.

One was the question on State water law that the gentleman from Wyoming so eloquently explained. It certainly delegates exclusive authority to the States to regulate the use of the water.

Mention was made of the Yellowstone River Compact where all three States must agree to the use of any water in that river. That changes absolutely nothing in this particular bill. Those same provisions remain in there because the bill as it is now written protects interstate compacts.

The bill denies the use of Federal eminent domain authority to acquire water for use by these pipelines. The only thing that I can see that someone wanted us to do was to have one State veto the use of water in another State.

I do not think we should have done that.

The second issue was the question of eminent domain. We thought that we took good care of that. A pipeline company has to pay attorneys' fees if the land is not equal to 80 percent of the value. The State law on eminent domain must be followed.

I think we ought to utilize this technology in the transportation of coal. It makes sense to do so.

The CHAIRMAN. The gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I reserve the balance of my time since I have only 1 minute and was the last of four to be recognized.

The CHAIRMAN. The gentleman reserves the balance of his time?

Mr. SHUSTER. Yes.

The CHAIRMAN. Mr. UDALL has the right to close debate.

Mr. SHUSTER. Mr. Chairman, how much time is left?

The CHAIRMAN. The gentleman from Pennsylvania has 1 minute remaining, the gentleman from Arizona (Mr. UDALL) has 3½ minutes remaining, and the gentleman from California (Mr. ANDERSON) has 5 minutes remaining.

Mr. SHUSTER. Then I would presume the gentleman from California would want to use his time.

Mr. UDALL. Mr. Chairman, his time will be yielded to me and my time will be yielded to me, that which is left.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. SHUSTER) yield back the balance of his time? Or does he wish to use it?

Mr. SHUSTER. No, I do not, Mr. Chairman.

I will use this last minute then.

Mr. UDALL. Mr. Chairman, if the gentleman wants, I will give him 2 minutes of my time.

Mr. SHUSTER. I thank the gentleman. If I need it I will take advantage of that very gracious offer.

Mr. Chairman, this special interest legislation is a recipe for a price gouging disaster. If you combine monopolistic, interlocking ownership of big coal, big pipelines and big ultilities and to that you add a 20- or 30-year take-or-pay contract, to that you add the extraordinary power of the Federal right of eminent domain and subtract from it the common carrier obligation you have indeed a recipe for price gouging disasters.

I would once again like to emphasize, and I heard my dear friend from Pennsylvania, Mr. CLINGER, say words to the effect that this is a railroad opposition.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHUSTER. Mr. Chairman, I would ask for 2 additional minutes.

Mr. UDALL. Mr. Chairman, I yield the gentleman 2 minutes.

Mr. SHUSTER. I thank the gentleman for his gracious offer.

My dear friend from Pennsylvania, once again, said it is only the railroads who are blocking the coal slurry pipeline. I would say once again for I think the eleventeenth time, but I suppose we will say still more times before we finish here, if the problem is the rail-

road, then those of us who oppose this legislation will support giving the Federal right of eminent domain to the coal slurry pipelines to cross railroad tracks. Let us pass this simple legislation and go home.

But, no, once we make that offer—and we have made that offer in 1978, 1980, and again and again and again, we have said, "If you really want to pin the tail on the big bad railroad, then let us, and we will support you, pass legislation for giving coal slurry pipelines the right of eminent domain of a railroad tracks."

But having said that, what response do we get? We do not get agreement. So I think one can safely conclude the argument about railroads being the only opposition here is simply a red herring, that is all it is, a red herring, a simplistic, well-meant but factually inaccurate description of what the problem is.

□ 1810

This is an enormously complicated piece of legislation which has far-reaching consequences, which goes far beyond the issue of railroads and transportation to the many other issues we have heard so well debated here today on both sides of the issue, including anticompetition and antienvironmental issues.

For all these reasons, I would urge the defeat of this onerous, blatant, special interest legislation.

Mr. ANDERSON. Mr. Chairman, I yield the balance of my time to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Chairman, it is passing strange to me that among the cliches we hear so much around here these days one of them is "high tech." Everybody is going to go high tech. High tech is going to revive our economy.

And the other one I hear so frequently is that we are the Saudi Arabia of coal. Coal is going to be our salvation.

And how strange it is that we are having this debate in about the third straight Congress on whether a new technology—not very high tech, but it is tech at least—is even going to be permitted to be tried. In effect, you strangle in the crib this new baby who is trying to get a little protection until it can try out its stamina and get on with that job. But here we have a massive attempt by the railroads, a shrewd tenacious attempt to defeat all legislation. They do not want 90 or 95 percent of the additional coal that is going to be mined in this country in the next couple of decades, they do not want the biggest part of that increase, they want it all. And they have been clever and tenacious about keeping it.

Let me catch the Members up with a couple of points here in the debate today. I hear a lot about spills and sludge and I am sure we will hear about that. I may be wrong, but I seem to remember about every month some railroad has a spill and it is not the kind of harmless sludge that you get from coal dust, it is usually toxic chemicals that require people to move out of their homes and that kind of thing. So we will talk more in the debate about the spills and the sludge problem.

The fact is this is a tiny fraction of what is spilled in coal dust as the trains roar through the Middle West going east in these unit trains. It is a mere fraction of that and we will show the Members how the coal dust is not damaging, as we discuss this issue.

The environmentalists kicked around a lot. They may take away my "Smokey Bear" hat, but I think the few environmental groups—and not all of them by any means—involved in this, that are against this—it is kind of knee jerk. Technology is bad, coal slurry pipelines are technology, coal slurry pipelines must be bad.

I have not seen any special environmental arguments here. In fact, I asked here what is the best kind of environmental impact to have? You have the choice of two in your little community in Montana or Wyoming or South Dakota. You have a couple of options. Would you rather have 100 or 80 or 60 or whatever the number of unit trains? There are communities where unit trains, loaded with coal, roar through that town, day and night, and they drop, depending on the wind and the conditions, all kinds of coal dust all over the place.

Would you rather have that? Or would you rather build a little pipeline, running 10 miles out of town. Under the bill you have to protect the farmers and the topsoil. You have got to dig down 9 feet and save the topsoil and cover it up again so it will grow. Is that better environmentally or worse environmentally than units trains roaring through the town where these tracks are located?

As with all major legislation of this kind, there is some input from outer people.

The American Public Power Association says that:

The American Public Power Association and the Consumer Federation of America urge you to vote for H.R. 1010, the Coal Pipeline Act . . . and to oppose all crippling amendments. The bill will be considered . . .

APPA and CFA have actively worked for passage of H.R. 1010 as a consumer measure. It is important to both consumer owned utilities and individual consumers. A small handful of railroads have a virtual monopoly . . .

And so forth.

The Reagan administration, the gentleman from New Mexico (Mr. LUJAN) referred to it, objected last year and testified in the last Congress against any coal slurry bill. They say:

The Administration has no objection to enactment of H.R. 3849 if the bill amended to delete the objectionable "Buy American" provision which is contrary to our GATT commitments.

The New York State delegation memo to new Members:

New York is satisfied that state water rights are protected in Section 3 of the legislation, and that the State's concerns regarding water diversion from the Great Lakes have been suitably addressed.

Letters referred to follow:

OFFICE OF THE GOVERNOR,
Austin, Tex., September 15, 1983.

Hon. MIKE ANDREWS,
House of Representatives, Longworth House Office Building, Washington, D.C.

DEAR MIKE: As you know, today the House of Representatives will begin consideration of H.R. 3857, the Coal Pipeline Act of 1983. H.R. 3857 will provide eminent domain authority for the construction of coal slurry pipelines. I am writing you today in support of H.R. 3857 and to encourage you to vote for this important legislation.

Initially, I was concerned that H.R. 3857 might negatively impact our ability to protect Texas' valuable water resources. However, the measure as it has been reported from both the House Committee on Interior and insular Affairs and the Committee on Public Works and Transportation has clearly established the primacy of state water law in governing access to necessary water supplies. I am convinced that Texas' laws will have full reign to function under this new law to protect our vital water resources, as pipelines are built to bring coal to power Texas' industries and utilities.

Coal is our nation's most abundant domestic fuel resource, and it will play an ever-increasing role in the Texas energy future, especially as domestic oil and natural gas supplies diminish. Daily, Texas is using increasing amounts of coal in a continuing diversification of our State's energy base. Coal slurry pipelines offer the promise of additional access to remote coal supplies. They hold the promise of access to those supplies at reasonable transportation costs, which will help to ease the burden of increasing electricity bills for Texas consumers of coal generated electricity.

As you are aware, rates for the transportation of coal have increased dramatically in the recent past, particularly for captive shippers, and they are likely to continue to rise unless checked by competition from an alternative mode of transportation. Coal slurry pipelines can provide that alternative, and I hope you will vote for H.R. 3857.

Yours truly,

MARK WHITE,
Governor of Texas.

MEMORANDUM

SEPTEMBER 13, 1983.

To: New York State congressional delegation.
Fr: Brad Johnson.
Re: Coal Pipeline Act of 1983.

The upcoming House floor debate on the coal slurry pipeline development legislation is likely to focus on state water rights. New York is satisfied that state water rights are protected in Section 3 of the legislation, and that the State's concerns regarding water diversion from the Great Lakes have been suitably addressed.

The bill provides that any claim or interest by the United States in water within any

state for a coal pipeline must be in accordance with state substantive and procedural law. The measure also expressly delegates to the states the power to limit or bar the use of water by a coal slurry pipeline. In addition, subsection 3(3) states that the legislation will not impair the validity of state laws, interstate compacts, or treaties governing the "appropriation, use, export, or diversion of, or other claims or rights to water."

While New York has no plans for a coal slurry pipeline, it has been greatly concerned with any attempts to divert water from the Great Lakes. In addition to the loss of water quantity, a diversion would have adverse impacts on fish and wildlife habitats, recreational boating, and navigation. Section 3 retains states' rights over the use of their water.

If you have any questions, please contact Jim Goldwater in my office at 638-1311.

STATEMENT OF ADMINISTRATION POLICY

SEPTEMBER 8, 1983.

H.R. 3849—COAL PIPELINE ACT OF 1983

(Rep. Udall (D) Arizona and 28 others)

The Administration has no objection to enactment of H.R. 3849 if the bill is amended to delete the objectionable "Buy American" provision (Sec. 17), which is contrary to our GATT commitments.

AMERICAN PUBLIC
POWER ASSOCIATION,
Washington, D.C., September 9, 1983.

Hon. MORRIS K. UDALL,
Member of Congress, Cannon House Office Building, Washington, D.C.

DEAR MR. UDALL: The American Public Power Association and the Consumer Federation of America urge you to vote for H.R. 1010, the "Coal Pipeline Act of 1983," and to oppose all crippling amendments. The bill will be considered by the House Rules Committee September 14 and will probably be considered by the full House shortly thereafter.

APPA and CFA have actively worked for passage of H.R. 1010 as a consumer measure. It is important to both consumer owned utilities and individual consumers. A small handful of railroads have a virtual monopoly on hauling coal needed by electric utilities. Coal slurry lines can provide needed competition to railroads and encourage them to modify their coal hauling rates, which in turn will benefit consumers through lower utility rates.

Presently, about 85 percent of all coal shipped in the United States is captive to rail transportation, and, on average, one-half of the delivered price of coal is due to these transportation costs. Electric utility rates are strongly affected by rail transportation costs, because 52 percent of the nation's electricity is generated by the burning of coal.

There are several documented examples of the competitive impact coal slurry lines can exert on railroad transportation costs. One is the recent decision by Arkansas Power and Light Company to award a long-term contract for coal deliveries to railroads instead of to the ETSI Pipeline Project. Vigorous competition between the railroads and the coal pipeline company for the contract made it possible for the utility to get the best possible price for its coal shipments. The utility estimates that the savings over present fuel transportation costs projected through the year 2016 will be $16.5 billion.

Recent negotiations of Oklahoma Gas and Electric Company are another example of the pro-consumer, competitive effect of coal pipelines on railroad rates. When the utility began negotiating with the ETSI pipeline for coal transportation, the railroad offered substantially lower rates, and the utility signed a five-year contract with the railroad. The utility has not yet signed a long-term contract, but whether the railroad or pipeline receives it, the availability of an alternative form of coal transportation has already demonstrated that it will save money for consumers.

The Arkansas and Oklahoma cases demonstrate the value of coal slurry pipeline competition which will be more widely available if Congress passes H.R. 1010.

Coal slurry pipeline legislation is long overdue, and APPA and CFA urge you to vote for H.R. 1010.

Sincerely,

ALEX RADIN,
Executive Director, American Public Power Association and Vice President, Consumer Federation of America.

Mr. UDALL. So I hope, Mr. Chairman, that we can resolve this, that our country is wise enough to use the new technology and compassionate enough that should this cause problems for communities or railroad labor people or anyone else that we can maybe stop those impacts or minimize them.

This is a good bill, it is good for consumers, it is good for utility companies, it is good for environmentalists, it is good for the land. I think we have got a pretty good bill this year and I hope we will pass it by a very large vote.

Mr. PORTER. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Illinois.

Mr. PORTER. I thank the gentleman for yielding.

I think that the points that the gentleman has been making are extremely well taken. And there is one more that I would like to reemphasize, and this is, what is the best situation in this country for competition, because the consumer is going to have the best deal if we have the maximum amount of competition available.

It seems to me that if we allow alternatives, such as pipelines competing with one another or with railroads, that we are going to get the lowest possible price and the best possible service. And that is what convinces me that we ought to pass this legislation.

The Coal Slurry Pipeline Act of 1983, which would grant the right of eminent domain to coal slurry pipelines. I have received many pieces of mail from constituents, State governments, and organizations expressing their respective opinions on the merits of supporting and opposing this legislation. Certainly we all have heard about the benefits that passage of this legislation would have for the construction industry, and, conversely, the havoc that this bill could wreak on the railroad industry. The farmers fear that their costs will rise as railroad transportation costs rise, and yet consumers will pay lower electricity bills because of a competitive alternative to railroad transportation of coal.

In my judgment, the issue of competition is at the heart of this legislation. I am not necessarily an advocate for the construction of coal slurry pipelines, but I do believe that it is only fair to grant the pipeline builders the same right-of-way rights to gain entry into the marketplace that the railroads received 100 years ago. Coal slurry pipelines have the potential to serve as an effective and competitive transportation alternative to railroads for long-distance shipment of coal, if they are given the chance.

Currently, the railroads carry 65 percent of the total coal traffic in the country, and coal is the railroads' top revenue producer. With U.S. coal consumption increasing 67 percent over the last 20 years and industry experts predicting an increase in production from 825 million tons in 1980 to 1,486 million tons by 1995, what we are talking about here is not a decrease in the volume of coal carried, but rather competition over the price at which coal is transported. Recently the Chicago North Western and Union Pacific railroads underbid the Energy Transportation Systems Inc. pipeline project and won a 20-year contract with the Arkansas Power & Light Co. to deliver coal from Wyoming to Arkansas powerplants.

The point is that the economics of the marketplace should play the critical role in determining the future method of coal transportation, which can only benefit the citizens of this country in the long run. I do not see how we could fail to enact this measure which is so firmly rooted in the spirit of the competitive marketplace. I urge my colleagues to pass this legislation and work to be sure that it becomes law.

Mr. UDALL. The gentleman is exactly correct and I share his views.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore. (Mr. MOODY) having assumed the chair, Mr. KILDEE, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1010), to amend the Mineral Leasing Act of 1920 with respect to the movement of coal, including the movement of coal over public lands, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill just under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

FEDERAL SUPPLEMENTAL UNEMPLOYMENT COMPENSATION

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MICHEL. Mr. Speaker, today I am introducing a bill which will extend the current Federal Supplemental Unemployment Compensation program for another 18 months, and most importantly, would initiate a new program of targeted benefits to high unemployment areas within States.

Under this bill, unemployed individuals residing in areas of 15 percent or more unemployment would receive 26 weeks of supplemental benefits, 12 weeks more than what they are entitled to at present. In areas of between 13 and 15 percent unemployment, lesser increases would be provided.

The major benefit of this targeted approach is that we can provide additional benefits in the areas of most severe unemployment without substantially increasing overall costs. The Labor Department estimates that this bill will only cost an additional $50 to $100 million per year.

I am inserting at this point in the RECORD a more detailed description of the bill:

A BILL PROVIDING TARGETED UNEMPLOYMENT BENEFITS TO HIGH UNEMPLOYMENT AREAS

(By Robert H. Michel)

This bill would extend the current Federal Supplemental Compensation Benefits Program for 18 months, through March 31, 1985, and would increase the number of weeks of benefits payable to individuals in high unemployment areas. A total of 26 weeks of supplemental benefits would be available for unemployed individuals residing in Metropolitan Statistical Areas or counties with unemployment rates 15 percent or greater. The current maximum is 14 weeks, depending on the state. Such individuals thus would be eligible for a minimum of 52 weeks and a maximum of 65 weeks, depending on whether they have received extended benefits.

By targeting extra benefits on the high unemployment areas, the bill would provide assistance where the needs are the greatest, and at the same time avoid the higher costs associated with the payment of extra benefits across the board, regardless of the unemployment rate.

PROVISIONS

Extend the current Federal Supplemental Compensation Benefits Program for 18 months, through March 31, 1985.

Provide for the payment of 26 weeks of supplemental benefits to unemployed individuals residing in targeted areas of 15 percent or greater unemployment, 21 weeks of benefits to idividuals in targeted areas of between 14 and 15 percent unemployment, and 16 weeks of benefits to individuals in targeted areas of between 13 and 14 percent unemployment.

"Targeted Areas" are defined as Metropolitan Statistical Areas, when compromised solely of complete counties, and counties when counties do not fall within such Metropolitan Statistical Areas.

A targeted area's eligibility would be determined quarterly, beginning October 1, 1983. Should a targeted area become ineligible at the beginning of a subsequent quarter, all extra benefit payments under the program would cease for that quarter and the area would be treated the same as the rest of the state with respect to supplemental benefits. Should such an area then become ineligible in a later quarter, an eligible individual's extra benefits would resume where they left off.

An individual's eligibility would be based on place of residence. An individual would be eligible for targeted benefits if he exhausts other unemployment benefits during the period that his place of residence is eligible for targeted benefits, or if he exhausted other unemployment benefits within 6 months of the time that his area initially triggers on to the targeted program.

ADDITIONAL INFORMATION

The Bureau of Labor Statistics currently collects county and Metropolitan Statistical Area unemployment statistics every month. Such statistics would be the basis of determining an area's eligibility for targeted benefits. Such statistics reflect the total unemployment rate, not the insured unemployment rate. Targeted benefits thus would be based on the total unemployment rate.

Targeted benefits would depend solely on the area's unemployment rate. The state unemployment rate would be irrelevant. A state with a low unemployment rate might have pockets of high unemployment. Such pockets would be eligible for targeted benefits.

At present, most states are ineligible for the extended benefits program. Consequently, the unemployed in such states are eligible for 26 weeks of regular benefits plus between 8 and 14 weeks of supplemental benefits, for a total of between 34 and 40 weeks of benefits. Under this bill, individuals in targeted areas of 15 percent or more unemployment would be eligible for a total of 52 weeks of benefits. In targeted areas of between 14 and 15 percent unemployment, they would be eligible for 47 weeks of benefits, and in targeted areas of between 13 and 14 percent unemployment, they would be eligible for 42 weeks of benefits.

If such individuals in targeted areas have received, or are receiving, extended benefits, they would be eligible for up to 26 weeks of supplemental benefits, for a total of 65 weeks in areas of 15 percent or more unemployment.

The estimated cost of the targeted benefits is between $50 and $100 million a year.

□ 1820

THE LATE HONORABLE LARRY McDONALD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order on today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Speaker, I have the sad but necessary task today to take this special order in order that Members of this body might pay a final tribute and farewell to our colleague LARRY PATTON MCDONALD, late a Member of Congress, a Representative from the State of Georgia.

We are all too well aware of the tragic and brutal circumstances in which our former colleague, along with 268 other innocent human beings, met their death in a Korean airliner, a commercial 747, which was barbarically shot out of the skies in an act of uncivilized murder by the Soviet Union.

LARRY MCDONALD came to this House the same year that I had the honor of being elected, and we served together for that entire time, until his tragic death. While LARRY MCDONALD and I did not see eye to eye on many issues, I can tell you that Congressman MCDONALD was a man true to his convictions and unswerving in his principles to those ideals in which he believed he was committed and was committed not only in words but in deed as well.

Having been first elected in 1974 and reelected in each election thereafter, he served as a member of the House Armed Services Committee and on the Subcommittee on Research and Development and on the Subcommittee on Readiness.

LARRY was a native of Atlanta, Ga., and went from both public and private schools in Georgia to Davidson College in North Carolina, where he completed his premedical training, and then went on to receive his M.D. degree from Emory University in Atlanta in 1957.

LARRY served in the U.S. Navy for 4 years as a physician and as an overseas flight surgeon, primarily in Iceland and completed his duty as a lieutenant commander and rose to the rank of captain in the U.S. Navy Reserve.

LARRY was known for his views. He was a member of numerous organizations through which he promoted his political ideals, and many of these organizations have recognized and paid tribute to LARRY MCDONALD'S work in promoting their causes.

He received the Distinguished Service Award from the Americans for Constitutional Action in 1980, the Naval Reserve Association's National

Distinguished Service Award in 1980, the Veterans of Foreign Wars Post 5290 Loyalty Day Award in 1979, and in 1982 he was presented with the Annual Leadership Award for his activity in Congress by 32 conservative organizations.

In addition to that, I think LARRY reached the high point of his career in terms of the organizational identification with his election earlier this year as chairman of the John Birch Society.

I mention these few items, and will revise and extend my remarks to include other material that relates to LARRY MCDONALD, simply to give a capsulized picture of an individual who was firmly committed to the ideals that he held and was willing to make sacrifice for them.

His needless death will not be soon forgotten as the United States and the world continues to respond to the unthinkable crime which caused it.

At this time I yield to my distinguished colleague from the Ninth District of Georgia (MR. JENKINS).

Mr. JENKINS. Mr. Speaker, the strength, the effectiveness, the uniqueness of this House of Representatives derive from those who compose it. The greatness of the whole results from the diversity of its parts. Thus, when one is taken from us the whole is diminished.

LARRY MCDONALD was a part of this House for more than 8 years. In this arena and from this base, he expressed his views and espoused his philosophy. His voice added to all of ours here to form this united yet atonal chorus reflective of the uniformity of our Nation and the dissimilarity of its citizens.

We are shocked by the untimely, unnecessary death of LARRY MCDONALD. We feel outrage at the sudden, violent, senseless act which took his life.

I believe few men loved their country more—few men expressed this devotion with greater vigor or fidelity. LARRY MCDONALD was a man committed to his beliefs, true to his ideals, and consistent to his purpose. He was outspoken in his principles and did not fear nor shrink from the opposition, though sometimes unpleasant and unfriendly, which his position often aroused.

As an advocate and defender of our Nation, he shared with Thomas Jefferson the belief that "eternal vigilance is the price of liberty." He saw his belief in military preparedness as a complement to his dedication to our country and our form of Government. LARRY MCDONALD was certainly an avid and relentless supporter of our military establishment and those directly involved in the defense of our Nation.

LARRY MCDONALD was an energetic and hard working Representative of the Seventh District and of Georgia. Our congressional districts border within our State, and we were many times called upon to exert our efforts in concert for the good of our area and its constituents. He was always cooperative and willing to do his share for the ultimate benefit of Georgia and Georgians.

When I first came to the House of Representatives, I remember with a feeling of warm appreciation LARRY's efforts to be helpful as I endured the overwhelming experience, frustrated by its delays, of settling into my office. One of my last contacts with LARRY was a very personal and human one—a handwritten note from him expressing appreciation for a simple gesture of sympathy at the death of his father.

LARRY MCDONALD was a young man, a vigorous man, a man true to himself.

In expressing to his wife Kathy, his children, his family our condolences, we are reminded of lines from that great Christian hymn, "Blest Be the Tie That Binds":

We share each other's woes, each other's burdens bear, And often for each other flows the sympathizing tear.

LARRY MCDONALD was a part of us. We suffer at his loss.

□ 1830

Mr. THOMAS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from the First District of Georgia.

Mr. THOMAS of Georgia. I thank my colleague for yielding.

Mr. Speaker, the death of our colleague, Hon. LARRY MCDONALD, was an act of murder in a tragic event that has echoed throughout the world. It is an act that is reshaping international affairs. But for those of us in this body, and for those of us in the Georgia delegation, it is a loss that is also deeply personal.

We have lost a Member of our congressional family in Washington, and in Georgia we have lost a public servant who had been active in elected public affairs for many years.

Though I have been in Congress for only a few months, I came to know LARRY MCDONALD as a colleague and I found him to be one who was clear and firm in the advocacy of his political positions.

There is no doubt that LARRY was a public official with both strident friends and strident opponents. That fact illuminates the central feature of LARRY MCDONALD as a Member of Congress.

He attracted support and opposition quickly because he was decisive in his views and uncompromising in his work to implement them in world events.

Politicians are often criticized for their twists and turns in confronting the tough issues that challenge our Nation. All too many drift, with the most gentle shifts, in the whims of public opinion.

But that did not apply to LARRY MCDONALD. He was a man with the total assurance that he knew where he stood on the issues, and he was unrelenting in his work involving them.

His constituency paid him the high compliment of sending him back to Congress in an unbroken series of election victories since 1974. His supporters are among the most dedicated and hard working of any group of citizens in the State of Georgia. He was loyal to his personal ideals, and those who shared them were tireless in giving of their time and energy for his support.

LARRY MCDONALD was a man whose voice was strong, whose course was unwavering, and whose life is a story of iron-willed resolve.

There has been much written and said about what should be the appropriate response of our Government in retaliation to the Korean airliner tradegy. If LARRY MCDONALD were here today, I am sure he would have no doubts about that question.

He would urge, just as I urge, that the memorial to those who died should be a renewal of commitment by our Government and our people to a strong national defense.

LARRY MCDONALD's death was tragic, it was stunning and it should not be in vain. It should be a constant reminder that we have adversaries in the world who do not share our sense of justice and our concern for human life. We must never allow ourselves to grow weak, because to do so would be to put our Nation at the mercy of those who have no mercy.

My family joins me in extending to Mrs. McDonald and their children our deepest sympathies, and I join with my colleagues in mourning the death of one of our own.

Mr. ROWLAND. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I will be happy to yield to my colleague from the Eighth District of Georgia (Mr. ROWLAND).

Mr. ROWLAND. I thank my colleague for yielding.

Mr. Speaker, throughout his very successful career in public life, Congressman LARRY MCDONALD carried out a fervent crusade for the philosophical beliefs that burned deeply within him.

He was dedicated, he was tireless, he was firm in his pursuit of those beliefs.

I first met LARRY MCDONALD in 1975, just a year after he had first been elected to Congress and when his reputation as a person absolutely committed to his beliefs was being established.

Although I did not always agree with the positions he held, he was always well informed and invariably had something thought-provoking to say when circumstances brought us to-

gether from time to time during the following years.

When I joined him in Congress last January, He welcomed me as a fellow physician and was generous with his advice about the pitfalls he felt I might encounter. I appreciated his friendship.

LARRY MCDONALD believed devoutly in patriotism. He believed we should love our country, demonstrate pride in our country, and be willing to defend our country and make the necessary sacrifices to keep her free and strong.

While many people were aware of Congressman MCDONALD's outspoken positions on national and international affairs, few fully recognized the concern he had for the individual problems of the people of Georgia's Seventh Congressional District. He developed and maintained a very busy and effective constituent services program, which provided critical help to many individuals and also contributed significantly, I believe, to his successful campaigns.

When we learned that LARRY MCDONALD had evidently perished in the murderous attack on the Korean airliner, all of us were shocked, and angered, and saddened.

Whether you agreed with LARRY MCDONALD or not, you had to acknowledge that he was a stimulating part of the political scene. And you had to admire the great courage he displayed in standing up for his convictions.

When Congressman MCDONALD went down aboard Korean Air Lines flight 007 with many other innocent passengers and crew members, he was traveling in the performance of his duties.

We will remember Congressman LAWRENCE PATTON MCDONALD as a patriotic American who made the ultimate sacrifice for his country.

We will miss him.

Mr. RAY. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I would be pleased to yield to my distinguished colleague from the Third District of Georgia.

Mr. RAY. I thank my colleague for yielding.

Mr. Speaker, I want to join my good friends in the House of Representatives today in paying tribute to the memory of our departed colleague—LARRY MCDONALD.

I join my colleagues in our thoughts and prayers for his wife, Kathy and his loved ones.

As a freshman Member of the 98th Congress, I came to respect LARRY's sincere concern for America and for his strong belief that America must remain economically and militarily strong.

LARRY MCDONALD was respected by not only those who shared his views, but also by those who had a different philosophy.

At the core of his convictions were his love of and concern for America and for the freedoms which we enjoy and many times unfortunately take for granted. It was this love for our country which led him to distrust the Soviet Union and their Marxist form of government and to dedicate so much of his energy to expressing these views.

We have had much evidence over the years that the Soviet Union does not base their convictions and actions on the same moral and ethical standards that we do—we have only to recall some of their more recent actions, such as the invasion of Afghanistan, their stifling of freedom in Poland, and their systematic oppression of civil and human rights all around the world. Sadly, it has taken the coldblooded murder of 269 civilians to reawaken us to the true nature of the Russian Government.

I hope we will not forget the lesson which we have learned from this tragedy—the lesson that the Soviets, indeed, have long-term, worldwide goals in mind.

Despite this, we must continue our negotiations in Geneva, Vienna, and Madrid. We must keep up the hope that, at some point, we can go forward with successful negotiations to the benefit of all mankind.

However, we must enter these negotiations with a new sense of determination to bargain with the Soviets from a position of strength, not from a position of weakness.

We cannot allow our Nation or our allies to be put in a position of nuclear or economic blackmail.

Our negotiators must be given the support and tools they need to encourage an agreement in America's best interests.

The 007 Korean plane incident makes it crystal clear that any agreements which are reached with the Soviets must be verifiable beyond a shadow of a doubt and that we must move in unison with the Soviets toward disarmament.

Often in the House we hear well-meaning rhetoric which implores us to trust the Russians. Naive voices implore us to take the first steps toward disarmament, with the suggestion that the Russians will follow.

When these voices are heard again in the House, which I am sure they will be, I hope the memory and philosophy of Congressman LARRY MCDONALD will be remembered and that we will also remember our obligation as he did, that America must have and maintain a strong defense and a strong economic foundation.

1840

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to my distinguished colleague, the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, all of us in this House were deeply shocked and angered when it was finally determined that our great colleague from Georgia, LARRY MCDONALD, was 1 of the 269 victims of the brutal, barbaric shooting down by the Soviets of the Korean airliner over the Island of Sakhalin.

LARRY had been one of the strongest, hardest working, and most dedicated Members in the fight against world communism. What an irony that he should have been one of the victims of the most brutal action, affecting the United States, which backed up the validity of everything that LARRY MCDONALD and everything that President Reagan had been saying about the nature of the Soviet threat and the character of its governmental leadership.

While I honestly do not believe the Soviets shot down KAL flight 007 because LARRY was on it, his death in that fiery crash certainly vindicated everything that LARRY had been saying. In that sense he was clearly a martyr to his convictions and beliefs.

I was privileged to serve with LARRY MCDONALD on the House Armed Services Committee, and on most of the matters that came before our committee he and I were in close agreement. But LARRY's concerns and interests went beyond even the problem of restoring the military balance between the United States and the Soviets.

LARRY traveled far and wide across the country to expound his views and to bring to people the facts and the intertwined Communist relationships that his careful and painstaking research had dug up.

I was frequently a signer of letters that LARRY had drafted to send to the White House or to the press. And the positions he took needed to be expounded, as LARRY's life and LARRY's death have now so clearly demonstrated.

We who served with LARRY MCDONALD will miss him greatly. Not often does a person come to Congress with such a deep inward sense of mission, and maintained it throughout his congressional career—though all too brief.

But the spirit of LARRY MCDONALD will indeed live on in this House as it did, for example, last Thursday. And we Americans are already the wiser and the safer for LARRY MCDONALD having walked among us—if only for so short a time.

Mr. LEVITAS. Mr. Speaker, I thank the gentleman from New York (Mr. STRATTON) for his words.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to my colleague, the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Georgia for giving me this opportunity to participate in this special order.

I would like to say that I am very sorry to say that we have to gather here today for such a sad occasion, but I think it is important that we pay our tribute to our colleague and friend, Representative LARRY MCDONALD.

I enjoyed, as the gentleman from New York (Mr. STRATTON) did, serving with LARRY on the Committee on Armed Services of the House. He was a very hard-working and knowledgeable Member, and when it came to work on projects for his country and also for his district, LARRY was always well prepared, and he got the job done.

Yesterday, I noticed that the Naval reservists were flying a new DC-9, and I remembered that LARRY MCDONALD had introduced an amendment to the authorization bill about 4 years ago to give this personnel aircraft that was so needed to the Navy. It was ironic that we saw this new aircraft flying yesterday because of LARRY MCDONALD'S amendment.

Let me say that he stuck to the Constitution. He believed that this country should go by the U.S. Constitution, and if we would look at his votes over the years, we would see they supported what the Constitution spelled out and what LARRY thought was legal.

As mentioned in this Chamber, he was very strong against communism, and he spoke out strongly and often about the dangers posed by the Soviet Union and by its client states.

I think LARRY was driven in his strong stand against communism by his love and respect for the principles of freedom and democracy that we have in this country.

The message that LARRY worked so hard to get across will now live forever by the tragic way in which he died. LARRY MCDONALD will not be forgotten.

Mr. Speaker, I want to extend my thoughts to LARRY'S wife, Kathy, and his family. He will be missed here in Congress, and I am glad I have the chance to serve with him.

Mr. LEVITAS. Mr. Speaker, I thank our colleague, the gentleman from Mississippi, for his words.

Mr. MOORHEAD. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentleman from California.

Mr. MOORHEAD. Mr. Speaker, I wish to thank my colleague, the gentleman from Georgia (Mr. LEVITAS), for calling this special order to honor the memory of our good friend and colleague, LARRY MCDONALD.

Certainly LARRY MCDONALD was one of the most patriotic Members of the House of Representatives. He loved his country and its Constitution, and he had strong feelings about his service to his country. LARRY had strong spiritual and moral convictions, and I am sure he lived his life in accordance with those convictions.

I do not believe that anyone would deny that LARRY MCDONALD had purpose and direction in his life, and that he believed totally and fervently in his cause. As a result of his devotion to his beliefs, he had impact in his district and with people in every corner of the Nation. It was in the furtherance of these convictions that LARRY MCDONALD gave his life on that tragic airplane trip to Korea, where he intended to speak about liberty and freedom in that far-off land.

America is a better place because of LARRY MCDONALD'S life, and we shall miss him very much.

Mr. Speaker, I wish to express my own regrets about LARRY'S death to his beloved wife, Kathryn, and to his family.

Mr. LEVITAS. Mr. Speaker, I thank our collegue, the gentleman from California, for his contribution.

Mr. PAUL. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the gentleman from Texas.

Mr. PAUL. Mr. Speaker, in the attack on KAL 007, America lost a loyal friend. LARRY MCDONALD was a constitutionalist, an advocate of freedom, and an opponent of communism and socialism, the ideologies that have engulfed half of the world's population in blood and war in the past 70 years.

In the introduction to LARRY'S 1976 book, "We Hold These Truths," subtitled "A Reverent Review of the U.S. Constitution," Dan Smoot wrote:

> If the Constitution does not mean what it says, then we have no Constitution: We are at the mercy of lawless government. . . . Never, in my happiest daydream, did I ever imagine a Member of the United States Congress writing a book like this one. . . .
>
> Congressman Larry McDonald indicts everyone and everything that gets in the way of a Constitutional principle. . . . The book factually ilustrates the awful consequences of allowing our hired public servants to disobey the fundamental law of the land. . . .
>
> That is what I think of Congressman McDonald's book. What do think of him? I think we Americans have found ourselves a Statesman.

LARRY MCDONALD was a statesman; that is why our loss in his death is so great. His understanding of the importance of constitutional government may be seen in these words:

> Other constitutions and bills of rights assume that all power is inherent in government, but government should be contractually obligated to provide certain rights for the people. The Soviet Union has a "bill of rights," contained in a written constitution. It is a long series of statements listing what government promises to do for the people. It promises them social security, medical care, child care for working mothers, maternity leave, schooling, and equal rights for men and women.
>
> In the American Bill of Rights, not one such promise is made. Our Bill of Rights, (as well as our Declaration of Independence and Constitution) assumes that all power is inherent in the people. Our Bill of Rights contains 462 words, telling the federal government what it must not do. Congress shall make no law is the opening statement in our Bill of Rights. It expresses the old American conviction that the greatest threat to a man's life, liberty, and property is the government under which he lives. It recognizes that government is like fire—necessary to civilization, but deadly if it gets out of control.

The unprovoked attack on a Korean airliner by a government out of control starkly punctuates LARRY'S words. LARRY'S anticommunism flowed from his love for freedom. As the world's most successful and implacable enemies of freedom, the Communists attracted LARRY'S attention and anger. It is not ironic that this intransigent defender of freedom was killed by the Communists; it was almost predictable.

LARRY'S love of freedom and hatred for totalitarianism made him few friends in Washington, D.C. Congress assaults freedom daily, and daily seeks to curry the favor of totalitarians by extending loans and credits to Communist regimes around the world. The Washington establishment was annoyed by LARRY'S voice, for he insisted on pointing out that their most cherished beliefs about communism were false and would lead only to a global disaster. Far from being a warmonger—as his McCarthyite detractors have pictured him—he was a man of peace.

In "We Hold These Truths" LARRY wrote:

> All foreign aid should be stopped. Our participation in multi-nation pacts, such as NATO agreements and the UN Charter, should be formally terminated. Our troops should be withdrawn from foreign lands, and our armed forces trimmed down to such size as is needed for the defense of our homeland. We should return not only to traditional American foreign policy, but also to traditional diplomatic procedures in this handling of our foreign affairs.

Those are hardly the words of a warmonger. But those who continue to subsidize the Soviets cannot so easily escape the label. It is the West's subsidies to the Communists that have built the Soviet Union's military-industrial complex to its present world-threatening proportions. The continued pursuit of such a suicidal policy will insure that KAL 007 will happen again and again.

I am convinced that the best tribute that can be paid to a fallen friend is to take his ideas seriously. This Congress and all America would benefit greatly by taking LARRY'S ideas about limited government as seriously as he himself did. He dreamed of a world in which governments, as well as the governed, would be limited by law. He was murdered by one of the bloodiest and lawless governments that has ever marred

the face of the Earth. In his death, the battle lines were drawn: freedom or totalitarianism, the rule of law or lawlessness, a Christian-style civilization or a materialist slaughterhouse. I hope that his life and his death will not be forgotten by the people he was trying to warn.

Mr. LEVITAS. I thank my colleague, the gentleman from Texas, for his contribution.

Mr. HUBBARD. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to my colleague, the gentleman from Kentucky.

Mr. HUBBARD. Mr. Speaker, Congressman LARRY MCDONALD was a friend of mine who was dedicated to zealously pursuing his goals for the United States. He was often able to persuade some who were not in agreement with him by the force and organization of his arguments, and/or by his calling for rollcall votes in the U.S. House of Representatives.

LARRY MCDONALD was a leader among conservatives and was respected by many who did not share his views.

He already had attained a distinguished career as a physician before he was elected to Congress in 1974, and his education and precise thinking served him well in Congress.

LARRY and I were first elected to Congress in the same year and became well acquainted as Members of the same freshman class in the House of Representatives 94th class. We were both Democrats from the South and felt a special bond by being contemporaries from the same region of the country. To put it simply, LARRY MCDONALD was my neighbor and my friend, and I will miss him.

We shared an additional bond toward the end of his life. We were both scheduled to speak at a conference in Seoul, Korea, to celebrate the 30th anniversary of the mutual defense treaty between the United States and the Republic of Korea. In fact, I was scheduled to introduce Congressman LARRY MCDONALD at this conference and considered it an honor to do so. You can imagine my shock upon being told that Korean Air Lines flight 007 had been "lost," knowing that LARRY MCDONALD and several Americans with whom I had conversed that August 31 in the Anchorage, Alaska Airport were on this flight. I felt special empathy for all who were on the flight, because for several days I had been scheduled to be on the same Korean Air Lines flight 007 myself. Fortunately, my flight was changed due to an invitation I had accepted from president Sala Stroup at Murray State University, Murray, Ky., for Tuesday, August 30.

In my hotel room in Seoul, I thought how it must feel to be aboard a plane which had lost all communication with the rest of the free world and how frightening this would be. Then, the whole horror of it became clear when we heard that this plane had been shot down by the Russians. It is always tragic when 269 people are killed for any reason, but my colleague and friend LARRY MCDONALD and at least 10 people I talked with at the Anchorage Airport were on the plane, and that made it personally traumatic and painful for me.

I deeply regret the tragic death of Congressman LARRY MCDONALD and deplore the criminal, vicious, and inhumane action of the Soviet Union in shooting down a defenseless passenger plane.

My wife, Joyce, daughters Kelly and Krista, and I extend our deepest sympathy to LARRY's wife, Kathy McDonald, as well as to his five children and his entire family.

Ironically enough, by his death LARRY MCDONALD causes many more people to be aware of the brutal and cruel attitude of the Soviet Union's leadership and military than he ever did by his words on this floor of the U.S. House of Representatives.

In other words, LARRY MCDONALD tried to convince us during his lifetime that the Soviet Union regarded their air space to be of higher priority than human lives, even those inside the Soviet Union. Now that LARRY MCDONALD is dead, we know he was right.

□ 1850

Mr. LEVITAS. Mr. Speaker, I thank our colleague, the gentleman from Kentucky, for those comments.

I am happy to yield 3 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, I thank the gentleman from Georgia, Mr. LEVITAS, for arranging this special order so that we may honor our distinguished colleague who perished aboard KAL flight 007, the Honorable LARRY MCDONALD.

Born and raised in Georgia, LARRY MCDONALD entered the medical profession, and served his country as a physician and flight surgeon in the U.S. Navy. He continued his practice as a urologist until his election to the 94th Congress in 1974. During his 8 years in the Congress, LARRY became known in the House for being a staunch supporter of a strong national defense and for speaking out on foreign policy matters, most especially where the Soviet Union was concerned. LARRY never wavered from his strong anti-Communist stance, and consistently spoke out on behalf of all those who, kept behind the Iron Curtain, suffer from the yoke of Soviet domination and oppression. LARRY often reminded us that the Soviet Union could not be trusted to keep its word, and he was right. By shooting down an unarmed, civilian passenger plane, the Soviet Union demonstrated its utter lack of concern for humanity and its disregard for the 269 men, women, and children who unknowningly and innocently strayed into Soviet airspace. It is ironic that LARRY perished in this manner. He fought Soviet aggression with every ounce of energy and every tool available to him, yet it was the Soviet's unbridled, hostile action that caused his demise.

Congressman MCDONALD will be sorely missed by his colleagues, but his loss is felt even more so by his family, his close friends, and constituents. I join my colleagues in extending my sincerest condolences to his widow, Kathryn, and to their five children; may they take comfort in knowing that LARRY MCDONALD served the people of Georgia and the Nation meritoriously and with all his heart.

Mr. LEVITAS. Mr. Speaker, I thank our colleague, the gentleman from New York, for his contribution.

I am happy to yield 3 minutes to the gentleman from California (Mr. MCCANDLESS).

Mr. MCCANDLESS. Mr. Speaker, I thank the gentleman from Georgia.

As a freshman, I only met LARRY MCDONALD recently, but I liked and admired him, and I was outraged by the manner in which he died.

It seems to me that as time goes on, it becomes more and more difficult in life to do the right thing. The world has become so complex, that the old black and white answers do not seem to work too well anymore.

Everything is questioned in an existential way: What is right? What is wrong? Who can say?

All too rarely do we see men and women of conviction: People who are not afraid to say what they believe and why they believe it, without apology or qualifiers.

LARRY MCDONALD was one of those rare men of conviction. Time after time, he stood in this well and forced us to examine our actions and motives.

Time after time, he told us that if we do not distinguish right from wrong as a nation and act on it, that we would not survive. He vigorously and tirelessly defended our Constitution and the principles upon which this country was founded.

He refused to be silent or to equivocate about the Communist threat this entire planet faces, and his prophetic words often had the ring of truth to them.

LARRY had a kinship with many of us, but his convictions and valor extend far beyond this lifetime.

More than three centuries ago, the English statesman John Milton said, "Give me the liberty to know, to utter, and to argue freely according to conscience, above all liberties." He would have respected LARRY MCDONALD, and

LARRY would have understood John Milton.

The Soviet Union, which LARRY understood so well, has robbed us and LARRY's family of a patriot and loving husband and father. This House is diminished by his absence.

Mr. LEVITAS. Mr. Speaker, I thank the gentleman from California for his contribution.

I am happy to yield to our colleague, the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Mr. Speaker, in an age of conformity and pragmatism, our colleague, LARRY MCDONALD, refused the norm. He bucked the tide—often alone—and he never relented, never tired, and never apologized. He stood four-square for America, and the sworn enemies of America were his enemies. Ultimately, it was the most aggressive of the sworn enemies of America, the Soviet Union, that snatched his life away.

Frankly, I am not certain how LARRY MCDONALD would like to be remembered. He would probably be a little embarrassed over our tributes and accolades. Knowing him as I did, I can imagine him saying right now, "Well, this is all well and good, but what I really needed was your vote on occasion."

LARRY MCDONALD was a good man, if you can say that about a person, then regardless of his politics, he measured up to God's admonition to all of us. He was a courageous man. I believe he was the only Green Beret to serve among us. He spoke his mind, but he was not vicious. Some of his enemies were vicious but he always seemed too busy fighting for America and freedom to get involved in personal vendetta.

I am going to miss LARRY MCDONALD. In Texas, we would call him a maverick. It is an endearing term that is a proud part of Texas history. He was a maverick. He would not compromise, and if it meant standing along, so be it. It was Henry Clay, who served as Speaker of this House, who once said, "I'd rather be right than be President," In other words, he was not willing to compromise principle. That, in essence, sums up LARRY MCDONALD.

We have had our say and passed our resolution on the Korean airline disaster. I know that my remarks got broadcast all over the country as did many of our colleagues. Now, we return to pay tribute to LARRY MCDONALD. Well, if we were really to honor his memory, we will stand up to communism wherever it rears its ugly head. We will rededicate ourselves to freedom and the principles of democracy. He would like that and so would the vast majority of the American people.

□ 1900

Mr. LEVITAS. I thank our colleague from Texas for his contribution.

I yield 3 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, I am pleased to take part in this special order for LARRY MCDONALD, because LARRY MCDONALD was a friend, an important Member of this House, and a national leader who deserves recognition for his contributions to our society.

What impressed me most about LARRY was that he was a man of integrity and conviction: He held strong beliefs and was unafraid to voice his viewpoint. This was especially true with regard to his outspoken criticism of communism and its challenge to our economic system. he was keenly aware of the threat posed by the Communist world and he was diligent in his efforts to alert the American people of the pervasiveness of that threat. Indeed, there is a tragic irony in how this stalwart spokesman of freedom met with his demise. The question of whether his death was an accident or an intentional homicide may remain unanswered, but the legacy that he leaves us in terms of his thought and vision shall not be diminished and the impact that he had shall continue to be profound.

LARRY was more than just a man of words, he was a man of action. And in this respect he will be remembered for the commitment that he maintained with tenacity and perserverance. Three examples come to mind of how LARRY MCDONALD translated his activity into action: He served on the Committee for the Survival of a Free Congress; he introduced legislation in the last Congress to establish the House Committee on Internal Security; and he participated as a speaker at a rally commemorating the 50th anniversary of the famine in the Ukraine, where the Soviets deliberately starved 8 to 10 million innocent men, women, and children. I recall these events because I had the pleasure of taking part in each of them with LARRY. He earned my respect, and that respect grew with each opportunity I had to work with him.

In a similar vein, LARRY demonstrated an unfailing commitment to a moral way of life. And this was evident in the way that he conducted himself in his personal, as well as his professional, life. LARRY adhered to the traditional values of American family life; he maintained that the preservation of such values is central to the preservation of our very society. As such, he espoused a pro-life position on abortion and believed that there was no moral alternative to a heterosexual lifestyle. To LARRY, the very notion of permissive attitudes toward homosexuality was unacceptable and cohabitation between such persons could never be a viable option for our society to sanction.

My last conversation with LARRY took place on the floor of the House shortly before the past recess. He took me aside to express his criticism of my support for a Sunday holiday in recognition of Dr. Martin Luther King. I recall telling him that Dr. King had made a contribution to our society that was worthy of being acknowledged in such a manner, and that such recognition is important to all Americans, especially black Americans. Yet, there was no changing LARRY's mind because, to him, King was a man who fostered violence and undermined our way of life.

Neither LARRY nor myself could have imagined that that conversation would be our last. We parted wishing each other well, unaware of the peril that was in the offing. His death was senseless, but his life was not without meaning. I pray for his soul and hope that my fellow Members of this House will give new life to what this fine man stood for.

Mr. LEVITAS. I thank our colleague from California for his contribution.

I will be happy to yield 3 minutes to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, I want to thank Congressman LEVITAS, the dean of the Georgia delegation, for arranging this special order to honor the life of LARRY MCDONALD.

August 31, 1983, will be remembered as a day when civilized nations around the globe were shocked by the brutal slaying of 269 innocent people by the Soviet military, among those who perished was Congressman MCDONALD. On a personal note, August 31 will be remembered as a day of the passing of a friend and colleague.

LARRY blazed a lonely trail here in the Halls of Congress. He was one of those rare individuals that stood up and fought for his beliefs even if it sometimes meant fighting alone. He warned us of the threat of Soviet expansion. He warned us that the Soviet Union was a regime that did not respect human rights and liberties and extended that disrespect to the arena of international competition. He warned us that the Soviets would go to any lengths to accomplish their ends. Considering how his life was taken, LARRY's warnings are nothing short of prophetic.

But LARRY was much more than a champion of democratic principles. He was a husband, father, physician, an accomplished public servant and a hard-working friend to many of us here in Congress. His absence will be felt but his death will not be forgotten.

I thank the gentleman from Georgia (Mr. LEVITAS), as the dean of the Georgia delegation, for conducting

this special order on behalf of our departed colleague, LARRY MCDONALD.

I would personally like to see this House pay even a more substantial tribute to our departed colleague via the convening of some ceremony participated in by the leadership and by indeed each and every Member of this House. After all, our friend and our colleague was murdered along with 268 others by our adversary. This Congress lost one of its own to our adversary. And I ask the American people is, there any difference between assassinating LARRY MCDONALD in Georgia or in Moscow, or killing him along with 268 other innocent people by firing a heat-seeking missile at a defenseless airliner? And I ask the men in Moscow that same question. I would hope that this House and the Members of the delegations of all the States would join together for an official ceremony involving the entire leadership and the entire membership to note the passing of our friend and colleague, LARRY MCDONALD.

It is indeed, as others have stated, the ultimate irony that LARRY MCDONALD's characterization of the Soviets, criticized by some in this House as overzealous, was borne out as accurate in the way he died, the mode of his death.

I express my deepest sympathy to his family who I hope will carry on what LARRY tried to do in his life.

LARRY MCDONALD was a man with boundless energy, dealing with problems related to communism—particularly the expansion of Soviet power. He had a virtually encyclopedic knowledge of various so-called wars of national liberation around the globe. LARRY MCDONALD had detailed understanding and acquaintance with the players in these various wars of national liberation, and could link and tie in so many cases Communist leadership, the Soviet international fighting force of assorted Bulgarians, Vietnamese, North Koreans, Cubans, and the like, to so many of these so-called liberation movements. And we criticized him in this body—not this Member, but others—for being overzealous. And, yet, his death in many ways proved him right.

When we think of what LARRY MCDONALD would wish this body to do, perhaps not in honor of his death, but as a necessity for the life of this Nation and the lives of its people, what he would have wished we could do in this body, let us consider it.

First of all, LARRY MCDONALD would have wished that we would stand fast in Central America and that we would not desert the cause of freedom or be fooled by the rhetoric of communism or allow the Soviet international fighting force which is so active in Central America, particularly out of Cuba and Nicaragua, that we would oppose them.

□ 1910

Perhaps his life did not convince us of the necessity of such standing fast but maybe his death will help us achieve that goal.

I thank the gentleman from Georgia for taking out this special order. I am happy to have been a part of it.

Mr. LEVITAS. I thank our colleague from Pennsylvania for his contribution.

● Mr. SHUMWAY. Mr. Speaker, like most Americans, my shocked reaction to the reprehensible Soviet strike against an unarmed Korean airliner was exacerbated by the knowledge that our friend and colleague, LARRY MCDONALD, was onboard. It is perhaps the height of irony that a man who dedicated so much of his public and private life to campaigning against communism and alerting others to the need to repel its growing threat such perish at Communist hands. In a truly tragic sense, LARRY's death has strongly proven the point he strove so hard to make: The Soviets cannot be trusted; they have no regard for the most basic human rights, and we must negotiate with them from strength.

From the time he took office in 1975 until his untimely death, LARRY MCDONALD worked tirelessly and effectively to expose the threat of spreading Marxism. No amount of criticism from those who opposed his conservative thinking could deter him from his principles, and for that he must be admired, by those who did not agree with him as well as by those who did. LARRY MCDONALD was always consistent, and the leadership he demonstrated was likewise. Throughout his tenure in office, he provided outstanding representation for his constituency, as well as a determined example for his colleagues.

It is always saddening to lose a Member of this body, but it is all the more so when we lose a colleague under inexcusable and violent circumstances. In the case of LARRY MCDONALD, there is one consolation of sorts: While his voice may now be silent, he has awakened America with a jolt to the dangers he sensed. He will be missed by all those who were privileged to work with him and know him, and I know I speak for all of us when I say he will not be forgotten.●

● Mr. PERKINS. Mr. Speaker, I join my colleagues today to pay my respects to our late colleague, Representative LARRY P. MCDONALD of Georgia.

For more than 8 years LARRY MCDONALD represented a great district and a great people in these Halls. He did not take his duties lightly, and he gave his job the best that was in him.

His views of this country, its history, and its potential were often controversial, but no one can say that they were not firmly held and vigorously expressed. You always knew where he stood on the issues that came before the Congress for decision.

LARRY MCDONALD was a friendly and agreeable man, a generous man, a good family man, and a good neighbor. That such a man should have been lost through the action of a tyrannical, renegade government with a philosophy he loathed seems to compound the tragedy.

Mr. Speaker, I extend my sympathy to the McDonald family, and to those friends of his who mourn his loss.●

● Mrs. HOLT. Mr. Speaker, I note that the recent destruction of a civilian airliner by the Soviet Union appears to have reawakened the country to the character of the Soviet regime and the need for the free world to be strong and vigilant in our defenses.

If that is an accurate observation, then our colleague LARRY MCDONALD did not die in vain. He and the 268 other people on that plane have died in a manner that reminds the world of the nature of the brutal adversary that confronts us.

It is almost as though the fates conspired to place LARRY MCDONALD on that plane. He was an anti-Communist who pursued that cause with zealous energy. He took flight 007 because he had missed an earlier flight, and it was 007 that flew off course to meet destruction by Soviet fighter planes.

He served among us in this House for 9 years, and I counted him among my friends. He was a man of strong convictions and worked with great passion and diligence on those issues that attracted his interest.

Before he came to Congress he was a practicing physician, where he could demonstrate the compassionate side of his nature. That side of him was very strong, as strong as his determination to compete for his principles in the political arena.

I am sure that all Members of the House join me in expressing condolences to his widow, Kathryn, and their five children.●

● Mr. DREIER of California. Mr. Speaker, special orders for deceased colleagues are always difficult. It is a much harder task when the events surrounding that death are as horrible as those surrounding LARRY MCDONALD's death.

No kinder compliment can ever be paid a Member of the House of Representatives than to say that they stood firmly behind their views. Although I did not always agree with LARRY MCDONALD, it is difficult not to admire this strong and unwaivering conviction to his views.

LARRY had many accomplishments in the House. He stood for the strengthening of our Nation's defenses—a goal he fought long and hard for both on the Armed Services Committee and in his efforts outside this body. He assisted us with our ef-

forts to lower taxes and reduce the size and scope of the Federal Government. He firmly believed that the United States should stand behind her allies, and in fact was on his way to South Korea when he died.

The death of Congressman McDONALD raises many troubling questions. We may never know the full story behind the Soviet downing of an innocent, civilian airliner. But we must remember LARRY. He had a message to tell. And if his death—however hard to accept—causes more Americans to think and take note of the current world situation, then it was not in vain.

I add my condolences to Kathryn McDonald and their entire family. I offer to them my support for the trials they will face ahead.●

● Mr. DANIEL. Mr. Speaker, with the coldblooded destruction of Korean Air Lines flight 007, this body and this Nation lost one of the most steadfast defenders our Nation has known.

Congressman LARRY MCDONALD stood consistently against the kind of treachery this incident represents. In my years in Congress and before, I have never known a more effective spokesman against the Communist menace.

His was the concern of one whose perception of the future is rooted in his knowledge of the past, uncolored by wishful thinking or unrealistic dependence on the good will of an implacable enemy.

It was a special privilege to serve with LARRY on the Armed Services Committee. He always shared freely his knowledge and his understanding of the security needs of this country, and it is a knowledge which cannot be easily replaced. This service would have been rewarded by his appointment as chairman of a panel on special forces, which I had planned following adoption of our conference report, and he had been so advised.

LARRY MCDONALD made a lot of people uncomfortable—people who preferred not to be reminded of the fact that there has been and remains a threat to our Nation, so long as the Soviet Union pursues its present course. This most recent outrage vindicated the correctness of his views.

The death of our colleague has left a void in this Chamber which will not soon be filled, and I mourn, as I am sure all do, this loss.

His wife Kathy and other members of his family have my deepest sympathy.●

● Mr. MAZZOLI. Mr. Speaker, I wish to pay my respects to my former colleague, Representative LARRY MCDONALD, who tragically died in the doomed Korean Air Lines flight 007.

I did not always agree with LARRY, but he was forthright and committed to a political philosophy. He stood strong for his beliefs and always accepted the majority even when it disappointed him.

He was a dedicated Member of the House and he served his constituents of Georgia with diligence and devotion.

I extend my condolences to his wife Kathryn and to his children.●

● Mr. ROE. Mr. Speaker, the downing of Korean Air Lines flight 007 by the Soviet Union was an act of blatant murder that has outraged freedom loving people the world over. One of those among the 269 passengers who lost their lives in that slaughter was our colleague LARRY MCDONALD of Georgia.

It is indeed with much sadness in my heart that I rise today to join in this tribute to LARRY MCDONALD, who was truly a champion in defending our cherished traditions of freedom and democracy.

LARRY MCDONALD had a profound commitment to preserving the highest ideals of man, which he rightly believed were embodied in the principles under which our great Nation was founded. While it may sound old fashioned to some, there is no better word than "patriot" to describe our fallen friend.

The Russians made a tragic mistake in downing that civilian airliner. For they not only alienated the world against them, but they strongly fortified the warnings LARRY MCDONALD had so often made concerning the brutal intentions of that cold hearted nation.

The legacy his tragic death leaves us is clear. We must not be lulled into any sense of false security in our Nation's dealings with the Soviet Union.

LARRY, more than anyone else, would not have been totally shocked by the Russians' cruel murder of 269 defenseless passengers on a commercial jetliner.

He warned us time and time again, that despite cosmetic appearances the Soviet Union attempts to put on in the international arena as a peaceloving nation seeking détente with the United States, it is still a nation controlled by Communist tyrants who have little regard for either human rights or human life.

If we remember that message, LARRY MCDONALD will not have died in vain.●

● Mr. KILDEE. Mr. Speaker, it was with profound shock and sadness that I learned of the Soviet downing of Korean Air Lines flight 007 over the Sea of Japan during the early morning hours of September 1. Violent loss of innocent life is always difficult to accept, and in this case the brutal murder of 269 innocent, unsuspecting travelers has rightfully been greeted with worldwide horror and revulsion.

But the tragedy over the Sea of Japan struck an especially close chord here in Washington. Among the victims of flight 007 was our friend and colleague, Representative LARRY P. MCDONALD, of Georgia.

LARRY and I often disagreed on legislative approaches to issues. But he was always a gentleman. He possessed a deep and abiding love for our country and our way of life, and he was a dedicated and able defender of both. His frankness and dedication will be missed by this body. Many here will always treasure his friendship.●

● Mr. BARNARD. Mr. Speaker, many of us rise today to pay tribute to a Member whose death has been noted in every capital of the world.

As a Member of the Georgia delegation to which he belonged, I feel particularly aggrieved at both the fact of his passing and the manner of his death.

Much has already been said on this floor about the callous, brutal action of the Soviets. The Korean Air Lines incident has served to remind us that we are in an adversarial relationship with a people whose values are light-years away from our own. Not only is there an apparent disregard for human life, but also a mechanical enslavement to the dictates of a paranoid state.

Perhaps today is a time, however, for reflection on LARRY MCDONALD and his work in the House. It has been said that the House is the most American and the most democratic of all our institutions, truly representing all the different people of the country. Because of this diversity and because of the sheer number of our 435 seats, we in this body look to Members who can articulate their views. We look to Members who can bring us new information, who are not afraid to be candid about their beliefs, and who can argue forcefully for what they believe to be right and in the best interests of the Nation.

LARRY MCDONALD was all of these things, to the extent that he became a national figure with a following in every State. For many people, his ideas were, and will continue to be, a clear view of where our country should stand and in what direction we should face. There will be others to voice these ideas, but LARRY was unique in the pure breadth of his political and geographic constituency, and his passing will diminish the House as a whole.

Finally, on a personal note, it should be said that a Member of the House is judged by the way in which he presents his views. Despite the passion with which he held his views, LARRY MCDONALD could also be gracious and charming. A loner with the strength to stick to his guns, he was a forceful character on our stage, and his presence will be missed.●

● Mr. YOUNG of Florida. Mr. Speaker, it is with sadness that I join today in paying tribute to our colleague from

Georgia who dedicated his life to warning the American people about the Soviet menace. LARRY MCDONALD, ironically, died as a result of the type of Soviet brutality of which he was such an outspoken critic.

Although we sat on opposite sides of the aisle, LARRY and I were united in our efforts to call attention to the Soviet threat to world peace and our Nation's need to respond to that threat by providing for a strong national defense. Together we sought to inform the American people that it is the Soviet Union, and not the United States, that imperils world peace. We will never use our Armed Forces to attack another nation and deprive our fellow human beings of their freedom as the Soviets have done in Eastern Europe, Africa, Southeast Asia, Central America, South America, Cuba, and most recently Afghanistan. And needless to say, we will never use our military weapons, as the Soviets callously did on September 1, to shoot down unarmed passenger aircraft.

LARRY and I many times from the floor of the House of Representatives called attention to acts of Soviet aggression and deceit because the American people must have a better understanding of the Soviet threat and the unpredictability of their actions. Our Nation also must realize that the Soviet Union cannot be trusted to negotiate in good faith or to honor international agreements to which they are a signatory.

Our colleague LARRY MCDONALD died at the hands of the Soviet Government which he told the American people seeks to fulfill its goal of world domination regardless of the cost of human life. Territorial expansion and control is the primary Soviet goal.

Mr. Speaker, LARRY MCDONALD spent his life cautioning the American people and the world about the impending Soviet threat to peace. As a Member of this body for 9 years, his message and work was being recognized by a growing number of people. Unfortunately, it was not until he lost his life that his warnings were fully understood.

That is why we now must realize as a nation that the Soviet Union is deterred only by a show of strength. Soviet worldwide aggression will be prevented so long as we maintain a national defense capable of responding to and repelling any Soviet advance against our Nation and our allies.

The murder of our colleague LARRY MCDONALD by the Soviet Union is a painful reminder that the message of his lifelong work must not go unheeded.●

● Mr. FIELDS. Mr. Speaker, it is with great sorrow but with a great sense of honor as well that I participate in this tribute to our late distinguished colleague, LARRY MCDONALD. The loss of LARRY MCDONALD is both a loss to the House of Representatives as a whole and to many of us as individuals.

Since my election to this body in 1980, I have looked to LARRY MCDONALD as a statesman. He was a man who identified his goals and never waivered from the goals. It has been often said that LARRY MCDONALD was a different breed of man. I suppose that statement is accurate but I am not sure that its connotations are fair.

LARRY MCDONALD was a true American patriot. He valued his country more than his own personal wealth or well-being. Often perturbed by the bureaucratic intricacies of the legislative process, LARRY MCDONALD chose to focus on broader horizons. It was as though he saw the future more distinctly than the present. He observed legislation with as much an eye to the future as the present. He did not ask, "Is this decision expedient?" He asked, "How will this decision affect my children and their children."

He was a champion of a strong national defense. As our Founding Fathers had, he feared too much power in the hands of Government. He viewed private enterprise as essential to individual liberty, and he believed that private sector solutions were superior to Government solutions. He sought to preserve the freedoms we have inherited as a birthright—knowing that freedom may easily be lost.

For LARRY MCDONALD, the constitution reigned supreme. While one may disagree with his objectives, LARRY MCDONALD's motives were beyond reproach.

LARRY MCDONALD's history of taking unpopular stands in Congress is well known, but his political side is only part of the man. LARRY MCDONALD was brilliant. A graduate of Emory University School of Medicine at the age of 22, his medical excellence was undisputed. And, he was a caring man, who, while vigilantly opposing the welfare state, gave himself liberally to those in need and called upon others around him to do likewise. Finally, his sense of humor was superb.

LARRY MCDONALD was never quite at home with the give-and-take, compromising nature of politics, yet he represented his district well. Undoubtedly, Congress needs men and women who are immersed in the grinding and sometimes tiresome legislative process. But, Congress has room for that cautious voice reminding us that liberty is fragile, that its price is high and that it must not be taken for granted. In a sense, LARRY MCDONALD was a modern-day "voice in the wilderness." I respect his contribution and am honored to have been his colleague.●

● Mr. KEMP. Mr. Speaker, I rise today to express my deepest sympathies to the family of our former colleague, LARRY MCDONALD of Georgia's Seventh District, his wife Kathryn, and to all those Americans who share this loss.

LARRY MCDONALD was a man who could be counted on at all times to vote his conscience and in accord with deeply held principles. He was never afraid to take a stand on any issue, no matter how tough or how controversial his views might be.

LARRY was a family man, devoted to his wife Kathryn and his five children. He was a distinguished urologist and a physician of great skill and compassion. He served his country as Navy physician and flight surgeon. His career in Congress was distinguished by his service to his constituents and his willingness to listen to the concerns of the people of Georgia's Seventh District.

But the trait we will most remember about LARRY MCDONALD was his great love for the traditional ideals of the United States, and his conviction that the Soviet Union is an active and indeed belligerent threat to freedom and democracy around the world. LARRY MCDONALD was aware of the present danger and was willing to risk so much to speak out and make Americans aware of the need to keep the lamp of eternal vigilance lit.

The brutal murder of LARRY MCDONALD and the other 268 passengers of KAL flight 007 is an atrocity, and I again extend my deepest sympathies to his wife and children. Our support for a strong America and strong defense would be one way in which we can help pay our tribute to his memory.●

● Mr. MILLER of Ohio. Mr. Speaker, I join my House colleagues today in paying tribute to a distinguished American and exceptional Member of Congress who so tragically lost his life recently. LARRY MCDONALD was, in every sense of the word, a dedicated servant of the citizens of both Georgia and the Nation. He was a man of principal and idealism whose leadership on the House floor will be greatly missed.

One of the things I personally admired most about LARRY MCDONALD was the fact that he was forthright and purposeful in his position on issues that others might find easy to skirt or sidestep. Whether you agreed with him or not on a particular issue, there was never any doubt about where he stood. There was never any doubt, either, about the fact that his position was based on study and research and not simply on reflect reaction. He was not a politician who would shift with the winds of expediency or political favor.

It distresses me deeply, Mr. Speaker, when I consider the fact that he is missing from this Chamber. But what distresses me even more is the manner in which he left us. LARRY MCDONALD was an innocent passenger on a Korean airliner bound for Seoul. He

became a victim of violence by a paranoid Soviet Union. He died along with 268 others at the hands of a nation that has tried every excuse to explain this atrocity when we know there is none.

History will remember the incident that took LARRY's life, just as we will remember his good deeds and conscientious work here in the House. Let us resolve to remember what he stood for and learn something from his passing.

My sincerest sympathy is extended to his family.●

● Mrs. LLOYD. Mr. Speaker, my district borders Georgia' Seventh Congressional District. LARRY MCDONALD was a very visible leader and the people of our area have been touched by his tragic death. His life was marked by an unswerving commitment to exposing communism and particularly the communism espoused by the Soviet Union, a nation which has demonstrated its lack of regard for human life much less human rights. LARRY helped remind us of the nature of the Soviet Union as shown in the long list of its crimes against humanity.

The flight of Korean Air Lines flight 007 is still far from resolved and we must not slacken our efforts to win retribution for that unjustifiable act. But it is appropriate for us at this time to pay tribute to the man and to his dedication to his cause. I wish to join with my colleagues in mourning his passing and extend my deepest sympathies to his wife and their five children.●

● Mr. STARK. Mr. Speaker, I join with my colleagues in expressing sadness at the death of our colleague, LARRY MCDONALD—and of those many others who died on Korean Air Lines flight 007.

I often disagreed with LARRY, but I always admired his energy and his passion for America and the future of our country. He was a very hard worker, dedicated to his service to the Nation and his constituents.

We should all rededicate ourselves to insure that his death, and the death of the other passengers on that flight are not forgotten, but can forge the heat necessary to make the nations of the world sit down and find ways to prevent this type of tragedy from ever-occuring again.●

● Mr. BENNETT. Mr. Speaker, the tragic death of Congressman LARRY MCDONALD is a blow to each of us, his colleagues, and to our country. I knew him as a very friendly man, always supportive of measures to strengthen the national defense of our country. We served together on the Armed Services Committee and on several of its subcommittees. He was a man of patriotism, courage, candor, and enthusiasm for every cause he espoused. And he studied with care and perseverance to be fully informed. He set a fine example for all of us in his dedication to duty. We will all miss him greatly and I am sure I share with all Members of the House a sincere and deep feeling of loss in his death and an expression of deepest sympathy to his beloved wife and family.●

● Mr. WINN. Mr. Speaker, in the wake of the downing of the Korean jetliner flight 007 by the Soviets, which killed 269 people from across the world including one of our own colleagues, we all sense a feeling of frustration in explaining and reacting to this despicable tragedy. In looking for answers, I am reminded of a saying that to me describes the sentiments of many in Congress, "Their hindsight was better than their foresight." I can assuredly say that today, after the unexplainable event, many of us are wiser about the threat that the Soviet Union poses to the rest of the world.

But perhaps no one had more foresight in explaining the motivation of the Soviet Government than Representative LARRY MCDONALD himself, who lost his life as a direct consequence of action taken by the nation he worked so hard to expose. On countless occasions, LARRY stood in this Chamber denouncing Soviet terrorism and warning of their lack of respect for human life. And we, in return, often turned a deaf ear to his persistent campaign against communism.

LARRY's foresight about Soviet tyranny was demonstrated in a most cruel way with the killing of 269 innocent men, women, and children through an inappropriate show of power. Today I wish to pay tribute to LARRY P. MCDONALD, a man who showed great foresight and courage by standing apart from the crowd in his fight against communism—a man whose life has provided us with valuable hindsight to guide us in the future.●

● Mr. SUNIA. Mr. Speaker, you may wonder why an American Samoan is here rendering final homage to an American. But you see, it is just that simple—ever since the First World War we have been fighting side by side with Americans in every fight and scrap that this Nation has reluctantly been forced into.

Moreover, LARRY MCDONALD was a colleague of mine and mentor. Not that I can say that I cosponsored x number of his bills or he passed me "the" secret way to get a bill through in less time and effort than previously expected, but in the larger sense, the sense that when I saw him I saw a Member of Congress in capital letters. Mayor Barry says that the District of Columbia is a capital city, let me paraphrase for LARRY; he was one helluva "capitol member," and saying that, as a lay minister in my transplanted Samoan Church, and as a son of a faifeau (minister) that, to coin a well-turned phrase is saying a lot.

The best examples around this Hall and this building are those of by example. From the venerable and Honorable Speaker, to the newest Member here present. I look up to you all as I looked up to LARRY and I say that his passing shall not be forgotten. I do not know, as many of you probably do not know, just yet, what the best way to honor and remember LARRY will eventually be. But I say this with all the conviction that I can muster: He will not be forgotten.

My sympathies and condolences go out to his lovely wife Kathryn and their fine children. Viewing young Tryggvi's composed responses on TV recently, convinced me that I was watching LARRY. Again, by example. Let the perpetrators of this dastardly deed beware, there are lots of Americans by the name of McDonald, and Jones and Sunia and others that will not forget this heinous deed—no not on your life, nor in any short time span.

May LARRY rest in peace.●

● Mr. BROOMFIELD. Mr. Speaker, when Korean Air Lines flight 007 was remorselessly blown out of the sky by an air-to-air missile fired by a Soviet warplane, the House lost a uniquely dedicated and outspoken defender of the U.S. national security interests. During his service in the House, LARRY MCDONALD's tireless vigilance against the soul-destroying tyranny of Communist dictatorship, wherever he perceived it, was unparalleled. Perhaps no other person who has ever served in this House has earned a greater reputation for unrelenting and eloquent opposition to the dangers of Communist oppression however manifested.

Surely it is a tragic irony that LARRY MCDONALD reportedly missed an earlier flight by a matter of moments. Nevertheless, the perverse twist of fate which placed him on flight 007 gave his untimely and violent death a certain grim but transcendent meaning. He fought all of his life to expose the cruelty, perfidy, and wanton contempt for basic human values which characterize the Soviet regime and to educate and forewarn Americans to the nature of overt and subversive dangers presented by Soviet policies and actions. The manner of LARRY MCDONALD's shocking and contemptible assassination was itself the most forceful and persuasive demonstration of just the facts about the fundamental nature of Soviet behavior which he dedicated his life to bringing to light and defending the United States against.

We sincerely mourn the passing of our colleague, the loss of one of the most constant sentries on the ramparts of the free world. But we may all take some comfort in our mourning of his martyrdom by recognizing that his death has served to firmly focus the

brilliant light of truth on the dark and bloody hearts and hands of the Soviet regime and expose them to the shocked and outraged understanding of the honorable and peace-loving people of the world.●

● Mr. CAMPBELL. Mr. Speaker, I would like to thank my colleague from Georgia for giving me this opportunity to pay tribute to Congressman McDONALD.

When Korean airliner 007 was shot from the sky, Congress lost a man of great principle. LARRY McDONALD never voted for something because it was popular or an in issue, but rather because it was the right or moral decision to make. And, once that decision was made, he never wavered from his course, leaving a record of conservative consistency that will be hard to match.

LARRY was not afraid to take on the tough, controversial issues and face them squarely, often at odds with his own party. His hard work and high principles won him the respect and admiration of his colleagues from both sides of the aisle. He will be sorely missed by us all.●

● Mr. WOLF. Mr. Speaker, it is with sadness and a great sense of loss that I rise to join my colleagues in this special tribute to LARRY McDONALD. My sincere, heartfelt sympathies are with the family who survive Dr. McDONALD's tragic death.

Last week, I attended the memorial service held for our friend and colleague. Through the many speeches, accolades, songs, and tributes made in Representative McDONALD's behalf, one statement has stuck with me from that gathering. Rev. Imagene Stewart took the podium to sing Amazing Grace, but before she began the hymn, she related a story giving her personal insight into the man. She explained of her meetings and conversations with LARRY McDONALD on a host of various social and religious issues. She related how they had their differences, but went on to quote something Dr. McDONALD had once told her: He said, "Imagene, if you don't stand for something, you will fall for anything." And then she began to sing the hymn.

LARRY McDONALD personified this principle. He was a man of deep commitment and conviction. I admired his courage and dedication to an agenda from which he never deterred.

To his wife, family and friends, we offer our prayerful support and condolence. This body will sorely miss his influence.●

● Mr. FUQUA. Mr. Speaker, I appreciate this opportunity, arranged by Congressman LEVITAS and the Georgia delegation, to pay my respects to the family of LARRY McDONALD. He was a decent and honorable man who faithfully served his constituents in Georgia's Seventh District, and left his mark on the entire Nation as well.

LARRY was a dedicated proponent of his point of view and always argued with great knowledge and sincerity. People may not always have agreed with LARRY but you could not doubt that he believed deeply in what he said.

His goal was always to make America strong and able to withstand any challenge from a hostile world. He recognized the need for a strong defense if we are to make the world a better place in which to live.

He was an honest man who loved his family, his State and his nation. His presence will be sorely missed in this Chamber. We can only hope that through his brutal murder by the Soviet Union some good will be gained. The philosophy he embodied must be remembered by this and future generations.●

● Mr. HATCHER. Mr. Speaker, I rise today to join my colleagues in remembering a fellow Member of the Georgia congressional delegation, Congressman LARRY McDONALD, whose life was taken by the barbarous and coldblooded Soviet attack on Korean Air Lines flight 007.

During my service in the Congress, I have known Congressman McDONALD as a man of ardent and deeply-held convictions whose actions without exception were true to his beliefs and personal commitments. I, further, have known him as a friend and colleague who time and time again offered and provided encouragement and assistance to projects and efforts important to the Second District of Georgia, which I represent. The role Congressman McDONALD played in the House and in the Nation is one which cannot simply be filled. This Nation, which cannot afford to lose her leaders, certainly has lost one of them with Congressman McDONALD's passing.

My thoughts and sympathies and those of my wife, Ellen, remain with Congressman McDONALD's family and friends during this terrible and difficult period.●

● Mr. REGULA. Mr. Speaker, today we pay tribute to our late colleague LARRY McDONALD. I want to first extend my deepest sympathies to LARRY's wife, Kathy, and his children. Death, whatever the circumstances, is tragic, but to come so suddenly and unnaturally is particularly painful.

William Lloyd Garrison, a prominent American abolitionist, said, "We may be personally defeated, but our principles, never."

First and foremost LARRY McDONALD was a man of strong principles. Whether you agreed with him or not, you had to admire and respect the strength of his convictions.

Thomas Paine called moderation in temper a virtue, but moderation in principle a vice. LARRY McDONALD never compromised his principles and as such he became an recognized and effective spokesman for conservative philosophy.

The strength of our system of government is that it encourages and fosters diversity of opinion. Only in such a free and open democratic system as ours could such diverse political philosophies as those of LARRY McDONALD and the late Phil Burton coexist.

Although they came from opposite ends of the political spectrum, both men shared the same strong allegiance to principle. It is this dedication to cause which LARRY McDONALD will long be remembered for. Although he has left us, the principles for which he fought will live on in this Chamber of democracy.●

● Mr. ADDABBO. Mr. Speaker, the passing of our colleague from Georgia, the distinguished LARRY P. McDONALD, has cast an ominous shadow on the proceedings of this body. None of us will ever forget the horrible event that took his life.

While the incident intensified the tragedy of this Member's death, I think it important to mourn LARRY McDONALD away from the glare of international furor. Representative McDONALD was, foremost, a man of courage. While he and I may have disagreed more than once on political issues, I admired a man who stood firmly behind his convictions. He will be remembered as a man who lived out his convictions daily through his dedication to his church and family.

I offer my deepest consolation to the Representative's wife, Kathryn, and to all his children and close friends. The Nation mourns a fine man whose religion gave him the guidance to be the wonderful father, husband, and powerful leader, that he was.●

● Mr. RODINO. Mr. Speaker, I want to join in honoring LARRY McDONALD and to extend condolences and my feeling of sorrow and compassion to his grieving family.

Congressman McDONALD and I were rarely on the same side of any of the major issues that this body regularly faces. Seldom did we agree on solutions.

But, during the saddest and most painful time of my life, LARRY McDONALD sought me out to offer me his professional counsel as a physician and, as a caring human being, to console me in those terrible hours.

For that kindness, I shall always be grateful, and I shall miss him.●

● Mr. NICHOLS. Mr. Speaker, I appreciate our friend, ELLIOTT LEVITAS, arranging for this special order so that the many friends of our departed colleague, LARRY McDONALD, may pay tribute to the life of this outstanding American.

It was my privilege to work with Congressman McDONALD as a member of the House Committee on Armed

Services and, certainly, there was no Member of Congress more dedicated to the principles in which he believed.

I would say further, Mr. Speaker, that although all of us in this body to some degree love and appreciate the type of government under which we are privileged to serve, LARRY MCDONALD above any other Member of Congress displayed that appreciation in his fierce and determined support of the precepts which over the years have made America the great country that we are.

Last Thursday night as Carolyn and I sat behind the Georgia delegation in the First Baptist Church in LARRY's hometown of Marietta, Ga., I thought about the depth of our friend's love for his country, the concerns that he held in opposition to communism, both at home and abroad, and of the imprint that his life has made on those of us who knew him, loved him and were privileged to serve in the halls of Congress with him over these years.

Congressman MCDONALD's untimely death, to use a military term, was most certainly service connected for he was on a mission to visit with the free people of Korea as a part of an American delegation seeking closer ties with the Korean people and the Korean Government. He will be missed by me as a friend and his advice, counsel, and knowledge on matters relating to defense will be sorely missed by our Armed Services Committee and by the Congress.

I would want to express my deepest sympathy to his widow, Mrs. Kathryn McDonald and to all other members of the McDonald family.●

● Mr. HORTON. Mr. Speaker, today I join with my friends to pay tribute to our fallen former colleague, Congressman LARRY P. MCDONALD of Georgia. His tragic and untimely death aboard Korean Air Lines flight 007, along with 268 other innocent human beings, stands as a testimonial to the Soviet's treachery, deceit, and callous disregard for human life. As we in this body know, it was this threat posed by the Soviets that LARRY spoke out against so loudly and for so long.

Since coming to the House in 1975 representing Georgia's Seventh Congressional District, LARRY took a leadership position in the fight against communism both at home and abroad. Although often adopting a bold or controversial position on difficult issues, LARRY stuck by his convictions and was never yielding in his efforts to educate Americans and the people of the free world on the Communist threat. Ironically, the Soviets cold-blooded attack on flight 007 which killed LARRY MCDONALD has been a tragic vindication of his tireless efforts.

As we in the House move on to consider legislation or policies that will influence our relationship with Communist-block nations, I hope we will remember the words and the warnings of LARRY MCDONALD. With the downing of flight 007 we are reminded again of the insignificant value which the Soviets place on human life. When we deal with the Soviet leaders we must do so in full knowledge of their capablity of committing the most atrocious of acts. These are the teachings for which LARRY MCDONALD gave his life.

Mr. Speaker, on behalf of myself and the people of the 29th District of New York I would like to extend my deep and sincere condolences to the family and friends of Congressman LARRY MCDONALD.●

● Mr. RUDD. Mr. Speaker, the premeditated murder of 269 civilians aboard the Korean airliner by the Soviet Union was also an attack upon the founding principles of our great Nation and the free world.

There was no greater defender of America's right to fight for these principles than Congressman LAWRENCE PATTON MCDONALD, a distinguished Member of this body, who was a victim of the brutal Soviet attack.

It was a sad, but unmistakable, irony that Representative MCDONALD was a leader in the struggle against international communism and a leader in the building of a strong and prosperous America.

His death, along with 268 other passengers and crew members of KAL flight 007, is directly attributed to the totalitarian regime he so consistently and vigorously fought to expose to the disbelievers. The truths about the nature of Soviet communism he espoused on the floor of this Chamber, and around the world, have been brought to the full attention of all civilized peoples as a result of the Soviet attack, their lies, and lack of contrition.

Congressman MCDONALD's contributions to the security of the United States and his diligence in documenting the threat of communism are testaments to his life's work in and out of Government.

A urologist by profession, in a family of physicians, Representative MCDONALD was an activist on a range of prominent issues: The right to life, the right to bear arms, the modernization of our Nation's military defense, fiscal discipline in Federal spending, and the rights of taxpayers.

His efforts to oppose the concepts and true-to-life subversion and terrorism of the Soviet Union and its client states went beyond his service within the U.S. Congress.

LARRY was the founder and president of the Western Goals Foundation, a group of distinguished Americans, devoted toward the exposure of the vastly expanding network of Soviet-sponsored revolution and terror throughout the world.

His anti-Communist campaign made him a recognized dignitary among our friends in the free world, and a hated enemy among the Communist regimes.

As a young doctor, Representative MCDONALD spent 4 years in the U.S. Navy, much of that service as a physician and overseas flight surgeon to naval squadrons in Iceland. At the time of the Soviet massacre, he held the rank of captain in the U.S. Naval Reserve. His steadfast support for improved U.S. intelligence and military capabilities, and resistance to Soviet encroachments anywhere on the globe, was invaluable during his membership of the House Armed Services Committee.

LARRY's crusade against Soviet aggression was to bring him to South Korea a few weeks ago to participate in meetings and ceremonies surrounding the 30th anniversary of the signing of the United States-Korea Defense Treaty. A Soviet interceptor jet shot down the commercial jet on which LARRY and 268 other civilians were en route to Seoul. But this brutal act did not destroy the hard-fought causes which this Member of Congress so ably represented.

Mr. Speaker, the survival of America and our principles as a free nation is tied to the courageous patriotism exemplified by Americans like LARRY MCDONALD. For this, we owe him our recognition and commitment to the freedom and liberty of those who are persecuted and threatened by the Soviet empire.

I join my colleagues in expressing condolences to Kathryn McDonald, their entire family, and many friends and followers, who must share in this tragic loss of life and leadership.●

● Mr. ANNUNZIO. Mr. Speaker, I rise today to mourn the loss of our colleague, the Honorable LAWRENCE P. MCDONALD, who died tragically when a Korean commercial air flight was deliberately shot down by the Soviet Union on September 2, in a dastardly act of barbarism—an act beyond all bounds of civilized conduct.

Congressman MCDONALD was a loyal, patriotic American, who served our Nation with distinction as a Navy flight surgeon, after having received his doctorate in medicine from Emory University in 1957. He was elected to the 94th Congress, and for the last 9 years has ably represented his constituents from the Seventh Congressional District of Georgia, as a member of the House Armed Services Committee, its Subcommittee on Readiness, and its Subcommittee on Research and Development.

At the time of his death, Congressman MCDONALD was a captain in the Naval Reserve, and was faithfully serving our Government in an official

capacity, en route to a conference marking the 30th anniversary of the United States-South Korean defense pact, when his unarmed plane carrying 269 passengers, was fired upon by the Soviet Union.

The United States must take firm and decisive action to show the Communists that we will not tolerate the killing of innocent civilians and public officials, while they travel aboard defenseless commercial aircraft.

Mrs. Annunzio and I extend our deepest sympathy to Congressman MCDONALD's wife, Kathryn, to his children, and to all of the other members of his family who survive him.●

● Mr. PRICE. Mr. Speaker, I rise to pay tribute and respect to the late Honorable LARRY P. MCDONALD of Georgia, a member of the House Committee on Armed Services.

The media accounts of the tragic shooting down of Korean Air Line 007 that led to his death have generally portrayed him as an ultra conservative loner whose legislative accomplishments and influence in this body was limited.

That description is inaccurate and unfair.

LARRY MCDONALD provided a valuable service to this Congress. He represented a conservative constituency in the State of Georgia and contributed to the flow of ideas in this House just as moderate or liberal Members do.

LARRY was widely characterized by his abhorence of communism. He studied Communist ideology and the methods the Soviet Union uses to infiltrate Democratic institutions. He warned us repeatedly to be alert to Communist maneuvering, either political or military, that could be detrimental to U.S. interests.

The LARRY MCDONALD I and most of the House Armed Services Committee members and staff know was a different LARRY MCDONALD then generally portrayed by the media. Words such as "compassionate," "conscientious," "helpful," "hardworking," and "highly intelligent," "warm," "gentle," and "pleasant," flow easily from the description of those who worked closely with him.

LARRY MCDONALD served on three subcommittees of the Armed Services Committee; Research and Development, Seapower and Readiness.

His association with the military services as a Navy flight surgeon, provided him with a working knowledge of the needs of the services and their personnel. He was a behind-the-scenes workaholic. It was characteristic of LARRY to offer his services to the committee and the staff to learn more about a subject so that the essence of an issue could be more articulately and understandably presented to the members of the committee and the public. He would often come to the committee rooms after normal working hours to study and discuss military programs of special interest to us. He was recognized by the committee membership as a person who did his homework.

LARRY MCDONALD was never reluctant to accept a challenge. He welcomed the opportunity to work in perhaps one of the most complicated areas in defense—research and development. He was not a technologist per se but he spent many hours trying to understand military technology and doing his part to make sure that our advances in technology would benefit the man in the field or in the fleet.

He worked long and hard to insure that our technology would not be compromised and offered to those who would use it against us on the battlefield. The entire subject of technology transfer was introduced to the Research and Development Subcommittee by LARRY MCDONALD. Larry took the initiative in many other areas as well. His expertise in the medical field enabled the subcommittee to professionally judge the Department of Defense medical technology program.

His understanding of naval matters was a great help to Chairman BENNETT on the Seapower Subcommittee. He was very interested in the programs involving assignment of medical doctors to the fleet, particularly on nuclear-powered submarines that were deployed underwater for periods of 90 days or more.

LARRY was also a tireless worker on DAN DANIEL's readiness Subcommittee. On a number of occasions (in the absence of the chairman because of scheduling conflicts) he was asked by Chairman DANIEL to chair the subcommittee at important hearings. He is remembered as always willing to help, to dig into the essence of the subject matter and ask meaningful and intelligent questions.

He always left the sincere impression that he was interested in the subject matter before the committee, and his contribution to the hearings process in the Armed Services Committee bears that out.

There is another side of the man, LARRY MCDONALD, that I know about that does not bear directly on his duties in my committee. LARRY's medical work for charity was well known to us. He engaged in an impressive effort to provide medical help to the poor and the needy of diverse races and nationalities.

LARRY MCDONALD was a complex and highly intelligent individual. I want his wife, Kathryn, and his children, Tryggvi, Callie, Mary, Larry, and Lauren, to know I am deeply grateful for his contributions to the Armed Services Committee and to the national defense.

So that some of you who may not know the extent and breadth of LARRY MCDONALD's personal accomplishments and service to the public, I am including at this point his detailed biography for the RECORD:

LARRY P. MCDONALD—DETAILED BIOGRAPHY

Congressman Lawrence (Larry) Patton McDonald, a Democrat, was elected to the U.S. House of Representatives in November, 1974, to represent the Seventh District of Georgia.

Rep. McDonald first sought the Seventh District seat in 1972 but was narrowly defeated in the Democratic Primary by the incumbent congressman. However, Dr. McDonald defeated the incumbent in the 1974 Democratic Primary and went on to win the 1974 General Election over the Republican nominee.

Congressman McDonald defeated three challengers without a runoff in the 1976 Democratic Primary and again beat his 1974 Republican challenger in the 1976 General Election.

He won the 1978 Democratic Primary runoff election after defeating three opponents in the primary and went on to easily defeat the Republican challenger in the 1978 General Election.

Rep. McDonald was renominated in the 1980 Democratic Primary and won the 1980 General Election, both by landslide margins.

He defeated two opponents in the 1982 Democratic Primary and was reelected in the November General Election, both by landslide margins.

Rep. McDonald is a veteran member of the House Armed Services Committee, its Research and Development Subcommittee and its Subcommittee on Readiness.

Rep. McDonald was born in Atlanta on April 1, 1935. He has been a resident of Cobb County, Ga. since 1966. He attended public and private schools in Georgia, graduating from Darlington School, Rome, Ga., in 1951. He completed his pre-medical training at Davidson College, N.C. in 1953 and was accepted to Emory University School of Medicine in Atlanta, Ga. prior to his 18th birthday. He received his Doctor of Medicine degree from Emory University in 1957.

Dr. McDonald spent four years in the U.S. Navy, most of that time as a physician and overseas flight surgeon to Naval Squadrons in Iceland. He completed his tour of duty as a Lieutenant Commander. Currently, he holds the rank of Captain in the U.S. Naval Reserve.

After two years residency in general surgery at Grady Memorial Hospital, Atlanta, Dr. McDonald spent three years in further residency training in urology at the University of Michigan Hospital in Ann Arbor, Mich. He also received his first taste of politics in Ann Arbor when he made an unsuccessful bid for that city's Council as a Democrat.

Congressman McDonald was a junior member of the McDonald Urology Clinic in Atlanta before his election to Congress. He is from a family of physicians. His father, Dr. Harold McDonald, is the senior member of the McDonald Urology Clinic and his brother, Dr. Harold McDonald Jr., is a member of the Clinic. The Congressman's grandfather, Dr. Paul McDonald, was in general practice in Bolton, Ga. for more than a half-century.

Rep. McDonald is a member of several medical associations. They include the Association of American Physicians and Surgeons, Association of Clinical Urologists, Medical Association of Georgia, Medical Association of Atlanta and the Atlanta Urol-

ogy Society. He served on the Georgia State Medical Education Board from 1969-74, as vice chairman and acting chairman.

He is the co-author of "Correlation of Urinary Output with Serum and Spinal Fluid Mannitol Levels in Normal and Azotemic Patients," published in the "Journal of Urology" in 1968.

In summary, the solon is also a member of several business, economic, health and conservative organizations, including the Cobb County Chamber of Commerce and the Smyrna, Ga. Rotary Club, where he is an honorary member.

He is also a member of the Northside, Ga. Independent Methodist Church.

The Northwest Georgia representative belongs to the Atlanta Astronomy Club, the Economic Monetary Investment Research Society and the Economics Committee of the Association of American Physicians and Surgeons; American Legion, Bolton Post 156. He serves as commissioner of Clan Donald for the District of Columbia.

The Congressman is on the National Board of the Movement to Restore Decency (Motorede) and a member of the Georgia Right to Life Committee. He is also on the Board of Advisors for American Life Lobby and a member of the Congressional Advisory Committee of Christian Voice Inc. Rep. McDonald is a member of the Advisory Council of Birthright of Atlanta Inc. and he serves as an honorary Board member of the Atlanta Interreligious Task Force on Soviet Jewry and Human Rights. He regularly scores 100 percent on the pro-family ratings of Christian Voice. He is a member of the National Pro Life Political Action Committee and he belongs to the Committee for Freedom of Choice in Cancer Therapy, for which he serves as legislative advisor.

He is a member of the National Rifle Association, the American Pistol and Revolver Association, Advisory Board of the National Committee for the Right to Keep and Bear Arms, Gun Owners of America, National Advisory Council of the Second Amendment Foundation, Citizens Committee for the Right to Keep and Bear Arms.

Rep. McDonald. A member of its National Council since 1966, was named chairman of The John Birch Society in March, 1983. It is a constitutionalist education-action organization. He is also a member of the Advisory Board of the Committee for the Survival of a Free Congress, serves as Congressional Advisor to the American Conservative Union, American Security Council, Conservative Caucus and the National Federation of Independent Business, is on the National Advisory Board of the Committee for a Free China, Association of American Dentists and Young Americans for Freedom, is a member of the National Advisory Council of the American Legislative Exchange Council and serves on the Congressional Advisory Panel of the National Tax Limitation Committee.

He is an ex officio member of the Georgia Democratic Committee and a member of the Floyd County, Ga. Democratic Association in his District.

In addition, the congressman has been appointed a member of the Congressional Advisory Board of Conservatives Against Liberal Legislation. He serves on the Membership Committee of the American Civil Defense Association, a panel that includes Dr. Edward Teller, designer of the hydrogen bomb.

Congressman McDonald is a member of the Board of Advisors of the Fund to Restore an Educated Electorate, as well as a member of the Conservative Leadership Youth Foundation's Advisory Board.

He has been named an honorary member of the Georgia Chapter, Association Builders and Contractors. The National Taxpayers Union has presented him the "Most Frugal Member of Congress" award for his voting record against wasteful and inflationary government spending.

Continuing, the Georgia Democrat is a life member of the Reserve Officers Association of the United States, an honorary member of the National Aeronautical Association, Friends of the Davidson College Library, Clan Donald of the Southeastern United States, the Naval Reserve Association and the Special Operations Association.

He has been named a Knight of Honor in the Sovereign Order of St. John of Jerusalem, Knights Hospitaller.

Congressman McDonald is a member of the Monday Club in London, England, the quarterly Tax Reform Immediately (TRIM) bulletin for the Tennessee Valley of North Alabama and numerous other TRIM Committees, which are nonpartisan, nonpolitical educational groups designed to encourge reduced Federal spending.

He is listed in "Who's Who in America," "Dictionary of International Biography," "Who's Who in American Politics," "Who's Who in the South and Southwest" and "Community Leaders and Noteworthy Americans."

The congressman was the U.S. representative to the World Freedom Day Rally on Taiwan in 1976 at the request of the World Anti-Communist League. It was attended by more than 50,000 people.

Rep. McDonald was presented the Bernado O'Higgins Award in 1977 by the government of Chile. It is the highest award that can be given by Chile because O'Higgins is remembered as "the George Washington of Chile."

Readers of Conservative Digest picked Rep. McDonald as one of the most admired conservatives in Congress in 1980 and 1981. Americans for Constitutional Action also presented him its distinguished service award in 1980.

He received Veterans of Foreign Wars Post 5290's Loyalty Day Award in 1979. In addition, the congressman was presented the annual Americanism citation from the Westchester County Committee of the American Legion in New York in 1979. He was recognized by the Greater Atlanta Chapter, Reserve Officers Association, that same year. In early 1980, the Anti-Communist Bulgarian National Front in New York also presented him the Order for the Fight for Liberty in Bulgaria, with merit.

Rep. McDonald received the Naval Reserve Association's national Distinguished Service Award in 1980.

He was the Grand Marshal of the Captive Nations Parade in New York in 1982.

Also, the solon was named the "Most Conservative Member of the 97th Congress" by the Philip M. Crane Chapter, Young Americans for Freedom, based in New York.

In 1982, he was presented with the annual leadership award for his activity in Congress by 32 conservative organizations, an award previously given to Sen. Jesse Helms (R-N.C.)

The Georgia Democrat has been recognized for his efforts to restore constitution government by Conservative Caucus, receiving its leadership award.

The Congressional Medal of Honor Society presented Rep. McDonald its distinguished service award in 1981 for his leadership on national defense issues. And he has been honored by the American Security Council for his contributions in that same area.

In 1980, Rep. McDonald received the Gen. John J. Pershing "True American" award from Barracks 948, Veterans of World War I, at Pershing Point ceremonies in Atlanta. That same year, he received a special baton from the world champion U.S. Army Golden Knights parachute team at Grant Field on the Georgia Tech campus.

He is a member of the Golden Age Hall of Fame, sponsored by the independent National Alliance of Senior Citizens, the second largest membership organization for older citizens in the nation, for his concern about the retired and elderly.

Rep. McDonald received a certificate of appreciation in 1978 from the National Human Rights Committee for POWs and MIAs. He was also recognized as TRIM Congressman of the Year in 1978 by the New Jersey TRIM Committee. He has been cited by the Captive Nations Committee, as well as by the American Defense Preparedness Association.

Since being in Congress, Rep. McDonald has consistently received the Watchdog of the Treasury Award, first presented by the National Associated Businessmen and now presented by Watchdogs of the Treasury Inc. He has also been awarded the "Guardian of Small Business" award from the National Federation of Independent Business on a regular basis.

The National Rifle Association has recognized Rep. McDonald "for his legislative efforts to preserve the right to keep and bear arms" by presenting him with its "Defender of Individual Rights" award.

Congressman McDonald was a member of a special Armed Services Committee panel that investigated Western defenses in Japan, Taiwan and South Korea in 1978.

He was the chairman of a House delegation that studied civil defense operations in Norway, Ireland, Switzerland, Egypt and Israel during the winter, 1979. During that trip, he met with then Egyptian President Anwar Sadat and Israeli Prime Minister Menachem Begin.

In 1981, he became the only Seventh District Congressman ever selected to participate in the Georgia Chamber of Commerce's annual Pre-Legislative Forum, a two-week, statewide program designed to inform Chamber members around the state about the upcoming session of Congress. The Forum is three decades old. He is the only Georgia congressman in the last 10 years to sponsor Federal Procurement Conferences in the state for Georgia businesses.

In 1982, Rep. McDonald was a key leader in the House for gaining approval of the C-5B transport plane, after it had been defeated in the Senate. The House approved the plane by a near three-to-one margin and the Senate went on to concur basically with the House and approve the aircraft. McDonald had pointed out merits of the plane to more than 140 of his colleagues in addition to his other activities on behalf of the plane.

The solon is a trustee of the Southern Foundation for Education and Medical Research, Atlanta. He is also a member of the Board of the Joseph McCarthy Foundation.

He is a member of the Board of Directors of the John M. Ashbrook Memorial Library and Political Forum, Ashland College, Ohio. Rep. Ashbrook, who died in 1982, was a close personal friend of Rep. McDonald's.

The congressman is also the unpaid president and chairman of the board of Western

Goals Foundation. The Advisory Board includes former Rep. Jean Ashbrook, Mrs. Walter Brennan, Taylor Caldwell, Roy Cohn, Rep. Philip Crane, Gen. Raymond G. Davis, Henry Hazlitt, Dr. Mildred Jefferson, Dr. Anthony Kubek, Roger Milliken, Adm. Thomas Moorer, E. A. Morris, Mrs. John C. Newington, Gen. George S. Patton, Dr. Hans Sennholz, Gen. John Singlaub, Dan Smoot, Roger Stoddard, Rep. Bob Stump, Mrs. Helen Marie Taylor, Dr. Edward Teller, Gen. Lewis Walt and Dr. Eugene Wigner.

Western Goals has published several works, including "FALN," about the Puerto Rican terrorist group; "Red Locusts" about Soviet support for terrorist groups in Southern Africa; "Outlaws of Amerika" about the Weather Underground Organization; "Ally Betrayed-The Republic of Korea," "Ally Betrayed-The Republic of China," "The War Called Peace" about Soviet influence of the nuclear freeze movement; "Red Tide Rising in the Carolinas" about efforts by militant groups to penetrate communities and trade unions in North and South Carolina; "Ally Betrayed-Nicaragua," and "Broken Seals" about the interconnection of groups that seek to undermine the Central Intelligence Agency and the FBI. It has also produced the network quality video presentation, "No Place To Hide," about the strategy and tactics of terrorism.

The solon serves on the Board of Directors of the Committee for the Survival of a Free Congress Foundation and the Conservative Caucus Education and Research Foundation. Rep. McDonald also serves on the Board of Advisors of The Ludwig von Mises Institute for Austrian Economics. Serving with him are Mrs. von Mises, chairwoman, and Nobel Prize winner Dr. Friedrich A. Hayek, along with noted free market economists Murray N. Rothbard, Henry Hazlitt and Dr. Hans Sennholz, as well as Congressman Ron Paul (R-Texas). Mr. Hazlitt and Dr. Sennholz also serve on the Board of Western Goals, of which Rep. McDonald is chairman.

Congressman McDonald is the author of several articles and books, including the book, "We Hold These Truths," a review of the U.S. Constitution. It has been described by former Secretary of Agriculture Ezra Taft Benson as "the most concise, courageous and forthright presentation of the present problems, their origin and solution," that I have seen anywhere. Rep. McDonald also authored "Trotskyism and Terror: The Strategy of Revolution," published by the American Conservative Union's Education and Research Institute. M. Stanton Evans, former chairman of the Institute said the book "offers a wealth of data by which to gauge the . . . media effort to portray the Socialist Workers Party (SWP) as a group of peaceable Socialists."

He is a contributor to "American Opinion," a conservative monthly magazine. "U.S. News and World Report" has published an essay by Rep. McDonald on the dangers of recognizing Communists Cuba, as well as a detailed interview on the ineffectiveness of the United Nations. He has also authored a guest editorial on the need for community leadership in "The Financial Planner" magazine. The congressman has written numerous articles on gun control, the volunteer army, the power of liberal special interest groups and the state of U.S. defenses.

Congressman McDonald has been recognized nationally as a leading conservative spokesman and Sen. Barry Goldwater (R-Ariz) said after his second term that Rep. McDonald had perhaps "contributed more to the Congress than . . . any other freshman who has ever come there."

Conservative groups that rate congressmen regularly on the basis of their votes have consistently placed Rep. McDonald at the top of their scales. Several of these groups include the National Taxpayers Union, American Conservative Union, Americans for Constitutional Action, The Review of the News and Committee for the Survival of a Free Congress.

He and his wife, Kathy, reside in Marietta when Congress is not in session. Their residence while Rep. McDonald is in Washington, D.C. is in Alexandria, Va. Rep. McDonald has three children, Tryggvi Paul, Callie Grace and Mary Elizabeth. He and Kathy have two children, Larry Jr., born in August, 1981, and Lauren Aileen, born on Christmas Day, 1982.●

● Mr. HUTTO. Mr. Speaker, I would like to take this time to express my sorrow over the untimely passing of our colleague. It was my good fortune to sit by the gentleman from Georgia on two subcommittees of the Armed Service Committee and, in this position, I had an extensive opportunity to view the work of LARRY MCDONALD. In the interrogiation of witnesses, he asked pointed and pertinent questions, but I never saw him be disrespectful to anyone. He was knowledgable of the issues. Although we did not always agree, I developed a healthy respect and admiration for LARRY. No one loved his country more. He was a true American patriot who believed in our system of government and fiercely fought against communism.

To Kathy and McDonald family, you have to have our sympathy. May God comfort you in the knowledge that LARRY gave his life for our Nation. The ruthless uncivilized Russians took him and the lives of 268 other innocent people when they and shot down Korean Air Lines Flight 007. LARRY's voice is stilled, but the freedom he cherished shall live on.●

● Mr. STUMP. Mr. Speaker, the definition of murder is the wanton, malicious, and premeditated killing of another. That definition clearly applies to the Soviet missile action which killed 269 passengers of the Korean Air Lines flight 007. That missile was specifically ordered by Soviet military authorities.

The tragic irony of that Soviet mass murder is that among those 269 innocent victims it struck down Congessman LARRY MCDONALD, of Georgia, who had spent his career in public life trying to convince the free world that the Soviets were not only capable of murder, but that in their passion to subjugate the peoples of the world, they were willing to use any violent means. They have proven their capabilities in Afghanistan and Southeast Asia. LARRY MCDONALD was not just a thorn in the side of the Soviets, he was the most dedicated Member of Congress, if not the United States in the fight against communism. He constantly was exposing their "peace" efforts as a sham, a confidence game in which the Soviets were lulling Western democracies into disarmament and weaknesses, so the free world could be terrorized into submission to Soviet power.

Through the years in which this country was led by those who held the naive belief that unilateral disarmament would somehow change the blood thirsty character of the Soviet Government, LARRY MCDONALD preached that the real road to peace was through strength.

Through those years, his messages stressing courage as a virtue were often received by small audiences. His work defending freedom and democracy was ridiculed and reviled by those opponents who tried to undermine the purpose and will of this country by crying for appeasement with their slogan "Better Red Than Dead."

Congressman MCDONALD, with his outspoken views on Soviets and communism, helped reawaken the American public to the dangers that we face so that they would support leadership who believe in peace through strength.

It is ironic that just as the message about the Soviets, that he had labored so long and hard to carry, was being recognized, and we were finally moving to strengthen national defense, LARRY MCDONALD was struck from the roll of patriots by the trigger finger of those who feared his rallying cry to the American people.

Throughout history our country has been preserved by voices crying in the wilderness warning us of dangers. LARRY MCDONALD has been one of those voices. He is truly a martyr in the cause of freedom and democracy.●

● Mr. JONES of Tennessee. Mr. Speaker, I appreciate the opportunity to present these remarks at this special order to pay tribute to our fallen colleague, LARRY MCDONALD. His untimely death was the result of what was simply an insane act by a nation whose dictatorial principles of government were fought so valiantly by our fallen colleague.

LARRY MCDONALD was a man of firm convictions and stood strong for those convictions even when it was not popular to do so. He felt deeply for the future of our Nation and unashamedly expressed his views to all. He truly tried to live up to the high principles and ideals on which this Nation was founded.

On many issues, LARRY MCDONALD and I disagreed, but even in those disagreements, he treated me with the respect that we all accord our colleagues recognizing that this institution mirrors the huge diversity that is one of the strengths of this Nation. LARRY

McDONALD's principles were high but not insensitive to the needs of others.

His death is a big loss to this Chamber. I want to extend to his wife and family my deepest sympathy.●

● Mr. SPENCE. Mr. Speaker, I rise to pay tribute to one of America's finest patriots, the late Hon. LARRY P. McDONALD.

LARRY P. McDONALD had a fundamental message for all Americans: Beware of those who would undermine our freedoms and our way of government. To that end he was a teacher of constitutional government and anti-communism.

LARRY was the author of books and articles on the U.S. Constitution. His book, "We Hold These Truths," has been acclaimed at the most concise, courageous, and forthright presentation of present constitutional/governmental problems, their origin and solution seen anywhere. LARRY also authored "Trotskyism and Terror: The Strategy of Revolution" which has been described as a book that "offers a wealth of data by which to gage the media effort to portray the Socialist Workers Party (SWP) as a group of peaceable Socialists."

LARRY was most active in his efforts to expose the worldwide activities of the Soviet Communist Party and the impact of such activities on American society. His Western Goals Foundation has published such works as "Red Tide Rising in the Carolinas" about the efforts of militant groups to penetrate communities and trade unions in North and South Carolina; and "Broken Seals" about the interconnection of groups that seek to undermine the Central Intelligence Agency and the Federal Bureau of Investigation. The foundation has also produced a first-rate video documentary, "No Place To Hide," about the strategy and tactics of terrorism.

I am reminded of a recent comment in a House Armed Services Committee briefing by Ambassador Edward L. Rowny, head of the U.S. delegation to the Strategic Arms Reduction Talks (START) in Geneva. The Ambassador was asked for his evaluation of the problems of negotiating with the Soviets. He said that he has studied the Russians for over 30 years and concludes that they are essentially different. He noted that when a Russian leader was asked for this reaction to the U.S. Congress denial of procurement of the B-1 bomber portrayed as a good-faith effort toward arms reduction, the Russians replied: "We are neither pacifists nor philanthropists."

That is the Russian mind set that LARRY McDONALD so eloquently attempted to portray to the Congress and the American people. It is perhaps unfortunate that more Members of this body and the media do not understand the Russian mentality and how different they really are in relation to Western thought and values. As my colleague PHILIP CRANE so aptly quipped at a memorial for LARRY in Constitution Hall: "No Samantha, they are not like us." LARRY McDONALD matched Soviet words and activities with Soviet deeds and found them to be lacking in sincerity and consistency. I believe we all owe him a debt of gratitude for portraying the Russian Communist for what he really is, and not what some people would like him to be. We should all benefit from LARRY's message and approach any détente with the Soviets with caution and realism.

LARRY McDONALD did so many things well. He worked tirelessly not only for his constituency in Georgia, but also for many classes of Americans. His work with the retired and elderly led to his installation in the Golden Age Hall of Fame by the National Alliance of Senior Citizens. His work with the business community has resulted in his consistently receiving the Watchdog of the Treasury Award by the National Association of Businessmen. All of us know best his unceasing work for medical charity.

LARRY McDONALD was considerate and caring for his associates; the Members and the staff. It was characteristic of him to go out of his way to be helpful to others. It was something he did naturally. Few people I have ever known have been so universally recognized by his peers for this commendable trait.

I will personally miss LARRY McDONALD for the intelligence and dignity he brought to this Chamber and for his dedication to a revival of the spirit of America as he envisioned it.

To his wife, Kathy, and to his family, I offer my sincere condolences and hope that they all will have the strength and courage to carry on the rich legacy LARRY McDONALD has bequeathed to them.●

Mr. LEVITAS. Mr. Speaker, much has been said about our colleague, Congressman McDONALD's political activities, of his zealous pursuit of the principles in which he believed, and the diversity of this House to which he contributed in a very special way.

But on the more human dimension, as an individual, LARRY McDONALD was a vigorous, hard-working human being. He spent many hours on the floor of this House. I remember on many occasions behind the rail at the rear of this chamber talking with LARRY and being talked to by LARRY about matters that were coming before the House, or his approaching me as he did other Members, to sign on to letters that he felt were important to send either to the President, the Secretary of State, or other world leaders.

He was someone who stood in his own shoes, as we say, and was unswerving in his commitments and his life has been untimely ended.

In that sense the real loss is not just to the causes in which he believed but to his family. I would like to extend my sympathy and my condolences to his mother and say that the last conversation I had with LARRY was one about the death of his father that had occurred just a few weeks before his own and LARRY was commenting about a note I had sent him and discussed with me in a very human and touching way the relationship between himself and his father. So, to his mother I extend my condolences and my sympathies as well as to his wife and his children.

May LAWRENCE PATTON McDONALD'S soul rest in peace.

I yield back the balance of my time.

HOUSE RESOLUTION 311

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PATMAN) is recognized for 5 minutes.

● Mr. PATMAN. Mr. Speaker, today I have introduced House Resolution 311 to express the sense of the House of Representatives that the Export-Import Bank of the United States delay issuing guarantees and insurance to the Government of Mexico and the Government of Brazil in the amount of $2 billion until the Congress has an opportunity to review such transactions.

In an unprecedented action, the Export-Import Bank informed Congress on August 17, 1983, that it was planning to extend $500 million in guarantees to the Government of Mexico, and $1.5 billion to the Government of Brazil, as part of an international effort to shore up the finances of these two countries.

Congress has only until September 22, 1983, to review a transaction of this magnitude unless we delay their implementation of this guarantee. I have written Mr. William H. Draper, President and Chairman of the Eximbank, to express my concern, and have also written Mr. Charles A. Bowsher, Comptroller General of the United States, asking him several questions, including whether the Eximbank can legally approve the proposed guarantee in the amounts indicated. Similar concerns have been expressed in the Senate.

My concern about a guarantee of this size is, what would happen in the case of default? We already know that these two countries are already facing severe credit problems. If we are in the position of extending credit to an admittedly poor credit risk, is there not need for additional security? What precedent are we setting that could be cited on future large guarantees for countries less worthy of our support

and perhaps even less capable of repaying the debts secured?

All I am asking at the present time is to delay the implementation so the Congress can examine these problems in the normal budget and appropriation process.●

REMARKS OF SPEAKER THOMAS P. O'NEILL ON THE DEATH OF HUMBERTO CARDINAL MEDEIROS

(Mr. O'NEILL (at the request of Mr. THOMAS of Georgia) was given permission to extend his remarks at this point in the RECORD.)

Mr. O'NEILL. Mr. Speaker, this past weekend Humberto Cardinal Medeiros died. He was a prince of the church and the spiritual leader of a large and dynamic archdiocese. He was a humble man who never forgot his humble roots. His many selfless acts of charity and kindness were well known. He liked to refer to himself as a "simple priest." I believe he chose to do so because his faith in God was so deep and his commitment to spreading the word of the Gospel was so total.

When you were in his presence there was no mistaking his gentleness, his compassion, and his concern for his fellow man. His life is testimony to his devotion to Christian ideals. He was truly a man of peace whose sudden passing is a deep personal shock to his flock, to the people of Massachusetts, and to me. We will miss him greatly.

REPORT FROM COMMITEE ON THE BUDGET 1983 CONGRESSIONAL BUDGET

(Mr. JONES of Oklahoma asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. JONES of Oklahoma. Mr. Speaker, pursuant to the procedures of the Committee on the Budget and section 311(b) of the Congressional Budget Act of 1974. I am submitting to the RECORD a letter to the Speaker advising him of the current level of spending and revenues for fiscal year 1983.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, D.C., September 13, 1983.

Hon. THOMAS P. O'NEILL, Jr.
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the curent level of revenues and spending. Pursuant to Committee Rule 10, I am herewith transmitting the status report under H. Con. Res. 91, the First Concurrent Resolution on the Budget for Fiscal Year 1984. This report reflects the adjusted resolution of July 26, 1983, and the current CBO estimates of budget authority, outlays, and revenues based on all completed action on spending and revenue measures as of the close of business September 9, 1983.

With best wishes,
Sincerely,

JAMES R. JONES,
Chairman.

REPORT TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1983 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 91—REFLECTING COMPLETED ACTION AS OF SEPTEMBER 9, 1983

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	877,896	807,781	604,300
Current level	869,188	806,988	604,131
Amount under ceilings	8,708	793	
Amount under floor			169

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $8,708 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 91 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $793 million in outlays for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 91 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 91.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., September 12, 1983.

Hon. JAMES R. JONES,
Chairman, Committee on the Budget, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1983 budget (H. Con. Res. 91). This report for fiscal year 1983 is tabulated as of close of business September 9, 1983 and is based on our estimates of budget authority, outlays, and revenues using the assumptions and estimates consistent with H. Con. Res. 91.

Since my last report Congress has completed action on the Railroad Retirement Solvency Act of 1983 (Public Law 98-76) and amendments to the Federal Supplemental Compensation Act of 1982 (Public Law 98-92). The budget resolution used in this comparison reflects the July 26, 1983 committee action making allocations of reserves under Section 2 of the budget resolution, H. Con. Res. 91.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	869,188	806,988	604,131
2. Entitlement authority and other mandatory items requiring further appropriation action			
3. Continuing resolution authority			
4. Conference agreements ratified by both Houses			
Current level	869,188	806,988	604,131

[In millions of dollars]

	Budget authority	Outlays	Revenues
Second budget resolution, revised, H. Con. Res. 91	877,896	807,781	604,300
Current level is:

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. STENHOLM, for 60 minutes, on September 22.

Mr. ROBERTS (at the request of Mr. STENHOLM), for 60 minutes, on September 22.

(The following Members (at the request of Mr. CHANDLER) to revise and extend their remarks and include extraneous material:)

Mr. MCKERNAN, for 5 minutes, today.

Mr. REGULA, for 60 minutes, on September 21.

(The following Members (at the request of Mr. THOMAS of Georgia) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. PATMAN, for 5 minutes, today.

Mr. PANETTA, for 60 minutes, on September 21.

Mr. GEPHARDT, for 60 minutes, on September 21.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CHANDLER) and to include extraneous matter:)

Mr. CONTE in two instances.

Mr. WINN in two instances.

Mr. MCCOLLUM.

Mr. LOWERY of California.

Mr. KEMP.

Mr. GUNDERSON.

Mr. LEWIS of California.

Mrs. HOLT.

Mr. RITTER.

Mr. PORTER.

Mr. LEWIS of Florida.

Mr. GREEN.

Mr. CORCORAN.

Mr. MOLINARI.

Mr. ROTH.

Mr. YOUNG of Florida in 10 instances.

Mr. FIELDS in two instances.

(The following Members (at the request of Mr. THOMAS of Georgia) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Ms. KAPTUR in two instances.

Mr. GARCIA.

Mr. HANCE.

Mr. LANTOS.

Mr. RODINO in three instances.

Mr. OBEY in five instances.

Mr. FLORIO.

Mrs. SCHROEDER.

Mr. HOYER.

Ms. OAKAR.

Mr. EDGAR.

Mr. ERDREICH.

Mr. VALENTINE.

Mr. HAWKINS.

Mr. WAXMAN.

Mr. DOWNEY of New York.

Mr. TOWNS.

Mr. AUCOIN.

Mr. SCHEUER.

Mr. WISE.

SENATE BILL REFERRED

A bill of the Senate of the following titles was taken from the Speaker's table and, under the rule, referred as follows:

S. 864. An act to amend the Volunteers in the Parks Act of 1969, and for other purposes; to the Committee on Interior and Insular Affairs.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and a joint resolution of the Senate of the following titles:

S. 118. An act to provide for the establishment of a Commission on the Bicentennial of the Constitution; and

S.J. Res. 131. Joint resolution designating "National Cystic Fibrosis Week."

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 353. Joint resolution condemning the Soviet criminal destruction of the Korean civilian airliner.

ADJOURNMENT

Mr. LEVITAS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 15 minutes p.m.) the House adjourned until tomorrow, Tuesday, September 20, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1871. A letter from the Auditor of the District of Columbia, transmitting a report entitled, "Review of the H Street Business Community Association-Facade Renovation Loan/Grant Program," pursuant to section 455(d) of Public Law 93-198; to the Committee on the District of Columbia.

1872. A letter from the Acting Assistant Secretary of State, Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Ambassador-designate Clayton E. McManaway, Jr., and members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1873. A letter from the Secretary of the Treasury, transmitting the 10th annual report entitled, "The Operation and Effect of the Domestic International Sales Corporation Legislation DISCs," pursuant to section 506 of Public Law 92-178; to the Committee on Ways and Means.

1874. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States Code, to provide participation by members of the Armed Forces in international sports activities; jointly, to the Committees on Armed Services and Merchant Marine and Fisheries.

1875. A letter from the Chairman, National Advisory Committee on Oceans and Atmosphere, transmitting a report entitled, "Marine Minerals: An Alternative Mineral Supply," to provide direction for a national commitment to the oceans; jointly to the Committees on Merchant Marine and Fisheries and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on September 15, 1983, the following report was filed on September 16, 1983]

Mr. NATCHER: Committee on Appropriations. H.R. 3913. A bill making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1984, and for other purposes. (Rept. No. 98-357). Referred to the Committee of the Whole House on the State of the Union.

[Submitted September 19, 1983]

Mr. FORD of Michigan: Committee on Post Office and Civil Service. Report pursuant to Section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 98-358). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRICE: Committee of Conference. Conference report on H.R. 2972 (Rept. No. 98-359). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of tule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. ZABLOCKI: Committee on Foreign Affairs. H.R. 2853. A bill to establish a National Oceans Policy Commission to make recommendations to Congress and the President on a comprehensive national oceans policy; with an amendment; referred to the Committee on Interior and Insular Affairs for a period ending not later than October 19, 1983, for consideration of such provisions of the bill and amendments as fall within that committee's jurisdiction pursuant to clause 1(1), rule X (Rept. No. 98-339, Pt. II). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[Submitted September 16, 1983]

By Mr. NATCHER:

H.R. 3913. A bill making appropriations for the Departments of Labor, Health and

Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1984, and for other purposes.

[Submitted September 19, 1983]

By Mr. BEDELL (for himself, Mr. ROBERTS, Mr. DE LA GARZA, Mr. FOLEY, Mr. MARLENEE, Mr. HARKIN, Mr. JONES of Tennessee, Mr. DASCHLE, Mr. EMERSON, Mr. EVANS of Iowa, Mr. LEACH of Iowa, Mr. MORRISON of Washington, Mr. STENHOLM, Mr. DURBIN, Mr. PENNY, Mr. WEAVER, Mr. ENGLISH, Mr. EVANS of Illinois, Mr. HIGHTOWER, Mr. GLICKMAN, Mr. MCCURDY, Mr. MADIGAN, Mr. TAYLOR, Mr. DORGAN, Mr. SLATTERY, Mr. SHARP, Mr. STANGELAND, Mr. SMITH of Iowa, Mr. OLIN, Mr. TAUKE, Mr. STAGGERS, Mr. HOPKINS, Mr. SKEEN, Mr. FRANKLIN, Mr. VOLKMER, Mr. JEFFORDS, and Mr. COLEMAN of Missouri):

H.R. 3914. A bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs; to the Committee on Agriculture.

By Mr. MICHEL:

H.R. 3915. A bill to extend the Federal Supplemental Compensation Act of 1982 for 18 months and to increase the number of weeks for which compensation is payable under such act to individuals residing in areas of unusually high unemployment; to the Committee on Ways and Means.

By Mr. ARCHER (for himself and Mr. PICKLE):

H.R. 3916. A bill to amend the Internal Revenue Code of 1954 to make technical correctons with respect to the application after 1983 of the percentage depletion allowance to oil and natural gas resulting from secondary or tertiary processes; to the Committee on Ways and Means.

By Mr. BERMAN (for himself and Mr. MCCOLLUM):

H.R. 3917. A bill to exempt States from the statute of limitations applicable to quiet title actions against the United States; to the Committee on the Judiciary.

By Mr. BONKER (for himself and Mr. MICA):

H.R. 3918. A bill to amend the International Claims Settlement Act of 1949 to provide for the determination of the claims of survivors of the U.S. citizens on board the Korean Air Lines airplane that was shot down on September 1, 1983; to the Commitee on Foreign Affairs.

By Mr. CLINGER:

H.R. 3919. A bill to amend title 28, United States Code, to remove the requirement of an amount in controversey for certain actions involving common carriers; to the Committee on the Judiciary.

By Mr. FAUNTROY:

H.R. 3920. A bill to authorize the District of Columbia Council to enact any act relating to the organization, jurisdiction, and rules of the landlord-tenant branch and the small claims and conciliation branch of the Superior Court of the District of Columbia; to the Committee on the District of Columbia.

By Mr. GREGG (for himself and Mr. D'AMOURS):

H.R. 3921. A bill to establish additional wilderness areas in the White Mountain National Forest; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. SAM B. HALL, JR.:

H.R. 3922. A bill to establish a 1-year limitation on the filing of claims for unpaid accounts formerly maintained in the postal savings system; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

By Mr. JACOBS (for himself, Mr. SUNIA, Mr. STANGELAND, Mr. KASICH, Mr. SAM B. HALL, JR., and Mr. ANNUNZIO):

H.R. 3923. A bill to prohibit the issuance of most immigrant and nonimmigrant visas to citizens of the Soviet Union until the anniversary date of the shooting down by the Soviet Union of unarmed civilian aircraft; to the Committee on the Judiciary.

By Mr. MINISH:

H.R. 3924. A bill to increase alternatives to institutionalization for senior citizens; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. PERKINS:

H.R. 3925. A bill to amend title II of the Social Security Act to provide increases in primary insurance amounts to account for depressed replacement rates; to the Committee on Ways and Means.

By DANIEL B. CRANE (for himself and Mr. MADIGAN):

H.J. Res. 361. Joint resolution expressing the sense of the Congress that the United States should not suspend grain shipments to the Soviet Union; to the Committee on Foreign Affairs.

By Mr. FORSYTHE (for himself, Mr. JONES of North Carolina, Mr. BREAUX, Mr. SUNIA, Mr. D'AMOURS, Mr. MCCANDLESS, Mr. WAXMAN, Mr. LEVINE of California, Mr. BATES, Mr. YOUNG of Alaska, Mr. DAVIS, Mr. CARPER, Mr. PRITCHARD, Mr. BOSCO, Mr. BIAGGI, Mrs. BOXER, Mr. BONKER, and Mr. HUGHES):

H.J. Res. 362. Joint resolution to declare June 4–10, 1984, as National Fisheries Week; to the Committee on Post Office and Civil Service.

By Mr. TORRES (for himself and Mr. BARNES):

H.J. Res. 363. Joint resolution expressing the support of the U.S. Government for the objectives of the negotiations of the Contadora nations, and for other purposes; to the Committee on Foreign Affairs.

By Mr. ANDREWS of Texas (for himself, Mr. SCHEUER, Mr. WRIGHT, Mr. DINGELL, Mr. PEPPER, Mr. BROOKS, Mr. PICKLE, Mr. FASCELL, Mr. AKAKA, Mr. FROST, Mr. LELAND, Mr. BROWN of California, Mr. MACKAY, Mrs. SCHNEIDER, Mr. HARKIN, and Mr. TORRICELLI):

H. Con. Res. 168. Concurrent resolution expressing the sense of the Congress that it is not appropriate at this time to transfer ownership of management of any civil meteorological satellite system and associated ground system equipment to the private sector; to the Committee on Science and Technology.

By Mr. APPLEGATE:

H. Con. Res. 169. Concurrent resolution urging the President to take certain actions with respect to the Soviet Union, and for other purposes; to the Committee on Foreign Affairs.

By Mr. PATMAN (for himself, Mr. ROEMER, and Mr. MCCOLLUM):

H. Res. 311. Resolution expressing the sense of the House of Representatives that the Export-Import Bank of the United States should delay issuing certain guarantees and insurance to the Government of Mexico and the Government of Brazil until the Congress has an opportunity to review such transactions; to the Committee on Banking, Finance and Urban Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. SAM B. HALL, JR.

H.R. 3926. A bill for the relief of Theron M. Bradley, Jr.; to the Committee on the Judiciary.

H.R. 3927. A bill for the relief of Kenneth L. Perrin; to the Committee on the Judiciary.

By Mr. UDALL.

H.R. 3928. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 29: Mr. ACKERMAN, Mr. BOLAND, Mr. FAUNTROY, Mr. JEFFORDS, Mr. MONTGOMERY, and Mr. WIRTH.

H.R. 433: Mr. DYMALLY.

H.R. 943: Mr. MINETA.

H.R. 1016: Mr. BOEHLERT.

H.R. 1031: Mr. CORCORAN.

H.R. 1199: Mr. MOODY and Mrs. BYRON.

H.R. 1315: Mr. EMERSON, Mr. GEKAS, Mr. HORTON, Mr. SNYDER, and Mr. WHITTAKER.

H.R. 1415: Mr. THOMAS of Georgia and Mr. LUJAN.

H.R. 1736: Mr. GEKAS.

H.R. 1795: Mr. MARRIOTT.

H.R. 2053: Mr. HANSEN of Idaho.

H.J. Res. 348: Mr. CROCKETT, Mrs. BOXER, Mr. MCNULTY, and Mr. FROST.

H. Con. Res. 9: Mr. GEJDENSON, Mr. SHARP, Mr. ADDABBO, and Mr. DYMALLY.

H. Con. Res. 93: Mr. ANDREWS of Texas, Mrs. BOXER, Mr. CARPER, Mr. DICKS, Mr. FISH, Mr. GILMAN, Mr. GOODLING, Mr. HAWKINS, Ms. KAPTUR, Mr. MARKEY, Mr. MCHUGH, Mr. MCKINNEY, Mr. MOODY, Mr. MRAZEK, Mr. RANGEL, Mrs. ROUKEMA, Mrs. SCHNEIDER, Mr. SPRATT, Mr. WHEAT, Mr. MILLER of California, Mr. BOUCHER, Mr. JACOBS, Mr. OLIN, and Mr. PICKLE.

H. Con. Res. 100: Mr. MARRIOTT, Mrs. JOHNSON, Mr. WEBER, Mr. GORE, Mr. FEIGHAN, Mr. BOEHLERT, Mr. TALLON, Mr. ROBINSON, Mr. SKEEN, Mr. PARRIS, Mr. DANIEL, Mr. MCDADE, Mr. ACKERMAN, Mr. SCHAEFER, Mr. MOLLOHAN, Mr. PAUL, Mr. PANETTA, Mr. DUNCAN, and Mr. COATS.

H. Con. Res. 146: Mr. ROGERS and Mr. JEFFORDS.

H. Res. 280: Mrs. SCHROEDER, Mr. MORRISON of Connecticut, Mr. FEIGHAN, Mr. LEVIN of Michigan, Mr. LOWRY of Washington, Mr. MITCHELL, Mr. CORRADA, Mr. EVANS of Illinois, Mr. LEVINE of California, and Mr. UDALL.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 953: Mr. REID.

H.R. 1693: Mr. REID.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1010

By Mr. COLEMAN of Missouri:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—At the end of section 10 of the amendment in the nature of substitute, insert the following:

(1) The Commission shall issue regulations specifying the extent to which a holder of a certificate issued under this section to construct, operate, maintain, or extend a coal pipeline shall be liable to any person whose land is acquired for such construction, operation, maintenance, or extension for damage or injury incurred by such person caused by the use and occupancy of such land. The regulations shall also specify the extent to which such holder shall indemnify or hold harmless such person for liabilities, damages, or claims caused by the use and occupancy of such land.

By Mr. VENTO:

(Amendment to the amendment in the nature of a substitute (Text of H.R. 3857).)

—In section 3 of the amendment in the nature of a substitute—

(1) strike out "and" at the end of paragraph (6);

(2) strike out the period at the end of paragraph (7) and insert in lieu thereof"; and"; and

(3) insert after paragraph (7) the following:

(8) no State shall sell or otherwise transfer or permit the sale or transfer, for use in a coal pipeline for which a certificate is issued under section 10 of this Act outside of such State, water which is taken from any river or other body of surface water which is located in or which passes through more than one State or from any aquifer or other body or ground water which underlies more than one State unless—

(A) there is in effect an interstate compact (i) among the diverting State and each State located downstream of such diversion and prior to the confluence with a river or stream of which it is a tributary, or (ii) among the States under which such aquifer or other body of ground water lies, which governs such sale or transfer, and

(B) such sale or transfer is in accordance with the terms of such compact.

H.R. 1036

By Mr. DURBIN:

—Page 7, strike out line 15 and all that follows through line 9 on page 8 and insert in lieu thereof the following:

LIMITATION ON USE OF FUNDS

SEC. 104. (a) Not less than 75 percent of the funds made available to any recipient under titles II and III of this Act from funds appropriated for any fiscal year shall be used to provide for wages and related employment benefits to eligible participants for work which the recipient certifies has been performed in one or more of the activities authorized under this Act.

(b) Not more than 15 percent of the funds provided to any recipient under title II or III of this Act from funds appropriated for any fiscal year may be used for the cost of administration.

(c) The remainder of the funds provided to any recipient under title II or III of this Act from funds appropriated for any fiscal year (after compliance with subsection (a) and deduction of cost of administration permitted by subsection (b)) may be used for the acquisition of supplies, tools, equipment, and other materials.

(d)(1) Nothing in this Act shall be construed to preclude or limit the payment of the costs of administration or the costs of supplies, tools, equipment, or other materials either in whole or in part, from non-Federal sources or from Federal sources other than this Act, such as section 106 of the Housing and Community Development Act

of 1974 (42 U.S.C. 5306) (popularly known as the community development block grant program) and chapter 67 of title 31, United States Code (popularly known as the general revenue sharing program).

Page 8, line 18, redesignate subsection (c) as subsection (e).

—Page 8, after line 17, insert the following new paragraph:

(3) Rates of pay for administrators funded in whole or part by this Act shall be at a wage no greater than the compensation in effect for grade GS-10.

By Mr. JEFFORDS:

—Page 3, lines 12 and 16, redesignate subsections (b) and (c) as subsections (c) and (d), respectively, and insert before line 12 the following new subsection:

(b) If, in the first three months of the calendar year in which begins the fiscal year for which an appropriation is to be made under subsection (a)(2), the national average rate of unemployment in the civilian labor force of the United States is less than 10 percent, then subsection (a)(2) shall be applied by substituting for "20 percent" a percent which is equal to 20 percent minus 5 percentage points for each full percentage point by which such national average rate of unemployment is less than 10 percent.

EXTENSIONS OF REMARKS

LEGAL AND ILLEGAL IMMIGRATION: THE IMPACT, THE CHOICES

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. LOWERY of California. Mr. Speaker, we will soon be debating the most important piece of immigration legislation to come before the Congress in over 20 years. Accordingly, I would like to share with my colleagues the following remarks by Charles R. Stoffell of the Federation for American Immigration Reform. Mr. Stoffell brings a great deal of expertise to the immigration reform arena and I am sure Members will find his speech before the California Roundtable stimulating and informative:

LEGAL AND ILLEGAL IMMIGRATION: THE IMPACT, THE CHOICES

Our Nation has a proud history of responding compassionately and humanely to the world's oppressed people. We are, after all, a Nation of immigrants. Most Americans would agree that we should continue to honor our tradition of help. But it must not blind us to the fact our Nation's resources are limited, and that our economy cannot long sustain the pressures of a continuing flood of immigrants.

IMMIGRATION CONCERNS AND FAIR

FAIR was founded in 1979 to tackle the intricacies of the immigration issue. Today, it is still the only national non-profit organization in the country that is educating the American people to the problems uncontrolled immigration pose to our future. FAIR believes that unlimited immigration is contrary to the national interest, that illegal immigration can and should be ended, and that all legal immigration should be placed within a single, stable ceiling that is consistent with our country's history of compassion and generosity for less fortunate people.

Immigration has always benefited America. But legal immigration at today's massive levels and illegal immigration that is completely out of control have numerous negative results. These negative effects can be seen in pressures on social welfare and health care systems unable to cope with this growing population, in job competition between illegal immigrants and American minority and youth job seekers and in ethnic conflicts. Conceivably a majority of Americans might in the end come to the conclusion that all immigrants hurt the country, and this could be the greatest tragedy of all.

I think that this growing awareness has come about in part because of the realization that our resources are not limitless. If we have learned anything from the long gas lines and water shortages here in the West in the past few years, it is that we are beginning to run short—that our melting pot, like any pot, indeed has a bottom.

Every nation has as one of its sovereign rights, the right to control the flow of people into its country. Of the 165 nations on this planet, 164 do so rigidly. Only the United States has a lax immigration policy. If you or I were to go to Mexico or Canada, it would be next to impossible under their laws for us to cross that border, get a job or become productive members of their societies. What we have to ask as a nation are three basic questions:

First, how many people will we admit to this country for permanent residency?

Two, who will get the slots? Who, of the 600 million people around the world who want to migrate, most of them to the United States, will be allowed entrance to our country?

And, three, how are we going to enforce the rules of our immigration policy?

I think this public debate, the answering, if you will, of these three questions is going to involve two stages. The first, and the one that Washington is grappling with now, is an attempt to form a consensus on the fact that we must limit immigration into this country.

The second stage, the one that will come after this agreement is what that limit should be. What is the number of people that should be allowed into our country every single year as immigrants? Will it be 400,000—800,000—or over a million, as we're getting today from both legal and illegal immigration?

ECONOMIC IMPACT

What are the impacts of current and prospective patterns of immigration in the U.S. labor market and economic system? There are those who have driven across the "empty space" of America and say that we have room to accommodate many, many, more people. What they don't understand is the need for this empty space in America to support our crowded urban population and the hungry world population which depends in ever increasing amounts on our grain. The economic competition felt by poor, minority and lesser skilled Americans when the volume of illegal immigration is high is another major problem. The main victim of illegal immigration is the unskilled domestic American worker.

Dr. John Reid is a graduate professor in Sociology at Howard University. In December, 1981, a study he did on the economic advancement of "Black America in the 1980's," was released. Dr. Reid writes, "Blacks are affected more than any other U.S. group by the massive increase in immigration since the mid-1970's. The surge of legal and illegal immigrants and refugees, no longer white Europeans, but primarily Hispanics and Asians, ironically presents new competition for Black Americans, just as they have finally begun to edge up the socio-economic ladder . . . it is clear that right now the masses of new immigrants are taking jobs away from disadvantaged Blacks, particularly Black teenagers. Furthermore, it cannot be argued that U.S. Blacks and Whites shun the kinds of jobs that illegal immigrants typically fill."

Then Dr. Reid presents evidence from the Department of Labor that a third of all workers employed in this country—34 million people—hold jobs in exactly the kinds of low-skilled industrial, service and agricultural jobs in which illegal aliens typically find employment, and that 10.5 million workers are employed at or below the minimum wage.

LEGAL INEQUITIES

Though there are necessarily two parties in this offering and accepting of employment, only undocumented foreign nationals are legally culpable. Worse yet, this legal inequity increases the dependence of undocumented aliens on their employers, making them even more vulnerable to exploitation.

In other words, as the law now reads, it is illegal for an illegal alien to take a job; it is illegal to harbor an illegal alien; but it is not illegal to hire one. It must be understood that undocumented workers do not make less than the minimum wage. Recent governmental surveys have shown that the average illegal alien makes between $4.00 and $5.00 per hour. To the extent that they take good jobs at good pay with the protection of the law, they are competing illegitimately and unfairly for the jobs that many Americans want and need.

Former Secretary of Labor, Ray Marshall, has observed, "I am convinced that we are sowing the seeds of a serious future civil rights struggle. We would be better off if we could confront it now."

ILLEGAL ALIENS TAKE NEEDED AMERICAN JOBS

For years we have heard that undocumented workers are a cost-free benefit to the United States. The argument rests on the belief that low-skilled American workers at worst are lazy, and at best choosy, about the jobs which they will do, and that they will no longer take jobs which they consider to be demeaning. Therefore, there exists a number of jobs that, if they are to be done at all, must be done by illegal immigrants.

This widespread myth is not supported by any data. Nor is the data that Americans won't take hard, dirty jobs supported by surveys of thousands of Americans. An Ohio State university study of young Americans performed for the Labor Department found that a majority of young people would take lowpaying jobs in fast-food restaurants, cleaning establishments, and supermarkets as well as washing dishes—exactly the types of occupations most associated with undocumented workers. A substantial number of the young people in the survey said they would work at wages even below the minimum wage.

A Los Angeles Times survey published on April 7, 1981, found that, "The widely accepted notion that some jobs are so menial only illegal aliens will take them is untrue . . . among unemployed people interviewed seventy-five percent said they would apply for jobs paying between $3.35 an hour, the legal minimum wage, and $4.50 an hour."

Former Secretary of Labor, Ray Marshall, stated in the Los Angeles Times on December 2, 1979:

"It is false to say American workers cannot be found for all of the jobs filled by undocumented workers. The truth is that there are millions of American workers in

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

all of these low-paying occupations already. The job market in which they (the illegal aliens) compete is highly competitive, with a surplus of people vying for a shortage of jobs, no matter how undesirable the jobs may be."

One of the lowest estimates of the number of illegal workers in the United States is 6 million. If only half of them are in jobs that would otherwise be held by U.S. workers, eliminating this displacement could bring unemployment down by one-third.

Recently, in Hempstead, Long Island, a new hotel opened up and 4,500 people stood in line to apply for 280 jobs as bellboys, busboys, and dishwashers—exactly the same types of jobs usually associated with illegal aliens, and that many would like us to think no one else is willing to do.

The real tragedy of this displacement is that its burden falls on the most vulnerable people in our society, minority teenagers, women who head families, and older workers. Their high rates of unemployment are public record. They will continue to suffer if high levels of illegal immigration continue.

Secretary Marshall has stated, "We may need foreign workers, but they should only be allowed to work here legally, under the protection of our laws."

THE SOLUTION TO PROTECTING AMERICAN JOBS

In the past decade a number of very impressive groups have studied the problem. In the sessions of Congress in 1971-1972, the House Judiciary Committee took a detailed look. The Domestic Policy Council reported to President Ford in December of 1976 on the subject. President Carter set up an Interagency Task Force in 1977. There was a Presidential Bipartisan Select Commission chaired by Father Theodore Hesburgh of Notre Dame that issued its report in 1981. President Reagan set up a commission to restudy that report and make its recommendations.

Every single one has concluded that we cannot regain control of our borders unless we make it first illegal to hire illegal immigrants. So long as people have a certainty of being able to get jobs when they get here, they will continue to come, and you cannot blame them. If you're in Mexico making $.30 an hour and you can cross that border and be assured of getting a job that pays between $4.00 and $5.60 an hour, and the worst thing that can happen to you is to get caught and sent home, you're going to come.

Changing the law in that regard will remove this magnet of jobs and therby make it possible to control the flow of illegal immigrants into this country. In a recent interview with U.S. News, Jorge Bustamante, Mexican population expert, stated flated, "Eighty-one percent of the people that come from Mexico go to the United States for jobs." While sanctions alone will not stop illegal immigration, nothing else without it makes sense.

SOCIAL SERVICES AND ILLEGAL IMMIGRATION

Let us now take a look at the status of illegal immigration as regards social services. Recent court decisions expanding the rights of illegal aliens in the United States have given at least some illegal aliens the right to claim at least some public benefits hitherto reserved for United States citizens and legal immigrants only. Today, illegal immigrants are not only willing to seek welfare and other social services, they are applying for and receiving hundreds of millions of dollars worth of services at the same time these programs are being cut back for disadvantaged Americans.

The available evidence suggests that publicly financed Health Services (especially emergency, obstetric and pediatric care) are widely employed. Of all births in Los Angeles County public hospitals in 1981, 67.5 percent were to illegal aliens. And, this was all at a cost of more than 100 million dollars to the taxpayers of Los Angeles County. In Denver, Colorado, in 1981, 81 percent of the births were to illegal aliens. And this creates an entirely new problem, because now we have children who are American citizens and their parents are here illegally.

The cost of educating the children of illegal immigrants, and nobody says we should not do this if they're here, in Los Angeles county alone, is more than 200 million dollars a year. In a recent meeting I had with the Board of Education, I was told that the Los Angeles County School System adds 25,000 children of illegal immigrants a year, or the equivalent of 20 new schools.

Unemployment Insurance is used to varying degrees. The worst example I have heard is in Illinois, where a recent study showed that in 1982, 45 percent of new applications for unemployment benefits were from illegal aliens.

And Social Security retirement benefits currently are used very little primarily because undocumented workers tend to be very young.

At the same time, they do pay taxes to support such services, though in the case of the low-paid workers who apparently predominate among illegal immigrants, such taxes are, of course, very low.

There's another side to this; on September 10, 1982, the Los Angeles Times reported on a study issued by the private nonprofit population research group, The Environmental Fund. After a computer analysis of Census Bureau and United Nations data, they found that:

"Illegal aliens cost the Federal Government in payments to displaced U.S. workers in unemployment insurance and food stamps alone, $8 to $18 billion a year."

And, this at a time when we are confronting a 200 billion dollar deficit!

To summarize the state of knowledge regarding social service costs, immigrants both legal and illegal, cannot be blamed for the rapid increase in governmental expenditures, but their impact is by no means trivial.

ENFORCEMENT OF THE LAW

Where are we in regard to enforcement of existing laws? In 1980, we had six to nine million illegal immigrants in the United States and our borders were, for all practical purposes unguarded. We have fewer people guarding our 1,750 mile border with Mexico than guarding the 103 acres of the United States Capitol; and, they do it all with a budget less than that of the Baltimore Police Department. Is it any wonder why so many consider enforcement of American Immigration Law by the Immigration and Naturalization Service to be poor? Under present circumstances, the chances are very low of even detecting, much less apprehending, most illegal immigrants.

As an example, several weeks ago in San Ysidro, two border patrol agents came upon 350 Mexican nationals crossing the border at one time. They were able to stop 40 of them and the rest got through.

A couple of weeks ago, I was in San Ysidro myself, and I went out with the border patrol. I spent the night and we went out on Kearney Mesa, looked through the scopes and watched as people crossed the Ensenada Highway into the United States, got into automobiles, and were picked up. That night we stopped a car and found six teenagers in one trunk, forty-eight in the back of a U-Haul trailer. That night, which was described as being slow, on a stretch of border 8½ miles long, 572 illegal aliens were caught. The tide has become a wave. And, as long as we continue to ignore that problem, and as long as Mexico continues in its current economic crisis, that tide will not slow.

Part of the problem is that the increase in illegal immigration has not been accompanied by a significant increase in the resources available to the INS. It alone is not an effective or sufficient strategy for controlling illegal immigration.

WORLD PROBLEMS

Unfortunately, the world of the 1980's is a less stable place, both in political and in economic terms. Domestic or international conflicts may produce real or only pyrrhic victors, but they always seem to produce refugees. Increasing strife, coupled with populations that are today more than twice as large as those of 1950, portends burgeoning numbers of refugees seeking asylum in the coming decades. Modern communication has brought our lifestyle into their homes, increasing the desire around the world to come to America. On the other side of the coin, that same modern communication has brought into our homes, the suffering of refugees on the high seas or in hastily erected encampments; suffering of which most of us would have been unaware in the past.

When emigration occurs, we must remember that the poorest of the poor, the sick and the old, do not migrate. They lack the requisite resources. Those who do come to the U.S. are those who are advancing within their societies; those who have attained the necessary knowledge of America and how to get here; those who have accumulated or been able to borrow the funds necessary to pay for their airline tickets or their smugglers; those that the sending countries can least afford to lose because their contributions to the future of their nations stand to be the greatest.

To go back to that interview in U.S. News with Jorge Bustamante, he stated flatly, "The people that are coming to America to look for jobs are those that Mexico has invested the most in, in terms of education and job training." The people that they need to build their economy and make their country as strong as it can be.

I firmly believe that we need to be committed to our southern neighbors, to helping them out of their current economic crisis, and to creating jobs there. It's our moral responsibility, and it's in the best interest of the United States. Let's take a look if we can just very briefly at some numbers. The labor population in Mexico has grown from 20 to 40 million people in the last 20 years. They're experiencing 40 percent unemployment or underemployment. And, by the year 2000, there will be 70 million people in the labor pool in Mexico. That's 30 million more in the next 17 years. And, unless we are willing to be a safety valve for that many people, we have got to encourage them to take the difficult decisions they have thus far put off within their economic and social structure. How do we know there are going to be that many people in the labor market? Because they're already born. But, it is not just Mexico.

Increasingly, we have to look at the Caribbean basin—Mexico, Central America, and the island nations. If we look at that region, in 1950 there was a population of 51 million

people. In 1981, there were 117 million. By the year 2025, just 37 years from now, that population will more than double to 298 million people. They are going to demand jobs and housing and all that they need. The problem we're facing throughout Central

a U.S/Mexican problem. In 1981, 800,000 more people flew into the international airports of this country than left. And nobody knows where they are! That's more in one year than the population of Washington, D.C., San Diego or San Francisco. And that does not count the estimated 500,000 from Mexico. The numbers are stagging: in Los Angeles County alone, it is estimated that there are 900,000 illegal immigrants; the population of Santa Ana, in Orange County, is estimated at 25% illegal; San Jose, in northern California, more than 30% illegal; at these levels, we are importing a new generation of poverty into this country every year.

Kevin F. McCarthy of the Rand Corporation, a Santa Monica based Think Tank, was quoted in the Torrance Daily Breeze on January 20, 1983, as saying in an El Segundo speech, "It is no exaggeration to say that California is really the Ellis Island of the 1980's."

To sum the major points, I feel very strongly it's essential to stop illegal immigration into this country for four central reasons:

Number One, illegal immigrants are in increasing amounts using social services in this country at a time when those same social services are being cut back for disadvantaged Americans.

Two, there is increasing evidence that illegal immigrants take jobs that Americans are willing to take and that Americans desperately need in a time of high unemployment.

Three, illegal immigrants, most of whom come to this country as undocumented workers, are the people sending countries can least afford to lose because they're those that stand to make the greatest contributions to improving their own societies.

And lastly, America currently takes in one half of all people who emigrate from anywhere to anywhere else in the world and America simply cannot be the home of the world's dispossessed.

However, we must insist that new policies not stop immigration. But, we must recognize that immigration, in the broadest sense, is a solution to human problems which, though it seems to have worked for this country at a very different demographic and ecological time, increasingly is a solution only for the very few. In fact, it delays the devising of solutions for the great masses of humanity whose lives will be spent not in escape, but in learning how to manage to live where they are.

We must balance the idea that the size of the U.S. population must be controlled with the desire that the American nationality never be perceived as fixed in its ethnic or cultural components. We must never allow our policies to be derived from, nor encourage racial or ethnic discord or ideological intolerance. Our public policy, however, must change as the world changes. Abraham Lincoln said it well, "As our case is new, so must we think and act anew. We must disenthrall ourselves.●

"WORK AND WOMEN IN THE 1980'S" RECENTLY PUBLISHED BY RAY MARSHALL

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Ms. KAPTUR. Mr. Speaker, the Women's Research and Education Institute of the Congressional Caucus for Women's Issues, recently published "Work and Women in the 1980's"—a perspective by Ray Marshall on basic trends affecting women's jobs and job opportunities.

Mr. Marshall describes the trends which have important implications for all parties involved in the labor market—women's groups, labor organizations, management, and government. National policy, he points out, must give greater weight to women's issues. While the Federal Government's antidiscrimination programs have been effective in improving the economic position of women, they are not enough. The report notes that general economic policies to reduce employment, specially targeted programs to meet the needs of women, as well as systematic policies to deal with the reality that women are permanent parts of the work force are all necessary. Tax and spending policies enacted over the last 2 years have adversely affected women. For example, over 70 percent of the cuts now in place affect programs serving low income groups, in which women predominate.

An executive summary of Mr. Marshall's article follows.

The increased labor force participation of women is one of the most important labor market trends of this century. From being peripheral and often temporary parts of the labor force during the early part of the century, women have become permanent and integral participants in the labor market. As late as 1950, 70 percent of American households were headed by men whose income was the sole source of household income; today, less than 15 percent of American households fit this "traditional" model. Major economic and labor market tensions are created by the fact that employment policies are still based on the traditional model.

Increased labor force participation by women has been accompanied by other important trends which interact to condition the nature and extent of employment opportunities for women. The internationalization of the American ecoonomy has intensified competition, caused the policies of multinational corporations to be important labor market actors, intensified competition between workers in the U.S. and other countries (especially low-wage Third World countries), and made it necessary for American firms to pay much more attention to the efficiency and productivity requirements of international competition. Internationalization has contributed to rising unemployment among women because they are heavily concentrated in the industries most vulnerable to competition, even though unemployment has risen most in male-dominated industries in recent recessions, reversing the traditional pattern where the unemployment rates for women were higher than those for men. Nevertheless, current unemployment rates for women are higher in the management and professional ranks, where women's breakthroughs have been most recent.

International competition also has called into question the traditional American management system, which tends to be authoritarian, is driven mainly by short-run profit maximizing, and pays little attention to long-run technological viability, This model is commonly contrasted with the Japanese management system, which pays more attention to long-run technological viability and emphasizes worker participation in production decisions and "life-time" employment for workers. While there is some truth in these models, both are stereotypes. American management across-the-board is more productive than the Japanese. In addition, the Japanese system applies to only one-third of the economy, provides security for only about 15 percent of the work force, is made possible by less secure "shock absorbers," and tends to discriminate against women. Moreover, well-managed companies everywhere have many characteristics in common. Indeed, the Japanese management system, while adapted to the Japanese realities, was developed from the experiences of enterprises in other countries, especially the United States.

Another important trend is the declining reate of productivity growth, which reduces the competitiveness of American firms, makes it difficult to improve real incomes, and aggravates social tensions. Real wages in the U.S. declined during the 1970s, but real per capita incomes rose, mainly because of the increased employment of women. Obviously, this is a self-limiting process, because fewer and fewer families have wives who are not already in the work force. In the future, greater attention will therefore have to be given to improving productivity as a way to increase real incomes or to prevent them from declining.

The reasons for the decline in productivity are not well understood, but many experts give heavy weight to capital formation and the American management system. While these and other things are important, uncoordinated, discontinuous, and unstable national economic policies probably are more important causes of our productivity disadvantages relative to other countries.

The trends toward higher inflation and unemployment also have important implications for the employment of women. The inflationary biases built into traditional demand management macroeconomic policies were aggravated by external shocks to the economy during the 1970s. The monetarist policies adopted to reduce inflation have greatly increased unemployment. Structural unemployment is a serious problem for the U.S. and other countries, especially Third World countries, and is likely to continue to be a worldwide problem, at least for the rest of this century. High levels of unemployment limit the nature and extent of jobs available to women at the very time that increasing unemployment of other family members put greater pressure on women to work. Federal budget cuts, driven by the deficits resulting from the recession and the Reagan Administration's 1981 tax cuts, have a disproportionately adverse impact on women, who were most dependent on federal human resource programs

and are least likely to benefit from the regressive 1981 tax cuts. Moreover, the decline in federal employment has been detrimental to women to whom federal employment has offered higher positions and more advancement than has the private sector.

There also are a number of demographic and labor market trends that affect women workers. The decline in fertility rates influences, and is influenced by, lifestyles associated with increased labor force participation of women. In combination with declining productivity growth, unemployment and inflation, the aging of the work force has placed a great strain on retirement systems. This is of concern to women because it has probably dimmed the prospects for redesigning retirement systems so that they will be more appropriate for women workers. Most retirement systems are still geared to the traditional male-supported family model.

With respect to the trend toward higher eduction levels of workers, there have been significant increases in female enrollments in professional training programs and, while there are still important differences, male-female undergraduate college enrollments are converging. Moreover, younger women have more than closed traditional gaps with young men. There educational trends are very likely to form the basis for continued changes in the quality of the labor force participation by women.

A more highly-educated work force is likely to have more interest in what have traditionally been managerial decisions. While the worker participation movement in the U.S. has not reached the level that it has in other industrialized countries, it is growing and could be important to women because decisions in which they participate are more likely to reflect the unique labor market needs to women.

Some important occupational shifts have been significant for women workers. The rapid growth of services, which now represent about three-fourths of the American labor force, has greatly increased the demand for women workers. Technological changes which have lengthened female life expectancy, reduced the number of years spent in childbearing and child care, and mechanized housework have greatly increased the time women have for work outside the home. The growth in the information occupations has decentralized economic activity, reduced the size of work places, and greatly altered the nature of work. Most workers now produce information, not goods. This has increased the demand for women and changed the definition of "women's work." Moreover, the greatest impact of these new information technologies is likely to be in office work, where women are concentrated.

These trends have been accompanied by significant shifts in female employment patterns. Women have entered many nontraditional occupations, especially in the professions, but are still heavily concentrated in occupations with other women. Moreover, women tend to be concentrated in the lower income classifications, even within nontraditinal or male-dominated occupations. Much of the change in occupational segregation has been by white women, but black women have higher labor market participation rates and earning ratios relative to men, even though black women are more heavily concentrated in minority- and female-dominated occupations.

Women have made less progress in improving their relative earnings than their occupational positions. That job segregation is an important determinant of these earnings differentials is suggested by the fact that women's earnings are greatest in predominantly male occupations. Moreover, the earnings ratios of white women relative to men have declined in recent years—unlike the experiences of women in other industrial countries, where female-male earnings ratios have increased. The reasons for these different experiences are not known, but undoubtedly reflect tighter labor markets throughout the post-war period, which have caused managements and governments to provide more supportive services as well as policies to make it possible for women to work. Some other countries also have pursued more egalitarian policies to reduce the income differentials between low-wage jobs (where women are concentrated) and higher-paying jobs, which have been dominated by men. Part of the lower earnings of American women can be accounted for by such labor market factors as less experience, discontinuous employment, and educational differences; however, detailed studies show a fairly large residual that cannot be accounted for except by labor market segregation and discrimination.

In the U.S., the incidence of poverty is very high among women, especially minority women, who have been unable to work. The poverty problem is particularly serious for women with young children; most of these women do not receive support payments from the children's fathers.

These trends are very significant for women and the country. Private management systems and public policies must change to reflect the fact that women are permanent and integral participants of the labor force. For women, as for men, work has become important not only as a way to improve incomes, but also as a unifying experience and an important means for self-fulfillment and identification. The dominant model has become the dual-earner family where both the man and woman work, even when there are young children. Attention therefore should be given to a family policy which will recognize this reality. Of course, stable economic growth at low levels of unemployment would improve the quality of family life, which is greatly strained by the social pathologies resulting from unemployment. Greater attention to human resource development would also strengthen families. Policies likewise are needed to meet the particular needs of women: strengthening affirmative action (especially equal pay for comparable work and eliminating job segregation), changing policies which discriminate against women in the conditions of employment, providing supportive services to facilitate the entry and reentry of women into the work force, and paying particular attention to the needs of female-supported poor families. Pressure for these changes will come mainly from women, but these pressures undoubtedly will be strengthened in the future by labor organizations (which must cater to women's needs in order to enhance their relative position in the labor market), by the political process (because women are becoming a more important political force), and by enterprise managers, who will increasingly see better-educated, more experienced women as productive, permanent parts of the work force. Thus, the economic, political, and social health of the country will depend heavily on how we adapt the needs of women to the realities of the modern world.●

BIRMINGHAM BARONS—BASEBALL "KINGS"

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. ERDREICH. Mr. Speaker, 16 years have passed since Birmingham has reigned as king of the Southern League. But the Birmingham Barons' tremendous comeback triumph over the Jacksonville Suns during the league's 1983 championship series in Jacksonville, Fla., this month brought the pennant back to Rickwood Field once again.

Baron fans and citizens across my district are proud of the team's accomplishments this season, and I share their feelings.

The text of an editorial that appeared in the September 13, 1983 edition of The Birmingham News, which highlights the outstanding efforts of this very special team, follows:

PENNANT AT RICKWOOD

For the first time since 1967, there's a pennant for Rickwood Field. The Birmingham Barons are the 1983 champions of the Southern League.

And the beautiful thing was not only that they won, but how they won. After dropping the first game of the championship series to the Jacksonville Suns here last Thursday, the Barons won three straight—the last two in hostile Jacksonville—to take the pennant.

Such play was no quirk. The club lost the Western Division playoff opener to Nashville before winning that series in five games, with two of the three victories needed coming at Jacksonville.

And what made those achievements even more impressive is a regular season in which the Barons won only one game at Jacksonville and lost every series at Nashville. Clearly, there was something extraordinary about this Birmingham team.

Perhaps 21-victory pitcher Don Heinkel expressed it best after evening the Jacksonville series 1-1: "I would like to see this club stay together all the way up. It seems like there's something special about this club."

That won't happen, of course. Double-A reality is that next year's Barons will be pretty much a different bunch; some of this year's team will be in Evansville or Detroit, others will be down a rung or out of professional baseball. Perhaps a third of the championship team will return, and they will be looking to go up.

But next year's team will only have to look back one year to see what it takes to make a true championship team. This year's Barons, without certified blue-chip, major-league prospects, hung together all season, winning games with grit, and determination when other clubs might have folded.

And that was something truly special, as Heinkel observed. Large credit for the team's attitude must go to Manager Roy Majtyka and General Manager Art Clarkson, whose drive for a first-class operation at Rickwood this year reached the playing field.

For the players, though some will never make it to the majors or even Triple-A, there will be championship rings and a place in the memories of Birmingham base-

ball fans which the passing years will only enhance. This was truly a championship team, with the emphasis on "team."

The only sad part is that they can't all be back next year. But there will be a pennant at Rickwood to remember them by, and a permanent warm spot in the hearts of Barons fans.●

NATIONAL COMMANDER KEITH KREUL TO TESTIFY BEFORE VETERANS' AFFAIRS COMMITTEE

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. GUNDERSON. Mr. Speaker, on September 20, 1983, Keith A. Kreul, national commander of the American Legion, will be testifying before the House Veterans' Affairs Committee.

Keith, who is both a constituent and a personal friend, is from Fennimore, Wis., and elected national commander of the American Legion at its 65th annual convention on August 25.

Commander Kreul has previously served the American Legion as its national vice commander in 1979–80 and as Wisconsin State commander in 1973–74.

Of interest to my colleagues on the Agriculture Committee, Keith has also been State Executive Director of the Agricultural Stabilization and Conservation Service (ASCS) for 6 years and recently completed a 2-year term as State Director of the Farmers Home Administration (FmHA) in Wisconsin.

I am including Commander Kreul's recent acceptance speech at the American Legion convention in the RECORD at this point so that all of our colleagues will have an opportunity to get to know the man who leads the largest of our Nation's veterans' organizations.

ACCEPTANCE REMARKS—KEITH A. KREUL, NATIONAL COMMANDER, THE AMERICAN LEGION, SEATTLE, WASH., AUGUST 25, 1983

National Commander Keller, distinguished national officers of The American Legion, distinguished guests and delegates to this 65th Annual American Legion Convention. This moment is one that will remain with me for a lifetime. When I joined The American Legion 28 years ago I never believed I would have the opportunity, much less the realization of becoming your national commander. But, by dreaming of the future, setting goals, and getting involved, this great land of ours, the United States of America, has prospered, just as its people have prospered.

At this time I would like to recognize some people that have been with me down the long path and we have worked together many, many hours. Would the delegation and representatives of the Auxiliary all please stand from the department of Wisconsin.

Ladies and gentlemen, thank you for recognizing Wisconsin, and to Wisconsin, I must leave for now. I am a part of you all. Would you all please stand so I can salute you.

At this time it is ironic, in a way, that this great organization has been woven from the same fabric as that from which individual lives are built. The American Legion, as well as our great nation, has been built on dreams and high ideals, the structure with which we climb together the mountain of success.

But, as in every life, there comes a time to turn dreams into reality. To dream of high goals is fine, but the time arrives when you have to consider where you are going and just how you are going to get there.

We did that 65 years ago and haven't stopped since. We were founded on dreams, yes. Our dreams of Americanism programs that would make every citizen in this great land proud of our flag and for all that the Stars and Stripes stands for. Our dreams, of activities and programs for the children and youth of America.

Our dreams of a nation secure from the threat of war so that we could pursue our great ambitions in the sanctity of peace.

We did not arbitrarily enter into these areas. We did not rush without consideration into establishing the greatest veterans organization ever created.

In addition to idealism, vision, and hopes, our founders had a sense of direction. They knew what they wanted to do and they gathered not once, but several times, to chart a course that has guided this organization to the greatness it holds today.

They knew there would be challenges. They knew there would be obstacles. They knew they would prevail.

And our founders, in their quest for excellence, organized and planned. They knew the very core of the organization would be at the gross roots level and it would be the effort of the individual Legionnaire that would make the organization's programs and activities succeed. In order for that Legionnaire to accomplish his goals, a framework was put in place. The American Legion is a structure through which the actions and the successes of the individual can be enjoyed by the whole. Without the energy generated by the enthusiasm of each and every Legionnaire, there would be no electricity, there would be no power to propel this organization.

I have strong feelings about this. When I was a youngster my family was an active Legion family. Our American Legion post was founded by my father. My parents and American Legion activities in our community taught me the worth of a good education, industriousness, integrity, and patriotism.

And that American Legion legacy must be carried forward today and tomorrow.

When you stop to think about it, community involvement begins with a voluntary step. That step is to join The American Legion. No one forced, no one ordered, no one threatened us to join The American Legion.

My fellow Legionnaires, we volunteered to join The American Legion. We took that first step in voluntarism when we put on that blue cap and said to ourselves, "I want to join an organization that is good for my community, good for my fellow veteran, good for my nation."

By taking that step we joined the team of the greatest volunteer organization this nation has ever seen. And when we joined that team we began providing that power, that electricity, that energy, to our national organization. We drew then, and are drawing today, upon the vigor and vitality of every Legionnaire to propel The American Legion up that mountain for the good of all Americans. That is what makes this organization the respected power that it is, being a team of more than two and a half million veterans, each dedicated to the ideals that were first espoused by our founders in 1919.

We have always operated as a team. We have always been "one for all and all for one." And do you know who that "one" is? It is the veteran, it is the veteran's child, or spouse, or any individual in our community who needs help.

Now, that help does not come from a ragged group that has nothing better to do. Our American Legion has been blessed with perceptiveness, intuition, and the foresight of our founders.

They had a plan; we have a plan; just as every successful team has a plan. It doesn't make any difference what kind of team you are talking about, a successful team has a plan.

You can accept the challenge of community involvement, or coach an athletic team, or you can be on a team challenging a mountain. But, for your team to succeed, a plan has to be in place.

The plan includes the kind of tools that are best suited for the job at hand. It occurs to me that, no matter what challenge we care to tackle, if you don't have the right tools you can't do the job properly. One of the many tools we have available to us, as Legionnaires, is our Regional Leadership Conferences. They provide skill and direction for the tasks we have at hand.

My friends, we can do the job well because we know where we are going, we know what we have to do, and we know what tools we need to conquer the challenges that face us.

I am a blue cap Legionnaire. When I look in the mirror tomorrow morning I will see only the chief volunteer of this nation's greatest team of volunteers, The American Legion.

You have placed in my hands a great responsibility. I accept it willingly. You have my admiration and my support, most of all, you have my thanks for entrusting your faith in me. As we climb together other veterans will get involved by our example and we will help America work. Thank you so very much.●

DONORS OF SALVADORAN EMERGENCY MEDICAL AIRLIFT THANKED

HON. BILL McCOLLUM

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. McCOLLUM. Mr. Speaker, last month I had the privilege of heading up an emergency medical relief operation to El Salvador with the assistance of Project HOPE, the international recognized humanitarian relief organization.

As a result of our efforts, more than 55,000 pounds of medicines and medical supplies were delivered for the treatment of thousands of civilians—men, women, and children—many of them displaced persons left homeless by the war. As one who personally witnessed this emergency operation, I can tell you that the gratitude expressed

by the Salvadorans was overwhelming—and that they will not soon forget the people in the United States who cared enough to help them in their time of need.

This effort could not have taken place without the generous donations of supplies, money, time, and effort by literally hundreds of people in the United States and El Salvador. More than a dozen U.S. companies which manufacture drugs and health-related products donated close to $2.5 million worth of supplies—practically at a moment's notice. In central Florida, nearly 50 businesses and individuals donated more than $30,000 to cover costs associated with the airlift. Many other businesses donated goods and services—ranging from hotel rooms to pilots—and a number of others provided special consideration and assistance in many other areas.

Here in Washington, we were supported in our efforts by the Department of State and AID, the Agency for International Development. In El Salvador, we received the consistent cooperation of President Magana, Salvadoran officials, and many people at the U.S. Embassy—including State Department Deputy Chief of Mission Ken Bleakley and Commercial Attaché Bonnie Lincoln, who offered our personnel many hours of hospitality as well as assistance. Our operations also received the strong support of Col. John Cash, Defense Attaché, as well as many other Embassy personnel. A tremendous amount of credit must go to the Knights of Malta and their president, Jerry Coughlin, who took on the major responsibility of assisting with the transportation, storage, and distribution of the medical supplies.

Also in El Salvador for several weeks were two of my staff members—my administrative assistant, Vaughn Forrest and my legislative aide, Kristin Foskett—who supervised the entire operation locally. Their efforts were backed up by my Washington and Winter Park staff, whose tireless efforts enabled this operation to come together in just 3 short weeks. In addition, my colleague, Representative JIM MCNULTY, provided immeasurable support by offering the services of his staff member, Ruben Ortega, who acted as translator.

There is no doubt that the Fifth District's emergency relief effort changed the lives of literally thousands of people in El Salvador. We can be proud of what we have done and of the many people in our Nation and in El Salvador who played leading roles in this "people to people" mission of mercy.

Listed below are some of the many individuals, businesses, and organizations who assisted in this effort—and whom I would like to recognize—though there are many, many more whose help was invaluable.

DONORS OR SUPPLIES

A. H. Robins, Alcon, Bristol-Myers, Burroughs Wellcome Co., Eckerd Drugs, K Mart, Lederle Laboratories, Merck & Co., Parke-Davis, Pfizer, Revco Drugs, 3M Center, Wyeth, and a number of anonymous donors.

DONATIONS

Jim Weinberg, Wall Street Co.; Bill Nassal; Cecil Moore, Southest Home Mortgage; Hermann Engelmann, Engelmann Nurseries; Hank Snow; Eric Braun, Braun Cadillac; Phil Grace, Grace Properties; Sun Bank; Wayne Densch, Densch Distributors; Dave Peoples, Southeastern Academy; Raymer Maguire; Jim Dever, Clark Chrysler Plymouth; Michael Ashington-Pickett; Pat Hargon, H&M Printers; Ted Bywater, The Bywater Co.; Jerry Chicone, Jr.; Hughes Supply; Stromberg-Carlson, Lake Mary; Sea World; Greater Construction; Bruce Berger; Fred McLeod, Plyworld; Gene Miller, M.D.; Days Inn; Duda Farms; Jim Gooding, Gooding Supermarkets; Residential Communities of America; Trammel Crow; Herndon Iles & Scott Insurance; Peter Barr; Central Florida Regional Medical Center; Howard Needles Tammen Bergendoff Architects; Jeno Paulucci; M. Stuart; Martin Marietta; Mr. and Mrs. Stanley Lewis; Mr. and Mrs. Crabtree; Mr. and Mrs. William Dunn; Mr. and Mrs. William Ruppel; Mrs. and Mrs. M. Robinson; Morely Properties; Florida Hospital; Orlando Central Park; Gary Strack; Neil Switzer.

DONORS: GOODS AND SERVICES

Chevron; Howard Johnson's Executive Center, Orlando, Hwy. 50/I-4; Clark Chrysler Plymouth, Casselberry; H&M Printing, Altamonte Springs; Church Street Station, Orlando; Joiner Mayflower, Inc., Orlando; Auto Machine & Parts, Co. Orlando; Florida Utility Trailer, Inc., Orlando; Townsend's Fish House and Tavern, Orlando; Dr. Copy; Marriott Inflite Services; George Stuart Office Supply.

SPECIAL CONSIDERATION

Page Avjet Corp., Orlando; Airlift International, Miami; Advance Petroleum, Miami; Greater Orlando Aviation Authority; TACA Airlines.

SPECIAL ASSISTANCE

San Salvadoran Chamber of Commerce; Pharmaceutical Manufacturers Association; Florida Petroleum Council.

FLIGHT CREW VOLUNTEERS

Rosie O'Grady's Flying Circus: Joe Kittinger, chief of flight operations; Robert Snow, Dennis Saunders, Robert Favreau.●

FOXES, CHICKENS AND HUNGER

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Ms. KAPTUR. Mr. Speaker, the President is beginning to admit that there might in fact be a hunger problem in this country. If the President is serious about the shame of hunger, it is time his administration became more responsive to the needs of hungry Americans. I commend to my colleagues the following editorial from the New York Times on this important topic.

FOXES, CHICKENS AND HUNGER

If you are President of the United States, what do you do when people are going hungry?

(a) Feed them.

(b) Appoint a committee.

(c) Cut spending for food assistance.

Ever since Lyndon Johnson declared war on poverty and Richard Nixon resolved to end hunger in America, the answer usually has been (a). President Reagan's answer is (b) and (c).

True, this Administration has spent billions to feed hungry people, but at sharply reduced levels—and in the face of an increase in hunger. The evidence of need is apparent everywhere.

Unemployment remains high—and so does the number of people whose unemployment benefits have expired. The Center on Budget and Policy Priorities, a nonprofit research group, finds a dramatic increase in patronage at soup kitchens and emergency feeding programs. The nation's mayors say hunger is their No. 1 concern.

The Census Bureau reports that 15 percent of the population—a 17-year high—has fallen below the official poverty line, based on a Spartan food budget. "We're getting a whole lot of people who don't know how to be poor," says the head of a Seattle program.

Until recently, Mr. Reagan's comments on hunger tended toward the anecdotal. He told a story, for instance, mocking food stamps, the major anti-hunger program: A man uses $10 in food stamps to buy an orange and then uses the change to buy a bottle of vodka. It's only a story, impossible in real life. Cash is used for food-stamp change only when the amount is less than a dollar.

Lately, in response to the increase in hunger, Mr. Reagan has become verbally alarmed. "I am deeply concerned about the extent to which we have a problem which should not exist in this great and wealthy country," he said last month. And now he has appointed a study committee, asking it for a "no-holds-barred" report by Jan. 31. The background of some prominent members makes their appointment should like asking foxes to design the chicken coop.

One of the 13 members is Dr. George Graham of Johns Hopkins, who last spring told a Senate committee that hunger has been sensationalized and that "the nutritional status of our people, including low-income groups, is very good and continually getting better."

A second member is J. P. Bolduc, an official of a White House cost control survey that has called for harsh reductions in Fed-

eral food assistance. A third member, Kenneth Clarkson, was a Reagan budget official who helped design the Administration's sharp anti-hunger spending cuts. The only conspicuous Democrat is former Massachusetts Gov. Edward King, a pronounced conservative hostile to social welfare spending.

If there are members who want to increase Federal anti-hunger efforts, they'll have a hard time being heard.

What makes the outlook more discouraging is the reality of Administration intentions for fiscal 1984, which begins Oct. 1, just three weeks after the committee's appointment. According to the Congressional Budget Office, food-stamp spending will be $2 billion less than it would have been without the cuts Mr. Reagan has already won. Beyond that, the Administration is asking Congress to cut *another* billion in 1984.

In four years, the Administration will spend about $7 billion less for food stamps than the $55 billion that would otherwise have been available, a cut of 13 percent.

Such cosmic numbers mask personal reality. It's not as if benefits are generous in the first place; they average 46 cents a meal. The Administration says it's only cutting out waste, or cutting off the richest of the poor. In fact, benefits are down even for people below the poverty line. And those receiving full benefits have trouble making them last. Small wonder that the soup kitchen lines are longer.

The good news is that, at last, the President is responding to the plight of America's hungry, at least with words. The better news, if he's serious about the shame of hunger, would be for him to put his money where their mouths are.●

MEXICO—THE ULTIMATE CRISIS IN CENTRAL AMERICA

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. SEIBERLING. Mr. Speaker, although the focus with respect to Central America these days is directed mainly to the situation in El Salvador and Nicaragua, a crisis of greater and more serious proportions is brewing in our largest and closest neighboring Central American country, Mexico.

Even when the news media talk of Mexico, they have focused mainly on the serious financial threat posed by the huge debt owed by Mexico to various United States and foreign banks. Serious as that is, measures are being taken, through the International Monetary Fund and other channels, to deal with it, assuming the Congress has the courage to vote for the requested increase in IMF's capital.

However, very little is being done so far to help Mexico cope with the enormous social problems that have been building in Mexico for years because of its rapidly expanding population. These problems have been exacerbated by the worldwide economic recession and the decline in oil revenues that have accompanied it.

Four or five years ago, Robert McNamara, then the head of the World Bank, spoke to a group of Members of Congress about the seemingly insoluble problem that Mexico and the United States would face in the coming decades as a result of Mexico's incredible population growth. At that time, Mexico had a population of about 65 million people but at the then-rate of population growth was likely to have a population of between 200 and 300 million people by the year 2030. Mr. McNamara pointed out that even if the Mexican people could bring their birth rate down close to one on one, which would be an almost inconceivable achievement in the short term, the population would nevertheless expand to around 175 million by the year 2030, if I correctly recall his estimates.

Mr. McNamara pointed out that there was, obviously, no way that a land the size of Mexico could support a population that large with anything like a passable standard of living, and that it was inevitable that most of those people would end up going elsewhere to survive. The most likely "elsewhere" would be the United States. So we will be facing a potential influx of immigrants, legal or illegal, on a scale that dwarfs anything we have experienced to date—possibly 100 to 200 million people.

To dramatize the situation, Mr. McNamara pointed out that the population of Mexico City at that time was approximately 14 million and that most of them lived in conditions of horrendous pollution, water shortages, substandard housing and general poverty. Today the situation in Mexico City is even worse.

A recent article by Gordon D. Mott of Knight-Ridder Newspapers, published in the Akron Beacon Journal of September 4, 1983, paints a grim picture of a Mexico City of 17 million that for most residents, must be about as close to hell as one can get in a non-war situation. As the article points out, 3,000 tons of garbage goes uncollected each day and is simply piled high in the streets; chemical pollutants from cars and factories blacken the sky; blinding, disease-transmitting dust storms sweep across the city carrying pollution from a lake bed used as a drying rack for raw sewage.

And the worst is yet to come. The city population is expected to reach 35 million by the year 2000. The city's top officials concede that roads, houses, waterlines, sewage pipes, electrical lines, and stores cannot even be built quickly enough to cope with the city's annual growth rate. In the words of one of the city planners, "The future is a totally black panorama."

Mr. Speaker, expert after expert on Lation America has pointed out that unless the economic and social problems of the countries of Central America can be solved, the political problems are hopeless. We tend to relax about Mexico, because it has oil revenues and has had stable and reasonably democratic governments for several generations. However, unless something is done to begin to correct the appalling economic and living conditions, and to come to grips with the population explosion in Mexico, it does not take much foresight to see that there will be a political explosion in Mexico which will make the current crises in Nicaragua and El Salvador look tame by comparison.

Those in the administration and in the Congress who think that the situations in Central America can be handled if only we will apply more military muscle would do well to look closely at Mexico and ask themselves how long military force could contain the kind of explosive pressures building there. The answer is obvious. It is less obvious in the other countries of Central America only because they are smaller and seem easy to intimidate or occupy.

We must move ahead, in collaboration with other Central American governments, to substitute a multilateral, diplomatic approach for unilateral military approaches to the immediate crises in Central America. But even more important, we need to get together with our neighbors in Central America, and particularly Mexico, in a major effort to develop and implement a comprehensive plan for helping Mexico and the rest of Central America break out of the vicious circles of poverty and exploitation that threaten to bring them all—and us—to a common disaster.

The threat to our security is just as great, the urgency is just as compelling as it was when Gen. George Marshall proposed the famous Marshall plan for Western Europe. Because the Central American countries start from a lower industrial and educational base, the challenge is even greater.

Mr. Speaker, the full text of the Knight-Ridder Newspapers article on Mexico City follows these remarks:

MEXICO CITY IS ALL BUT UNLIVABLE AS 17 MILLION FACE NIGHTMARE OF BAD AIR, CRIME, AND RATS

(By Gordon D. Mott)

"This city could become uninhabitable . . . . It has drowned under mountains of garbage. It is overrun with rats and flies. The number of assaults, kidnappings and assassinations are growing. There is a collective hysteria."—Ramon Aguirre Velasquez, mayor of Mexico City.

MEXICO CITY.—For Mexico City, the future is now. The projections of urban doomsayers have come true. The roughly 17 million residents in the largest city in the world exist in an oppressive cauldron of noise, dirt and stress.

Traffic jams slow the average speed to less than 3 mph downtown and raise the average noise level to about 90 decibels, which is akin to standing near a jackhammer. Poor distribution of 17 tons of fresh food a day causes frequent shortages of the milk, eggs

and vegetables hauled in by 1,500 trucks to the 7,300-foot-high Valley of Mexico.

Blinding, disease-transmitting dust storms sweep across downtown Mexico City in the dry season, carrying pollution from a lake bed used as a drying rack for raw sewage.

Chemical pollutants from 80,000 factories and businesses blacken the sky. Exhaust fumes from 2.3 million cars and 5,000 diesel buses billow up from streets and expressways.

The dust and smog combine with dried, airborne refuse from 3,000 tons of garbage left daily on the streets to foul the air with an estimated 11,000 tons of solid particle pollution every day. One autonomous University of Mexico study suggested that breathing Mexico City's air is like smoking two packs of cigarettes a day.

Even the city's top officials concede its future looks hopeless. They admit that roads, houses, water and sewage pipes, electrical lines and stores can't be built quickly enough to cope with the city's annual growth rate of 5 percent. By 2000, the city's population is expected to reach 35 million.

"The future is a totally black panorama," said Javier Caraveo, a city planner. "Our problem is that we just got our first city plan in 1980, after 450 years."

"That's not pollution. It's just fog."—Manuel Lopez Portillo, former environmental official.

If there is one factor that is making the city unbearable and its inhabitants crazy, it is the air pollution. Mexico City residents face the unavoidable fact that walking out the front door each morning and breathing the air can be injurious to their health.

During the city's hottest months, February through May, the dawn sun faintly glimmers through a huge, hanging bubble of brown air. Visibility on downtown streets drops during the morning rush hour to less than three blocks, or shorter than a football field. Government statistics reveal that about 70 percent of the pollution can be attributed to automobile and bus exhaust. About 15 percent to 20 percent comes from the day heavy industrial zones on the city's northern perimeter. The rest comes from natural sources: animal feces, human excrement and the lake bed dust.

In one 24-hour period in 1980, the latest year for which data is available, particulates in Mexico City's air reached 800 micrograms per cubic meter. The U.S. standard for safe levels is 260 micrograms. By contrast, the highest level recorded in Los Angeles in 1982 was 291 micrograms.

Carbon monoxide concentrations, measured over a one-hour period in the downtown area, reached a high of 80 parts per million in Mexico City in 1980. U.S. government standards put the maximum tolerable limit at 35 ppm. The highest level reached in Los Angeles in 1982 was 27 ppm.

There are no hard facts about another source of automobile-based contamination: lead. But experts have cautioned that the heavy leaded gasoline made in Mexico has raised the level of toxic metal in residents' blood to intolerable levels. Regular joggers on paths near highways have reported serious cases of lead poisoning.

Ozone concentration, an indicator of industrial pollution, has been recorded in Mexico City at 0.36 part per million, compared with Los Angeles's high in 1982 of 0.40 ppm. The U.S. standard for safe levels is 0.12 ppm.

In addition, according to Dr. Alicia Barcena Ibarra, the sub-secretary of ecology, refineries and electric generating plants pump 481 tons of sulfur dioxide into the air every day.

The incidence of gastrointestinal diseases, typhoid and various fungus-based lung infections increases during the dry season, when there isn't rain to clean the air or settle the dust. The dust flies off Lake Texcoco, a raw-sewage deposit near the end of Mexico City airport's two main runways.

Dr. Enrique Wolpert, an internist, said he sees "a marked increase" in infections during the dry months.

Though Mexico's anti-pollution laws are some of the world's strictist, government officials have not enforced them, preferring instead to take the same path that nearly every Third World nation takes—develop, and don't worry about the environment.

Cesar Reyes, the new spokesman for the Secretariat of Ecology and Urban Development, criticizes the previous administration's program to control pollution.

Reyes said that despite public pressure to stop new factories from opening unless they had adequate pollution-control systems, former President Jose Lopez Portillo's administration routinely handed out permits so factories could start up without such controls.

"We are so far behind, it's hard to know even where to start," Reyes said. The secretary of urban development and ecology, Marcelo Javelly, and Mayor Aguirre Velasquez declined to be interviewed, claiming they still don't know their domains well enough to comment.

"There is the human potential in this valley equal to some European nations. There's no way the government can stop an entity of that size from growing. It just won't work."—Humberto Munoz, urban studies professor.

The magnitude of the problem is staggering. The Federal District, which accounts for 60 percent of the metropolitan area, covers 543 square kilometers and contains more than 10 million people. About 10 million people live in the Los Angeles megalopolis, which, with 1,200 square kilometers in a five-county area, is more than twice as large as Mexico City.

Officially, the 1980 census puts the Mexico City metropolitan area's population at 14.4 million. Considering growth and those not counted, the actual figure is more than 17 million.

"It's just going to be a bigger and bigger megalopolis," Munoz said. "It is urban stain in the heart of the country."

The lack of planning is exhibited everywhere. At least 5 million people live in slums or substandard housing. More than a million homes were built illegally on private or federal land.

The city contains what has been called the world's largest slum, Netzahualcoyotl. It also is the country's second largest municipal entity, even though it is part of the metropolitan Mexico City area. Two million to 3 million people live in a dusty maze of dirt streets and concrete block houses on the edge of Lake Texcoco.

Two other areas, Naucalpan and Ecatepec, rank as the country's fourth and fifth largest cities, though they also form part of the urban sprawl. These slums count thousands of homes built in steep ravines, on hillsides and beside heavily traveled roads and railroad tracks. Shacks are built with little more than thick tar paper, a few planks of wood and sometimes a tin roof.

Because of the high mountain ranges that ring the city, including several extinct volcanoes towering to 18,000 feet, the city must pump all its water into the valley and then pump the waste out.

The cost of pumping the water from more than 100 miles away makes Mexico City's water five times more expensive than that of New York City or Sao Paulo, Brazil, two of the world's most populous cities.

The city government claims 90 percent of the city's residents get water, but the steady flow of about 1,000 immigrants a day means that whole new sections of the city are built every year without water service.

The city forbids using wells in the valley, but at least 40 wells still pump hundreds of thousands of gallons of water out of the ground every year. The old part of the city, which is built on a lake bed, is sinking up to 8 inches a year as the water table drops.

The city generates nearly 750 million gallons of sewage a day. Although some sewage flows through a 300-foot deep sewage tube to a cesspool lake 40 miles north of the city, much of it still ends up in the sewage drying pit at Lake Texcoco.

Of the 10,000 tons of garbage produced each day, the city admits it can pick up only about 7,000 tons, so 3,000 tons remain in the streets. In some lower-class neighborhoods, the medians of four-lane streets are stacked with piles of rotting garbage.

The uncollected garbage also serves as a spawning ground for rodents and flies. Fernando Leon Diaz a former official of the Health Secretariat's rodent control department, estimated last year that 78 million rats lived in the Mexico City metropolitan area—about five per person.

"The public security is in crisis. Life in the street has become an exercise in faith."—Victoria Adato De Ibarra, Federal District attorney general.

There also are plenty of two-legged rats here. The city's crime rate has become a growing problem, with more than 53,000 robberies reported in the Federal District alone in 1982.

Official figures show there were 122 rapes last year, but one women's group claims there are about 16,000 rapes a year, or 43 a day. The group says the rapes go unreported because women fear that police won't help.

There were almost 1,000 murders in the city last year.

Transportation can be aggravating at best and deadly at worst. Of the 8,640 violent deaths in the city last year, 3,550 resulted from traffic accidents.

A private businessmen's organization estimates that 15 million man hours are lost every day because of traffic jams, too few buses and an incomplete subway network.

Public transportation provides more than 21 million trips daily. Most of those trips are on buses, although the expanding subway system now carries about 1 billion riders a year, or almost 3 million a day. The government subsidizes fares, so a bus ride costs 2 cents and a subway chit 0.6 cent.

The bus system, however, only has about 5,000 buses running at once. About 3,000 usually are broken down, according to the city government, which claims it needs twice that many new buses to meet demand.

Subway crowds press so tightly into the trains at rush hours that guards separate male and female passengers to cut down on complaints of molestations.

Double- and triple-parking blocks the traffic flow on the narrow streets. But policemen permit the illegal parking because there are 450,000 too few parking spaces downtown.●

PUERTO RICO AND SECTION 936—PART I

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. GARCIA. Mr. Speaker, I would like to call to the attention of our colleagues an extremely informative report on the Puerto Rican economy. The article, published by the Institute for Research on the Economics of Taxation was written by Dr. Norman B. Ture, IRET Board Chairman and former Under Secretary of the U.S. Treasury Department.

In the article, "Puerto Rico and Section 936: A Case Study of the Effective Use of Private Sector Incentives," Dr. Ture describes Puerto Rico's economic transformation during the past 30 years from being the "Poorhouse of the Caribbean" to the technologically advanced industrial economy it is today. Section 936, a carefully designed and tested tax incentive program targeted to a specific area, suggests ways of modifying our current revenue code to encourage new productive investment in distressed areas also.

The economic milestone which Puerto Rico has accomplished and which Dr. Ture discusses has resulted from the application of section 936. While calling this impressive economic progress "a marvelously successful laboratory demonstration of achievement relying on the private sector," Dr. Ture also cites Puerto Rico's lingering high levels of unemployment and expresses the hope that future policy developments seeks to fortify the achievements of section 936.

I enter Dr. Ture's article in the RECORD so that we all may better understand the importance to the economy and the people of Puerto Rico of the section 936 program.

The article follows:

PUERTO RICO AND SECTION 936: A CASE STUDY OF THE EFFECTIVE USE OF PRIVATE SECTOR INCENTIVES—PART I

For those who have a professional concern with ensuring expanding opportunities for rewarding employment, there is no better setting for sharpening the focus of those concerns than Puerto Rico. This beautiful island has been a laboratory in which it has been demonstrated how strong and constructive the response of the private sector of the economy can be to appropriately designed tax incentives. There is much for everyone to learn from the experience of Puerto Rico with respect to public policy strategies for economic development initiated in the private sector.

Even a quick tour of San Juan brings home to one a sense of the vitality of the people who live and work in Puerto Rico, of their sense of urgency about progress in their economic life. One of the most impressive attributes of that progress is that rather than rejecting or destroying established cultural values, it is built on a foundation of solid traditions. In contrast with so many of our mainland cities, San Juan's urban progress has not been at the cost of losing the beauty of the past. Old San Juan, for example, spans the centuries and reminds one today of the sources of the intellectual and cultural strength of the fine people whose energy is transforming this land economically.

The statistical record of that economic transformation is an extraordinary one. Some of the major accomplishments over the last three decades may be highlighted by citing a few of the statistics which describe the changes in the amount and composition of employment, output, and income in Puerto Rico.

Slightly more than three decades ago, Puerto Rico was one of the poorest lands in the western world—"The Poorhouse of the Caribbean." In a little over thirty years, the Puerto Rican economy has been transformed from an impoverished, predominantly agricultural economy to a technologically advanced, industrial economy. It is difficult to capture the full import of this transformation in simple words and numbers, but one cannot help but be impressed by them.

Measured in constant (1972) dollars, GNP increased from $1.565 billion in 1950 to $7.383 billion in 1980. This is an increase of 372 percent. The percentage increase in real GNP in the U.S. as a whole was less than half—176 percent.

Per capita real GNP in Puerto Rico increased from $709 to $2,324 or by 228 percent over these 30 years. In the United States, as a whole, per capita real GNP rose from $3,526 to $6,475 or by 84 percent.

The average yearly growth rate of real GNP in Puerto Rico was 5.3 percent over the three decades; it was 3.4 percent during the same period in the U.S. as a whole.

Per capita real GNP increased by 4.0 percent a year, on the average, in Puerto Rico, almost twice as fast as the 2.1 percent average annual growth in the U.S. as a whole during these years.

This dramatic growth did not occur as a result of an explosion in the agricultural sector of the Island's economy. Quite the contrary; it came about as a result of a tremendous shift of employment from agriculture to other sectors, combined with a huge increase in labor's productivity.

In 1950, more than a third—36 percent—of the employed labor force worked in agriculture; manufacturing employment was 9.3 percent of total employment, little more than the amount of employment in home needlework, which was 8.6 percent of the total. In 1980, agricultural employment was only a fifth of what it had been 30 years earlier, accounting for only 5.2 percent of total employment. Manufacturing employment has almost tripled in absolute terms, and more than doubled—to 19 percent—as a shre of total employment. In the U.S. as a whole, the number of manufacturing wage and salary workers increased by one-third over the three decades; as a fraction of the total of such employment, manufacturing employment fell from more than a third in 1950 to 22.4 percent in 1980.

Net income originating in manufacturing was 14.5 percent of total net income in 1950; by 1980, this share was 3¼ times the 1950 percentage, accounting for 47.5 percent of total net income. This experience contrasts sharply with that of the U.S. as a whole where income originating in manufacturing fell by more than a fifth.

This growth in output and income in manufacturing was not financed by exploiting labor—by paying workers less than their contribution to total output and income. On the contrary, total real compensation in manufacturing and real compensation per manufacturing employee soared over this 30-year period. Total real compensation for manufacturing employees increased by 740 percent; real compensation per manufacturing employee was almost three times as much in 1980 as in 1950. Over the period productivity of workers in manufacturing increased by more than 3½ percent a year, on the average.

As these data show, the growth in manufacturing output and income was not achieved by importing cheap labor, an important element in the rapid growth of certain European economies. Across the entire labor force spectrum, expanding employment has meant expanding the number of jobs filled by Puerto Ricans, almost one for one. Even in the most demanding management and technical jobs, over 93 percent of these positions are filled by Puerto Rican men and women.

Particularly in the last decade, a very substantial share of the employment growth has been in high technology industries.

In chemicals and allied products, especially pharmaceuticals, almost 9,000 jobs were added from 1971 to 1981. In nonelectrical machinery manufacturing, particularly computers, employment increased almost fivefold in this period. Over 7,000 jobs were added in electrical and electronic machinery, equipment and supplies production. Employment in the manufacture of scientific instruments more than doubled.

In the pharmaceutical industry alone, employment gains have been remarkable. From 1970 to 1980, almost 9,300 jobs were added, nearly 6,400 of which were production workers. The size of pharmaceutical establishments grew, from 20 workers per establishment in 1960 to 143 per establishment in 1980.

The expansion of employment has not been confined to manufacturing. Impressive gains in jobs in trade and services occurred over the three decades. As one might expect, this diversification of employment has been associated with a marked upgrading of employment. In just the eight-year period from 1973 to 1981, white-collar employment grew by about 88 thousand jobs, from 40.2 percent of total employment to over 47 percent. Within this category, almost 43 thousand of the additional jobs were in professional and related positions.

The rapid growth in the private sector of the Puerto Rican economy both gave rise to increasing demands on the public sector and provided it with the financial capacity to service those demands. In 1950, only 45,000 persons were employed by government in Puerto Rico. By 1980, the number had reached 202,000, almost a quarter of total employment.

One final observation about this truly remarkable record of employment growth and economic progress is called for. It has not occurred at the expense of jobs, output, or income on the U.S. mainland or elsewhere. As the data shows, the most impressive employment gains in the private sector of the Puerto Rican economy have occurred in the very same industries which have registered the most pronounced growth in jobs and output on the mainland.

Moreover, Puerto Rican economic growth has required increasing imports, principally from the mainland. In 1980, for example, Puerto Rican business establishments and households bought $1.5 billion of goods and

services from the mainland U.S. It is estimated that about 153,000 mainland jobs were involved in producing these goods and services. A year later, imports from the mainland had increased to $5.7 billion, implying an increase in mainland employment to meet these output requirements.

Of course, there have been reverses along this economic growth path. The Puerto Rican economy is extremely sensitive to changes in economic conditions elsewhere, particularly in the mainland United States. Recession developments on the mainland lead quickly to even sharper downturns in Puerto Rico, and recovery on the mainland transmits its expansionary impulse to the island economy only with a significant time lag. In the 1979-1982 recession, the rising unemployment rate on the mainland was dwarfed by that in Puerto Rico, reaching more than a fifth of the labor forces in 1981 and 1982.

Notwithstanding such reverses, the overall record of economic development from the early postwar years to the present is really remarkable. It can be capsulized briefly by pointing out that in the late 1940's, the Island's economic demography was a prototype of the sources of social unrest and upheaval—a handful of affluent persons and the overwhelming proportion of the population living in grinding poverty. No middle class, generating social and political stability as well as a solid economic base, existed. The contrast with today's economic profile is striking.●

HOW MANY RANDY CLARKS?

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. OBEY. Mr. Speaker, a little over a week ago I had the sad duty to visit the family of L. Cpl. Randy Clark who had just been killed in Lebanon.

The Clark's were proud of Randy. Jim and Norma Clark typical patriotic Americans who love this country but they are asking the kinds of questions that all of us should ask before this House votes to give the administration a free hand in Lebanon.

I would ask every Member to read the enclosed Newsweek article of September 26. It is a story which can easily be repeated again and again and again if the Congress votes to allow an open ended American military presence in Lebanon in the absence of a cease fire.

The article follows:

[From Newsweek, Sept. 26, 1983]

A BITTER FAREWELL

(By Jerry Adler and Madlyn Resener)

The conflict in which Marine Lance Cpl. Randy Clark died was ancient history before he was born, and up until last May seemed to have as much to do with him as the Peloponnesian War. All of Lebanon would fit snugly into the corner of northwestern Wisconsin, roughly between Duluth, Minn., and Eau Claire, where Clark grew up and where he was buried last week in a little cemetery outside his hometown of Minong. The bloody Shouf mountains, where generations have fought for every single rock and gully, could disappear into the woods that start just beyond Clark's grave.

The only place in Minong big enough for Clark's funeral—more than 1,000 people attended, twice the population of the town—was the gymnasium of Northwood High School, from which Clark had graduated just 16 months ago. The choice of jobs in Minong at the time was between part-time logging and part-time pulp cutting, and so Clark—an honors student and all-conference lineman on the high-school football team—decided to enlist in the service. "He wanted to go into the military for the adventure, like you see on TV," said his friend Kevin Postl; and because their standards were the highest, Clark carefully chose the Marines.

FOURTH OF JULY

Clark went to Lebanon last May, posted first to guard duty outside the American Embassy in Beirut, and later among the peacekeeping troops stationed around the Beirut airport. He was happy to be there at first: "He loved the country," his mother, Norma, recalled; "he said it was so beautiful." It was even beautiful in the dark, with rockets and artillery fire lighting up the hills—"like the Fourth of July every night," he wrote to his parents. He sent them a picture, but they were less interested in the view than in the M60 machine gun in the foreground, wondering uneasily why it clearly had no ammunition.

As the fighting intensified, Clark began to worry. He wrote of how callous the Lebanese militia appeared about the casual slaughter of civilians, about how awful it was to see bodies lying unburied for days. He was happy to hear that he would be rotated out on Aug. 19—and crushed when the transfer was canceled. On Sept. 1 he wrote about the shelling—said at the time to be accidental—that killed two Marines and wounded 14, all of them from Clark's Alpha Company. ". . . I'm all right," he told his parents. "Not hurt. Just scared . . . There were four or five of us that helped the wounded and carried out the dead to the Am-Tracs. I hope I don't ever have to do that again."

Five days later Clark and another corporal, Pedro J. Walle Ramos, of San Juan, Puerto Rico, were crossing a field on their way back to their bunker at 4 a.m. when a rocket round landed almost on top of them, killing them both instantly. Col. Timothy J. Geraghty, who commands the Marines in Lebanon, said that this time the gunner—who could have been a Druse, or one of any number of other warring factions—was clearly aiming at the Marine position. It was just fate, however, that he happened to hit the two Marines in the dark. "The round came out of nowhere," said Clark's company commander, Capt. Paul Roy. "The odds were a million to one."

SENSELESS

To the people of Minong, and especially Clark's father, James, it seemed a particularly senseless way for him to die. On the morning that the two Marines came to Clark's house to deliver the news of his death, a White House aide called his parents and asked them to stand by for a call from the president; by the time the call came, six hours later, James Clark's shock had turned to anger. "I told him [Reagan] I was very bitter," said Clark, a burly construction foreman who supported Reagan in 1980. "I asked him why we were over there, and he said we were needed. I said I didn't agree."

Clark finds it peculiar that the Marines are supposed to be protecting "the Lebanese people"; the only Lebanese people he seems to hear about are divided into warring camps that want only for the Americans to leave and let them settle their differences in their traditional fashion. If that includes massacre, Clark is in no mood to stop them. For the Clark family of Minong, Wis., America's intervention in Lebanon is over for good.●

TAX CUTS AND ECONOMIC DEVELOPMENT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mrs. SCHROEDER. Mr. Speaker, high technology companies looking to relocate are more interested in a State's educational facilities, transportation systems, and general quality of life than in the tax rate levels.

This is an important message from Colorado Gov. Richard Lamm in the September 12, 1983, Rocky Mountain Business Journal, "Lamm Says Tax Cuts Imperil High-Tech Future."

A related and equally significant message comes from the Denver Post senior editor, Bill Hornby, "Growth and Slow Learners: the West's Political Tragedy," Denver Post, September 11, 1983. Western States, which have depended heavily on Federal spending, are refusing to plan or pay for the future.

The two articles follow:

LAMM SAYS TAX CUTS IMPERIL A HIGH-TECH FUTURE

(By Paul Danish)

Every time Colorado cuts taxes it becomes that much harder to induce high technology industry to locate in the state, according to Gov. Richard Lamm.

In an interview Lamm told the Rocky Mountain Business Journal that national studies have found low tax rates placed no higher than seventh on the lists of priorities corporations use in deciding where to locate their facilities.

The first priorities, he said, especially to high technology corporations are proximity to strong educational facilities in general and higher education in particular, availability of good transportation, access to amenities, and overall quality of life.

The state's ability to provide all of these declines each time it cuts taxes, the governor said, and as a consequence business is more inclined to look elsewhere "as we cannibalize our system of government."

"I think the legislature ought to take great pride in all the tax relief it has given," Lamm said. "There's some of those things I've been pushing for too to make our tax structure more progressive. But the fact is they overdid it."

The governor said the state's failure to properly fund higher education contributed to its failure to induce the new Microelectronic Computer Consortium to come to Colorado.

The consortium is a joint venture of several of the country's largest electronic compa-

nies organized to undertake advanced computer-related research projects, including those related to the development of supercomputers and fifth generation machines.

It is widely considered one of the most important research ventures ever undertaken by private industry.

Some 30 states were attempting to attract the consortium, which ultimately located in Austin, Texas. Texas promised it a 20-acre headquarters site on the University of Texas Research Campus, a $20-million, 200,000-square-foot office laboratory building, $20 million in low-interest mortgage loans, 30 new faculty positions at the University of Texas plus a $750,000 more for research, and use of a Learjet.

Lamm said in a view of Texas' very generous package it is questionable if Colorado could have landed the center in any event, but that the quality of the state's universities took it out of the running early on.

He said the consortium's president and chief executive officer, former CIA head Admiral Bobby Inman, told him the state's higher education facilities were found wanting.

"Bobby Inman was very impressed with Colorado's quality of life and how easy it would be to recruit here," the governor said. "But in his letter to me he specifically said that we've let our universities run down. Essentially he was saying we don't have first tier universities and the excellence we did have we're allowing to deteriorate."

In the letter to the governor explaining the rejection Inman wrote:

"The principal suggeston that I would give to Colorado is to intensify your efforts to develop your state universities into the first tier of universities in computer science and institutions. Your institutions have many well-known faculty members and excellent programs, but I don't think they are generally considered to be in the same tier as Stanford, MIT, the University of California at Berkeley and Carnegie Mellon."

Lamm, who made his remarks against the backdrop of a special session of the legislature to deal with a state budget shortfall and cries from some Republican lawmakers to further cut college and university funding, was critical of the legislature's attitude toward higher education.

"I think that our legislature looks at universities as just another hog feeding at the trough," he said. "We've got to explain to them that the jobs of the future we want attracted to the state are going to need higher education facilities."

He said Colorado "has been successful beyond what we deserve to be [in attracting industry] when you look at the foresight of our public officials. The fact is economic development has been very easy for Colorado."

"However, our historic economies—tourism, mining, and agriculture—are all under a great deal of pressure, and really the prospects in a lot of those are not for the kind of jobs that are going to keep us going in this state," he said.

"This state as far as we can say is the fifth in [attracting] high technology firms," he said, "and we've really done very well up to now.

"The fact is that I think the competition is toughening and companies are looking for more than snowy mountains. Now they're going to look and say 'what kind of engineering department do you have?'" he said.

The governor said that in dealing with the present budget shortfall he has asked the legislature "to cut a dollar and raise a dollar" in new taxes.

"There's been a lot of Republican feeling that all we have to do is cut the budget again," he said. "Well, we've cut for seven years in a row now. The average per capita cost of government has gone down, down, down, and now what we have to do is recognize we gave too much tax relief and take some of it back.

"We've given $2.2 billion worth of tax relief in the past few years, and I need $46 million of it back," he said.

Lamm said he has suggested increases in the state's personal and corporate income taxes "either through a surtax or something else" as the best way of getting the added revenues.

"I don't think we need a permanent tax increase," he said. "The good news in Colorado is that for two years from now our projections still show some very healthy surpluses."

FAST GROWTH AND SLOW LEARNERS: THE WEST'S POLITICAL TRAGEDY

(By Bill Hornby)

The tea leaves of the demographers, those who study population growth and distribution, were given a mighty stir by the U.S. Bureau of the Census this week with its projection of where Americans will be in the year 2000, less than 20 years away.

The bureau predicts the West, including the Pacific Coast states, Alaska and Hawaii, will continue as the country's fastest growing region, with all that implies in the redistribution of political and economic power. The projected increase is 45 percent, compared to a national average of 18 percent. The South is also expected to grow considerably by 2000, some 31 percent. The Northeast is expected to decline slightly and the Midwest to remain stagnant.

Descending from the bureau's lofty generalizations about large areas to our Mountain West in particular, three of our states are expected to more than double their populations by the year 2000—Nevada (140.1 percent), Wyoming (112.9), and Arizona (105.4). Then at lesser rates of growth but still far ahead of the national average, we have Utah (90.1 percent), Colorado (61.2), Idaho (60.2), New Mexico (32.9) and Montana (22.4). These high growth rates are given perspective by the relative figures for the neighboring Great Plains wheat states. Kansas (5.6 percent) and Nebraska (5.9) are indicative that the population flow is toward the mountains and the energy resources and recreation they foster.

Colorado is expected to have 4,656,600 people by the year 2000, compared to 2,888,800 at present, almost two more people for every three you see today. At least two-thirds of the new arrivals will jam into the Front Range from Colorado Springs to Fort Collins, given the now-obvious lack of lead time to develop major population centers on a more spread-out pattern.

The Washington political journal, "Congressional Quarterly," has just surveyed the states, and of Colorado it says that this demographic packing of the Front Range is good news for the state's Republicans. It notes the Democratic core cities of Denver and Pueblo are not sharing in the general growth, and that the heavily Republican suburbs and rural areas will continue to dominate the state legislature.

If this is true, then the state Republican party bears the major responsibility for preparing for the huge population growth ahead. The Democratic state administration can propose, as it has, a myriad of action programs to prepare for growth, but the GOP leadership in the legislature is where the real power lies. If it doesn't provide more money for roads, schools, water, cultural and recreation facilities, and the other basic elements of Colorado's quality lifestyle, the state will inevitably decline.

Under the Census Bureau's population projections, Colorado would climb from 28th ranking to 21st among the 50 states by the year 2000. Already its median family income is much richer in state ranking than its population position. We rank 12th in family income, as opposed to 28th in size. And we rank very low in the tax burden per capita, 39th.

The conclusion is obvious that Coloradans could afford a heavier tax load to prepare for the future. But whether we will encourage our political leaders to take the long view and the unpopular step of increased public investment is doubtful, at least as suggested by the past decade of legislative history.

What is true of Colorado is mostly true in the other states of the Mountain West. The decline of federal spending on Western public facilities, especially roads and water storage, has not been balanced by an increased role of the state and local governments. The result is the inevitable loading of more and more people onto the same public infrastructure, which is eroding under the weight.

Practically wherever one looks in today's West, our schools, roads, reservoirs, transportation systems and parks are just barely meeting adequately the population pressures of today, let alone those ahead in the next two decades. We won't be able to do much about it if the only reaction of legislators is to cut budgets, delay capital improvements, and mislead people into thinking they can have a quality life cheaply.●

TO HONOR DR. GERALD A. SMITH

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. LEWIS of California. Mr. Speaker, on Monday, September 26, the people of San Bernardino County will be honoring a very special man, Dr. Gerald A. Smith, at a retirement dinner and ceremony dedicating the Dr. Gerald A. Smith Hall of Anthropology in his honor. Unable to attend this gathering, I would like to take this opportunity to ask the Congress to join me along with his many friends and admirers in expressing our deep appreciation and gratitude to this outstanding human being upon the occasion of his retirement after his many years of dedicated service.

Dr. Smith was born in Gravette, Ark., but raised in the San Bernardino Valley. He and his wife, Dr. Maxine Smith, live in Redlands and are the proud parents of daughters Jerilynn and Meredith; and sons Geoffrey and David. His professional education reflects his devotion and dedication to his profession. He graduated from the University of Redlands in 1937 where

he received his master's degree in 1939. He earned his doctorate in education from the University of Southern California in 1953.

Dr. Smith began his career as an elementary and junior high school teacher in San Bernardino Valley schools; coached the football and basketball freshman teams for the University of Redlands in 1937-38. His administrative abilities earned a promotion from teaching principal at Warm Springs Elementary School in San Bernardino to superintendent of the Warm Springs District, a position he held from 1941-43. Dr. Smith has been the director of the San Bernardino County Museum since 1971, but his association with the museum dates back over 50 years, first as a volunteer and later as an employee of the county. He was instrumental in establishing the county museum in Bloomington in 1961 and later guided the plans for the present museum which was built in 1975 in Redlands.

Dr. Smith has earned many honors during his career, including a special award at the Indian Affairs Conference of California Historic Societies in 1971; the American Educator's Medal from the Freedom Foundation in 1963; a national honorary membership in the Parent-Teachers Association. As well as receiving his many distinguished awards and honors, he has published many articles and books in the fields of history and anthropology including "The Mojaves," "Cattle Brands of San Bernardino County;" "Newberry Cave Excavations;" "Prehistoric Man of San Bernardino Valley;" "Natives of the Marshall Islands Kwajalein Atoll" and the "Historical Diego Sepulveda Adobe of Yucaipa."

Some of Dr. Smith's other activities include holding presidencies of the San Bernardino County Historical Society; San Bernardino County Museum Association, Archaeological Survey Association, and the California Conference of Historical Societies. He is also a member of the California Association of Museums Board of Directors, the Pacific Coast Archaeological Society, American Association of Museums, Society of California Archaeology, Arrowhead Area Council of Boy Scouts, Arrowhead United Way, and the YMCA.

All who are privileged to work with Dr. Gerald Smith recognize and admire his dedication as an outstanding citizen and for his contributions to his community as well as the entire State of California. Dr. Smith continues to serve his community now as the executive director of the San Bernardino County Museum Association.

Mr. Speaker, I take great pride in commending to my colleagues, Dr. Gerald Smith, a truly dedicated man who has, through his selfless years of hard work, contributed to his community in a most beneficial way.●

HISPANIC WEEK

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mrs. BOXER. Mr. Speaker, I am grateful for the opportunity to participate in this special order. I am especially pleased to speak as a Member whose State has one of the largest and most dynamic Hispanic populations in the country.

Throughout their histroy, Hispanic Americans have struggled to achieve success in our country using their talents and gifts to enhance the cultural diversity and moral foundations upon which this country was established.

The Hispanic community has consistently worked successfully within the American system to obtain social and economic justice. The Hispanic community has consistently been in a vital part of the civil rights movement and has achieved remarkable gains for thousands of otherwise forgotton migrant workers and farmworkers. The Hispanic community has initiated strong support for quality bilingual programs which have enabled many children to become productive and respected members of our society.

Hispanic culture, cuisine, art, and music have enhanced the quality of American life, making us a richer country.

National Hispanic Heritage Week gives us the opportunity to praise a great people and to honor them for their contributions to American society.●

COMPETITION VERSUS RESEARCH

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. WINN. Mr. Speaker, I have always been a strong advocate of deregulation as a means of serving the public interest by spurring competition in our free market economy. However, we must be mindful that in our enthusiasm to deregulate we may eliminate business and industry from participating in certain pursuits which we want to encourage. Such is the case with basic research—an area of great concern to the Committee on Science and Technology, on which I am privileged to serve as the ranking minority member. When business and industry are forced to abandon basic research ventures to remain competitive on the balance sheet, the Federal Government is forced to pick up the slack. A recent newspaper article discusses this anomaly. I include it as this point in the RECORD for the benefit of my colleagues:

[From the New York Times, Aug. 31, 1983]

COMPETITION VERSUS RESEARCH

(By William J. Baumol)

Many economists advocate vigorous competition as the most effective means to get to consumers the mix of products they want at the lowest sustainable prices. Deregulation of transportation by air, trucks and railroads, for instance, has been promoted in the belief that most of these markets are now reasonably competitive, and that substitution of competition for regulation serves the public interest.

However, competition, like virtually all good things, incurs some social costs that are usually overlooked. If businesses are forced to vie with each other in charging the lowest possible prices for similar products, they will have nothing left over for nonbusiness-related expenditures.

Competition, whatever the personal morality of individual business executives, all but precludes voluntary spending for social projects such as environmental protection, training of the unskilled and support of worthy causes such as education, health care and the arts. Perhaps even more disturbing, competition impedes business expenditure on basic research, whose marketable products are unpredictable, but on which the nation's future productivity and living standard depend.

None of this, however, weakens economists' loyalty to competition.

Paradoxically, the basic source of virtue of the competitive process is also responsible for its discouragement of good works by business management. In a vigorous competitive environment the company that turns our inferior products or engages in wasteful outlays is rapidly replaced. The marketplace makes no distinction between expenditures that arise from inefficiency and waste, and therefore serve no purpose, and those that yield benefits to society rather than just to the company's customers.

Voluntary outlays to prevent the emission of pollutants or to help the arts are all "wasteful" insofar as market forces are concerned because they yield no marketable product. The public-spirited management that makes such expenditures will quickly be undercut by less scrupulous rivals and driven from the market. The more competitive, the less monopolistic an industry, the more powerful these forces will be.

Basic research is another victim of this process that is of critical concern for public policy, given this country's poor record of productivity growth in recent decades. Basic research, in contract to applied research, is the pursuit of knowledge for knowledge's sake. It seeks no better mousetrap but only better understanding. Yet there is widespread agreement that it has had enormous payoffs in the past and must continue to yield breakthroughs in the future if society is to continue to prosper. It has spawned high-technology industry; new sources of energy, computer technology, revolutions in medical care and more effective economic policy.

These technological revolutions originated largely in universities, and Government laboratories. Business contributed only a small share because money spent by private companies for basic research, even if it yields

valuable discoveries, may very well not benefit the sponsoring companies themselves. Moreover, the enterprise that benefits from company A's basic research may well be company B in another industry, which will very likely pay nothing to defray the costs of the advance in knowledge.

Economists call this "the free-rider problem"—investment in basic research is unremunerative to private companies because such free riders are likely to reap the bulk of the benefits. Worse still, sometimes company A's basic research will primarily benefit its rival, company C, which may be quicker to appreciate the value of the new knowledge and to learn how to use it.

Up to now, the International Business Machines Corporation and the American Telephone and Telegraph Company, whose enormous market shares reduced their vulnerability to competitors, have been virtually alone in sponsoring such research extensively. It is unlikely that these two corporations will continue to spend as much as they did on basic research in the past, as they find themselves increasingly subjected to competition.

It is little wonder that a recent report by the Committee for Economic Development, an organization composed largely of business executives little inclined to encourage Government expenditure, concluded that there was no realistic alternative to the Federal Government as the primary source of support for basic research.●

NATIONAL HISPANIC HERITAGE WEEK

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 13, 1983

● Mr. RODINO. Mr. Speaker, it is a privilege for me to take part again in this celebration of National Hispanic Heritage Week. I thank the Congressional Hispanic Caucus and its friends for this effort to bring to the Nation's attention the contributions of the various Hispanic cultures to our country and for focusing on persisting problems that demand solution, particularly economic problems, problems that require attention not for 1 week but for 52 weeks out of the year.

From the very discovery of America, right up until today, the Spanish settlers and their descendants have added invaluably to the rich diversity of our society in which all of us take great pride. These contributions span the spectrum of our Nation's endeavors: art, music, education, science, government, business, entertainment. The bravery of Hispanic heroes in the service of their country is legendary.

There are some 16 million Hispanic citizens of the United States, and they are the fastest growing minority group in America. They are a political force to be reckoned with. Their pivotal role in recent elections in many States—Texas, New Mexico, Illinois, Florida, Colorado, to name a few—has stimulated a sudden and frantic (some say unseemly) courtship of the Hispanic vote that is chronicled almost daily by the Nation's media.

This courtship cannot be a sometime thing. I pledge to work constantly with my colleagues to eliminate from our society the inequity and injustice that daily frustrate the Hispanic and other minorities. We and our successors cannot rest as long as the promise of our Constitution to secure the blessings of liberty to ourselves and our posterity remains, for too many citizens, a promise unfulfilled.●

WHO WILL SPEAK FOR THE UNEMPLOYED?

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. HAWKINS. Mr. Speaker, this week the House begins full consideration of H.R. 1036, the Community Renewal Employment Act. As this body deliberates the merits of this necessary and urgent legislation, we should also examine the deeper questions of what are the real purposes of an economy, and of our Nation.

Before elected President, candidate Ronald Reagan commented, "I don't think the American people want an administration that talks about unemployment as something to be 'used' against Americans. You don't 'use' the suffering of human beings—you alleviate that suffering."

What a hollow ring these words have today, especially from an administration who deliberately manufactured a severe recession to bring down inflation, and opposes any meaningful jobs program to help the unemployed. Many of the victims of this recession will never completely recover from their losses, and thousands of others will never return to jobs they have held most of their lives.

When the President's economic recovery program was adopted unemployment was 7.2 percent, a level which Mr. Reagan referred to as a "depression state" as a candidate. Unemployment is currently 9.5 percent, 20 percent for blacks, and 53 percent for black youth. This level is 0.5 percent higher than the peak of the severe recession in 1975 and 2.2 million more individuals are unemployed.

This deplorable economic picture is further clouded by the latest Congressional Budget Office projections forecasting unemployment to drop only to 8.2 percent by the end of 1984 and not reaching the prerecession level of 7.2 percent until after 1986.

Further, the current official jobless rate of 9.5 percent is grossly understated. When you include hidden unemployment, that is, the discouraged worker, and those working only part time for economic reasons, over 18 million people are unemployed.

The seriousness of the unemployment problem is further confirmed by thousands of other Americans who receive below minimum or below poverty level pay for full-time work; workers forced to reduce their regular workweek hours; and other individuals who simply are not found by the statistic counters.

The human dimension of the unemployment crisis becomes even more critical because the duration of joblessness has been getting longer. The average length of unemployment during August was 19.9 weeks. Nearly 2½ million persons have been unemployed for more than 6 months. The duration of unemployment has more than doubled since the start of the recession in July 1981.

Mr. Speaker, how long can the communities in this Nation hold out and wait for this so-called recovery to take place, if it does at all? And how long can people continue on inadequate diets or do without proper health care? How long can our Nation continue to put the problems of the impoverished on a scrap heap of inattention and indifference?

Those of us who support H.R. 1036 do not advocate this to be the total solution or even a substantial amount of the solution to the problem; we do so on the theory that it is complementary to monetary and fiscal policies and doing the things that are right, and that it is only one of a series of things that need to be done in the context of a total jobs package.

H.R. 1036 addresses the immediate problems of the long-term unemployed by creating jobs in both the public and private sector to repair and renovate deteriorating community facilities essential to public safety; to provide vital health and social service activities; and for conservation and improvement of public lands.

These are not make work jobs, as sometimes misstated by the administration, but are meaningful, labor intensive jobs necessary to rebuild America's crumbling infrastructure. H.R. 1036 not only makes good economic and human sense, it also is desirable from a policy point of view. The recent bridge collapse on a Connecticut highway vividly illustrates the desolate shape of many of our Nation's streets and bridges. The Congressional Budget Office estimates that governments at all levels must spend an extra $11 billion each year in this decade to repair deteriorating transportation and water systems. America's schools have indicated they have $25 billion worth of repair and maintenance problems.

Additionally, the social services provided by this bill are in short supply. The U.S. Conference of Mayors reports that only 36 percent of the eligible population receive health services,

only 14 percent receive day care, and a scant 4 percent are reached by employment and training programs. It is also estimated that local officials met only 43 percent of the demand for emergency services, such as food and shelter.

The administration's opposition to past structural programs is well known. They continually make simplistic arguments and reckless anecdotal references to criticize job programs to galvanize support for their narrow agenda. The President recently accused the press corps of using "hype and hoopla" in their reporting methods. But as columnist James Reston pointed out, "he should know, he's an expert on both."

The administration's unfounded attacks on structural programs, is a divide and conquer strategy, used in such a way to aggravate certain groups, and play the working population against the unemployed. But now, even the administration's top officials are criticizing their program which in 1981 phased out a CETA jobs program and called on the private sector to help CETA employees make job transitions.

The administration's approach simply does not work, as confirmed by Albert Angrisani, the current Assistant Secretary of Labor for Employment and Training, in his interview with the Wall Street Journal, "This darn re-employment effort isn't the perfect example of our efforts to get jobless people into the private sector. It's just a hodgepodge and a mess, and I'll be glad when it's over."

This is evidence that the administration does not have any real mechanism for dealing with the unemployed. The only explanation we get from the President is to wait for the economy to recover. Mr. Speaker, the unemployed, especially those who have been without work for an extended time period, can wait no longer.

And while we wait and do nothing about this tragic national problem, the economic and human costs of this policy inaction continue to mount. It is estimated that each 1-percent increase in unemployment adds between $26 and $40 billion to the Federal deficit. Unemployment compensation alone added approximately $33 billion to the deficit in 1983.

Unemployment not only bears a heavy financial cost; but it also exacerbates the real but immeasurable cost of physical and mental illness, loss of dignity, and broken homes. The effects of unemployment are felt acutely by children, who suffer from higher rates of child abuse, infant mortality, childhood illness and anxiety. These are not assumptions, Mr. Speaker. These are factual, well documented studies on the social impact of high rates of unemployment.

Have we so quickly forgotten the purposes of our society to provide for the welfare of our people? Shall we do nothing as we watch West Germans send care packages to our urban poor? Have we forgotten the words of one of our Nation's Founding Fathers when referring to this body he said, "Here sir, the people govern." Have the pleas of the poor and the disenfranchised fallen on deaf ears? It becomes incumbent to all of us not only to listen, but to act in their behalf. Listen to the words of the wife of an unemployed worker:

To me, Reaganomics is cruel and self-serving. Reagan seems to be telling us that the United States is a sinking ship and that if we harden our hearts and throw a few people overboard, we can lighten the load. I don't see my country quite that way. The philosophy behind the original structure of the United States is that we are a people who sink or swim together. We don't make human sacrifices.

Another unemployed worker tells us:

I wish the President could be that unemployed guy in South Succotash for just one month. I'd be curious to know what his view would be on the greater need for warheads than for jobs if the window of vulnerability were situated on the front porch of his home.

What we are providing in H.R. 1036 is a bridge to opportunity. A helping hand to thousands of Americans who have been abandoned by this recession, and may still be left behind even if we achieve recovery. H.R. 1036 allows our young people to trade dependence for independence. It provides a stepping stone to opportunity for jobless individuals who have been condemned to idleness and placed in a psychological no-man's land.

Mr. Speaker, H.R. 1036, the Community Renewal Employment Act is the first real alternative to our chronic unemployment crisis. Clearly, much more is needed. Surely we can do no less, if we are to be guided by the light of reason, hold our head high, be true to our conscience and sense of justice, and do our best, not our worst.●

THE 75TH ANNIVERSARY OF GENERAL MOTORS HYDRAMATIC OF TOLEDO, OHIO

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Ms. KAPTUR. Mr. Speaker, this week General Motors Hydramatic of Toledo, Ohio, is celebrating its 75th anniversary. For three-quarters of a century, the General Motors Hydramatic facility and its workers have served as an anchor for our local industrial economy. The facility has provided thousands of jobs for our citizens and the type of capital necessary for community growth and prosperity. We, in the Toledo area, are especially proud of General Motors Hydramatic. It has shown itself to be extremely innovative and progressive, taking a lead in critical industrial competitiveness areas such as product innovation, energy conservation, and labor-management relations. The recent expansion of operations by General Motors Hydramatic is evidence of the commitment by the company and its workers to continue taking the steps necessary to keep the facility in the forefront of the automotive industry. To all those associated with the anniversary celebration, I offer, on behalf of the House of Representatives and the citizens of the Ninth District, congratulations and best wishes to General Motors Hydramatic, its management, and employees.

STATEMENT ON WEEA

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Ms. OAKAR. Mr. Speaker, I submit for the RECORD today a piece by Judy Mann which appeared in the Wednesday, September 14, Washington Post. Ms. Mann addresses the issue of the recent cutbacks in the Department of Education and specifically in the Women's Educational Equity Act program. She questions the President's commitment to women and to education. His rhetoric on these issues has been geared toward winning the support of women and minorities in this Presidential election season. But his actions are very different. He is cutting programs that benefit these same groups.

Mr. Speaker, I insert Ms. Mann's excellent piece in the RECORD at this point:

[From the Washington Post, Sept. 14, 1983]

TWO-FACED

(By Judy Mann)

While President Reagan is preoccupied with international crises, his New Right appointees in the Department of Education are quietly getting away with mischief that will give the Democrats wonderful ammunition to fire into the gender gap.

In the weeks immediately preceding the Korean airline crash, the president toured the country citing his administration's accomplishments on behalf of women. At the American Bar Association meeting in Atlanta, for example, he pledged to "assure that every women has an equal opportunity to achieve the American dream."

The connection between education and achieving the American dream is well-established. But while President Reagan was saying one thing, his appointees were doing the exact opposite. They were busily carrying out a right-wing vendetta against the only federal program that helps schools and universities give girls and women the same opportunities in education that boys and men have.

Under the guise of a reorganization, Reagan appointees have downgraded the Women's Educational Equity Act program from its place near the top of the Education Department bureaucracy to one near the bottom of it. Five of the seven staff members who worked in the $5.5 million-a-year program have been RIF'd, including Dr. Leslie Wolfe, the program director who was the target of a particularly virulent attack in the Conservative Digest. All five were women. The two people who were not RIF'd are men. They, it is worth noting, were protected by veterans preference.

"WEEA is one of the most cost-effective programs in government," says Dr. Bernice Sandler, head of the Project on the Status and Education of Women of the Association of American Colleges. "All of the programs must be replicable. These programs don't push anybody. They encourage the schools to be fair and to give maximum opportunities for all of their students."

The Project on the Status and Education of Women, for example, received a WEEA grant to study the awarding of campus prizes—which are important in getting jobs and into graduate school—and it developed suggestions about how institutions and foundations can make sure that both men and women students get equal consideration. "We were able to point out things that people were inadvertently doing," Sandler says. "A lot of discrimination is not overt."

WEEA has also given grants to develop manuals for training rural women, for career planning for minority women, for guiding women reentering the job market, and to help women in vocational education programs, in gifted and talented programs and in bilingual educational programs.

WEEA was targeted in the Heritage Foundation's "Mandate for Leadership," which labeled it a haven "for extreme feminist ideology." The editor of the Heritage Report, Charles Heatherly, subsequently became deputy undersecretary for management of the Department of Education, and he has engineered the reorganization.

In April of 1982, the Conservative Digest printed an anonymous article, purportedly written by a "concerned employee in the Education Department," that accused the program of funding "hard-left women's groups" and attacked Wolfe, labeling her a "radical feminist." Within two weeks Wolfe was transferred out of her job and an important part of the grant selection process for 1982 was taken over by a Reagan administration appointee. This produced an outcry among women's groups and in Congress and Wolfe was later reinstated.

Congress has also repeatedly rescued WEEA from administration efforts to kill it by taking away its funding. But this time the program's staunch supporters on the Hill have been unable to block the reorganization that takes its staff and expertise away.

On Aug. 16, RIF notices were sent out affecting WEEA and four other programs, abolishing more than 100 positions, including that of WEEA director. Wolfe, a GS 15, who has been in the civil service 10 years, will be out of a job on Friday.

At the same time the president was trying to mend fences with female voters, his administration abandoned broad enforcement of Title IX, the only law that protects women from discrimination in education, and his appointees gutted the only federal program that promotes equity in education. There is a lesson in this for voters who care about the commitment President Reagan and his aides have toward women.

Watch what they do, not what they say.●

NORTH CAROLINA SCHOOL FOR EXCELLENCE

HON. TIM VALENTINE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. VALENTINE. Mr. Speaker, during the past several months the state of American education has come under substantial scrutiny and criticism. We in the Congress are responsible for establishing our Nation's priorities. We would do well to take notice of the considerable needs our young people have with respect to basic education, and we should take steps to ensure that our investment in America's future pays sound dividends.

I am proud that my State of North Carolina frequently takes the lead in improving the quality of public education. The North Carolina School of Science and Mathematics, in particular, has become a model for other States to emulate. Two recent articles in State Government News and the Raleigh News & Observer outline the school's tremendous achievements, and I ask that they be inserted in the RECORD.

The articles follow:

[From the State Government News]

NORTH CAROLINA SCHOOL FOR EXCELLENCE

(By Elaine S. Knapp)

For its best and brightest high school students in science and math, North Carolina has created a special place for learning.

It is the North Carolina School of Science and Mathematics (NCSSM), a public, residential, coeducational high school for juniors and seniors with high intellectual ability.

The school was created by the general assembly in 1978 with the strong backing of Gov. James B. Hunt, Jr. It opened in fall 1980 with 150 juniors and has since grown to nearly 400 students. Located in Durham on 27 acres, it utilizes the educational and research institutions in the Research Triangle area.

GIFTED STUDENTS

Before the school existed the "educational needs of gifted students were not being met in most high schools in North Carolina," explained Braughn Taylor, director of development at the school. These were the few children who were ready to do higher mathematics in the 10th and 11th grades, but whose rural schools did not have teachers to work with them.

The 380 students at NCSSM come from 87 of North Carolina's 100 counties; 45 percent are female and 23 percent are black. Tenth graders are selected through a competitive process which includes interest and ability in science and mathematics, standardized test scores, academic performance, personal interviews and other activities and accomplishments. A committee of leaders in the scientific and educational communities and NCSSM staff makes selections.

Family income is not a consideration in selection since tuition and room and board are provided.

"The idea was to bring these gifted students to one place, and let them learn as rapidly as they wanted and progress as far as they could," Taylor said. Some seniors at NCSSM are working at the level of college sophomores.

COLLEGE ATMOSPHERE

As a residential school and in its learning methods, the school is more like a college than high school. Classes are held three days a week, so that there's time for students to learn on their own. One of the most difficult things students must learn is to be responsible for their own time, Taylor noted. Facilities are open until late at night so that learning can go on around the clock. Classes are organized so that students who quickly master one course can move into another with little disruption. Subject areas are organized to allow more intensive study than the general survey courses offered in most high schools.

Students have found the challenge worth the home life they had to give up, Taylor said. Many have commented that they had felt isolated and alone in their home schools. At NCSSM they have formed new friendships and their intellectual growth has been stimulated by fellow students. These students have a tremendous appetite to learn, Taylor commented.

As a minimum, students must take three units of science, two of mathematics, two of English, as well as courses in American history, foreign language, physical activity and electives. One unit of credit is given for satisfactorily completing one year-long course. Students must also be proficient with computers.

Because they must live at the school, students are required to spend four hours weekly in housekeeping, groundskeeping or office chores to complete two years of work service. They must also spend three hours weekly in community service, such as volunteering in schools or hospitals, to complete one year of community service.

TOP FACULTY

Half the full-time faculty hold Ph.D's, and the rest have master's degrees. It is essential that the faculty be throughly knowledgeable about their field, and be willing to say "let's find out" if they don't know an answer, Taylor said. The state scale for a high school teacher with a Ph.D and 10 years experience is $20,000. NCSSM pays a supplement of $2,000 to $2,500. Although the pay is not what many might get in industry, it's easy to get teachers for NCSSM, Taylor said. "There's no discipline problems. All the students want to learn. It's an opportunity to work with bright young people," he commented. Plus, teachers "just teach," and don't have the other duties often imposed on teachers.

Teachers have come from other public schools, universities, education in industry and straight out of industry. NCSSM has its own Board of Trustees and is not limited by state restrictions on hiring faculty or on course offerings or textbooks.

There are 27 full-time teaching faculty, 11 part-time faculty and four Babcock visiting instructors in mathematics, biology and chemistry. The visiting teachers come from North Carolina high schools and teach three classes while developing materials, computer programs or new approaches to teaching. After one year they are expected to return to their home schools.

SUCCESSES

Students have won admission to some of the nation's finest colleges and universities, most with advanced standing and scholarships and awards.

The 138 members of the first graduating class in June 1982 were offered over $325,000 in scholarships and awards. Over 70 percent chose to attend North Carolina institutions, with most selecting North Carolina State University and University of North Carolina at Chapel Hill. The 1983 graduating class of 148 were offered $1.4 million in scholarships and awards. In-state institutions were selected by 65 percent of the class.

The high visibility of the school has likely contributed to the number and amount of scholarship offers.

The quality of the students is attested to by NCSSM being second in the nation, after a New York school with over 2,000 students, in the number of National Merit Scholarship awards during each of its first two years of operation.

NCSSM has attracted visitors from foreign nations and other states interested in learning more about the concept. Louisiana is opening its own version this fall.

Another goal of the school has been to lead the way to improvements in all State high schools. Already 500 science and math teachers have taken summer courses in computers in the classroom at NCSSM. Those teachers have held workshops at their home schools and taught another 500 teachers.

FUND RAISING

When NCSSM was created, the legislature realized the state could not finance it all. Thus, the school aggressively pursued private funding. It has raised $7 million in three years.

When asked whether the concept of the school could work in other states, Taylor saw no limitations. "It needs political leadership at the top," he declared.

For North Carolina, the school has been a highly visible indication of the state's long-standing commitment to education. Terry Sanford, now president of Duke, started the tradition during his term from 1961-65. But Gov. Hunt has taken a leading role in the state and nationwide in pushing education. He started a reading program for the primary grades, asking volunteers to work in the classroom and volunteering himself.

The concern over the crisis in science and mathematics education is spreading nationwide. But North Carolina is "proving that educational excellence is possible, practical, adaptable to most communities, and, best of all, an idea whose time has come," wrote NCSSM Director Charles R. Eilber.

[From the Raleigh News and Observer, Sept. 15, 1983]

NORTH CAROLINA MATH, SCIENCE SCHOOL TOUTED AS NATIONAL MODEL

(By Ben Esters)

DURHAM.—The North Carolina School of Science and Mathematics should be used as a model in a national effort to improve education in the fields of math and science, a co-chairman of a National Science Foundation study commission said Wednesday.

The commission issued a proposal this week that calls for $1.5 billion in federal funds to go in part "to help start more schools like the N.C. School of Science and Math," said Dr. Cecily C. Selby of New York City, former dean of academic affairs and chairman of the board of advisors of the Durham school.

The commission's proposal calls for "a level of mathematics, science and technology education that is the finest in the world" by 1995. It states that the country "is currently failing to provide its own children with the intellectual tools needed for the 21st century."

During a news conference at the school Wednesday afternoon, Dr. Selby said the commission conducted a detailed study of America's educational system. "We found ourselves looking at models such as this school," she said.

One of the commission's proposals is to create 1,000 elementary and 1,000 secondary schools that have "exemplary programs" in mathematics and science.

"We're not looking at a network of elite situations," Dr. Selby said. The Criteria for admission to the schools should be "committed students and committed parents," she said.

Other changes recommended by the commission include providing students with earlier exposure to the fields of math and science, retraining of teachers in those fields and attracting high quality instructors, improving the quality and usefulness of math and science courses, and taking advantage of new information technologies, especially computers.

"We felt the most important thing to do was to try and put a price on everything we recommened," Dr. Selby said. She said these changes will require strong leadership along with the $1.5 billion investment.

Several professional organizations have endorsed the plan, including the American Federation of Teachers and the American Association of School Administrators.

"There's no question that committed presidential backing would be the best thing to happen to us," Dr. Selby said. "Top leadership is the key."●

A STANDARD WORTH EMULATING

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. PORTER. Mr. Speaker, at a time when most hospitals in this country are struggling to adjust to more cost-conscious times, I am extremely proud to draw your attention to a hospital in my district which has set an example for the entire health care community of Illinois.

Victory Memorial Hospital of Waukegan, Ill., recently received the Blue Cross and Blue Shield Award of Merit for its excellence in cost-effective management. Victory Memorial was honored for its outstanding utilization review program, its exceptional performance in the Blue Cross and Blue Shield guaranteed payment/hold harmless program and for other ambitious and effective cost containment initiatives.

Victory Memorial's successful utilization review program has meant that patients who once were hospitalized as a matter of course have received high quality outpatient care at a far lower cost. For those patients who have been hospitalized, the program has insured requisite number of hospital days their condition requires.

Under the guaranteed payment/hold harmless program, Blue Cross and Blue Shield members have been assured that they will not be required to pay for any service that is determined to be unnecessary during claim processing. In turn, the program denies reimbursement to the hospital if the unnecessary services reach a certain level. To be successful in this program requires the maintenance of an effective utilization review program to see that medically unnecessary services are kept at the bare minimum. Victory Memorial has succeeded in this area beyond all expectation.

With these and other cost containment programs, Victory Memorial has generated an annual savings of $2,720,000.

I applaud Victory Memorial and its fine staff for what clearly has been a cooperative and extraordinary effort to attain quality and cost-effective health care for the people of Waukegan. Theirs is a standard well worth emulating.●

JOSEPH J. BAKER, VETERANS SERVICE OFFICER

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. EDGAR. Mr. Speaker, I would like to pay a special tribute to Joseph J. Baker who recently retired after 37 years in Federal service with the Veterans' Administration.

During this distinguished career he coupled years of personal and compassionate service to the veteran community with an in-depth knowledge of veterans benefits and services. Mr. Baker became one of the most knowledgeable experts within the Veterans' Administration on the history, implementation, and incalculable benefit of VA educational programs, serving three generations of our Nation's veterans. His service to the agency and particularly with the VA Regional Office and Insurance Center in Philadelphia will be sorely missed. As a member of the House Veterans' Affairs Committee, and, on behalf of his coworkers and the veterans he served, I would like to commend and thank Joe Baker for a job well done.

Mr. Speaker, I submit for the RECORD, a brief summary of Joe Baker's accomplishments in Federal service detailing an outstanding contribution in service to his country. We are very grateful:

JOSEPH J. BAKER, VETERANS SERVICES OFFICER

Mr. Joseph Baker has held the position of Veterans Services Officer (VSO) for the

Veterans Administration Regional Office and Insurance Center in Philadelphia from August 3, 1975 through July 29, 1983. His extensive knowledge of all areas of veterans' benefits coupled with his managerial skills made him an invaluable asset to the Philadelphia Regional Office and the Agency.

Mr. Baker's vast knowledge of veterans' benefits began with his employment in the Vocational Rehabilitation and Education Division in 1946. As he rose through the ranks of the division, he acquired in-depth knowledge of the broad spectrum of services available to veterans. His knowledge of veterans' benefits as well as his ability to communicate with all types of people established him as a leader. While in the Adjudication Division, Mr. Baker was called upon to provide assistance to the VA Central Office by conducting compliance surveys at various stations and by revising the VA education manual. In addition, he was instrumental in developing a ten-week college preparatory course at Pennsylvania State University for educationally disadvantaged Vietnam veterans.

As VSO, Mr. Baker managed the activities of over 80 employees in the Veterans Services Division. He oversaw numerous changes in methods, procedures, and operations in his division. His flexibility and talent for establishing new procedures quickly and efficiently was demonstrated through his assistance during the implementation of the TARGET system. In both the Adjudication and Veterans Services Division, Mr. Baker pioneered the use of the TARGET system. His efforts resulted in greater productivity and efficiency for both the veteran and the Agency.

Mr. Baker's unique sense of responsibility and driving initiative inspired his staff to achieve. During his tenure as VSO, the division consistently ranked among the most rated Veterans Services Divisions in effectiveness and productivity. Under his direction, the last two Supervisory Visit Evaluations resulted in excellent ratings for management. Because of his expertise in the area of Veterans Services, Mr. Baker was called upon by Central Office to be a subject matter expert for a job analysis of the VSO position.

Since his days as a Veterans Claims Examiner, Mr. Baker demonstrated the ability to deal effectively with employees, veterans, and the general public. Early in his career, he established himself as liaison between local educational institutions and the VARIOC. His knowledge of VA educational benefits is unsurpassed and he was the source of expertise concerning educational inquiries at the Philadelphia Regional Office. As VSO, he coordinated a network of social, political, and veterans' groups to keep abreast of the needs of veterans and to acquaint the public with the benefit programs available through the VA. He was the chairman of the local Vietnam Veterans Civic Council. Under Mr. Baker's guidance, the Civic Council expanded and became an active and important link in the VA's relationship with the community. As the result of a proposal submitted by the local Civic Council under Mr. Baker's direction, the delimiting date and eligibility requirements for educational benefits were liberalized. Always searching for more effective ways to serve the veterans in the community, Mr. Baker initiated various special studies and outreach projects. At the time of his retirement, he held the position of Station Coordinator for Consumer Affairs, Station Coordinator for POW Activities, Station Coordinator for Outreach to the Aged and Liaison for the Discharge Upgrade Review Program. He also frequently conducted training sessions for County Veterans Affairs Officers and veterans services organizations, such as the American Legion, Veterans of Foreign Wars and United Vietnam Veterans Organization.

Throughout his career, Mr. Baker was presented with numerous performance awards. He received an Outstanding Performance Award in 1956, Superior Performance Awards in 1962 and 1967, and a Quality Increase in 1969. In 1969, he was also awarded the Station Public Service Award for Direct Service to the Public for developing on-the-job training programs for the Philadelphia Police Department, Fairmount Park Police, and the Fire Department of Philadelphia. He received a Public Service Award in Communications in 1972 for his development of a summary of information regarding flight training and, in 1973 and 1974, he received Superior Performance Awards for the training and supervision he provided concerning education benefits.

Over the years, Mr. Baker grained a reputation of which he can be proud. He earned the loyalty and respect of his co-workers and representatives of various agencies and veterans' organizations. He consistently maintained a fair and professional image and never lost sight of our ultimate goal—"to provide the best possible service to the veterans and their dependents."

On the day of his retirement, Mr. Baker was honored with awards and accolades from various colleagues and veterans organizations. The following is a partial listing of those who paid tribute to Mr. Baker.

Jewish War Veterans;
Disabled American Veterans;
Veterans of Foreign Wars;
American Legion;
Red Cross;
Military Order of the Purple Heart;
AMVETS; and
PA Bureau of Veterans Affairs.

The numerous commendations given to Mr. Baker were evidence of the admiration and respect with which he is regarded.●

GRACE TEMPLE NO. 424 OF TOLEDO, OHIO, CELEBRATES 57TH ANNIVERSARY

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Ms. KAPTUR. Mr. Speaker, this week Grace Temple No. 424, of Toledo, Ohio, is celebrating its 57th anniversary. Grace Temple is one of the oldest black women's organizations in the city of Toledo. For more than a half century, this fine organization has dedicated itself to community service. Over the years, the members of Grace Temple No. 424 have worked hard to make Toledo a better place in which to live. On behalf of the House of Representatives, I offer congratulations and best wishes to the women of Grace Temple No. 424 who have made our community a better place for all people.●

LAWYER EXEMPTION FROM FTC JURISDICTION OPPOSED

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. FLORIO. Mr. Speaker, I wish to supplement the background material I inserted in the RECORD on September 15 (page E4305) regarding the proposal to exempt lawyers from the consumer protection jurisdiction of the Federal Trade Commission.

That proposal is entirely unwarranted, and I am happy to note that many lawyers themselves recognize this. Following is a statement from the Association of the Bar of the City of New York opposing the exemption:

THE ASSOCIATION OF THE BAR OF THE CITY OF NEW YORK, COMMITTEE ON TRADE REGULATION,
New York, N.Y., August 26, 1983.

Re FTC reauthorization bill (H.R. 2970), proposed exemption of lawyers from jurisdiction of FTC.

Hon. JAMES J. FLORIO,
Chairman, Subcommittee on Commerce, Transportation, and Tourism, Committee on Energy and Commerce, U.S. House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE FLORIO: The Committee on Trade Regulation on behalf of the Association of the Bar of the City of New York has adopted a position paper with respect to proposed legislation that would make lawyers exempt from regulation by the FTC. A copy of this position paper is enclosed.

As set forth in the enclosed position paper, we strongly oppose any effort to grant lawyers a blanket exemption from regulation by the FTC. The Association of the Bar of the City of New York has a membership of more than 14,000 lawyers, and our committee is comprised of more than 20 active practitioners in the antitrust field.

Although our position is at variance with the position adopted by the House of Delegates of the American Bar Association on August 2, 1983, we believe strongly that exemption of lawyers from the FTC's jurisdiction would not be in the public interest.

Respectfully yours,

GUY MILLER STRUVE.

POSITION PAPER

There are two amendments to the FTC Authorization Act (H.R. 2970) presently pending in Congress that would affect the regulation of professionals by the Federal Trade Commission ("FTC"). The first is the product of a compromise worked out between the American Medical Association ("AMA") and the FTC which provides, in pertinent part:

"The Commission shall not use its authority under section 5 or section 18 to prohibit unfair or deceptive acts or practices engaged in by professionals in a particular State if such use of authority would result in the invalidation of a State law of such State or any part of such law if such law or part establishes—

"(1) Training, education, or experience requirements for the licensure of professionals, or

"(2) Permissible tasks or duties which may be performed by professionals and which are based, in fact, on specialized training or education. . . ."

To that language, the House Energy and Commerce Committee has added the following proposal by Representative FLORIO (D., N.J.):

"Nothing in this section shall be deemed to restrict the Federal Trade Commission's authority under this Act or any other Act with respect to commercial or business acts or practices of professionals."

The second amendment, a proposal drafted by the State Bar of Texas, was introduced by Representative SAM B. HALL, Jr. (D., Tex.) on June 14, 1983. That amendment would prohibit regulation of unfair or deceptive acts or practices by professionals

"If such acts or practices are effectively regulated by the state court of last resort in civil cases or by such state court and state law."

We support the AMA-FTC compromise, if the Florio amendment is included, and oppose the Hall amendment.

In the last Congress, several bills were introduced which would have given professionals broad exemption from regulation by the FTC. In the face of opposition from the present administration, among others, those bills were defeated after an all-night session of both Houses of Congress on December 17, 1982. The Trade Regulation Committee, on behalf of the entire association, opposed those bills on the ground that there was no compelling reason why the commercial practices of professionals should not be subject to the same strictures as the commercial practices of other sectors of the economy. We also pointed out that, while many states regulate professions through the licensure mechanism, such regulation does not typically cover commercial practices. Finally, we noted that the proposed professional exemption seemed to be nothing more than special interest legislation, and we urged the members of Congress to stand up for the principle of uniform application of the laws.

We repeat and reaffirm those principles today. Professional services are a growing and important segment of the American economy. Public policy should strive to create an environment in which the highest quality professional services are delivered to the public at the lowest possible cost, with the least amount of governmental regulation required to achieve those ends. In pursuing those ends, it should be remembered that the primary focus of state law has been the quality of professional services whereas the primary focus of federal law has been the commercial aspects of such services. That is not to say that quality concerns and commercial concerns never overlap; they sometimes do. In our opinion, however, this does not justify the blanket exemptions that have been proposed. Experience has shown that it is almost always possible to reconcile the competing considerations of quality and competition when they appear to conflict in a regulatory scheme.

The AMA-FTC proposal and the Florio amendment are consistent with these principles. The AMA-FTC proposal preserves the State's traditional role in setting requirements for training, education and experience, while permitting the FTC to pursue the national policy of free and open competition. The Florio amendment clarifies the AMA-FTC proposal by making it clear that the FTC may proceed in situations where a state regulation purports to establish professional qualifications but in fact deters competition.

The proposal of the Texas Bar Association is inconsistent with the principles articulated above. It extends the pre-eminence of the State's role beyond licensing activities into the commercial area. With its emphasis on regulation by "the state court of last resort" the Texas Bar Association's proposal is quite clearly designed to provide a special exemption for lawyers. It is not clear why such an exemption has been proposed, since the FTC has never sought to regulate the acts or practices of lawyers as distinguished from other commercial or professional activities. Nor is it clear why the Texas Bar Association has chosen to focus on the FTC, leaving the Justice Department's antitrust jurisdiction over lawyers intact.

We can envision few, if any, benefits that would flow from such an exemption and can foresee a enormous potential for abuse. For example, the proposal would make concerted activity by a State's legal establishment to prohibit certain truthful advertising, which also had the effect of reducing competition, immune from challenge by the FTC. Similarly, if a state bar decided not to take action against certain types of deceptive advertising, the FTC would presumably be powerless to act.

It might be argued that the Texas Bar Association's proposal would not prevent action by the FTC in appropriate cases because it exempts from FTC jurisdiction only acts or practices that are "effectively regulated" by the State. This highlights an ambiguity in the proposed legislation: does the word "effectively" refer to the effectiveness of the regulation or is it another way of saying, "in effect"? If the latter interpretation is correct, then it would prevent FTC action even where the state regulation is in fact ineffective. If the former interpretation is correct, then it raises the question of who determines whether the regulation is effective and the standard by which that determination is made.

It must be recognized that we have entered an era in which lawyers are permitted to advertise as a matter of constitutional right and lawyers are increasingly engaging in activities that extend across state lines. In these circumstances, it may become important to have a consistent national policy governing the commercial practices of lawyers and the truthfulness of their statements to the public. The only real effect of the Texas Bar Association's proposal would be to deter development of such a national policy, especially in the area of deceptive acts or practices, where the FTC is the only federal agency with authority to act.

It has often been said that lawyers must adhere to standards stricter than those of the marketplace if they are to command the public confidence that their unique position in society requires. See e.g., Stone, "The Public Influence Of The Bar," 48 Harv. L. Rev. 1 (1934). The Texas Bar Association's proposal raises the spectre of lawyers being held to a looser standard than the rest of society. Moreover, it places lawyers in the unseemly position of advocating an exemption for their own profession. Passage of such a proposal can only have the effect of diminishing public confidence in the bar while providing no tangible benefit in return. We strongly urge its rejection.●

IN SUPPORT OF CONCURRENT RESOLUTION OFFERED BY MR. ANDREWS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. SCHEUER. Mr. Speaker, I rise in strong support of the concurrent resolution offered by our distinguished colleague from Texas (Mr. ANDREWS). This resolution expresses the clear intent of the Congress that it is not appropriate to sell the Government's civil weather satellites to the private sector at this time.

Since April of this year, the Subcommittee on Natural Resources, Agriculture Research and Environment, which I chair, has had five hearings on the proposed commercialization of civil land and weather satellite systems. These hearings heightened my concern about how the decision to commercialize weather satellites was reached. In April 1982, the Cabinet Council on Commerce and Trade, chaired by Secretary of Commerce Malcolm Baldrige, concluded that "weather satellites should not be transferred to the private sector." Eight months later, that decision was reversed, even though neither the Cabinet Council nor any of its work groups had met in the interval. In fact, if one examines the advice which the administration received in the interval, it is almost inconceivable to me that the decision to commercialize weather satellites could have been reversed.

Specifically:

Thirteen of fourteen industry respondents to the Commerce Department's request for information did not endorse sale of weather satellites.

The Commerce Department's Land Remote Sensing Satellite Advisory Committee concluded that "there is only a small commercial opportunity associated with weather satellites * * * weather satellites were judged to be inherently governmental."

A joint DOD/NASA study concluded that "there is considerable financial, policy, and program risk to the government in commercializing weather satellites and there is no clear policy or financial benefit to be realized."

Since President Reagan announced his decision to sell both the weather and land remote-sensing satellites in March of this year, we have heard testimony from the President's own Private Sector Survey on cost control and from three congressionally chartered panels that transfer of weather satellites is not a sensible or a cost-effective idea. We have heard disturbing allegations that the former Deputy Secretary of Commerce had extensive employment negotiations with the one

company that has consistently expressed an interest in purchasing and operating the weather satellites. We have also reviewed the draft "RFP" language which will be used to solicit bids from industry. The administration's plan would allow for free and open distribution of weather data both domestically and internationally, which guarantees that no significant new commercial venture involving marketing of weather data could develop. It also guarantees that transfer of the weather satellites would create a government-subsidized monopoly which might ultimately degrade the level of services provided to the public by the National Weather Service.

In light of this mounting evidence, we in the Congress have expressed repeatedly our views that weather satellites provide a legitimate public service and that any plan to sell them should be summarily dropped. Yet the administration has refused to listen to our suggestions and has refused to admit that it made a mistake.

It is never easy to admit a mistake, and I could understand, and perhaps even condone, the administration's intransigence on this issue if it were not so costly. But this continued sham is costly, and in many ways. While no one who understands the issue believes there is the slightest chance that Congress would ever approve the sale of weather satellites, private industry in the meantime is forced to spend millions of dollars to protect itself with defensive bids. More importantly, pursuing the sale of weather satellites distracts from the real issue—whether the U.S. Government should act decisively to maintain its leadership in land remote-sensing. The longer we argue over weather satellites, the more we are allowing the U.S. land remote-sensing capability to wither away, to be replaced by French and Japanese capability.

Secretary Baldrige stated at a hearing earlier this year that land remote-sensing is the central issue in this debate and that a vigorous policy initiative is needed or the United States will lose its rapidly dwindling technological advantage in this field. I agree with his assessment of the Landsat issue. But I do not agree, nor do any of the experts who have looked at this problem, that we should sell a weather satellite system that is working well in order to cross-subsidize our land remote-sensing capability. There are many other options for preserving our capabilities in this growing industry without selling our weather satellites.

I urge my colleagues to restore sanity and leadership to this debate by supporting the Andrews resolution.●

THE HUMAN RACE

HON. ANDREW JACOBS, JR.,

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. JACOBS. Mr. Speaker, the following constitutes one of the main things wrong with the human race:

"U.S. Says Soviet Downed Korean Airliner; 269 Lost; Reagan Denounces 'Wanton' Act."—New York Times, 9-2-83.

"Tass Accuses U.S. Of Provocation."—Washington Post, 9-4-83.

"Israelis Down A Libyan Airliner In The Sinai, Killing At Least 74; Say It Ignored Warning To Land."—New York Times, 2-22-73.

"Arab Nations Outraged; Soviet Denounces Israel."—New York Times, 2-23-73.

"U.S. Reluctant To Criticize Israel For Air Attack."—London Times, 2-23-73.

Faults are things that make our friends human and make our adversaries inhuman.●

TRIBUTE TO VANESSA WILLIAMS—MISS AMERICA 1983

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. BIAGGI. Mr. Speaker, as a Representative from the State of New York it gives me great pleasure to congratulate the lovely Ms. Vanessa Williams of Millwood, N.Y., who captured the Miss America pageant this past weekend in Atlantic City.

Vanessa, a student at Syracuse University, thus becomes the first black Miss America in our Nation's history. She has joined the ranks of other black pioneers who have broken down arbitrary color barriers and have done so on the basis of merit. Vanessa Williams was the class of the 1983 contestants. She combined beauty with style and grace and blended them in such a way as to make both a captivating and compelling presence to not only the judges at the contest but to the millions of Americans who watched on television.

Vanessa Williams, I am proud to note, did live for a period of her life in the Bronx, which I have represented in Congress for the past 14 years. All of New York State is proud of our native daughter, Vanessa Williams, and her tremendous accomplishment. She has displayed a strong independent spirit in her dealings with the media thus far and her reign as Miss America promises to be interesting.

As President Reagan said in his congratulatory phone call to Vanessa her selection was "a wonderful thing for our Nation." Now as a Nation let us permit Vanessa to enjoy her year as Miss America and not focus so much on the past but rather on the present and future.

At this point in the RECORD, I wish to submit an article from today's New York Daily News entitled "Miss Millwood to Them."

MISS MILLWOOD TO THEM

(By Larry Sutton)

The local girl made good.

So while the rest of America spent yesterday getting to know Vanessa Williams, Miss America 1984, Millwood was busy bursting with pride over their hometown heroine.

The beauty pageant winner came to the small, comfortable Westchester County town while just a baby.

She grew up in Millwood population 2,500, and had the hopes and prayers of the community with her as she paraded down the runway in Atlantic City Saturday night.

The town let loose when she won the title.

"Everybody in the room stood up, screamed and hollered, poured champagne," said David Sarles Jr., 26, who watched the pageant on television with about 15 of Williams' neighbors.

Some neighbors set off firecrackers when Williams was named winner.

Edward Hart, Williams' former high school principal, was almost as excited as his former student when he heard the good news.

"He was howling and screaming around the house," said Hart's son Christopher. "We were afraid he was going to wake up the baby."

Town firefighters made a banner reading "Welcome Home Vanessa Williams, Miss America 1984," which community leaders hope to display on her return.

Williams already has a prominent position in one of the town's most popular spots.

"I work in a deli down the road," said Steven Santon, 15, a neighbor, "and we have a picture of her on the bulletin board."●

TRADE ACT OF 1974

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. EDGAR. Mr. Speaker, on Thursday, September 15, I was unavoidably absent when the House was considering H.R. 3391, amending the Trade Act of 1974. As a strong supporter of trade adjustment assistance, I would have voted against the two amendments to weaken the bill. As passed, H.R. 3391 will make needed changes in the adjustment assistance program, improving our ability to help workers in industries affected by imports. Had I been present, I would have voted with the majority, against the attempts to eliminate the special account and entitlement provisions of the bill.●

A TRIBUTE TO SENATOR JOHN TOWER

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. KEMP. Mr. Speaker, the Senate is losing one of its most able spokesmen and America is losing one of its most respected leaders, Senator JOHN TOWER. During his 22 years of dedicated service to the United States in the Senate, Senator TOWER earned the admiration of his colleagues and the gratitude of the Nation for his insight, his calm judgment, and his untiring efforts not only on behalf of his State of Texas but for all America. His experience, knowledge, and leadership will be sorely missed in the Senate Chamber, in the Congress and in the country. I personally hope his voice and efforts will continue wherever he goes.

JOHN TOWER assumed the chairmanship of one of the most demanding committees in the Senate, the prestigious Armed Services Committee, at a moment in history when this Nation had its attention riveted on the need to reinvigorate our defenses in the face of an unprecedented expansion of the Soviet military threat. Since then, no one in Congress has spoken more forcefully or more effectively on behalf of a strong America or President Reagan's defense program than the distinguished chairman of the Senate Armed Services Committee. Those who care about the defense of our country sincerely hope that he will continue to lend his voice and his efforts to our national endeavor to remain strong, and free, and at peace.

George Will has written a tribute to Senator TOWER, in an article that appeared in the Buffalo Evening News on September 14 entitled, "Another Giant Is Leaving the U.S. Senate." Mr. Speaker, I ask that this tribute to my good friend be printed in the RECORD.

ANOTHER GIANT IS LEAVING THE U.S. SENATE

(By George F. Will)

WASHINGTON.—When asked recently why a colleague had voted against a defense program, Sen. John Tower snapped: "He abuses the right to be stupid." When Tower points the Green Bullet (his 1972 Dodge Charger) toward Texas next year, the Senate will lose one of its tartest tongues and sharpest minds.

Tower, whose office is a few yards from what was Sen. Henry Jackson's office, will not quite say so, but he might have reversed his decision to retire if he had not announced it before Jackson died. In the Senate, as in many other institutions, 20 percent of the members do 80 percent of the work. For two decades Tower and Jackson have been two of the consequential 20. Since 1981 they have been, respectively, chairman and ranking Democrat on the Armed Services Committee.

So in 1985, the Senate is certain to be without at least 15 percent (counting Howard Baker) of the 20, and even more of the heart of its leadership on military matters.

Tower has been in the Senate 22 years, 20 of them in the minority. In 1965-66 he had just 32 Republican colleagues. No senator, having been a chairman, can stand the thought of returning to the minority.

But there are 19 Republican and only 14 Democratic seats up in 1984, and today at least six Republican seats (Texas, Tennessee, Illinois, Iowa, North Carolina, New Hampshire) look more vulnerable than any Democratic seat. (Savor this, gender-gap scholars: Some Republicans hope three women potential candidates—in Michigan, Rhode Island and Nebraska—can save Republican control of the Senate by defeating Levin, Pell and Exon.)

Tower thinks probably rightly, he would have been re-elected. Polls show him 20 percent ahead of his nearest rival; his job-approval rating is higher than ever. And he actually likes campaigning across his unreasonably vast and complex state.

However, the Texas electorate is 11 percent black, 18 percent Mexican-American, and as the 1982 defeat of Gov. Clements showed, Texas Democrats have been reading the Republican book on organizing turnouts. Tower would not have needed to spend a nickel to build name-recognition, so his campaign might have cost "only" $7 million. Texas has 19 media markets. Four cover 70 percent of the electorate, but the other 15 can turn an election like the one Tower won in 1978 by 12,227 out of 2.3 million votes cast.

Beyond a desire for a fresh and less draining life, Tower's decision to leave the Senate reflects dismay about the institution. Not long ago, he says, the Senate was more efficient and civil, in part because power was concentrated in a few persons who received considerable deference—persons like Richard Russell, Everett Dirksen, Styles Bridges, Lyndon Johnson, Bob Kerr. There never was a record vote unless that leadership wanted one. That saved time and, even more important, prevented what has become common—the engineering of record votes, often on amendments that are going nowhere, often for grandstanding purposes, or to get responsible incumbents to make themselves vulnerable to irresponsible challengers by casting politically dangerous votes.

Tower thinks the Senate has "lost its corporate memory." Forty-three senators have been there less than six years, and 63 less than 10. Too many of the new members are "media creatures." They are frightened of politically awkward publicity. They increasingly share, or at least are inhibited by, the values of a press corps that see itself as an adversary of established institutions. Many younger senators assess their success by the media attention they receive.

The easiest way to get attention is by challenging the executive on defense and foreign policies. That is one reason why, having awakened to the fact that it has delegated two much discretion to the executive, Congress began asserting itself in the wrong area—in defense and foreign policies, where it is least equipped to cope, and where deference to the executive is proper.

Because President Reagan's defense buildup has been the most important public business since 1981, since 1981 Tower and Jackson have been, with Baker, the most important senators. As Reagan contemplates the likely mixture of pain and pleasure in a second term, he must be imagining how hard it would be for him to deal with a Senate with those three men missing.

When Tower leaves, the Senate will lose half its contingent from the London School of Economics. (Patrick Moynihan is the other alumnus.) Tower, a former professor, wants to do some teaching. That is good news for American education. Some students are going to learn something, and their teacher will not grade on a curve.●

MAX TURCHEN HONORED

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. WAXMAN. Mr. Speaker, on September 23, 1983, Max Turchen will be honored for 29 years of dedicated service to my State of California at a special retirement dinner given by his friends and associates. Max Turchen's activities over the years reflect his special interest in the welfare of fellow State employees as well as his dedication to the community at large.

Max Turchen was born in Sturgeon Bay, Wis. He is a graduate of the University of Wisconsin where he received a BA from the school of commerce. After graduation, Max joined the U.S. Army serving a 4-year tour of duty with the 1263d Combat Engineer Battalion in the European Theater. While in the service he attended an Army specialized training program in languages at the University of Michigan.

In 1952, Max Turchen moved to California. His career with the State of California began in November 1954, when he became an employment and claims assistant in the department of employment. He subsequently served as an employment security officer, industrial welfare agent, senior industrial welfare agent and currently is an area administrator with the division of labor standards enforcement.

In 1954, Max became a member of the California State Employees Association and began active participation in chapter 4 in 1964 when he became a general council delegate. Since that time until the present he has remained active and involved in many CSEA activities and in community affairs which are almost too numerous to mention.

In CSEA-chapter 4, he served as vice president 1964-65, president 1965-66, 1972-73; ways and means chairman 1975, 1976, 1977, 1978; member of the insurance committee 1963-64; regional director region XI 1966-67, 1967-68; member, trichapter parking committee 1964-65, 1965-66; member, CSEA Insurance Committee 1964-65, 1965-66; member CSEA Insurance Marketing Review Committee 1970; sponsor Los Angeles area CSEA Immunization Clinics 1964-75; president CSEA Health, Inc. 1964-79; chairman Employees Political Information Committee Governing Council 1970-75; Region

XI Employees Political Information Committee Coordinator 1970 present; member CSEA Legislative Committee 11 years; member CSEA Ad Hoc Committee on Reorganization of Legislative Committee and Poltical Action Policy 1973; Los Angeles Institutes of Government, 1967, 1968; Organization and southern chairman, California Labor Standards Association; member, board of directors, San Fernando Credit Union; chairman, Supervising Committee California State Employees Credit Union No. 3; recipient of CSEA Award of Merit 1979; president of La Cienega Cadillac Community Association 1980–83; associate chairman of United Way Aid Campaign for State-Employees 1982–1983.

In all of Max Turchen's endeavors, he has had the support of his wife Geraldine and children Barry and Freya.

I ask the Members to join me in congratulating Max Turchen on his outstanding record of service and to wish him many more years of success and fulfillment.●

PERSONAL EXPLANATION

HON. KENT HANCE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. HANCE. Mr. Speaker, last week I spent several days touring counties in Texas that have been devastated by drought. It was important for me to examine firsthand the effects of the dry weather so I could make appropriate recommendations to State officials and the administration on how to deal with this situation. Unfortunately, my tour of the drought area caused me to miss the vote on House Joint Resolution 353, a resolution condemning the Soviet Union for its actions in the KAL airline incident. As you know, I was a cosponsor of House Joint Resolution 353 and had I been present the day the House voted on the resolution, I would have voted "yea."●

FINANCING RUSSIA'S DEFENSE BUDGET

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. ROTH. Mr. Speaker, "for nearly two decades the West has been financing two separate defense budgets: its own, and a steadily increasing part of the Soviet bloc's," wrote veteran reporters Arnaud de Borchgrave and Michael Ledeen in the New Republic in December 1980. At that time the administration was preparing to embark on a major effort to strengthen export controls on the flow of information and advanced technology to the Soviet Union and the Warsaw Pact countries.

During the last 2 years, there have been major improvements to the U.S. export control system. Most importantly, for the first time since the early days of détente, the United States is devoting increased resources to the enforcement of export controls. This is a most difficult task because the Soviets and their agents from East European countries have embarked on a major campaign to acquire advanced Western technology. Until quite recently, no country within the Western alliance devoted the resources necessary to prevent the diversion of advanced Western technology to the Soviet Union. At this time, we simply cannot rely on the enforcement capabilities of our allies to prevent the diversion of strategic goods and technologies.

On September 30 the Export Administration Act expires and with it the President's ability to license, and thereby restrict, exports for reasons of national security and foreign policy. Last summer the Committee on Foreign Affairs approved amendments to the Export Administration Act. Several of these proposed changes to the existing statute seriously weaken United States and multilateral controls on goods and technologies of significant strategic value to the Soviets. Other proposed changes strip away the President's foreign policy authority to extend controls to foreign subsidiaries of U.S. corporations and U.S. goods and technologies.

Mr. Speaker, the destruction of South Korean flight 007 was followed by another tragedy—it was the loss to America of Henry Jackson. He was an undaunted advocate of improving the administration of U.S. export controls. He saw the danger in the Soviets pirating advanced Western technology and applying that technology to their weapons systems.

As the House begins its debate on reauthorizing the Export Administration Act, we should keep in mind the memory of Henry Jackson and his views on export controls.

Mr. Speaker, I urge my colleagues to consider the points raised by Henry Jackson, as well as other issues, contained in the article "Selling Russia the Rope."

The article follows:

[From the New Republic, Dec. 13, 1980]

In one of his most oft-quoted remarks. Lenin predicted that the capitalist countries would provide the Soviet Union the rope with which it would hang the West. And today, in the words of Senator Henry Jackson. "our export control system is a shambles. The United States and its allies have been selling the rope to the Soviets. What we haven't sold, we have been giving away in educational, governmental, and technical exchange programs. What we haven't sold or given away, they have been stealing."

In the last 10 years alone, Western countries have sold the Soviets $50 billion worth of goods, including machine tools; power lines; sophisticated technology that has gone into missiles and tanks; command, control, and communications systems; spy satellites; and radar. The Russians also have been able to purchase complete factories, designed and built by Western companies and financed with Western credits, that produce a substantial part of their military stockpile. Restraints on Western shipments to the Soviets actually have weakened in recent years. This is partly because the people and institutions that are supposed to regulate this traffic are generally ill equipped to judge the possible impact of technology transfer; and it is partly because of a blind faith in the virtues of East-West trade.

Last year, for example, Datasaab of Sweden sold the Soviet Union an air traffic control system that is able to detect any kind of airborne object (even is there is no radio signal), and also can determine if the object is a hostile aircraft or missile. The Datasaab system can calculate the flight path of the object, and can predict its location at a specific moment in the future. In short, the "air traffic control system" sold to the Soviet Union has many characteristics uniquely suited to military purposes. This Swedish system, destined for Moscow airport, contains American integrated circuitry and was sent to Moscow with American approval, even though some Pentagon officials expressed concern.●

LOUIS L. GOLDSTEIN

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. HOYER. Mr. Speaker, I am indeed very pleased today to bring to the attention of my colleagues an event which will take place on Wednesday, September 28, in honor of a great Marylander and fine man, Louis L. Goldstein. On that day I will join hundreds of other well-wishers at his 70th birthday party and testimonial dinner sponsored by the Mental Health Association of Maryland.

Certainly, the association could not have picked a finer representative of public service than Louis Goldstein. I have know Louis Goldstein for more than 20 years; in fact, I cut my teeth on the campaign trail with him. He is a man who knows how important one-on-one contact is for a politician, and I am sure that in all his years in elected office he has rarely forgotten a face.

Louis Goldstein has served the people of Maryland since 1938 when he was elected to the Maryland House of Delegates. In 1946, he was elected to the Maryland State Senate, where he served 4 years as majority floor leader and 4 years as president of the Maryland Senate. In 1958, he ran for the office of the comptroller, and since that time he has served consecutively as State comptroller, having been reelected six times.

We in Maryland are very familiar with one aspect of Louis Goldstein's job—and every spring we are reminded by him on the radio, on television, and in the news media to get our tax returns in on time. Not everyone would like to be the taxman; but not only does Louis Goldstein do an excellent job, he does it with a smile and one of the fastest tax return records in the United States.

Louis serves as the chief fiscal officer. He also serves on the board of public works, the highest administrative agency in the State, is a member of the Governor's cabinet and serves as chairman of the Maryland Retirement and Pension Board, chairman of the board of revenue estimates, and chairman of the committee to study the State debt. He is an outstanding civic leader, as well, and is a member of numerous historical societies, and the Baltimore Symphony Orchestra. He is also an active conservationist.

But Louis is equally well known nationally. He has served as a delegate or alternate to nine Democratic National Conventions, and was a member of the platform and resolutions committee in 1964, 1968, 1972, and 1976. He was president of the National Association of State Auditors, Comptrollers and Treasurers in 1969 and is still active in that organization. He is also a member of the Maryland Public Finance Association and Municipal Finance Officers Association of United States and Canada. He has also been honored by numerous county, State, and national organizations for his work on issues ranging from the U.S. savings bond campaign to preserving Assateague Island as a national wildlife refuge.

So it is truly appropriate that we honor him on his 70th birthday. He and his wife, Hazel, have contributed greatly to our State, both in their public lives and in their private times. The courtesy and good humor they have extended to one and all are remarkable in this era of quick tempers, curt replies, and canned responses.

The Mental Health Association of Maryland is to be commended in their choice of honorees. The association is also worthy of much praise for its tremendous contribution to our community. The association's service is critically important during this era of reduced public funding for mental health programs. I am sure that this testimonial dinner will provide a great boost to the funding of many, much-needed programs.

Mr. Speaker, Louis Goldstein has certainly made an important mark on the State of Maryland, and, in particular, his community of Calvert County. I know you will be happy to join me in wishing him all the best in the coming years.●

THE DEATH OF SENATOR HENRY M. JACKSON OF WASHINGTON

HON. SILVIO D. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. CONTE. Mr. Speaker, I would like to take a few moments to join my colleagues in paying tribute to Senator Henry M. Jackson of Washington. My expression of sorrow may provide little consolation to his family so soon after his passing. But I do hope that they will come to realize how deeply his loss has been sustained by the good people of Washington State, the Congress, and the Nation.

Senator Jackson's contributions to American history will long be remembered with admiration and respect. During his 42 years in the U.S. Congress as an elected official, he served the people of his district, his State, and his country with dignity. As a distinguished statesman, and a leader of the Democratic Party, his efforts to address and provide for the needs of the American people and the security of this Nation were recognized across the country and around the world.

It has been a privilege, Mr. Speaker, for me to serve in the U.S. Congress with Scoop Jackson. Indeed, one of the most special honors which I have been accorded in 25 years of service in the House is to have served with him on the Board of Regents of the Smithsonian Institution, where he had been a member for 10 years.

While Senator Jackson will long be remembered for his leadership in many other areas of national and local concern, I will best remember him for the key roles which he played on the board in its efforts to expand and preserve this country's cultural heritage. As a U.S. Senator, and as a Smithsonian regent, Scoop Jackson maintained his moral and professional integrity, his devotion to public service, his commitment to quality education, his love for his family and for this great country.

The untimely death of Senator Henry M. Jackson has left a void in many lives and institutions. Yet his memory will serve as a vivid reminder of our individual responsibilities to advance and defend those values and principles which we as Americans most cherish.●

CLINGING TO THOSE OLD LONG-DISTANCE SUBSIDIES

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. CORCORAN. Mr. Speaker, the issue of changing telephone rates as a result of the impending AT&T divestiture is one which will soon be considered by the Congress and more specifically by the Energy and Commerce Committee, on which I serve. One of our former colleagues, Lionel Van Deerlin, a member of the Commerce Committee and one time chairman of the House Communications Subcommittee, recently wrote an article which appeared in the San Diego Tribune, on August 8, dealing with this important telecommunications matter. Entitled "Congress Plays Telephone Games," Van Deerlin, after citing the benefits of competition and of cost-base pricing, concludes that:

> Other than the very poor, for whom arrangements can be made, there seems no reason for any of us to accept subsidized phone service from now on—much less demand it of our Congressmen.

His approach to this complex matter is on target and I would, at this time, insert the entire article into the RECORD for our colleagues to read:

[From the San Diego (Calif.) Tribune, Aug. 8, 1983]

CONGRESS PLAYS TELEPHONE GAME

(By Lionel Van Deerlin)

As kids we played a game where two teams started from behind parallel lines. One by one we'd try to scamper to the other side without being caught. At the game's end, everyone who hadn't been caught was on the side opposite where he started.

Congress seems to be playing a game like that with the telephone industry. Just seven years ago AT&T sent its army of lawyers across Capitol Hill promoting a bill they called the "Consumer Communications Reform Act of 1976." It was a misnomer. If passed (and it had more than 190 congressional sponsors), the bill would have spiked all competition, present or future, in telephone service and equipment. It would have conferred on the world's largest corporation a permanent monopoly over not only the communications we know today, but over any device or service the company might provide in the years to come.

In justifying so audacious a departure from the principles of competition, its lawyers explained that the telephone business was a "natural monopoly" that would become less efficient, if shared with competitors. They argued for continuing the acknowledged subsidy that long-distance tolls have provided to local users, keeping home-subscriber rates artificially low.

The prevailing mood in Congress back then was that competition was the best way to improve service and keep rates down. This already has been demonstrated on the equipment side of the business—not only by the variety of individual telephones then coming onto the market but in ever new and more efficient PBS systema. Non-AT&T

manufacturers were already installing fully 40 percent of on-premise switching systems.

Congress refrained from passing the "Bell bill" or any other legislation restructuring the industry. Instead, change came last year through settlement of a long-standing antitrust case against the company—an arrangement under which AT&T gave up its 22 regional operating companies and agreed to concessions in the management of its wholly owned research and manufacturing arms, Bell Laboratories and Western Electric.

In a chorus, public utilities commissions of the various states now sound the warning cry that homephone rates—long held below actual cost by the subsidy from toll service—will be going up. And scores of senators and House members, hearing from home, are pushing legislation to keep that from happening. How? By clinging to those long-distance subsidies as a drunk hangs on to his bottle. Joint House-Senate hearings began on these bills in late July, with members unashamedly voicing the very argument AT&T advanced in 1976 and has now abandoned. "The telephone business is a natural monopoly," they intoned as if it were a fresh idea. "Only by subsidizing household service can we preserve the world's greatest communications system."

The Chicken Littles tended to ignore an intriguing possibility—that a decline in long-distance rates may hold overall phone bills fairly steady. AT&T executives, excited by the freedom divestiture will allow them to compete for data processing and other unregulated new markets, urged Congress to lay off—to do nothing until the industry has had a chance to shake out under a plan carefully crafted by the company, the Justice Department and the courts.

Underpinning the new approach is the principle of cost-based pricing—paying for what we get, no more, no less. Early-day toll service utilizing human operators, who relayed cross-country calls manually, was very expensive. Today those calls are completed in seconds with automatic switching. Yet the dominant Bell system kept tolls skyhigh to cover part of the cost of local service. The sleight of hand enabled a commercial entity to play God, deciding in effect that only the well-to-do had a need for long distance. It also enabled Ma Bell to keep those pesky PUCs reasonably happy.

Which brings us to another of the players who has switched roles in recent months—our friend John Bryson. Until last year, Bryson, a Jerry Brown appointee, was the president of California's toughest of all regulatory bodies. Perceiving himself a sentry at the guard gate of the public interest, Bryson stoutly fought revision of the time-honored system which let AT&T decide who paid how much for what service, while state commissioners claimed credit for keeping basic home rates low.

Where is Bryson today? The sentry has gone over to the enemy. He accepted employment with MIC—Microwave Communications, Inc., the company which, more than any other, precipitated change by forcing its way into Bell's local phone systems, skimming off the cream of inter-city calls.

Competing smartly, MIC and its smaller imitator, Sprint, signaled the end of the old system by threatening to dry up the source of that subsidy, from tolls. Instead of trying to force things back into the bottle, Congress should push the PUCs to demand further steps toward cost-based pricing. Is there good reason why Mrs. Gab, who sits on her phone four hours a day, should pay no more for it than a neighbor who makes only 20 to 30 calls a month? Microelectronic measuring, a present possibility, could bill each of us for what we actually use. "Usage-sensitive pricing," it's called.

Other than the very poor, for whom arrangements can be made, there seems no reason for any of us to accept subsidized phone service from now on—much less demand it—of our congressmen.●

THE THREAT: INSIDE THE SOVIET MILITARY MACHINE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. FIELDS. Mr. Speaker, last week each Member of the House and the Senate received in their offices a copy of Andrews Cockburn's recent book, "The Threat: Inside the Soviet Military Machine." This book was sent by Random House Publishers and distributed by the Military Reform Caucus.

The Military Reform Caucus has, by this action, made the book an important element in the ongoing discussions of the nature and effectiveness of the Soviet military, a subject whose interpretation has direct bearing upon U.S. policy, spending, and military preparedness.

The entire history of the Soviet Union, KAL 007 being only the most recent example, is neck-deep in atrocity and barbarism—the nature of the Soviet leadership and its military is unquestioned by all but the most witless apologists.

However, the effectiveness of the Soviet military forces is a subject of fair debate, and an important one. Mr. Cockburn's basic thesis is that the Soviet power and effectiveness are vastly overstated by the Pentagon, and that American attempts to redress the balance is both dangerous and a waste of resources.

There are those, of course, who strongly disagree with Mr. Cockburn's analysis. Some believe that Mr. Cockburn's book is excessvie and reckless, and that his real target is not the Soviet military but rather the American military establishment.

As members of Congress and their staff consider this book, I strongly recommend that they also read and consider "Inside the Soviet Army." (Macmillan) by Viktor Suvorov, a former Soviet military officer and veteran of 15 years.

For the benefit of all, I am inserting into the RECORD a book review of Mr. Suvorov's book, and two reviews of Mr. Cockburn's work. The reviewers are Eliot A. Cohen, assistant professor of government at Harvard, and Francis Fukuyama, a member of the political science department of the Rand Corp.

I recommend that Members and their staffs remove these reviews from the RECORD and insert them into the frontispiece of Cockburn's book as a reminder to readers that the work may be deeply flawed, and that misreading the Soviets can be fatal.

THE THREAT: INSIDE THE SOVIET MILITARY MACHINE

(By Andrew Cockburn)

(Reviewed by Francis Fukuyama)

All thoughtful analysts of the Soviet military are well aware that the Soviet threat is at times exaggerated for political purposes, and that complicated issues are treated simplistically. There are many reasons for taking a balanced view of Moscow's capabilities. For one thing, an awareness of Soviet weaknesses and vulnerabilities allows us to plan policies which exploit them and yield the greatest return on a given political or military investment. Static "bean counts" of weapons inventories hide the complex realities of actual combat and fail to take into account the all-important human element in war. Overemphasis on the threat can be counterproductive: the current administration's rhetoric about the Soviets have not stopped and may even have contributed in some measure to the unraveling of the national consensus for a stronger defense that existed when it came into office.

Andrew Cockburn's book *The Threat* presents the case that Soviet military power has been vastly overrated by the West, and that American attempts to redress the balance are both wasteful and dangerous. *The Threat* obviously reflects considerable research into various aspects of the Soviet military. The author has, for example, interviewed recent Soviet émigrés who have served in the Soviet military. He present considerable anecdotal evidence about racial tensions between Slavs and Central Asians in the Army, accidents and discipline problems in the Navy, and soldiers who go blind drinking the hydraulic fluid out of their airplanes.

Much of this is interesting and represents an inadequate pursued line of inquiry. Unfortunately, this mass of information is subordinated to the sole purpose of denigrating every aspect of Soviet power—a purpose, I suspect, the author had formulated long before he knew what a T-72 tank was. His unremitting single-mindedness and pretzel-like twisting of arguments and facts are breathtaking and frequently laughable.

In Jokes and Their Relation to the Unconscious, Sigmund Freud cites the following story: "A. borrowed a copper kettle from B. and after he had returned it was sued by B. because the kettle now had a big hole in it which made it unusable. His defence was: 'First, I never borrowed the kettle from B. at all; secondly, the kettle had a hole in it already when I got it from him; and thirdly, I gave him back the kettle undamaged.' " (Freud, incidentally, comments that while this may not be a joke, it is a piece of sophistry.) Cockburn, in his eagerness to deflate the Soviet threat, adduces a number of similar arguments. Take the example of air defense weapons. Cockburn correctly notes that during the 1973 Yom Kippur War only one-third of the aircraft lost by Israel were downed by surface-to-air missiles, the rest falling victim to simple antiaircraft guns and other fighters. (This of course neglects the fact that modern Soviet air defenses are an integrated system of overlapping layers of fire, in which high altitude missiles force aircraft to fly low into ground defenses—a mistake made in the book at several places.) Cockburn then goes on to argue that the

Soviet ZSU-23-4 anticraft gun (which in fact accounted for a large proportion of Israeli losses) is an oversophisticated piece of technology whose worthlessness has been demonstrated on the test range. How then were those Israeli A-4s and F-4s shot down? Evidently they fell out of the sky of their own accord, victims no doubt of American gold-plating.

Other examples of Cockburn's peculiar logic abound. For instance, he spends a good deal of time documenting the poor quality of life in the Soviet armed forces, citing low pay, bad food, inadequate health services, and high incidence of alcoholism as evidence that the Soviets will perform poorly on the battlefield. The actual relationship is quite likely to be the reverse: a future war will not be a girls' school outing, and the Russian soldier, whose daily privation merely reflects the lower standard of living of Soviet society as a whole, will be better suited to survive its rigors than an American serviceman who has opted for military service as an alternative to unemployment. There are endless stories from World War II of the unbelievable toughness of individual Soviet soldiers and the miserable quality of their service conditions as they fought their way—often completely drunk—to Berlin.

Cockburn's efforts to run down the Soviet military would be simpler but for his countervailing desire to give the American military no credit for doing things well. Indeed, the book's stated theme is that "there is very little military rationale to be found in any of the activities of the superpowers' armed forces." Cockburn therefore devotes much space to an across-the-board criticism of American weapons systems, including areas like tactical airpower or anti-submarine warfare where everyone is agreed we have a substantial lead. In his breezy treatment of the enormously complicated Quantity-Quality debate, Cockburn predictably accepts James Fallows' criticisms of advanced aircraft like the F-15 and F-16, but goes beyond Fallows by arguing that advanced systems are actually less capable than the ones they replace. The pilots who fly these planes, for instance the Israelis operating over Baghdad and Lebanon, would gasp in disbelief.

Cockburn's failure to see a military rationale for these weapons is related to his basic ignorance about military operations, and the book is replete with simple factual errors. For example, he suggests that armored personnel carriers would be better off without roofs; he claims that the E-2C Hawkeye did not play a major role in Lebanon; and that sonar and radar were not crucial in destroying German submarines in World War II. The list could go on. Cockburn's self-assurance in passing judgment on highly technical questions and sneering at the viewpoints and motives of those who don't agree with him would be more becoming were he less manifestly unqualified to pose as an expert. Fallows at least admitted from the outset that he was an amateur.

Now, Cockburn's thesis that threat overestimation drives unnecessary U.S. military spending has some validity, particularly for the late fifties and early sixties when Khrushchev's valiant but ultimately vain efforts to cut back Soviet military spending generally went unrecognized in the West. But the opposite has also occurred: for several years in the mid-to-late sixties the CIA consistently *underestimated* the level of Soviet ICBM procurement. (Cockburn notes this fact, but typically uses it as a basis for attacking the CIA's competence.) Since the non-Vietnam share of U.S. defense spending shrunk steadily in real terms from 1964 until midway through the Carter Administration, Cockburn's point of view is difficult to sustain. A book which treats Soviet weaknesses objectively and deals with qualitative issues remains to be written. As for *The Threat*, it is best summarized by the Soviet pamphlet *Whence the Threat to Peace?*, quoted by Cockburn in a different context: "tendentiously selected and deliberately distorted information about the Armed Forces of the USSR."

THE RED ARMY—AND US

INSIDE THE SOVIET ARMY

(By Viktor Suvorov)

THE THREAT: INSIDE THE SOVIET MILITARY MACHINE

(By Andrew Cockburn)

(Reviewed by Eliot A. Cohen)

S.L.A. Marshall, the great combat historian of the United States Army, once wrote that "The basic study in all warfare is the mind and nature of the probable enemy, compared to which a technical competence in the handling of weapons and engines of destruction is of minor importance." According to Marshall, what needs to be known is not only the quantity and technical characteristics of an opponent's military apparatus—his "order of battle," in military jargon—but his culture and psychology, the mind, the logic, and the ethos that shape his military organization.

These two books, both of which attempt to describe Soviet weapons, military organization, and doctrine, must be measured by the extent to which they also succeed in describing and explaining Soviet military culture. This task is an exceptionally difficult one, for the Soviet Army by design and historical accident has swaddled itself in wraps of myth, secrecy, and disinformation.

The author of *Inside the Soviet Army* is identified as a former Soviet Army officer, a veteran of fifteen years' service with troops and staffs, who fled to the West and now writes under a pseudonym. In his introduction to the book, Sir John Hackett, the eminent retired British general, assures us of the author's credentials and experience, including participation as a young company commander in the 1968 invasion of Czechoslovakia. Although General Hackett expresses reservations about some of Suvorov's conclusions, he gives the book high praise, recommending it to all who "wonder about the makeup and outlook of the armed forces in the free world's main adversary."

The book is uneven. It contains long, dull stretches of interest only to the specialist, in which Suvorov describes the structure of the Soviet high command, the military district system, and the rivalries among the various Soviet military services. But Suvorov more than redeems these tedious passages with his description of the Soviet approach to war, of how Soviet officers and soldiers live and think.

To take material matters first: Suvorov describes an army devoted to a rigorous simplicity of equipment, and offers a number of intriguing examples. Thus, the Soviets vary the calibers of most of their projectile weapons by a few millimeters, a practice of which Suvorov approves since it bespeaks a high degree of military realism. In one passage he evokes the likely consequences in 1941 when, before this policy was adopted, the Soviets introduced a 7.62 mm pistol into an arsenal already containing a 7.62 mm rifle:

In wartime when everything is collapsing, when whole armies and groups of armies find themselves encircled, when Guderian and his tank army are charging around behind your own lines, when one division is fighting to the death for a small patch of ground, and others are taking to their heels at the first shot, when deafened switchboard operators, who have not slept for several nights, have to shout someone else's incomprehensible orders into telephones—in this sort of situation absolutely anything can happen. Imagine that, at a moment such as this, a division receives ten truckloads of 7.62 mm cartridges. Suddenly, to his horror, the commander realizes that the consignment consists entirely of pistol ammunition. There is nothing for his division's thousands of rifles and machine guns and a quite unbelievable amount of ammunition for the few hundred pistols with which his officers are armed.

Or take a grimmer piece of Soviet military logic: according to Suvorov, the Soviet forces on the front lines in Eastern Europe do *not* get the most modern Soviet equipment. This may seem odd to Americans and other Westerners, who tend to assume that the units most likely to enter battle first ought, in fairness, to receive the best equipment. The Soviets, however, reason that their first echelon will probably suffer near destruction in the opening battles of a campaign; hence the most modern equipment should go to the follow-on troops, who will win the war. It was this policy, argues Suvorov, which enabled the Soviets to absorb the German *Blitzkieg* in 1941 and then surprise the invaders with masses of troops equipped with T-34 tanks, at the time the best in the world.

In short, Suvorov shows how thoroughly the Soviets have absorbed the bitter lessons of the Eastern front in World War II. They favor mass and simplicity over quality and technical refinement (which does not mean that they are incapable of producing sohisticated weapons). They favor weight of fire over accuracy, which is why they possess thousands of easily operated heavy mortars, weapons as destructive as they are simple. They design their weapons in the knowledge that most of the users will perish in battle; their aim is not to enhance a soldier's chances for survival, but to maximize the brief utility of his equipment and himself.

Soviet tactical doctrine reflects this same, brutally pragmatic approach to war. Suvorov recounts a tactical problem that he has often posed to Western officers. Suppose three Soviet motor-rifle companies are advancing: one has fallen apart under fire, the second is advancing slowly but suffering heavy losses, and the third has endured a counter-attack and, having lost its officers, is retreating. The regimental commander has three tank companies and three artillery batteries to deal with the situation. What does he do? Never, according to Suvorov, has his audience given the correct reply, which is to throw all resources behind the second, advancing company, and the devil take the other two. "My audience smiles," writes Suvorov, "they believe they have found the Achilles heel of Soviet tactics. But I am always irritated—for this is not weakness, but strength."

Suvorov does not minimize the weaknesses of the Soviet Army. He questions its ability to conduct a sustained war (despite the Soviet capacity for industrial and civic mobilization) and he has no illusions about the average soldier's commitment to the regime. He predicts that in a lengthy war, Soviet

troops would desert in the millions—assuming, of course, that they could safely find their way to enemy lines. He describes in considerable detail the inefficiency of a military-service system which allows senior recruits to bully and rob the younger ones, a system (unlike that of virtually all Western armies) which possesses no seasoned cadre of professional noncommissioned officers to train, discipline, and set standards for the rank and file. Nonetheless, he makes clear his belief that the Soviet military machine, because of its brutal realism (which extends to training with real, if diluted, nerve gas), makes a formidable opponent.

Such is not the view of Andrew Cockburn, whose book offers a sustained case for the fragility of the Soviet military system. Selecting bits of evidence from Suvorov and other writers, he argues that the Soviet threat is far smaller than we have been led to believe. In four sets of essays—on Soviet personnel, land power, nuclear and chemical weaponry, and sea power—Cockburn hammers at the theme that Soviet bureaucrats and soldiers are incompetent and dispirited, their weapons ill-constructed and obsolete, their nuclear and chemical strength chimerical, their Navy fatally constricted by geography and inferior equipment.

Some of his points are valid. If the American Army finds it difficult to cope with Spanish-speaking soldiers, imagine the perplexities of the polyglot Soviet Army, made up of antagonistic and mutually incomprehensible ethnic groups. American generals worry about the morale of the armed forces when only a third of all enlisted men sign up for a second tour: in the Soviet Union, the comparable figure is 1 percent.

Never, however, does Cockburn wrestle with the Soviet Union's military successes and strengths. He does not confront the brute fact that the Soviets, did, after all, beat the Wehrmacht, probably the most efficient military machine of the 20th century. And this occurred, it should be remembered, only a few years after the Russo-Finnish war had supposedly demonstrated the incurable military incompetence of Communist regimes. Cockburn asserts that the recent battles between Israelis and Syrians in the Bekaa Valley of Lebanon prove the complete superiority of American over Russian equipment, but he neglects to point out that on the one side there was first-line and improved American weaponry operated by a superb army and on the other Soviet export models (of a kind discussed by Viktor Suvorov) operated by a stolid but third-rate Arab force.

Cockburn does not adequately examine—and cannot conjure away—the staggering numerical advantages of the Soviet Army, particularly in such key items as tanks and artillery pieces. As American campaigns in northwest Europe in 1944 and 1945 demonstrated, superior numbers of inferior tanks (in our case, Shermans) backed by vast quantities of artillery, can provide victory—perhaps not elegant or easy victory, but victory nonetheless. He ignores completely the advantages of geographical location and the existence of subservient client states which further enhance Soviet military power. Not to mention the pervasive secrecy which in 1941, for example, enabled the Soviets to surprise the invading Germans with a force almost twice as large as that estimated by German intelligence.

Most important of all, Cockburn fails to weigh adequately the military advantages of Soviet ruthlessness. In quality of organization, equipment, and training, the Soviet armed forces are indeed the inferior of some of those in the West. Nonetheless, the Soviets are increasingly willing to project force and to sustain long-term and bloody military commitments abroad. The steadily accumulating proof of the use of chemical and biological weapons in Afghanistan and Laos indicates that the Soviets' callousness toward their own troops is more than matched by a willingness to destroy their enemies by any means available. As Viktor Suvorov's book suggests, in war a complete lack of scruple confers advantages as substantial as they are chilling, advantages which can outweigh deficiencies in tactics or equipment.

Cockburn's undisguised disdain for the Soviet armed forces is both excessive and reckless. Indeed, he finds the Soviet military apparatus so ludicrously hollow that he must take pains to explain why anyone in the West should regard it seriously. He comes up with two contradictory answers: first, the Soviet threat is a sham, concocted by self-interested American bureaucrats and generals who knowingly and deliberately distort the truth in order to win power and money from an intimidated Congress; second, the Soviet threat is the hallucination of stupid and credulous soldiers and analysts, gulled by Soviet propagandists. Thus, throughout the book, Cockburn alternates between *frissons* of horror at the bellicosity of Western generals and a genial contempt for their competence. He pursues the latter theme so far that he undercuts his own argument, claiming at one point that American generals cannot even devise workable weapons for their own troops. According to this view, the next war will take place between two armies of incompetents equipped with unusable arms.

In fact, the real agenda of this book is an attack not on the Soviet but on the American military establishment. On the penultimate page Cockburn writes: "Today we see militarism in the ascendant both in the Soviet Union and in the United States. . . . Only by understanding the true motivations and actions of the military bureaucrats, both in the East and at home, can we hope to frustrate them. . . ." Presumably the person who wrote these words knows that few Soviet citizens will read his book, and none will act on its message. One must therefore conclude that his aim is less to analyze the outlook and methods of Soviet military men than to discredit those of their Western counterparts.●

RAYMOND WHITE CELEBRATES 40 YEARS OF COUNTY SERVICES

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. FLORIO. Mr. Speaker, I would like to bring to the attention of my colleagues a lifelong Camden City, N.J., resident, Raymond White, who has the distinction of celebrating more than 40 years as an employee of Camden County. I join with the Camden County Board of Chosen Freeholders in honoring this outstanding individual. In tribute to Raymond White's dedication and dependability, Thursday, September 22, 1983, will be designated as "Raymond White Day" in Camden County—a tribute he well deserves.

Seventy-three years young, Raymond happens to be one of the best known men in Camden and he may well be the most liked. He has faithfully executed his role as elevator operator and managed his shoeshine stand for well over 40 years. He has not missed a day's work at city hall for the past 30 years. I feel that the words "steady," "dependable," and "hard working" are fairly descriptive of Raymond's many fine qualities.

Raymond has established himself as a "permanent fixture" at city hall through his dedication to his job. He is ever ready with a warm smile and friendly greeting to his coworkers and he considers no job too small or unimportant. Raymond is a constant reminder that pride in one's job is still an admired American ideal and virtue.

The father of 13, with more than 100 grandchildren, great-grandchildren, and great-great-grandchildren, Raymond has no intention of retiring from either of his occupations. His shoeshine stand provides employment to any grandchild in need of work.

I commend Raymond for his many fine achievements and I am sure that my colleagues will join me in wishing him many more happy and healthy years with Camden County.●

HOUSE BOLSTERS EDUCATION AND SOCIAL PROGRAMS

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. TOWNS. Mr. Speaker, the House wisely passed the Rehabilitation Act Amendments of 1983, H.R. 3520, on Tuesday, September 13. H.R. 3520 extends the vocational rehabilitation program for disabled Americans and increases the fiscal year 1984 authorization levels for 10 major education and domestic programs, including chapter 1 for disadvantaged children, the Education of All Handicapped Act, vocational education, WIC, the special supplemental feeding program for women, infants, and children, as well as the community services block grant, and others.

I would like to stress the importance of several of these programs. Chapter 1 is extremely important in meeting the education needs of disadvantaged children. This program has improved the achievement levels of poor, educationally deprived, and minority children; it has also closed the achievement gap between minority and nonminority students. Even Secretary of Education Terrel Bell has described it as "a very successful federally funded program." In spite of its effectiveness, the Federal funding for this program

was cut nearly 6 percent between fiscal years 1980 and 1982. At the present time, only 47 percent, or 5.2 million, of the 11 million eligible children are being served. The new authorization would enable approximately 6.2 million children to be served.

The WIC program has been equally effective in improving the health of pregnant women, infants, and young children who are nutritionally at risk. Studies show increased birth weights and fewer infant health problems among WIC participants. According to testimony, every dollar spent on the WIC food package can save as much as $3 in immediate medical costs.

Yet with a reported increase in infant mortality, the current WIC funding level is unable to address the needs of thousands of eligible women and children. In fact, without an increase in the authorization level 500,000 women and children will have to be dropped from the program.

The community services block grant (CSBG) provides the only Federal program with the specific objective of ameliorating the causes of poverty. It sponsors State and local initiatives, through block grants to States, aimed at making poor people self-sufficient. Title IV of H.R. 3520 will maintain the community economic development program, programs to address rural poverty, the national summer youth sports program, programs for the elderly poor, programs to assist the families of migrant and seasonal farmworkers, and State and local community initiatives.

In 1981, when the President proposed his New Federalism concept, Congress was assured that this was not an effort to kill the poverty program, but rather an effort to have States participate more directly in maintaining their own programs. Yet for fiscal year 1984, the President has proposed to terminate all assistance for the community services block grant. The need for a reauthorization of the CSBG was graphically illustrated in the August 25 New York Times article by Lisa Belkin entitled "Most of 166 Children Pass Health Tests at Shelter." The children's health deteriorated largely as a result of poor housing and poverty. "None of them eat," said Bianca Carbera, the children's mother, "they don't like the roaches crawling on the food."

The CSBG can directly address this kind of problem. Block grant funds can be used "to obtain and maintain adequate housing and a suitable living environment" as well as providing emergency assistance to meet "urgent individual and family needs, including the need for health services, nutritious food, and housing."

The passage of the Rehabilitation Act Amendments of 1983 will insure that the poor and disadvantaged gain some relief from their pressing economic problems. I only hope that our colleagues in the Senate will be wise enough to agree to the reauthorization of these programs in conference.●

PERSONAL EXPLANATION OFFERED

HON. ROBERT E. WISE, JR.

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. WISE. Mr. Speaker, according to the best information I was able to obtain late last Friday afternoon, there were not to be any recorded votes today during proceedings in the House. Based upon this knowledge, I kept the longstanding obligations I had made in my district.

Early this morning, I learned recorded votes were scheduled for today. By the time I learned of these votes, it was impossible to catch a commercial airline flight back to Washington, D.C., in time to cast my votes.

I missed House rollcalls 342 and 343—on a motion that the Committee of the Whole do rise, and final passage of the State/Justice appropriations.

Had I been able to attend, I would have voted "aye" on both.●

TRIBUTE TO BISHOP JOHN J. DOUGHERTY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. RODINO. Mr. Speaker, next Saturday, September 24, 1983, a thousand friends and admirers will join with Auxiliary Bishop John J. Dougherty of the Archdiocese of Newark as he celebrates the golden anniversary of his ordination into the priesthood.

Bishop Dougherty's 50-year career as a priest is an illustrious one. A native of Jersey City, N.J., he was graduated from Seton Hall University in South Orange in 1930. He journeyed to Rome to continue his preparation for the priesthood and was ordained in Rome on July 23, 1933. He went on to earn advanced degrees in Rome, including a doctorate in Sacred Scripture.

Upon his return to the United States, Bishop Dougherty, a highly respected scholar, became professor of Sacred Scripture at Immaculate Conception Seminary in Mahwah, N.J., in 1937. In addition, he conducted the Catholic Hour, a highly regarded network radio and television program sponsored by the National Council of Catholic Men.

In 1959, Bishop Dougherty was chosen to be the 13th president of his alma mater, Seton Hall. He held that prestigious position for 10 years. During his tenure there, he was appointed a bishop by Pope John XXIII and was consecrated on January 21, 1963.

After leaving the Seton Hall presidency, Bishop Dougherty served as pastor of St. Rose of Lima Church in Short Hills, N.J., until September 1977. He then returned to Seton Hall to become the university's first distinguished scholar in residence. Bishop Dougherty continues to serve as the chairman of the New Jersey Catholic Historical Records Commission at the university. He also has recently taken on the direction of a group that is expanding its service of reading to the blind over the campus radio station.

Bishop Dougherty's achievements and honors are many. During the Vietnam war, he established a national organization, Negotiations Now, to focus on the "futility of the conflict." He was chairman of the Committee on World Justice and Peace of the National Conference of Bishops and of the Interfaith Council on Religious and National Affairs. He received a Sylvania award for his work on a National Broadcasting System documentary, "Rome Eternal." He also has been honored with a gold medal award from the Freedoms Foundation. Bishop Dougherty has pubished many articles and books. The latter include "Searching Scripture," a study of the Dead Sea Scrolls, and the recently completed "Personalities in the Bible."

To honor this distinguished clergman, eminent scholar and beloved pastor, a pontifical mass will be celebrated at 3:30 Saturday afternoon in the Sacred Heart Cathedral in Newark. The Most Reverend Peter L. Gerety, archbishop of Newark, will preside and deliver the homily. Bishop Dougherty will be the principal celebrant. The nine concelebrants will include the other auxiliary bishops of the archdiocese, other bishops from New Jersey, and two men who were classmates of Bishop Dougherty during his time in Rome.

That evening there will be a reception and dinner at Seton Hall to continue the celebration of Bishop Dougherty's golden jubilee. Auxiliary Bishop Joseph A. Francis will be the principal speaker.

It is a pleasure and a privilege for me to join in honoring Bishop Dougherty for his invaluable contributions to the religious and educational life of my State and for his devotion to the well being of our citizens. I wish him well in his current labors and future endeavors.

We are proud of Bishop Dougherty and all his accomplishments and I want to thank the cochairmen of this golden anniversary celebration, Brendan T. Byrne, former Governor of New Jersey, and Robert R. Ferguson, Jr., chief operating officer of the First

National State Bank Corp. of Newark and all the many others who organized this most fitting tribute to Bishop Dougherty.●

CORPORATIONS "ADOPT" ELDERLY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. FIELDS. Mr. Speaker, in proclaiming May 1, 1983, through April 30, 1984, as "National Year of Voluntarism," President Reagan stated:

Voluntarism is a cornerstone of the American way of life and a fundamental characteristic of our American heritage. The gererosity and civic-mindedness of the American people has long been a noted aspect of our Nation. Since its inception, this has been a country in which neighbor has lent a hand to neighbor, and families have banded together to help one another in times of adversity.

The concept of "neighbor helping neighbor" is not a concept buried in the American past. Voluntary assistance is as important today as it was in the rugged early days of our Nation's history. While society has changed with time, the principle of voluntarism remains ageless. We simply cannot rely solely on the institutions of Government to meet all of the needs of society.

For this reason, I wholeheartedly support President Reagan's private sector initiative program and commend those individuals, civic organizations and businesses which accept the challenges and responsibilities of private sector voluntarism. In particular, I commend the initiative of three Houston corporations who have "adopted" the elderly residents of three Houston Housing Authority projects in an ongoing outreach project.

In that light, I bring the following article from the September 4 edition of the Houston Post to the attention of my colleagues:

CORPORATIONS "ADOPT" ELDERLY IN NEW PROJECT

(By Janet Elliott)

Three Houston corporations have "adopted" elderly residents of three Houston Housing Authority projects, in what is being billed as the first such partnership of its kind in the nation.

Employee volunteers are sponsoring parties for elderly residents, taking them on field trips, helping them with their gardens and generally getting to know them.

The project is an outgrowth of the Houston Committee for Private Sector Initiatives, a group of local business and civic leaders who believe in President Reagan's theory of meeting social needs through private industry rather than government programs.

James Ketelsen, chairman and chief executive of Tenneco, came up with the idea for the Partners in Public Housing Program. Tenneco adopted the elderly housing project at 6000 Telephone Road.

Texas Eastern is working with residents of the Lyerly project at 75 Lyerly, and Bank of the Southwest has adopted Bellerive, 7225 Bellerive.

Ketelsen also is serving on a citizens committee working with the housing authority to determine what should be done with Allen Parkway Village.

The theme of the program of HEART—Help Elderly Achieve Real Ties. It has the enthusiastic support of Earl Phillips, executive director of the housing authority.

"This is a new era in public housing where private industry and public housing come together," Phillips told Tenneco volunteers and Telephone Road residents at a recent party to celebrate the project's sixth anniversary.

About 40 Tenneco volunteers, wearing identifying T-shirts, socialized and danced with some 150 residents. Other volunteers challenged the resident experts at cards, dominos and checkers.

A band of Tenneco workers and other volunteers played country-western music. Tenneco provided food for the party and donated an $865 kiln so the residents could continue their ceramics work.

Mary Capers, a secretary at Tenneco, explained what motivated her to spend her Friday evening at the housing project. "I'm basically a happy person. And I want to share all I have with other people," she said.

"I come from a small town and am used to being around older people. They have so much love and knowledge to give."

Jo Ann Swinney, head of community affairs for Tenneco, said she hopes the relationship between the Tenneco volunteers and the Telephone Road residents continues.

"The ultimate goal is to keep their minds healthy and have them more involved in community," Swinney said. "We want to listen to them and develop friendships. We want them to feel they are wanted."

Tenneco surveyed the residents to find out what kind of activities they wanted.

Gladys Vaughan, president of the Telephone Road facility's resident council, said residents were curious, and maybe a little skeptical at first, but once they understood the program, they supported it.

The program also benefits Tenneco employees who participate, Swinney said.

"They know they are making their community a better place to live," Swinney said.

Linda Wilson Jordan, administrative assistant in personnel for Texas Eastern, said a Sept. 17 kickoff party at Lyerly is planned.●

CHRONIC POVERTY MARKS SUB-SAHARA'S STAGNATION

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. AuCOIN. Mr. Speaker, events in Chad have attracted renewed international attention in recent weeks. The social, economic, and political problems besetting this impoverished African nation are by no means unique to Chad.

Recently, Nicholas D. Kristof, a Rhodes scholar from Yamhill, Oreg., traveled through several sub-Saharan African nations. He wrote a series of enlightening reports which were published in the Oregonian, Oregon's largest daily newspaper. I believe it would be useful to share with my colleagues Mr. Kristof's observations. His first report follows:

CHRONIC POVERTY MARKS SUB-SAHARA'S STAGNATION

(By Nicholas D. Kristof)

MONROVIA, LIBERIA.—Amid the squalor of this city—the prostitutes, the hustlers, the malnourished children, the open sewers and filthy streets—shine flashy new posters exhorting Monrovians to roll up their sleeves and pull in their belts for a better Liberia.

It is a sure sign of stagnation, repeated in dozens of other African cities. When the economic pie isn't growing as quickly as the population, the government reminds people they shouldn't eat sweets.

Passing up dessert—or dinner—threatens to become a way of life, not just in Liberia but in much of Africa. The World Bank Development Report for 1981 predicted that even with optimistic assumptions about expansion of the world economy, the low-income, oil-importing countries of Africa—most of the continent—would realize annual growth in per capita Gross National Product of only 0.1 percent in the 1980s. With less optimistic assumptions, per capita GNP would actually fall 1 percent per year.

The economic downturn first hit in the 1970s, for what was a tremor in the West was an upheaval in Africa. Per capita incomes dropped by 0.4 percent per year in that decade among the low-income, oil-importing nations of sub-Saharan Africa, the only region to experience a decline in the last decade or expected to experience one in the next.

The World Bank calls it a crisis. In fact, the stagnation may last too long to be called a crisis, it may become a way of life. But if there were such a thing as a chronic crisis, this would be it, for stagnation hits much harder in the Third World than in the developed countries.

Where a majority of the population is engaged in subsistence agriculture, dangling over the abyss of starvation, a recession means doing without food, shelter, clothing. There is nothing else to economize on. Food grain consumption already has dropped steadily in the last 20 years to just 312 pounds per person per year, far lower than anywhere else in the world.

Where economic development is still under way, churning up the population and sending thousands to live in the streets or shanty towns of cities like Lagos and Dakar, then the wanderers are left with nothing—and "nothing" here rings with much more hollowness and finality than in the West. Fragile governments are easily sucked under by the economic whirlpool, leaving countries to lurch into further fragility and instability.

Economic stagnation also means that governments cannot provide even basic social services in a continent that ranks far behind the rest of the world in social statistics. Life expectancy in sub-Saharan Africa is 47 years, compared to 57 for low-income countries in general and 74 for industrialized countries. Child mortality rates are 25 times higher in Africa than in Latin America. In many areas even elementary schooling remains a luxury.

The stagnation in black Africa is partly the result of the increased oil prices and worldwide economic downturn of the 1970s, but its roots go deeper than that. One important factor is dizzying population growth: 2.5 percent per year in the 1960's rising to 2.7 percent in the 1970's. These figures mean that just to tread water the economy must grow considerably.

Agriculture illustrates the problem. Agricultural production grew by 2.3 percent per year in the 1960s and 1.3 percent per year in the 1970s. But this was not enough to keep up with the population explosion, so food production per person is less now than it was 20 years ago.

The increases in production, moreover, came mostly from increases in the amount of land under cultivation, rather than from increases in productivity per unit of land. Crop yields in Africa lag considerably behind the rest of the world; cocoa and palm oil yields are only half what they are in parts of Asia.

The agricultural lag is partly the result of a hostile environment—infrequent and uncertain rains and scarcity of humus—but it also reflects ineffective agricultural methods and government neglect of farmers. Much less research on agriculture is conducted in Africa than in developed countries, and only one-twentieth as much fertilizer is applied per acre of land.

In the desperately poor Sahel regions of Mali and Upper Volta, farmers painstakingly cultivate their land with hoes under the scorching sun. If they had plows pulled by horses or oxen, they could turn over the soil and farm much more land. In Mali, only about 4 percent of the arable land is cultivated.

Governments have also tended to pay farmers much less than their produce is worth. World Bank data from 13 countries suggest that farmers often were paid only about half what their crops were worth. But where farmers were paid well, as in the Ivory Coast, production soared, so that in a short time the Ivory Coast became the world's leading producer of both cocoa and coffee.

As the success of the Ivory Coast shows, the prospects for Africa are not uniformly bleak. Continued growth is expected in Ivory Coast, Togo and other bright spots. The prospects of the entire continent would brighten if industrialized nations were more forthcoming with aid.

The problem is not a lack of potential, for Africa is rich in resources; the difficulty lies in exploiting them. The proven oil reserves on the continent are only 1 percent of the estimated potential, and many other minerals are locked in the ground. The offshore waters are teeming with fish, and the agricultural output could be enormous if modern methods, including irrigation were applied.

But Africa is constrained by its own poverty, locked in a vicious vortex that spins faster and faster and shows no signs of slowing down in the 1980s.●

COMMEMORATING GOOD SHEPHERD HOME'S 75TH ANNIVERSARY

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. RITTER. Mr. Speaker, this Sunday, September 25, 1983, the Lehigh Valley of Pennsylvania will be celebrating the 75th anniversary of the Good Shephard Home in Allentown, Pa. Since 1908, Good Shepherd Home has been a source of hope and care to our community's handicapped citizens.

The success that will be celebrated on September 25, is the work of many people who have dedicated their lives to this institution and the beliefs for which it stands. However, it is all fitting and proper that we also reflect on the man who started the home 75 years ago, a man with a large heart and a vision of a better tomorrow. His story epitomizes the true meaning of the Good Shepherd, a man who gave quietly and unselfishly so that others may have a fuller, more richer life. That man was Rev. John Raker.

Reverend Raker began his home primarily as a place for handicapped orphans. However, the mission of Good Shepherd soon grew to include all handicapped people and in later years it reached out to the community and, through its many shops, gave those who had difficulty in gaining employment a chance to work and earn a wage. Its size has also expanded and today it has a staff of 400 people and over 200 permanent residents. In addition, many others from all over our community and State use the facilities and care of Good Shepherd. Age is no barrier. It cares for the young and old alike with over 135 beds devoted to long-term care for the physically handicapped. Its workshops keep an average of 200 people working weekly and their involved in everything from crafts to micrographics. The Good Shepherd Home has become a community unto itself and its future looks even brighter.

Few communities are as fortunate as ours in having a facility such as Good Shepherd Home. Their work has been recognized on both the local and national level and their programs have been studied by others in this area of health care. Under the guidance of Rev. Dale Sandstrom, Good Shepherd Home stands as a beacon of hope for those who are in need of its services. Their good work has caused many miracles in the lives of those it touches. Most importantly, it allows the handicapped the ability to reach the maximum independence they can through love, understanding, and attention.

As we in the community mark this important day in Good Shepherd's history may we think of all those who have contributed so much to its success over these many years and may we hope and pray that the programs and mission of Good Shepherd may continue for many more years to come. Your work has earned our hearty congratulations and best wishes for the future.●

GUILD FOR EXCEPTIONAL CHILDREN

HON. GUY MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. MOLINARI. Mr. Speaker, the spirit of concern for one's neighbors is thriving in the Borough of Brooklyn, thanks to the outstanding efforts of the Guild for Exceptional Children.

The group, which, I am proud to say, is based in my district, started 25 years ago through the hard work and determination of a handful of women who saw a need and decided to act.

In the ensuing years, the guild has become a vital force in the community. It currently serves the needs of 500 retarded people and their families, providing programs that both educate and enrich.

The guild works with universities, health care facilities, schools and other community agencies, provides staff education and training and offers opportunities for parent and community involvement through membership and fund-raising activities.

Mr. Speaker, the guild is a voluntary, nonprofit, nonsectarian agency whose dedicated staff is a shining example of love and humanity. The guild's motto: "Guiding an exceptional child is an exceptional accomplishment," is not just a fine-sounding phrase, but literally words to live by.

The Guild for Exceptional Children will be celebrating its 25th anniversary this month, Mr. Speaker. I cannot think of a more appropriate time for all of us to not only salute the guild's work, but to live its principles and its dedication in our daily lives.●

TRIBUTE TO DR. PASQUALE CARONE

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. DOWNEY of New York. Mr. Speaker, one of the great advantages of serving in Congress is the opportunity to become acquainted with individuals of the highest merit and dedication to their fields of endeavor. I want to take this opportunity to recognize one such individual, Dr. Pasquale

Carone. Dr. Carone is one of the most gifted and caring members of the Long Island community. His dedication to serving his fellow man, as well as his contributions to his profession, are truly exceptional. I would like to take a few moments to highlight some of his achievements.

Dr. Carone has been involved in the field of psychiatry for more than 40 years, since he received his M.D. from Creighton University School of Medicine. His education was broadened through appointments at St. Vincent's Hospital in Staten Island, Colorado State Hospital, Lyons VA Hospital in New Jersey, the New York Psychiatric Institute, and fellowships with the American Board of Psychiatry and Neurology, and the American Psychiatric Association. Dr. Carone consulted at numerous Long Island hospitals, including Good Samaritan Hospital, Nassau County Medical Center, Catholic Medical Center, Mercy Hospital, Southside Hospital. At present, he is the executive director of South Oaks Hospital and Broadlawn Manor Nursing Home and Health Related Facility in Amityville, N.Y.

His publications are extensive and widely respected, and illustrate the breadth and depth of his knowledge. They deal with such widely diverse subjects as psychoses and depressive features, drug abuse, cost containment, drug therapy, quality of care, and the impact of life style on cancer. He is the author of seven books, in which he has probed questions of mental health in an industrial society.

His commitment to his community is in many ways most noteworthy. The list of groups to which he has donated precious time and skills is too extensive to be reprinted here. However, he has lent his expertise to the NYS university system, the Rehabilitation Institute, the United Fund of Nassau and Suffolk, the Asthmatic Children's Foundation, the Narcotics Guidance Council, youth organizations, numerous State education and nursing boards, the U.S. Congress, and many national associations. No group is too small, and no request too great, to receive the attention of Dr. Carone.

Although Dr. Carone is already the recipient of many honors and awards, I would like to take this opportunity to mention two of his latest honors.

Mr. Speaker, few acts of recognition are so meaningful or as telling as those given by fellow workers. The staff of South Oaks Hospital has underlined their appreciation in a recent decision to name their new hospital offices the "Carone Administration Building" in his honor.

But he is far more than a local hero—he has reached national prominence. Next January, Dr. Carone will become the president of the National Association of Private Psychiatic Hospitals (NAPPH). NAPPH is a nonprofit organization made up of more than 204 independent, private psychiatric hospitals located in 35 States and Puerto Rico. These hospitals provide the highest quality, most comprehensive care available for emotionally disturbed children, adolescents, adults of all ages, and persons suffering from chemical dependencies. NAPPH hospitals provide leadership in mental health care, training of pshychiatrists and auxiliary personnel, individualization of psychiatric care, and the implementation of the most advanced techniques of treatment.

Pat Carone has striven for an excellence in his work which he has clearly achieved. He has also reached out to help all those who need it, and I am proud today to recognize the efforts of this great humanitarian.●

ACT FURTHER ON KOREAN JET TRAGEDY

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. LEWIS. Mr. Speaker, I commend my colleagues for their quick and unanimous passage of the resolution condemning the Soviet Union's murderous assault on Korean Air Lines flight 007.

The Russians shot down an unarmed passenger plane in an unwarranted, senseless, and wanton act of destruction. They continue to lie and distort the truth.

Anyone that knows anything about the Soviet mentality knows that they did it to protect their system of total physical and psychological control over their land, air space, and people.

They continue to lie because it is their belief that if they repeat the lie often enough, somebody will believe it.

We must respond in a manner that graphically illustrates our abhorrence with this tragic episode and discourages it from ever happening again. Appropriate responses should include exercising restraint in assessing all available options.

The President should also be commended for exercising that restraint immediately following this tragic event. President Reagan made the best possible decision in pursuing the issue through appropriate international channels in an effort to clearly emphasize that this is a matter of the Soviet Union versus the world, not the Soviet Union versus the United States.

While the search continues for the bottom line answer to what happened, we must now initiate specific actions and demand that the Soviets provide a full accounting of their role in the shooting down of a defenseless airliner.

We must insist upon a Soviet apology, compensation to the families of those lost and the institution of safeguards to prevent the repetition of such an uncivilized and unwarranted act.

I agree wholeheartedly with the editorial comments in the Palm Beach Post, a daily newspaper in my district, which state that those responses from the U.S.S.R. "are the least one would expect of a civilized nation."

If those responses are not forthcoming, then the Russians should expect nothing less than tough action by the United States and other civilized nations.

Short of a complete cutoff in diplomatic relations, retaliation on the part of the United States could include shutting down their consulate offices, reducing their Embassy staff to the bare minimum, closing our seaports to all Soviet and Eastern bloc nation ships and eliminate favorable credit and debt payment agreements.●

PRESERVING COMPETITION AND DIVERSITY IN TELEVISION

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mr. LANTOS. Mr. Speaker, our Nation's most creative community, the independent television producers, is in danger of having its artistic spark snuffed out by the Federal Communications Commission and the three networks, ABC, CBS, and NBC.

This combination of Government and big business is trying to shackle the marketplace of television production that earlier had been set free by regulations allowing the producers to maintain a financial interest in programs they create.

Those rules on syndication, enacted in 1970, caused an explosion of diverse, innovative, and challenging programing.

Those rules spawned a new burst of creative energy by increasing the number of independent producers, by generating new outlets for programing as independent television stations sprang up and by providing the competition and diversity that had not been present before.

And yet, the FCC and its allies now want to repeal those rules.

If the FCC succeeds, the networks will enjoy an ominous concentration of power. Three men, the network presidents, will have virtual control over what we all watch on television. Imitation, not innovation, may again become the watchword on television.

In essence, the FCC would rely on the good will of the networks to make certain the competitive forces that

exist today would continue. We surely can do better than that.

Many segments of our society: consumers, parents, women, minorities, and the elderly have all voiced their strong opposition to the proposed FCC actions.

They all fear that it would be the end of competition in the television markets if the FCC succeeds in abolishing syndication rights for producers.

Mr. Speaker, we must preserve the competition and diversity in the television industry. We must keep intact the independent producer community, with its vitality and energy.

I have cosponsored H.R. 2250, to prevent the FCC from repealing the syndication rules for at least 5 years.

If those rules are repealed, and the FCC and its allies win, the American people will be the losers.●

THE GLITTER OF GOLDSTEIN

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 19, 1983

● Mrs. HOLT. Mr. Speaker, on September 28, the Mental Health Association of Maryland will sponsor a testimonial dinner to honor the 70th birthday of Maryland State Comptroller, Louis L. Goldstein, and his 45 years of service to the State of Maryland.

Another name for his job is tax collector. It might seem strange to you that a person with that job would be the most popular public figure in the State of Maryland, but that is the truth of the matter.

You could not possibly understand it if you have not known Mr. Goldstein, a man of such bouyant good cheer and enthusiasm that it would be impossible to imagine his having an enemy.

I dare to say that most citizens of Maryland have met Mr. Goldstein on one occasion or another. He is a lively presence at an astounding number of public events throughout the State each year, and he is a star even when he walks down the street of a town, greeting folks as he goes.

I know Mr. Goldstein as a dedicated public servant, and one with a very keen mind. He has a sharp wit, which is a pleasure to all who know him.

In the State senate, his colleagues elected him as majority leader and then president of the senate.

Mr. Goldstein was elected State comptroller in 1958 and has been reelected six times for 4-year terms.

The testimonial dinner marking his 70th birthday promises to be a major event in the State of Maryland, and I certainly hope that his presence will grace the State for many more years.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 20, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 21

9:30 a.m.

Banking, Housing, and Urban Affairs

Housing and Urban Affairs Subcommittee

To hold hearings on S. 1821, proposed Secondary Mortgage Market Enhancement Act.

SD-538

Commerce, Science, and Transportation

To hold oversight hearings on the implementation of the Motor Carrier Act (P.L. 96-296).

SR-253

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

SD-366

Environment and Public Works

Business meeting, to consider proposed amendments to the Clean Water Act (P.L. 95-217), S. 1354 and H.R. 3103, bills to provide emergency relief for disaster-damaged roads administered under the Federal-aid highway emergency relief (ER) program, and S. 452, to establish public buildings policies for the Federal Government, to establish the Public Buildings Service in the General Services Administration, to provide for the authorization of funds for the construction, renovation, and maintenance of public buildings and related activities of the Public Buildings Service.

SD-406

Finance

Business meeting, to consider the nomination of Katherine D. Ortega, of New Mexico, to be Treasurer of the United States, and other pending calendar business.

SD-215

Governmental Affairs

Business meeting, to mark up S. 121, to establish a U.S. Department of Trade as an executive department of the Federal Government.

SD-342

Judiciary

Administrative Practice and Procedure Subcommittee

To hold hearings on the substance of S. 1080, to improve and modify the Federal regulatory reform process (pending on Senate calendar).

SD-562

*Labor and Human Resources

Business meeting, to consider S. 1838, authorizing funds for fiscal years 1984, 1985, and 1986 for the Legal Services Corporation, and other pending committee business.

SD-430

Conferees

On H.R. 3263, appropriating funds for fiscal year 1984 for military construction programs of the Department of Defense.

S-128, Capitol

2:00 p.m.

Judiciary

To hold hearings on pending nominations.

SD-226

3:00 p.m.

Conferees

On H.R. 3415, appropriating funds for fiscal year 1984 for the District of Columbia government.

H-302, Capitol

SEPTEMBER 22

9:30 a.m.

Agriculture, Nutrition, and Forestry

Soil and Water Conservation, Forestry and Environment Subcommittee

To hold hearings on S. 566, S. 1503, and S. 129, miscellaneous land conveyance bills.

SR-328A

Banking, Housing, and Urban Affairs

Housing and Urban Affairs Subcommittee

To continue hearings on S. 1821, proposed Secondary Mortgage Market Enhancement Act.

SD-538

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

SD-366

Foreign Relations

To hold hearings to review recent developments concerning the U.S. Information Agency.

SD-419

Governmental Affairs

Business meeting, to consider recommendations to the Budget Committee with regard to budget reconciliation requirements imposed by House Concurrent Resolution 91, revising and replacing the congressional budget for the U.S. Government for fiscal year 1983 and setting forth the congressional budget for the U.S. Government for fiscal years 1984 and 1985.

SD-342

Judiciary

Business meeting, to consider pending calendar business.

SD-226

Labor and Human Resources

Education, Arts, and Humanities Subcommittee

To resume hearings on a Presidential commission report on excellence in education, and to review Federal and

State efforts to impose higher standards in education.
SD-430

Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on causes and societal implications.
SD-628

10:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to mark up S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1984 for foreign assistance programs.
S-126, Capitol

Energy and Natural Resources
To hold hearings on an alternative funding plan for completing the Clinch River breeder reactor plant project recommended by the administration on August 1, 1983, for congressional consideration and action.
SD-366

Environment and Public Works
Environmental Pollution Subcommittee
Business meeting, to mark up S. 1329, to provide financial assistance to States for wetlands conservation, and other pending business.
SD-406

3:00 p.m.
Armed Services
Closed briefing on the political and military situation in Lebanon.
S-407, Capitol

SEPTEMBER 23

9:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 1090, to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities to assure the continued availability of quality outdoor recreation.
SD-366

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To hold hearings on the future of U.S. basic industries.
SD-215

Judiciary
Constitution Subcommittee
To hold hearings on Senate Joint Resolution 26, proposing an amendment to the Constitution authorizing the President to disapprove or reduce an item of appropriations.
SD-226

Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain provisions of the Age Discrimination and Employment Act which affect Americans working abroad.
SD-430

10:00 a.m.
Joint Economic
To resume hearings on job training needs of American workers.
2203 Rayburn Building

SEPTEMBER 26

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on numerous tax proposals, including S. 120, S. 1397, S. 1584, S. 1814, S. 1815, and S. 1826.
SD-215

10:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To resume hearings to review the progress of this year's refugee resettlement program.
SD-226

*Joint Economic
To resume hearings on job training needs of American workers.
2203 Rayburn Building

SEPTEMBER 27

9:00 a.m.
Office of Technology Assessment
The Board, to hold a general business meeting.
H-227, Capitol

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on S. 141, to provide a special defense to the liability of political subdivisions of States under section 1979 of the revised Statutes (42 U.S.C. 1983) relating to civil actions for the deprivation of rights.
SD-226

10:00 a.m.
Agriculture, Nutrition, and Forestry
Soil and Water Conservation, Forestry and Environment Subcommittee
To hold hearings on S. 843, to reimburse farmers for the costs of applying conservation practices to acreage diverted under an acreage limitation program for the 1982 through 1985 crops of wheat, feed grains, upland cotton, rice, and soybeans, S. 998, to establish a conservation program for erosion-prone cropland, and S. 1053, to use surplus agricultural commodities to make supplemental payments-in-kind (PIK) to producers who divert acreage from production of agricultural commodities and devote such acreage to long-term conservation uses.
SR-328A

Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1624, to reserve up to 20 percent of bulk commodity imports and exports for U.S.-flag ships, to allow a tax credit for increased shipping costs, and to establish a capital construction fund for building shipyards, S. 1616, to clarify laws regarding transportation of Government cargoes on U.S.-flag vessels, S. 206, to increase the Secretary of Transportation's role in administering cargo preference laws, and S. 188, to require all U.S. mail shipped overseas to be carried on American vessels.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to resume markup of S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

SEPTEMBER 28

9:30 a.m.
Banking, Housing, and Urban Affairs
Consumer Affairs Subcommittee
To hold hearings on S. 573, proposed Fair Deposit Availability Act.
SD-538

Judiciary
Juvenile Justice Subcommittee
To resume oversight hearings to review State and local victims assistance programs.
SD-562

Select on Intelligence
Legislation and the Rights of Americans Subcommittee
To hold closed hearings on intelligence matters.
S-407, Capitol

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Business meeting, to resume markup of S. 1354 and H.R. 3103, bills to provide emergency relief for disaster-damaged roads administered under the Federal-aid highway emergency relief (ER) program, and S. 452, to establish public buildings policies for the Federal Government, to establish the Public Buildings Service in the General Services Administration, and to provide for the authorization of funds for the construction, renovation, and maintenance of public buildings and related activities of the Public Buildings Service.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings to investigate alleged involvement of organized crime and mismanagement of funds in the hotel and restaurant workers union (HEREIU).
SD-342

SEPTEMBER 29

9:30 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To resume hearings on S. 1821, proposed Secondary Mortgage Market Enhancement Act.
SD-538

Rules and Administration
To hold hearings to discuss media and the regulation of campaign finance.
SR-301

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To resume hearings on S. 1624, to reserve up to 30 percent of bulk commodity imports and exports for U.S.-flag ships, to allow a tax credit for increased shipping costs, and to establish a capital construction fund for building shipyards, S. 1616, to clarify laws regarding transportation of Government cargoes on U.S.-flag vessels, S. 206, to increase the Secretary of Transportation's role in administering cargo preference laws, and S. 188, to require all U.S. mail shipped overseas to be carried on American vessels.
SR-253

Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 1811 and H.R. 71, bills to authorize and direct the Secretary of the Interior to engage in a special study of the potential for ground water recharge in the high plains States.
SD-366

Environment and Public Works
Regional and Community Development Subcommittee
To resume hearings on S. 1525, authorizing funds through fiscal year 1986 for administrative expenses of the Federal Emergency Management Agency and for emergency and disaster relief assistance, and to revise procedures concerning State requests for relief assistance.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings to investigate alleged involvement of organized crime and mismanagement of funds in the hotel and restaurant workers union (HEREIU).
SD-342

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education, and to review Federal and State efforts to impose higher standards in education.
SD-430

Joint Economic
Economic Goals and Intergovernmental Policy Subcommittee
To hold hearings on certain economic issues relating to the Soviet Union.
2203 Rayburn Building

SEPTEMBER 30

9:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 837, to designate certain lands in the State of Washington as wilderness.
SD-366

9:30 a.m.
Finance
Oversight of the Internal Revenue Service Subcommittee
To hold hearings on S. 1262, to clarify and expedite Internal Revenue Service audits of religious organizations.
SD-215

10:00 a.m.
Environment and Public Works
Water Resources Subcommittee
Business meeting, to consider S. 865, to provide for the operation, maintenance, and construction of water resource projects, and S. 970, to authorize funds through fiscal year 1988 for maintenance dredging and to require non-Federal interests to pay for 50 percent of the annual Federal costs to dredge deep-draft channels and harbors.
SD-406

OCTOBER 3

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To resume hearings on the future of U.S. basic industries.
SD-215

10:00 a.m.
Joint Economic
Agriculture and Transportation Subcommittee
To hold hearings on issues relating to certain changes in the telecommunications industry.
SD-138

OCTOBER 4

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on S. 764, proposed Air Travelers Security Act.
SR-253

Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 19 and S. 918, bills to revise current Federal pension law with respect to the rights and benefits of working and nonworking women, and the substance of S. 372, to promote interstate commerce by prohibiting discrimination in the writing and selling of insurance contracts.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Finance
Social Security and Income Maintenance Programs Subcommittee
To resume hearings on S. 1691, to restructure the administration of the child support enforcement program, and a related proposal, S. 1708.
SD-215

Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on the role of government.
SD-628

11:00 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To resume hearings on S. 1691, to restructure the administration of the child support enforcement program, and a related proposal, S. 1708.
SD-215

OCTOBER 5

9:30 a.m.
Labor and Human Resources
To hold hearings to review human resources implications in job corps reform.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to resume consideration of S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

Judiciary
Courts Subcommittee
To hold hearings on S. 1706, to provide for the positive identification of persons holding identification documents.
SD-226

Judiciary
Administrative Practice and Procedure Subcommittee
To holding hearings on proposed legislation to authorize compensation for those citizens and resident aliens of the Aleutian Islands who were interned, detained, or forcibly relocated by the U.S. Government during World War II.
SD-628

Joint Economic
To hold hearings on the emerging economics of agriculture.
SD-138

OCTOBER 6

9:30 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings on S. 1366, to implement the recommendations of the Interim Report of the Northern Mariana Islands Commission on Federal Laws, and to revise certain provisions of the Revised Organic Act of the Virgin Islands and the Organic Act of Guam, and S. 1367, to repeal certain provisions of law relating to the territories and insular possessions of the United States.
SD-366

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to consider S. 23, S. 532, and S. 1330, bills to develop long-term job opportunities in public works.
SD-406

Joint Economic
To resume hearings on job training needs of American workers.
SD-138

OCTOBER 7

9:30 a.m.
Joint Economic
To hold hearings on the employment/unemployment statistics for September.
SD-106

OCTOBER 17

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings to review environmental research and development programs.
SD-406

OCTOBER 18

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1634, to repeal certain provisions of the Federal Coal Leasing Act Amendments of 1976.
SD-366
Judiciary
Security and Terrorism Subcommittee
To hold hearings to examine the influence of communism in liberation theology.
SD-226
Judiciary
Administrative Practice and Procedure Subcommittee
To resume oversight hearings to provide indemnification to Government contractors against the risks of catastrophic accidents and noncatastrophic accidents for which the Government is primarily responsible.
SD-562
Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
Business meeting, to mark up S. 503, to make it unlawful to manufacture, advertise, distribute, or possess a drug which is an imitation of a controlled substance.
SD-628
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational education programs administered by the Department of Education.
SD-430

OCTOBER 19

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430
9:30 a.m.
Labor and Human Resources
To hold hearings to review Federal and State efforts to impose higher standards in education.
SD-430
10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To continue hearings to examine the influence of communism in liberation theology.
SD-226

OCTOBER 20

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on proposed legislation to improve and clarify the employee retirement income security program.
SD-430
10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
SD-406
Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain programs for older veterans.
SD-628

OCTOBER 21

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings on ground water contamination.
SD-406
Judiciary
Courts Subcommittee
To hold hearings on S. 1581, to grant congressional approval to the Central Interstate Low-Level Radioactive Waste Compact.
SD-226

OCTOBER 25

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings to review computer security in the Federal Government and the private sector.
Room to be announced
Labor and Human Resources
To resume oversight hearings on alleged illegal sales of union memberships or books to unqualified welders by officials of local chapters of the International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers and Helpers.
SD-430
10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational educational programs administered by the Department of Education.
SD-628

OCTOBER 26

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430
9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To continue oversight hearings to review computer security in the Federal Government and the private sector.
SD-628
Labor and Human Resources
To hold hearings to review volunteer initiatives in health.
SD-430

OCTOBER 27

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold oversight hearings on Federal arts policy.
SD-430

NOVEMBER 2

10:00 a.m.
Labor and Human Resources
To resume hearings to review Federal and State efforts to impose higher standards in education.
SD-430

NOVEMBER 3

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on proposed legislation to revise certain provisions of the Federal Employees Compensation Act.
SD-430

NOVEMBER 9

10:00 a.m.
Labor and Human Resources
To resume hearings to review Federal and State efforts to impose higher standards in education.
SD-430

HOUSE OF REPRESENTATIVES—*Tuesday, September 20, 1983*

The House met at 12 noon.

The Reverend John G. Alley, pastor, Calvary Baptist Church, Alexandria, La., offered the following prayer:

Eternal God, we acknowledge Thee as our Creator, the Giver of Life, the One who called the world into being and dotted the night with stars.

We beseech Thee to grant these Representatives the sharp wisdom, strong will of spirit, depth of compassion, and integrity of soul, that they may be the instruments of peace in our time.

Grace this Chamber always with Your presence, being the ultimate lobby to insure we never forget the less fortunate. Knowing, O God, that when we have done it unto the least of these we have done it unto You.

Grant us the grace to be the guardian of shattered dreams by providing the atmosphere of hope for all mankind.

Now grant perfect peace here in this place, forgive our transgressions as You receive our gratitude and praise.

In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

REV. JOHN G. ALLEY

(Mr. LONG of Louisiana asked and was given permission to address the House for 1 minute.)

Mr. LONG of Louisiana. Mr. Speaker, it gives me great pleasure to introduce to the House of Representatives our guest chaplain, the Reverend John G. Alley, and I thank Reverend Alley for the gracious and compassionate prayer he has offered this morning.

For the last 12 years, Reverend Alley has been the pastor of Calvary Baptist Church, which is located in my hometown, Alexandria, La. The church's large and enthusiastic membership—nearly 3,000 members—is testimony to his inspirational Christian leadership.

In addition, Mr. Speaker, Reverend Alley's uplifting sermons reach a wider audience in central Louisiana each week by means of an active and growing television ministry.

A graduate of Louisiana College and the New Orleans Baptist Theological Seminary, Reverend Alley has devoted himself since age 17 to the spiritual enrichment of Louisianans. He is a past president of the executive board of the Louisiana Baptist Convention and is also active in the Southern Baptist Convention.

In addition to ministering to spiritual needs, Mr. Speaker, Reverend Alley is also a prominent figure in civic and humanitarian endeavors. These range from involvement in the Boy Scout movement to service on our local hospital board. Reverend Alley also has served as chairman of the Governor's committee on crime and justice in central Louisiana.

He is recognized not only within his church but through all of central Louisiana as a compassionate man of God to whom you can go with your problems.

My respect for him is further enhanced by his intellectual ability and his great love of nature as exemplified by his skill as a superb bass fisherman.

I am delighted to have been able to share Reverend Alley with the Congress today.

THE GREAT MORAL TRAGEDY OF OUR TIME

(Mr. HAWKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAWKINS. Mr. Speaker, 11 million Americans are officially unemployed. Almost an equal number are either underemployed or simply not counted in the rate.

At the same time, long festering and critically needed human and community needs are unmet, constituting a serious backlog; and a threat to our personal security and economic stability.

Recent surveys found no region, population segment, or area free of pressing infrastructure problems.

The U.S. Conference of Mayors recently reported only 36 percent of the eligible population receives health services, only 14 percent receives day care, and a scant 4 percent are reached by employment and training programs. Emergency food, shelter, and even police protection often go unanswered.

This situation—which need not exist—has been aptly called "the great moral tragedy of our time."

Today as we begin consideration on H.R. 1036, the Community Renewal Employment Act, we have the opportunity to address the problem. I plead for the attention and support of my colleagues.

INVOKING THE WAR POWERS ACT

(Mr. FROST asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, I rise to speak on the question of the application of the War Powers Act to the situation in Lebanon. This is an issue about which many Members have deep feelings.

A majority of this House has been elected since 1974. Those of us who were elected in the last 10 years differ on many issues. However, most of us feel strongly that Congress must play a role on the use of American troops abroad. There are voices in the House seeking a compromise with the White House to avoid a confrontation on this issue in the Congress.

Mr. Speaker, sometimes in our history confrontation is necessary. Accordingly, I urge that we adopt a joint resolution invoking the War Powers Act. If the President wishes to veto that resolution, then let this issue be joined in the House where it belongs.

OPPOSITION TO A PROPOSED SOVIET GRAIN EMBARGO

(Mr. DORGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN. Mr. Speaker, in the wake of the shooting down of the Korean airliner we once again are hearing some Members of Congress call for a grain embargo to the Soviet Union.

Well, I too am furious with the Soviets. Their behavior is despicable.

But, proposing a Soviet grain embargo because we are angry with them is like hitting ourselves on the head with a hammer. It just does not make sense.

The fact is the Soviets' agriculture industry is in a shambles. They cannot produce enough food for their domestic needs. Therefore they have to make grain purchases from abroad.

Now I happen to think it makes good sense for us when the Soviets are forced to use their hard currency to buy American wheat. A ruble that the Soviets use to purchase a bushel of American wheat is a ruble that the Soviets cannot use to build a tank or jet fighter airplane.

We are better off when that Soviet hard currency heads in the direction of an American farmer's pocket that

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

when it is being invested in another Soviet missile silo.

In short, I think a grain trade relationship with the Soviets strengthens us and weakens them. There is not any other way to read it. That is why I intend to fight these proposals for a new grain embargo.

THE 1983 DROUGHT—A TRUE CATASTROPHE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, while much of the Nation's attention these last few weeks has been focused on disasters abroad, our Nation has experienced a true catastrophe at home.

I refer to the unprecedented drought of 1983, which has created Dust Bowl conditions in 27 States and has caused crop production losses of up to 50 and as much as 80 percent in many areas. In my own State of Arkansas, farm crop damage, because of the drought could exceed $500 million.

For 3 years already, our Nation's farmers—crippled by debt, suffocated by surpluses, and faced with a shrinkage of their markets—have experienced the reality of an economic depression.

In this crisis situation, it is urgent that we eliminate the delays that have so often impeded disaster assistance under the Department of Agriculture's programs.

Accordingly, tomorrow I will propose amendments to the continuing appropriations resolution for fiscal 1984 which would establish reasonable time boundaries for the provision of relief to afflicted States and counties.

I invite the attention of my colleagues to these amendments and to the reality of the emergency which they underscore.

A government serves the people best when it acts expeditiously in the people's best interest.

□ 1210

THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. BROWN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROWN of California. Mr. Speaker, the national unemployment figures have begun to decline in the last few months as the economic recovery has been officially declared. Any decline in unemployment should be hailed as good news—as it most assuredly is—but let us look at the entire picture. Nine months into the recovery, unemployment is still worse than at any other time since the Great Depression. In my own district, unemployment remains high with the July figures indicating that 11 percent of the work force was unemployed—this is a district which is expected to be the fastest growing area in the country during the 1980's. Nationwide, nearly 11 million people are still unemployed, with many millions more either underemployed or too discouraged to look for work.

Later today the House will debate the merits of the Community Renewal Employment Act. Some will argue that with the recovery underway such a program is not needed. But the fact remains that we are not yet down to prerecession unemployment levels. The fact remains that we continue to have unemployment rates not seen since the 1930's. The fact remains that since fiscal year 1980 total spending on employment and training programs has dropped from $10.3 billion to $5.2 billion in fiscal year 1983, a reduction of 50 percent in 3 years.

The Community Renewal Employment Act is still very much needed; it is long past the time to help those most severely hit by the longest, hardest recession in over 40 years—the unemployed, minorities, and women.

THE NATIONAL SECURITY CREDIT SANCTIONS ACT OF 1983

(Mr. McCLOSKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLOSKEY. Mr. Speaker, today I am introducing the National Security Credit Sanctions Act of 1983.

Commentators running the gamut from George Will through Felix Rohatyn and Walter Mondale have commented that in the wake of the Korean airliner travesty, there should be more significant sanctions short of all-out war.

This legislation seeks to fill this void.

It also seeks to correct the anomaly of hundreds of banking institutions making decisions in relation to the Soviet bloc that undermine the military, diplomatic, and economic security of the Western alliance.

This bill will make illegal further extensions of credit by banking institutions in this country to the Soviet Union and other Communist nations without specific and detailed approvals of the U.S. Government.

It calls for the Secretary of the Treasury to immediately formulate a plan to purchase all outstanding Soviet bloc loans in the United States and foreign nations—subject to approval of the Congress.

Perhaps such measures could give the Soviets pause for thought about the consequences of future actions. The Soviets could take appropriate measures in numerous areas of concern for us to prevent default.

I urge support of the Congress for the National Security Credit Sanctions Act of 1983.

SENIOR AMERICAN EMPLOYMENT

(Mr. REID asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REID. Mr. Speaker, it has become a widely accepted notion that older people either want to quit work or do not want to work at all. Yet, in reality, most senior Americans seek options about work. These options would help them earn more money or serve as volunteers or keep them active in other meaningful and productive ways.

Recently, the Select Committee on Aging held hearings in my district, Las Vegas, Nev., not to discuss traditional issues related to aging, such as social security, housing and medicare. Rather, we heard testimony about senior employment.

It was more than educational to learn about the enthusiasm and energy these forgotten people have. It was inspirational. We listened to seniors who represent millions of people with the ability and energy to make vital contributions to their communities. But they are discriminated against because of an arbitrary birth date, a mere number on a calendar.

The benefits of reintroducing seniors who want to work into the workplace are unlimited. For the country this senior employment would fortify the economy and reduce the current Federal outlay through social security. For the individual this employment would translate into economic independence and renewed self-esteem.

IN SUPPORT OF H.R. 1036, THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. MITCHELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL. Mr. Speaker, today and tomorrow we will consider the Community Renewal Employment Act. The physical deprivation associated with unemployment is bad enough, the loss of a standard of living, and so forth; but it seems to me that the psychological impact of unemployment is even greater, the feeling of worthlessness, the feeling of hopelessness, the feeling of despair.

In my State of Maryland, where the unemployment rate has dropped statewide, more than 10,000 people are going to lose or have lost their extended unemployment compensation benefits. The State says it does not have the money to continue and there

are not 10,000 jobs available in my State to hire those people.

I would hope as we consider this legislation that the Members of this House who are so far removed from the pain of unemployment, who have never experienced it, who are so caught up about budget deficits and other things, would consider the human factor, the absolute misery to an individual or a family when there is no job available.

The legislation we will consider this afternoon is within the budget. There will be an amendment to reduce the spending down to $3.5 billion and I hope we will pass this legislation overwhelmingly.

Certainly we can point to some semblance of decreased inflation and a hint of recovery among the Wall Street activities. This notwithstanding, one must wonder if, indeed, such positive results of the prevailing economic policies are not at the expense of needed moneys for essential job training programs, community improvements, survival of small and minority businesses, and economic stimuli to such depressed industries as housing.

The prevailing economic policies of this current administration accept shameful levels of unemployment and deprivation as the price to pay for lower interest rates and declining inflation. These policies dictate that certain families are forced to choose between such essentials as food and affordable housing, or education and adequate health care.

The Community Renewal Assistance Act is not just another "makework" proposal. Specific activities are targeted, the improvement of which will bring long-term stimulation to our neighborhoods. The initial investment in such projects as disaster relief, infrastructural repairs, and the removal of hazardous materials from public buildings, is unquestionably a feasible approach to addressing the problems of needed job training and community improvement simultaneously. Who can question the merits of this proposal?

I would commend my friend, Mr. HAWKINS, for his foresight in presenting this critical bill and urge emphatically that my colleagues vote favorably when this measure is considered.

THE COURAGEOUS S. SGT. CHARLES R. KESSLER, JR.

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr Speaker, the Nation has recently become aware of the ridiculously high prices the armed services have been paying for certain spare parts. Unfortunately, this is not a recent phenomenon; it has been allowed to exist for some time by the Department of Defense.

Wasteful and inefficient procedures often go uncorrected because people are afraid to challenge the system. Fearful of jeopardizing their careers, they go along rather than rock the boat. One person who had the courage to step forward and say "enough" was S. Sgt. Charles R. Kessler, Jr., a crew chief at Tinker Air Force Base, Okla.

Sergeant Kessler challenged a system which cost the taxpayer $1,118.26 for a plastic stool cap worth about 50 cents. The resulting investigation was a key factor in alerting the public and Congress to the exorbitant prices being charged for spare parts to keep our military equipment operational.

At a time when we are looking for every possible way to hold down the Pentagon budget without compromising national security, Sergeant Kessler and his colleagues represent our frontline of defense against waste and inefficiency.

In a welcome change of attitude, the Air Force and the Department of Defense have commended and rewarded Sergeant Kessler for his courage. Today I want to recognize and thank him on the floor of the House of Representatives.

THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, when the House of Representatives considers H.R. 1036, the Community Renewal Employment Act, authored by Congressman HAWKINS, today I urge my colleagues to support this legislation which will provide employment opportunities to individuals out of work 15 weeks or longer. Despite President Reagan's contention that the economy is on the upswing, there are still more than 10 million Americans who do not have a job. In California alone, the unemployment rate averaged 9.9 percent last year.

Rather than covering up the unemployment problem by spending more money for increased welfare services, this bill takes a different approach by authorizing funds to be distributed to local units of government for jobs in community improvement projects and for the repair of educational facilities.

First priority would go to those who have exhausted or otherwise are not eligible for unemployment insurance. Rather than perpetually extend unemployment benefits, this bill would put people to work in areas such as the improvement of roads and water systems—all of which would benefit the public. Twenty percent of the $5 billion authorized would be spent on unemployed youths aged 16 to 19.

Rather than making work for the unemployed or handing out more unemployment checks, this bill puts people to work. At the same time, it provides practical benefits in the form of improved community projects to the public. I urge my colleagues to support this bill.

□ 1220

PRIORITY HIRING FOR THE UNEMPLOYED

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, I represent a State where the unemployment rate went up last month, not down. Pennsylvania's displaced steelworkers and manufacturing workers, laid off mine workers and construction workers, and its structurally unemployed know that there are not enough jobs to go around. Over 40 percent of Pennsylvania's unemployed have been looking for work for more than 15 weeks.

Recovery is not around the corner for some of these workers, it is down the drain. That is why we need to pass the Community Renewal Employment Act, carefully crafted by Representative HAWKINS, and I call on the other body to come up with a "real" jobs bill as well.

This bill is targeted to those who have been unemployed for over 15 weeks with priority given to those who have exhausted their unemployment benefits. It is for those who will not be lifted by the first rise in our economic tide.

Unlike the emergency jobs bill, it offers much more in the way of job opportunities for the unskilled and for women. This bill funds a wide range of work activities such as public school repairs, weatherization, the provision of emergency food and shelter, and dependent care services to veterans, handicapped, and the elderly—to name a few.

The Hawkins bill also makes a substantial investment in our public works repair needs, which are vital to business location and economic growth for the future.

I would like to point out the findings of my most recent constituent questionnaire. While the respondents to this questionnaire were alarmed with the Federal Government's sky-rocketing deficits, the one program they would overwhelmingly urge more spending for was the creation of public works and service jobs.

Our constituents are bright enough to see that there are not enough jobs to go around. Let us show them that we are bright enough to see this as well.

SIMPSON-MAZZOLI BILL SHOULD BE CONSIDERED UNDER OPEN RULE

(Mr. ROYBAL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROYBAL. Mr. Speaker, it is my understanding that the Committee on the Judiciary has asked for a rule on the Simpson-Mazzoli immigration bill. This means that this infamous piece of legislation, already passed by the other body, will once again be considered by the House of Representatives.

Simpson-Mazzoli was considered last year under an open rule subject to amendment at any point, and it should likewise be considered under an open rule this year.

Enough time must be given for debate, not only to members of the committee but to those of us, not in the committee who oppose this legislation because of its adverse effect on the people of America. We want time to point out the dangers it presents, particularly those dangers inherent in its anti-human and civil rights provisions.

We want to show that the Simpson-Mazzoli bill because, of its well intentioned, but dangerous provisions, will effect adversly, not only those who live among us without documents, but every man, woman, and child in the United States.

It is important that we know all the ramifications inherent in the Simpson-Mazzoli immigration bill before it is too late.

DANNY LaBOCCETTA—WINNER OF POSTAL SERVICE STAMP DESIGN CONTEST

(Mr. ADDABBO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADDABBO. Mr. Speaker, I take this opportunity to publicly congratulate a talented young artist from my district. Eight-year-old Danny LaBoccetta entered a design for the 1984 Christmas stamp in a nationwide contest. Out of over half a million participants, Danny was one of two finalists selected by the U.S. Postal Service—his Santa Clause design will appear on next year's secular stamp issued nationwide.

The whole community is proud of Danny's accomplishments, which do not end with his recent success as an artist. Danny attends the second grade at Our Lady of Perpetual Help School in Richmond Hill, where his principal, Margaret Mahon, describes him as an excellent all-around student. He entered the contest at the urging of Mrs. Furia, his art teacher, who recognized his talent. Danny, she says, would rather be out playing shortstop or pitcher than indoors drawing, which makes him quite normal. In spite of a rush of local publicity, including an appearance on the evening news, Danny remains nonchalant about the whole episode.

I am proud to have this talented young man as a constituent; he obviously has a solid base from which to choose the future he wants. He is also fortunate to have teachers who notice individual achievement, who push their students to fulfill their potential, and who get involved with each student. Congratulations also go out to his parents and the dedicated staff of Our Lady of Perpetual Help.

We all look forward to seeing Danny's stamp next holiday season.

MARINES SHOULD NOT BE SITTING DUCKS

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, do you not just love the hypocrisy alive in our land; columnists and Congressmen who say it is just fine to send our fighting men to Lebanon to protect freedom, where none exists, yet it is foolish to send advisers to El Salvador to help cultivate freedom where it is clearly growing. But hypocrisy or double standards aside, I have an idea about Lebanon. We need to pull the Marines out now, take our propaganda lumps, and save their precious lives. We need to replace them with men trained to be ducks, like in sitting ducks. Marines are not ducks. They do not act like ducks, they are not equipped as ducks, they do not think like ducks. Marines come to fight. Since we are not going to let them fight in Lebanon, nor should we, let us bring them home and replace them with volunteers willing to serve for an indefinite period of time and assume the role of ducks.

When these volunteers are shot at and shelled and used as political pawns and macho symbols, we can easily ignore their squawks. After all, they are just ducks, not men with families or dreams or futures. Just ducks—sitting ducks.

HOPE INSTEAD OF DESPAIR

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, throughout the past 2 years we have heard a series of horror stories of unemployment which are becoming more and more commonplace in our country today. Indeed, as we prepare for what soon will be a bitter winter, many of these thousands of our fellow citizens find themselves in the most difficult of economic circumstances. Indeed, yes, even in my own State in which just a few years ago an unemployed person could have unemployment compensation for 65 weeks they now find that cut to 36 weeks as a result of actions by the Reagan administration. Instead of further punishing our Nation's unemployed we should try to help them.

The Community Renewal Employment Act does just that. My hard hit district along with many others of my colleagues would be benefited from it.

After years of neglect, this bill offers us the chance to create jobs to rebuild our Nation's crumbling public works and improve other services provided by our financially strained localities. Several schools in my district have contacted me about their state of ill repair and the need to remove cancer causing asbestos from their buildings; however, the funding just does not exist for such important jobs. But, with the Hawkins bill, we can put people back to work, repair our buildings and roads, and protect our children.

The administration says that time will solve the problems of the unemployed. Time is one thing that the unemployed already have too much of. They do not want a dole. They want dignity and a job. The Community Renewal Employment Act offers hope instead of despair for millions of Americans.

COMMUNITY RENEWAL EMPLOYMENT ACT DESERVES SUPPORT

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, as president of the Democratic New Members Caucus, I am pleased to report that the vast majority of our 60 members support H.R. 1036, the Community Renewal Employment Act.

When we got elected in 1982, we saw first hand during our campaigns the suffering and misery caused by the administration's unrelenting goal to cure inflation through unemployment.

We forged a coalition to help pass the first Emergency Jobs Bill in 1982 and are part of that same coalition now.

The unemployment rate is 9.5 percent. Many of these unemployed are American women—single, divorced, widowed or separated—whose husbands earn less than $15,000 per year. The feminization of poverty continues to grow and if we do not reverse this trend by the year 2000, almost all of those in poverty will be women.

H.R. 1036 addresses this important need by providing employment opportunities for both men and women through jobs which will help the com-

munity and make these unemployed members of our society productive once more.

Unemployment brings personal misery and adds to our deficit as the unemployed seek sustenance programs for their economic survival. H.R. 1036 is a good bill that deserves our support.

MARINES INVOLVED IN INTERNECINE WARFARE IN LEBANON

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, the U.S. Marines have become involved in internecine warfare among religious factions in Lebanon. American forces have taken casualties and have become involved in combat. Yesterday, a new level of involvement was reached when U.S. naval ships engaged in shore bombardment in support of the Lebanese Government.

Clearly, our marines no longer form a part of a peacekeeping force. They are becoming involved in an age-old conflict among Lebanese factions. While the nature and mission of the forces we have deployed in Lebanon have changed, the administration has refused to recognize that we are now involved in hostilities and that the War Powers Act should now be in effect.

□ 1230

This is not a dispute over whether catsup is a vegetable. The President is saying that the American Marines killed in combat were not involved in hostilities. This is just not true.

Regardless of the advisability of committing U.S. troops in this situation, one fact stands clear: The President should not be allowed to make such a commitment unilaterally and the Congress must not allow him to defy the law.

The War Powers Act must be invoked if we are indeed a nation of laws.

THE HOUSE MUST PASS THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEIBERLING. Mr. Speaker, I rise today in strong support of H.R. 1036, the Community Renewal Employment Act that we are taking up later today.

Since the Reagan recession began, millions of American workers have joined the ranks of the officially unemployed. In my own State of Ohio, the unemployment rate is 10.8 percent, third highest in the Nation. Officially, 564,000 Ohioans are out of work. But official unemployment statistics do not tell the whole story. According to Ohio Gov. Richard Celeste, more than 800,000 Ohioans are without jobs. More than 250,000 of them have simply given up hope of ever finding a job. They are the statistically invisible unemployed, and they are no longer calculated in any official employment figures.

At hearings last week on unemployment compensation, worker after worker testified about the frustrations and deprivations caused by unemployment. These are people who are facing the prospects of losing everything—their homes, their personal property, and their self-esteem. These unemployed workers also were resoundingly clear on one point—they would rather work than receive unemployment benefits.

Yet during most of this recession, the Federal Government has had no authority to respond to the unemployment crisis by creating jobs. The Reagan Budget Act of 1981 eliminated the only countercyclical jobs program then in existence. Congress has responded to this crisis by enacting the Job Training Partnership Act, and by approving the emergency supplemental appropriations bill, which included funds for short-term jobs creation.
